shall be treated as ordinary income and shall be recognized notwithstanding any other provision of this subtitle, and

"(B) no gain other than that treated as ordinary income under subparagraph (A) shall be recognized.

"(f) SPECIAL RULES.—

"(1) DISPOSITIONS WITHIN 1 YEAR AFTER PLACED IN SERVICE.—The term 'first-year recovery property' shall not include any property if such property is disposed of by the taxpayer before the date 1 year after the date on which such property was placed in service.

"(2) PROPERTY FOR WHICH INVESTMENT CREDIT NOT ALLOWABLE.—If a credit would not be allowable under section 38 to the taxpayer with respect to any first-year recovery property (determined without regard to sections 48(a)(11) and 48(c)(2)), the applicable percentage for such property shall be determined under the following table (in lieu of the table contained in subsection (b)(1)(B)):

"Class:	percentage: Applicable
1	91. 3
2	79. 5
3	73. 1
4	71. 0

"(3) PROPERTY WHICH CEASES TO BE A FIRST-YEAR RECOVERY PROPERTY.—If any first-year recovery property for which a deduction was allowable to the taxpayer under this section ceases to be first-year recovery property with respect to the taxpayer—

"(A) the taxpayer shall be treated as having disposed of such property for an amount equal to its fair market value as of the date of such cessation, and

"(B) the basis of such property in the hands of the taxpayer after the date of such cessation shall be treated as equal to such fair market value.

"(4) PUBLIC UTILITY PROPERTY.—For purposes of this section, the term 'public utility property' has the meaning given to such term by section 167(1)(3)(A) except that, for purposes of this section, clause (iv) of such section shall be applied as if it read as follows:

"'(iv) transportation of gas, oil, or steam by pipeline,'.

"(g) PHASE-IN.—

"(1) REDUCTION OF DEDUCTION FOR PROPERTY PLACED IN SERVICE BEFORE 1990.—

"(A) IN GENERAL.—In the case of any first-year recovery property placed in service before 1990, the amount allowable as a deduction under this section shall be the phase-in percentage of the amount which, but for this paragraph, would have been so allowable with respect to such property.

"(B) PHASE-IN PERCENTAGE.—For purposes of subparagraph (A)—

"In the case of property placed in service during:	The phase-in percentage is:
1981	35
1982	50
1983	50
1984	70
1985	75
1986	80
1987	85
1988	90
1989	95

"(2) DENIED DEDUCTION PLACED IN SUSPENSE ACCOUNT.—The taxpayer shall establish a suspense account for purposes of this subsection. As of the close of each taxable year ending after December 31, 1980—

"(A) the taxpayer shall add to such suspense account the aggregate amount disallowed as a deduction by reason of paragraph (1) with respect to property placed in service during such taxable year,

"(B) the taxpayer shall add to such account an amount equal to the balance in such account (as of the first day of such taxable year), multiplied by one-half of the rate of interest in effect under section 6621 as of the middle of such taxable year, and

"(C) the taxpayer shall subtract from such account the amount by which the amount allowable as a deduction under subsection (a) for such taxable year is increased by reason of paragraph (3).

"(3) Allowance of suspended deductions.—

"(A) IN GENERAL.—In the case of taxable years beginning after 1981 and before 1991, the recovery percentage of the balance in the suspense account established by the taxpayer under paragraph (2) shall be added to the amount allowable as a deduction under subsection (a) for such taxable year. Such balance shall be determined as of the close of the taxable year but before making the adjustments under subparagraphs (A) and (C) of paragraph (2) for the taxable year.

"(B) RECOVERY PERCENTAGE.—For purposes of subparagraph (A)—

"In the case of taxable years beginning in:	The recovery percentage is:
1982	25
1983	30
1984	35
1985	40
1986	45
1987	50
1988	55
1989	70
1990	100

"(h) OTHER TRANSITIONAL RULES.—

"(1) LIMIT ON USED PROPERTY.—For purposes of this section—

"(A) IN GENERAL.—In the case of property placed in service in a taxable year beginning before 1984, the term 'first-year recovery property' shall include used property only to the extent that the aggregate cost of used property placed in service during such taxable year does not exceed the limitation determined under the following table:

"In the case of a taxable year beginning in:	The limitation is:
1980 or 1981	$100, 000
1982	200, 000
1983	300, 000

If such cost exceeds the limitation determined under the preceding table, the taxpayer shall select (at such time and in such manner as the Secretary shall by regulations prescribe) the items of used property which are to be treated as first-year recovery property, but only to the extent of an aggregate cost not in excess of such limitation. Such a selection, once made, may be changed only in the manner, and to the extent, provided by such regulations.

"(B) USED PROPERTY.—For purposes of this paragraph, the term 'used property' means any property—

"(i) the original use of which does not begin with the taxpayer, and

"(ii) which is first-year recovery property (determined without regard to this paragraph).

"(C) COORDINATION WITH LIMITATION ON USED PROPERTY FOR INVESTMENT TAX CREDIT.—The limitation of section 48(c)(2) applicable to the taxpayer for any taxable year shall be reduced by an amount equal to the cost of any used property taken into account under this section for such taxable year.

"(D) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of subparagraphs (B), (C), and (D) of paragraph (2) of section 48(c) and of paragraph (3) of section 48(c) shall apply for purposes of this paragraph.

"(2) PROPERTY CONTINUES TO BE USED BY SAME PERSON.—The term 'first-year recovery property' shall not include any property acquired by the taxpayer if, after its acquisition by the taxpayer, it is used by a person who used such property before January 1, 1981 (or by a person who bears a relationship described in subparagraph (A) or (B) of section 179(c)(2) to a person who used such property before such date).

"(i) PARTNERSHIPS, SUBCHAPTER S CORPORATIONS, AND OTHER PASSTHROUGH ENTITIES.—The Secretary shall prescribe such regulations as may be necessary to ensure that the tax treatment of each partner, shareholder, or other beneficiary of a partnership, electing small business corporation, or other pass-

through entity with respect to the acquisition, disposition, or distribution of (or other transaction with respect to) first-year recovery property by the entity is consistent with the treatment which would result if such beneficiary engaged in such transaction directly."

(b) FIRST-YEAR RECOVERY DEDUCTION TREATED AS DEPRECIATION.—Subsection (a) of section 167 (relating to depreciation) is amended by adding at the end thereof the following new sentence: "In the case of first-year recovery property (as defined in section 168(c)), the deduction allowable under section 168 shall be deemed to constitute the reasonable allowance provided by this section.".

(c) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by inserting after the item relating to section 167 the following new item:

"Sec. 168. First-year capital cost recovery method.".

SEC. 202. DEPRECIATION OF REAL PROPERTY.

Section 167 (relating to depreciation) is amended by redesignating subsection (s) as subsection (t) and by inserting after subsection (r) the following new subsection:

"(s) METHOD OF DEPRECIATING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of section 167(s) property (other than low-income housing), the depreciation allowance under subsection (a) shall be computed under the straight line method using a useful life of 20 years and no salvage value.

"(2) LOW-INCOME HOUSING.—In the case of low-income housing, the depreciation allowance under subsection (a) shall be computed under the straight line method using a useful life of 15 years and no salvage value.

"(3) DEFINITIONS.—For purposes of this subsection—

"(A) SECTION 167(S) PROPERTY.—Except as provided in subparagraph (B), the term 'section 167(s) property' means any property—

"(i) which is section 1250 property or an elevator or escalator which would be section 1250 property but for section 1245(a)(3)(C), and

"(ii) which is placed in service after December 31, 1980.

"(B) EXCEPTION FOR PROPERTY FOR WHICH CLASS LIFE IS PRESCRIBED UNDER SUBSECTION (m).—The term 'section 167(r) property' shall not include any property for which a class life is in effect under subsection (m) as of May 1, 1981.

"(C) LOW-INCOME HOUSING.—The term 'low-income housing' means any property described in clause (i), (ii), (iii), or (iv) of section 1250(a)(1)(B).".

SEC. 203. $25,000 OF DEPRECIABLE BUSINESS ASSETS TREATED AS EXPENSE.

(a) IN GENERAL.—Section 179 (relating to additional first-year depreciation allowance for small business) is amended to read as follows:

"SEC. 179. EXPENSE TREATMENT FOR CERTAIN DEPRECIABLE BUSINESS ASSETS.

"(a) TREATMENT OF EXPENSES.—The cost of any section 179 property shall be treated as an expense which is not chargeable to capital account. Any cost so treated shall be allowed as a deduction for the taxable year in which the section 179 property is placed in service.

"(b) DOLLAR LIMITATION.—

"(1) IN GENERAL.—The aggregate cost taken into account under subsection (a) for any taxable year shall not exceed $25,000 ($12,500 in the case of a married individual filing a separate return).

"(2) ORDER IN WHICH PROPERTY TAKEN INTO ACCOUNT.—Except as otherwise provided in regulations prescribed by the Secretary, if the aggregate cost of section 179 property placed in service by the taxpayer during the taxable year exceeds the limitation of paragraph (1), property shall be taken into account under subsection (a)—

"(A) in the order of the classes in which such property is placed under section 168(b) (beginning with the class with the lowest number), and

"(B) within any class, in the order in which the property is placed in service.

"(c) DEFINITIONS AND SPECIAL RULES.—

"(1) SECTION 179 PROPERTY.—For purposes of this section, the term 'section 179 property' means any first-year recovery property which is acquired by purchase for use in a trade or business.

"(2) PURCHASE DEFINED.—For purposes of paragraph (1), the term 'purchase' means any acquisition of property, but only if—

"(A) the property is not acquired from a person whose relationship to the person acquiring it would result in the disallowance of losses under section 267 or 707(b) (but, in applying section 267 (b) and (c) for purposes of this section, paragraph (4) of section 267(c) shall be treated as providing that the family of an individual shall include only his spouse, ancestors, and lineal descendants),

"(B) the property is not acquired by one component member of a controlled group from another component member of the same controlled group, and

"(C) the basis of the property in the hands of the person acquiring it is not determined—

"(i) in whole or in part by reference to the adjusted basis of such property in the hands of the person from whom acquired, or

"(ii) under section 1014(a) (relating to property acquired from a decedent).

"(3) SPECIAL RULE FOR SECTION 1031 OR 1033 EXCHANGES.—For purposes of this section, in the case of any property received in an exchange described in section 1031 or 1033, the cost of such property shall only include money or the fair market value of other property (within the meaning of section 1031), or the fair market value of property not similar or related in service or use (within the meaning of section 1033) received by the taxpayer.

"(4) SECTION NOT TO APPLY TO ESTATES AND TRUSTS.—This section shall not apply to estates and trusts.

"(5) DOLLAR LIMITATION OF CONTROLLED GROUP.—For purposes of subsection (b) of this section—

"(A) all component members of a controlled group shall be treated as one tax payer, and

"(B) the Secretary shall apportion the dollar limitation contained in subsection (b) among the component members of such controlled group in such manner as he shall by regulations prescribe.

"(6) CONTROLLED GROUP DEFINED.—For purposes of paragraphs (2) and (5), the term 'controlled group' has the meaning assigned to it by section 1563(a), except that, for such purposes, the phrase 'more than 50 percent' shall be substituted for the phrase at least 80 percent' each place it appears in section 1563(a)(1).

"(7) DOLLAR LIMITATION IN CASE OF PARTNERSHIPS.—In the case of a partnership, the dollar limitation contained in subsection (b) shall apply with respect to the partnership and with respect to each partner.

"(8) COORDINATION WITH SECTION 168.—

"(A) WHERE ENTIRE COST DEDUCTED.—If the entire cost of any section 179 property (determined without regard to paragraph (3)) is allowed as a deduction under subsection (a), such property shall not be treated as first-year recovery property for purposes of section 168.

"(B) WHERE ONLY PART OF COST DEDUCTED.—If only a portion of the cost of any section 179 property (determined without regard to paragraph (3)) is allowed as a deduction under subsection (a)—

"(i) such property shall not be treated as first-year recovery property for purposes of section 168 to the extent of the amount allowed as a deduction under subsection (a) of this section, and

"(ii) in the case of any disposition of such property, for purposes of sections 1245 and 168(f), the taxpayer shall be treated as having disposed of 2 properties each of which bears the same ratio to fair market value at the time of disposition as the amount taken into account under this section or section 168 (as the case may be) bears to the sum of such 2 amounts.".

(b) TECHNICAL AMENDMENTS.—

(1) Paragraph (1) of section 263(a) (relating to capital expenditures) is amended—

(A) by striking "or" at the end of subparagraph (F);

(B) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a comma and "or", and

(C) by adding at the end thereof the following new subparagraph:

"(H) the cost of any property deductible under section 179.".

(2) Subparagraph (A) of section 1033(g)(3) (relating to condemnation of real property held for productive use in trade or business or for investment) is amended by striking out "(relating to additional first-year depreciation allowance for small business)" and inserting in lieu thereof "(relating to expense treatment for certain depreciable b siness assets)".

(c) RECAPTURE RULE.—Subsection (a) of section 1245 (relating to gains from dispositions from certain depreciable property) is amended—

(1) by striking out "169, 184" each place it appears in paragraph (2) and inserting in lieu thereof "169, 179, 184",

(2) by striking out "section 190" in the third sentence of paragraph (2) and inserting in lieu thereof "section 179, 190", and

(3) by striking out "169, 185" in paragraphs (2)(D) and (3)(D) and inserting in lieu thereof "169, 179, 185".

(d) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by striking out the item relating to section 179 and inserting in lieu thereof the following:

"Sec. 179. Expense treatment for certain depreciable business assets.".

SEC. 204. THIRTY PERCENT VARIANCE FROM CLASS LIFE FOR LONG-LIFE PUBLIC UTILITY PROPERTY AND CERTAIN REAL PROPERTY.

Subsection (m) of section 167 (relating to class lives) is amended by adding at the end thereof the following new paragraph:

"(4) 30 PERCENT VARIANCE FOR LONG-LIFE PUBLIC UTILITY PROPERTY AND CERTAIN REAL PROPERTY.—In the case of—

"(A) any property which is placed in service after December 31, 1980, and is described in subparagraph (A) of section 168(d)(5) (relating to long-life public utility property), and

"(B) any property placed in service after December 31, 1980, which would be section 167(s) property but for subsection (s)(3)(B),

the last sentence of paragraph (1) shall be applied by substituting '30 percent' for '20 percent' ".

SEC. 205. TERMINATION OF INVESTMENT TAX CREDIT.

(a) GENERAL RULE.—Subsection (a) of section 48 (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(11) FIRST-YEAR RECOVERY PROPERTY.—The term 'section 38 property' shall not include any first-year recovery property (as defined in section 168).".

(b) CONTINUATION OF ENERGY CREDIT.—Subparagraph (B) of section 48(l)(1) (re-

lating to energy property treated as section 38 property) is amended by striking out "paragraph (3)" and inserting in lieu thereof "paragraphs (3) and (11)".

SEC. 206. EFFECTIVE DATE.

The amendments made by this subtitle shall apply to taxable years ending after December 31, 1980.

Subtitle B—Research and Experimental Expenditures

SEC. 211. CREDIT FOR RESEARCH AND EXPERIMENTAL EXPENDITURES.

(a) Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44F. CREDIT FOR RESEARCH AND EXPERIMENTAL EXPENDITURES.

"(a) IN GENERAL.—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) 25 percent of the qualified research or experimental expenditures, plus

"(2) 25 percent of the qualified higher education research or experimental expenditures,

paid or incurred by the taxpayer during the taxable year in carrying on any trade or business of the taxpayer.

"(b) QUALIFIED RESEARCH AND EXPERIMENTAL EXPENDITURES.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified research and experimental expenditures' means the excess of—

"(A) the research and experimental expenditures of the taxpayer for the taxable year, over

"(B) the average of such expenditures during the base period of the taxpayer.

"(2) BASE PERIOD.—

"(A) IN GENERAL.—For purposes of this subsection, the term 'base period' means the 3 taxable years immediately preceding the taxable year for which the determination is being made.

"(B) TRANSITIONAL RULES.—Subparagraph (A) shall be applied—

"(i) by substituting 'first taxable year' for '3 taxable years' in the case of taxable years beginning in 1981, and

"(ii) by substituting '2' for '3' in the case of taxable years beginning in 1982.

"(3) DEEMED TAXABLE YEARS.—If the number of taxable years in the base period exceeds the number of taxable years of—

"(A) the taxpayer, or

"(3) any person with whom the taxpayer is required to aggregate expenditures under subsection (d)(2).

which precede the taxable year, then the taxpayer or such person shall be treated as having a number of taxable years equal to such excess during which no research and experimental expenditures were made.

"(c) QUALIFIED HIGHER EDUCATION RESEARCH AND EXPERIMENTAL EXPENDITURES.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified higher education research and experimental expenditures' means amounts paid during a taxable year to any institution of higher education for a planned research, critical investigation, or experimentation to the extent that such amounts do not exceed 5 percent of the taxable income of the taxpayer for such year.

"(2) CERTAIN AMOUNTS INCLUDED.—The term 'qualified higher education research and experimental expenditures' includes those expenditures described in paragraph (1) utilized for an exploration for new knowledge (1) undertaken without a predetermined application or (2) for a possible application which may prove useful to the taxpayer.

"(3) CERTAIN ITEMS EXCLUDED.—The term 'qualified higher education research and experimental expenditures' does not include any amount paid for—

"(A) the ordinary testing or inspection of materials or products for quality control, or for efficiency surveys, advertising, promotions, management studies, or consumer surveys;

"(B) acquiring any patent, model, production, or process from any other person, or obtaining a patent (including attorney's fees expended in a patent application);

"(C) research to the extent that the taxpayer has received a grant, contract or subcontract for such research from any Federal, State, or local government, or agency or instrumentality thereof; or

"(D) research in the social sciences or humanities.

"(4) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an institution described in section 1201(a) or 481(a) of the Higher Education Act of 1965 (as in effect on January 1, 1981).

"(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) RESEARCH AND EXPERIMENTAL EXPENDITURES.—The term 'research and experimental expenditures' has the meaning given to such term by section 174(e), except that such term shall only include expenditures for research and experimentation conducted within the United States.

"(2) AGGREGATION OF EXPENDITURES.—

"(A) CONTROLLED GROUP OF CORPORATIONS.—In determining the amount of the credit under this section—

"(i) all research and experimental expenditures (and all qualified higher education research and experimental expenditures) of members of the same controlled group of corporations shall be treated as expenditures of a single taxpayer, and

"(ii) the credit (if any) allowable by this section to each such member shall be its proportionate share of the increase in research and experimental expenditures giving rise to the credit (or its proportionate share of such qualified higher education expenditures).

"(B) COMMON CONTROL.—Under regulations prescribed by the Secretary, in determining the amount of the credit under this section—

"(i) all research and experimental expenditures (and all qualified higher education research and experimental expenditures) of trades or businesses (whether or not incorporated) which are under common control shall be treated as expenditures of a single taxpayer, and

"(ii) the credit (if any) allowable by this section to each such person shall be its proportionate share of the increase in research and experimental expenditures giving rise to the credit (or its proportionate share of such qualified higher education expenditures).

The regulations prescribed under this subparagraph shall be based on principles similar to the principles which apply in the case of subparagraph (A).

"(3) PASSTHROUGH IN THE CASE OF SUBCHAPTER S CORPORATIONS, ETC.—Under regulations prescribed by the Secretary, rules similar to the rules of subsections (d) and (e) of section 52 shall apply.

"(4) ADJUSTMENTS FOR CERTAIN ACQUISITIONS, ETC.—Under regulations prescribed by the Secretary—

"(A) ACQUISITIONS.—If, after December 31, 1979, a taxpayer acquires the major portion of a trade or business of another person (hereinafter in this paragraph referred to as the 'predecessor') or the major portion of a separate unit of a trade or business of a predecessor, then, for purposes of applying this section for any taxable year ending after such acquisition, the amount of research and experimental expenditures (and the amount of qualified higher education research and experimental expenditures) paid or incurred by the taxpayer during periods before such acquisition shall be increased by so much of such expenditures paid or incurred by the predecessor with respect to the acquired trade or business as is attributable to the portion of such trade or business or separate unit acquired by the taxpayer.

"(B) DISPOSITIONS.—If, after December 31, 1979—

"(i) a taxpayer disposes of the major portion of any trade or business or the major portion of a separate unit of a trade or business in a transaction to which subparagraph (A) applies, and

"(ii) the taxpayer furnishes the acquiring person such information as is necessary for the application of subparagraph (A),

then, for purposes of applying this section for any taxable year ending after such disposition, the amount of research and experimental expenditures (and the amount of qualified higher education research and experimental expenditures) paid or incurred by the taxpayer during periods before such disposition shall be decreased by so much of such expenditures as is attributable to the portion of such trade or business or separate unit disposed of by the taxpayer.

"(5) SHORT TAXABLE YEARS.—In the case of any short taxable year, research and experimental expenditures (and qualified higher education research and experimental expenditures) shall be annualized in such circumstances and under such methods as the Secretary may prescribe by regulation.

"(6) CONTROLLED GROUP OF CORPORATIONS.—The term 'controlled group of corporations' has the same meaning given to such term by section 1563(a), except that—

"(A) 'more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a)(1), and

"(B) the determination shall be made without regard to subsections (a)(4) and (e)(3)(C) of section 1563.

"(e) LIMITATION BASED ON AMOUNT OF TAX.—

"(1) IN GENERAL.—The credit allowed by subsection (a) for any taxable year shall not exceed the amount of the tax imposed by this chapter reduced by the sum of the credits allowable under a section of this part having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a).

"(2) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(A) ALLOWANCE OF CREDIT.—If the amount of the credit determined under this section for any taxable year exceeds the limitation provided by paragraph (1) for such taxable year (hereinafter in this paragraph referred to as the 'unused credit year'), such excess shall be—

"(i) a research and experimental credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(ii) a research and experimental credit carryover to each of the 7 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by this section for such years. If any portion of such excess is a carryback to a taxable year beginning before January 1, 1981, this section shall be deemed to have been in effect for such taxable year for purposes of allowing such carryback as a credit under this section. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 10 taxable years to which (by reason of clauses (i) and (ii)) such credit may be carried, and then to each of the other 9 taxable years to the ex-

tent that, because of the limitation contained in subparagraph (B), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(B) LIMITATION.—The amount of the unused credit which may be added under subparagraph (A) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by paragraph (1) for such taxable year exceeds the sum of—

"(i) the credit allowable under this section for such taxable year, and

"(ii) the amounts which, by reason of this paragraph, are added to the amount allowable for such taxable year and which are attributable to taxable years preceding the unused credit year.".

(b) DEDUCTION FOR RESEARCH AND EXPERIMENTAL EXPENDITURES.—

(1) IN GENERAL.—Section 280C (relating to disallowance of deduction for portion of wages for which credit is claimed under section 40 or 44B) is amended by adding at the end thereof the following new subsection:

"(c) RULE FOR SECTION 44F CREDIT.—In the case of an individual or an electing small business corporation (within the meaning of section 1371(b)), no deduction shall be allowed for that portion of research and experimental expenditures (other than qualified higher education research and experimental expenditures) paid or incurred during the taxable year which is equal to the amount allowable as a credit under section 44F for such taxable year (determined without regard to section 44F(d)).".

(2) CONFORMING AMENDMENTS.—

(A) The heading for section 280C is amended to read as follows:

"SEC. 280C. EXPENDITURES FOR WHICH CREDIT IS CLAIMED UNDER SECTION 40, 44B OR 44F.".

(B) The item relating to section 280C in the table of sections for part IX of subchapter B of chapter 1 is amended to read as follows:

"Sec. 280C. Expenditures for which credit is claimed under section 40, 44B, or 44F.".

(c) TECHNICAL AMENDMENTS RELATED TO CARRYOVER AND CARRYBACK OF CREDITS.—

(1) CARRYOVER OF CREDIT.—

(A) Paragraph (4) of section 55(c) (relating to credits) is amended by inserting "44F(e)(1)," before "53(b)".

(B) Subsection (c) of section 381 (relating to items of the distributor or transferor corporation) is amended by adding at the end thereof the following new paragraph:

"(28) CREDIT UNDER SECTION 44F.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44F, and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44F in respect of the distributor or transferor corporation.".

(C) Section 383 (relating to special limitations on unused investment credits, work incentive program credits, new employee credits, alcohol fuel credits, foreign taxes, and capital losses), as in effect for taxable years beginning after June 30, 1982, is amended—

(i) by inserting "to any unused credit of the corporation under section 44F(e)(2)," after "44E(e)(2),", and

(ii) by inserting "research and experimental credits," after "alcohol fuel credits," in the section heading.

(D) Section 383 (as in effect on the day before the date of the enactment of the Tax Reform Act of 1976) is amended—

(i) by inserting "to any unused credit of the corporation which could otherwise be carried forward under section 44F(e)(2)," after "44E(e)(2),", and

(ii) by inserting "research and experimental credits," after "alcohol fuel credits," in the section heading.

(E) The table of sections for part V of subchapter C of chapter 1 is amended by inserting "alcohol fuel credits, research and experimental credits," after "new employee credits," in the item relating to section 383.

(2) CARRYBACK OF CREDIT.—

(A) Subparagraph (C) of section 6511(d)(4) (defining credit carryback) is amended by striking out "and new employee credit carryback" and inserting in lieu thereof "new employee credit carryback, and research and experimental credit carryback".

(B) Section 6411 (relating to quick refunds in respect of tentative carryback adjustments) is amended—

(i) by striking out "or unused new employee credit" each place it appears and inserting in lieu thereof "unused new employee credit, or unused research and experimental credit";

(ii) by inserting "by a research and experimental credit carryback provided in section 44F(e)(2)," after "53(b)," in the first sentence of subsection (a);

(iii) by striking out "or a new employee credit carryback from" each place it appears and inserting in lieu thereof "a new employee credit carryback, or a research and experimental credit carryback from"; and

(iv) by striking out "work incentive program carryback)" and inserting in lieu thereof "work incentive program carryback, or, in the case of a research and experimental credit carryback, to an investment credit carryback, a work incentive program carryback, or a new employee credit carryback)".

(d) OTHER TECHNICAL AND CLERICAL AMENDMENTS.—

(1) Subsection (b) of section 6096 (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44E" and inserting in lieu thereof "44E, and 44F".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44E the following new item:

"Sec. 44F. Credit for research and experimental expenditures.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1980.

SEC. 212. RESEARCH AND EXPERIMENTAL EXPENDITURES DEFINED.

(a) IN GENERAL.—Section 174 (relating to deduction for research and experimental expenditures) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) RESEARCH AND EXPERIMENTAL EXPENDITURES DEFINED.—

"(1) IN GENERAL.—For purposes of this section, the term 'research and experimental expenditures' means amounts paid or incurred by the taxpayer—

"(A) for research for the purpose of discovering information which is potentially useful in—

"(i) the development of a new business item for the taxpayer, or

"(ii) bringing about a significant improvement in an existing business item of the taxpayer, or

"(B) in applying results obtained by research to develop a plan or design for a new business item for the taxpayer, or for a significant improvement in an existing business item of the taxpayer.

"(2) EXCLUSIONS.—The term 'research and experimental expenditures' does not include expenditures related to—

"(A) research in the social sciences or the humanities; and

"(B) to the extent that such expenditures are funded by a grant, contract or subcontract for research and development with any agency or instrumentality of any Federal, State, or local government.

"(3) DEFINITIONS.—For purposes of this subsection—

"(A) RESEARCH.—The term 'research' means a planned search or critical investigation, and includes experimentation.

"(B) BUSINESS ITEM.—The term 'business item' means a product, service, process, or technique for use by the taxpayer in a trade or business.

"(C) EXISTING.—The term 'existing' means a business item sold or used by the taxpayer in a trade or business before the taxpayer paid or incurred the amounts for research, or for the application of research results.

"(4) LIMITATION OF AMOUNTS SPENT FOR APPLIED RESEARCH.—No amount shall be taken into account under paragraph (1) as a research and experimental expenditure which is paid or incurred for research, or the application of research results, in connection with a business item after the point at which—

"(A) the new business item or significantly improved business item meets specific functional and economic requirements of the taxpayer for that item, or

"(B) the new or improved item is ready for manufacture, sale, or use.

"(5) PERSONS WITH COMMON INTERESTS.—For purposes of this subsection, a business item of any person with whom the taxpayer is required to aggregate expenditures under section 44F(d)(2) shall be treated as a business item of the taxpayer.".

(b) CONFORMING AMENDMENT.—Subsections (a) and (b) of section 174 are amended by striking out "research or experimental" each place such term appears and inserting in lieu thereof "research and experimental".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1980.

TITLE III—RETIREMENT PLANS

SEC. 301. RETIREMENT SAVINGS PROVISIONS.

(a) GENERAL RULE.—Section 219 (relating to deduction for retirement savings) is amended to read as follows:

"SEC. 219. RETIREMENT SAVINGS.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual, there shall be allowed as a deduction an amount equal to the qualified retirement contributions of the individual for the taxable year.

"(b) MAXIMUM AMOUNT OF DEDUCTION.—

"(1) IN GENERAL.—The amount allowable as a deduction under subsection (a) to any individual for any taxable year shall not exceed $2,000.

"(2) $1,000 LIMITATION IN THE CASE OF ACTIVE PARTICIPANTS IN EMPLOYER PLANS.—In the case of an individual who for any part of the taxable year is an active participant in a qualified employer plan, paragraphs (1)(A) and (3)(A)(ii)(II) shall be applied by substituting '$1,000' for '$2,000'.

"(3) SPECIAL RULES IN CASE OF SIMPLIFIED EMPLOYEE PENSIONS.—

"(A) LIMITATION.—If there is an employer contribution on behalf of the employee to a simplified employee pension, the limitation under paragraph (1) shall be equal to the sum of—

"(i) the amount contributed by the employer to the simplified employee pension and included in gross income (but not in excess of $7,500), and

"(ii) $1,750, reduced (but not below zero) by the amount described in clause (i).

"(B) CERTAIN LIMITATIONS DO NOT APPLY TO EMPLOYER CONTRIBUTION.—Paragraphs (1) and (2) of subsection (c) shall not apply with respect to the employer contribution to a simplified employee pension.

"(C) SPECIAL RULE FOR APPLYING SUBPARA-

GRAPH (A)(II).—In the case of an employee who is an officer, shareholder, or owner-employee described in section 408(k)(3), the $7,500 amount specified in subparagraph (A)(ii)(I) shall be reduced by the amount of tax taken into account with respect to such individual under subparagraph (D) of section 408(k)(3).

"(4) SPECIAL RULE FOR INDIVIDUAL RETIREMENT PLANS.—If the individual has paid any designated employee contributions during the taxable year, the amount of the qualified retirement contributions (other than employer contributions to a simplified employee pension) which are paid during the taxable year to an individual retirement plan and which are allowable as a deduction under subsection (a) for such taxable year shall not exceed—

"(A) the amount determined under paragraph (1) (as modified by paragraphs (2) and (3)) for such taxable year, reduced by

"(B) the sum of the employer contributions to a simplified employee pension plus the amount of such designated employee contributions.

"(c) CERTAIN INDIVIDUALS NOT ELIGIBLE.—

"(1) SELF-EMPLOYED INDIVIDUALS AND CERTAIN SHAREHOLDERS.—No deduction shall be allowed under subsection (a) to any individual for any taxable year—

"(A) if for any part of such taxable year such individual was an active participant in a qualified plan, and

"(B) if at any time during such year such individual was an employee (within the meaning of section 401(C)(1)), or a shareholder (within the meaning of section 408(k)(3)(B)(ii)), with respect to such plan.

"(2) INDIVIDUALS WHO HAVE ATTAINED AGE 70½.—No deduction shall be allowed under this section with respect to any qualified retirement contribution which is made for a taxable year of an individual if such individual has attained age 70½ before the close of such taxable year.

"(3) ALTERNATIVE DEDUCTION.—No deduction shall be allowed under this section for the taxable year if the individual claims the deduction allowed by section 220 for the taxable year.

"(d) OTHER LIMITATIONS AND RESTRICTIONS.—

"(1) RECONTRIBUTED AMOUNTS.—No deduction shall be allowed under this section with respect to a rollover contribution described in section 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8), 408(d)(3), or 409(b)(3)(C).

"(2) AMOUNTS CONTRIBUTED UNDER ENDOWMENT CONTRACT.—In the case of an endowment contract described in section 408(b), no deduction shall be allowed under this section for that portion of the amounts paid under the contract for the taxable year which is properly allocable, under regulations prescribed by the Secretary, to the cost of life insurance.

"(e) DEFINITION OF RETIREMENT SAVINGS CONTRIBUTIONS; ETC.—For purposes of this section—

"(1) QUALIFIED RETIREMENT CONTRIBUTION.—The term 'qualified retirement contribution' means—

"(A) any designated employee contribution paid in cash by the individual during the taxable year, and

"(B) any amount paid in cash during the taxable year by or on behalf of such individual for his benefit to an individual retirement plan.

For purposes of the preceding sentence, the term 'individual retirement plan' includes a retirement bond described in section 409 only if the bond is not redeemed within 12 months of its issuance.

"(2) DESIGNATED EMPLOYEE CONTRIBUTION.—

"(A) IN GENERAL.—The term 'designated employee contribution' means any contribution—

"(i) which is made by an individual as an employee under a qualified employer plan, and

"(ii) which the individual designates as being taken into acconut under this subsection.

"(B) LIMITATION ON MANDATORY CONTRIBUTIONS.—

"(i) IN GENERAL.—No mandatory contribution shall be taken into account by any employee under subparagraph (A) for any taxable year.

"(ii) MANDATORY CONTRIBUTIONS.—For purposes of clause (i), the term 'mandatory contribution' has the meaning given to such term by section 411(c)(2)(C).

"(C) DESIGNATION.—An individual shall make a designation under subparagraph (A) with respect to any contribution under a qualified employer plan by notifying, not later than the time prescribed by law for filing the return for the taxable year (including extensions thereof), the plan administrator of such plan that the individual is taking such contribution into account under this section. Any designation or notification referred to in the preceding sentence shall be made in such manner as the Secretary shall by regulations prescribe and, after such time for filing, such designation shall be irrevocable.

"(3) QUALIFIED EMPLOYER PLAN.—The term 'qualified employer plan' means—

"(A) a plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

"(B) an annuity plan described in section 403(a),

"(C) a qualified bond purchase plan described in section 405(a), and

"(D) any plan under which amounts are contributed by an individual's employer for an annuity contract described in section 403(b).

"(4) PAYMENTS FOR CERTAIN PLANS.—The term 'amounts paid to an individual retirement plan' includes amounts paid for an individual retirement annuity or a retirement bond.

"(f) OTHER DEFINITIONS AND SPECIAL RULES.—

"(1) COMPENSATION.—For purposes of this section, the term 'compensation' includes earned income as defined in section 401(c)(2).

"(2) MARRIED INDIVIDUALS.—The maximum deduction under subsection (b) shall be computed separately for each individual, and this section shall be applied without regard to any community property laws.

"(3) TIME WHEN CONTRIBUTIONS DEEMED MADE.—For purposes of this section, a taxpayer shall be deemed to have made a contribution to an individual retirement plan on the last day of the preceding taxable year if the contribution is made on account of such taxable year and is made not later than the time prescribed by law for filing the return for such taxable year (including extensions thereof).

"(4) REPORTS.—The Secretary shall prescribe regulations which prescribe the time and the manner in which reports to the Secretary and plan participants shall be made by the plan administrator of a qualified employer plan receiving designated employee contributions.

"(5) EMPLOYER PAYMENTS.—For purposes of this title, any amount paid by an employer to an individual retirement plan shall be treated as payment of compensation to the employee (other than a self-employed individual who is an employee within the meaning of section 401(c)(1)) includible in his gross income, whether or not a deduction for such payment is allowable under this section to the employee after the application of subsection (b).

"(6) EXCESS CONTRIBUTIONS TREATED AS CONTRIBUTION MADE DURING SUBSEQUENT YEAR FOR WHICH THERE IS AN UNUSED LIMITATION.—

"(A) IN GENERAL.—If for the taxable year the maximum amount allowable as a deduction under this section for contributions to an individual retirement plan exceeds the amount contributed, then the taxpayer shall be treated as having made an additional contribution for the taxable year in an amount equal to the lesser of—

"(i) the amount of such excess, or

"(ii) the amount of the excess contributions for such taxable year (determined under section 4973(b)(2) without regard to subparagraph (C) thereof).

"(B) AMOUNT CONTRIBUTED.—For purposes of this paragraph, the amount contributed—

"(i) shall be determined without regard to this paragraph, and

"(ii) shall not include any rollover contribution.

"(C) SPECIAL RULE WHERE EXCESS DEDUCTION WAS ALLOWED FOR CLOSED YEAR.—Proper reduction shall be made in the amount allowable as a deduction by reason of this paragraph for any amount allowed as a deduction under this section for a prior taxable year for which the period for assessing deficiency has expired if the amount so allowed exceeds the amount which should have been allowed for such prior taxable year.".

(b) TREATMENT OF DISTRIBUTIONS FROM EMPLOYER PLAN TO WHICH EMPLOYEE MADE DEDUCTIBLE CONTRIBUTIONS.—

(1) IN GENERAL.—Section 72 (relating to annuities; certain proceeds of endowment and life insurance contracts) is amended by redesignating subsection (o) as subsection (p) and by inserting after subsection (n) the following new subsection:

"(o) SPECIAL RULES FOR DISTRIBUTIONS FROM QUALIFIED PLANS TO WHICH EMPLOYEE MADE DEDUCTIBLE CONTRIBUTIONS.—

"(1) TREATMENT OF CONTRIBUTIONS.—For purposes of this section and sections 402, 403, and 405, notwithstanding section 414(h), any deductible employee contribution made to a qualified employer plan shall be treated as an amount contributed by the employer which is not includible in the gross income of the employee.

"(2) ADDITIONAL TAX IF AMOUNT RECEIVED BEFORE AGE 59½.—If—

"(A) any amount is received from a qualified employer plan to which the employee made one or more deductible employee contributions,

"(B) such amount is received by the employee before the employee attains the age of 59½, and

"(C) such amount is not received by reason of such employee's becoming disabled (within the meaning of subsection (m)(7)),

then the employee's tax under this chapter for the taxable year in which such amount is received shall be increased by an amount equal to 10 percent of the amount so received to the extent that such amount is includible in gross income, and also to the extent that the amount so includible (when added to the amounts previously received under the plan which were subject to tax under this paragraph) does not exceed the aggregate deductible employee contributions made by the employee to such plan. For purposes of this title, any tax imposed by this paragraph shall be treated as a tax imposed by subsection (m)(5)(B).

"(3) AMOUNTS CONSTRUCTIVELY RECEIVED.—For purposes of this subsection, rules similar to the rules provided by subsection (m)(4) shall apply.

"(4) ROLLOVER AMOUNTS NOT TAKEN INTO ACCOUNT.—

"(A) IN GENERAL.—Paragraph (2) shall not apply to any amount which is not includible in gross income under section 402(a)(5), 402(a)(7), or 403(a)(4).

"(B) SPECIAL RULES.—For purposes of sections 402(a)(5), 402(a)(7), 403(a)(4), 408(d)(3), and 409(b)(3)(C), the Secretary shall prescribe regulations providing for such allocations and separations of amounts attributable to deductible employee contribu-

tions, and for such other rules, as may be necessary to insure that the deductible employee contributions do not become eligible for additional tax benefits (or freed from limitations) through the use of rollovers.

"(5) DEFINITIONS AND SPECIAL RULES.—For purposes of this subsection—

"(A) DEDUCTIBLE EMPLOYEE CONTRIBUTIONS.—

"(i) IN GENERAL.—Except as provided in clause (ii), the term 'deductible employee contribution' means any designated employee contribution (as defined in section 219(e)(2)).

"(ii) SPECIAL RULE.—If the amount of the designated employee contributions taken into account under section 219 for any taxable year exceeds the amount of the deduction allowable by section 219 for such taxable year (or where section 219(b)(3) applies, the amount specified in section 219(b)(3)(A)(ii)(II) as modified by section 219(b)(2)), each of such designated employee contributions shall be treated as a deductible employee contribution only to the extent that it does not exceed an amount which bears the same ratio to the amount of the deduction so allowable (or the amount so specified) as such contribution bears to the aggregate of such designated employee contributions.

"(B) AGGREGATE DEDUCTIBLE EMPLOYEE CONTRIBUTIONS.—The term 'aggregate deductible employee contributions' includes the deductible employee contributions taken into account under section 219 for the taxable year in which the amount is received.

"(C) QUALIFIED EMPLOYER PLAN.—The term 'qualified employer plan' has the meaning given to such term by section 219(e)(3).".

(2) 10-YEAR AVERAGING AND CAPITAL PROVISIONS NOT TO APPLY.—Subparagraph (D) of section 402(e)(4) (relating to total taxable amount) is amended by adding at the end thereof the following new sentence: "For purposes of this subsection, subsection (a)(2), and section 403(a)(2), the total taxable amount (determined without regard to this sentence) shall be reduced by the amount by which the aggregate deductible employee contributions under the plan (as determined under section 72(o)(5)) exceed the sum of the amounts previously distributed under the plan which were includible in gross income.".

(c) ESTATE AND GIFT TAX EXCLUSION.—

(1) ESTATE TAX.—Subsection (c) of section 2039 (relating to exemption of annuities under certain trusts and plans) is amended by adding at the end thereof the following new sentence: "For purposes of this subsection, any deductible employee contributions (as determined under paragraph (5) of section 72(o) as of the date of the decedent's death) shall be considered as made by a person other than the decedent.".

(2) GIFT TAX.—Subsection (b) of section 2517 (relating to transfers attributable to employee contributions) is amended by adding at the end thereof the following new sentence: "For purposes of this subsection, any deductible employee contributions (as determined under paragraph (5) of section 72(o) as of the date of the transfer) shall be considered as made by a person other than the employee.".

(d) AMENDMENT OF SECTION 220.—Subparagraph (C) of section 220(b)(1) (relating to maximum deduction) is amended by striking out "$1,750" and inserting in lieu thereof "$2,000".

(e) CONFORMING AMENDMENTS TO INCREASE IN IRA LIMITATIONS.—

(1) The following provisions are each amended by striking out "$1,500" each place it appears and inserting in lieu thereof "$2,000":

(A) Section 408(a)(1) (defining individual retirement account).

(B) Section 408(b) (defining individual retirement annuity).

(C) Section 408(j) (relating to increase in maximum limitations for simplified employee pensions).

(D) Section 409(a)(4) (defining retirement bond).

(2) Subparagraph (A) of section 408(d)(5) is amended by striking out "$1,750" and inserting in lieu thereof "$2,250".

(3) Subparagraph (A) of section 409(b)(3) (relating to redemption within 12 months) is amended—

(A) by inserting "or 220" after "section 219", and

(B) by adding the following sentence at the end thereof: "The preceding sentence shall not apply to the extent that the bond was purchased with a rollover distribution described in subparagraph (C) of this paragraph or in section 402(a)(5), 402(a)(7), 403(a)(4), or 408(d)(3).".

(4) Subsection (a) of section 4973 is amended by striking out the last sentence and inserting in lieu thereof the following: "The tax imposed by this subsection shall be paid by such individual.".

(5) Subparagraph (C) of section 4973(b)(2) is amended by striking out "sections 219(c)(5)" and inserting in lieu thereof "section 219(f)(7)".

(f) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) ESTATE AND GIFT TAX PROVISIONS.—

(A) The amendment made by subsection (c)(1) shall apply to the estates of decedents dying after December 31, 1981.

(B) The amendment made by subsection (c)(2) shall apply to transfers after December 31, 1981.

SEC. 302. INCREASE IN AMOUNT OF DEDUCTION FOR CERTAIN RETIREMENT PLANS.

(a) SELF-EMPLOYED INDIVIDUAL RETIREMENT PLANS.—

(1) IN GENERAL.—Subsection (e) of section 404 (relating to special limitations for self-employed individuals) is amended—

(A) by striking out "$7,500" in paragraphs (1) and (2) and inserting in lieu thereof "the deductible amount",

(B) by adding at the end thereof the following new paragraph:

"(5) DEDUCTIBLE AMOUNT DEFINED.—

"(A) IN GENERAL.—For purposes of this subsection, the term 'deductible amount' means an amount equal to either—

"(i) $7,500, or

"(ii) in the case of a plan which meets the requirements of subparagraph (B) for the plan year, $15,000.

"(B) REQUIREMENTS.—A plan meets the requirements of this subparagraph for the plan year if—

"(i) the plan administrator elects for the plan year and all subsequent plan years the application of section 72(m)(5) to all employees (within the meaning of section 401(c)(1)) who participate in the plan, and

"(ii) for the plan year, the plan provides that, after not more than 3 years of service, each participant has a right to 100 percent of his accrued benefit under the plan which is nonforfeitable (within the meaning of section 411) at the time such benefit accrues.".

(2) CONFORMING AMENDMENTS.—

(A) Subsection (e) of section 401 is amended by striking out "$7,500" and inserting in lieu thereof "the deductible amount described in section 404(e)(5)".

(B) Subparagraph (A) of section 401(j)(2) (relating to benefit plans for self-employed individuals and shareholder-employees) is amended by striking out "$50,000" and inserting in lieu thereof "$50,000 or, in the case of a plan described in section 404(e)(5)(B), $100,000".

(3) Subparagraph (B) of section 1379(b)(1) (relating to certain qualified pension, etc., plans) is amended by striking out "$7,500" and inserting in lieu thereof "the deductible amount described in section 404(e)(5)".

(b) SIMPLIFIED EMPLOYEE PENSIONS.—

(1) IN GENERAL.—Paragraph (7) of section 219(b) (relating to simplified employee pensions) is amended by striking out "$7,500" each place it appears and inserting in lieu thereof "$15,000".

(2) CONFORMING AMENDMENTS.—Section 408 of such Code (relating to individual retirement accounts) is amended—

(A) by striking out "$7,500" in subsection (d)(5)(A) and inserting in lieu thereof "$15,000", and

(B) by striking out "$7,500" in subsection (j) and inserting in lieu thereof "$15,000".

(c) APPLICATION OF PENALTY TO RETIREMENT PLANS OF SELF-EMPLOYED INDIVIDUALS.—Paragraph (5) of section 72(m) (relating to annuities; certain proceeds of endowment and life insurance contracts) is amended—

(1) by striking out "an owner-employee." each place it appears and inserting in lieu thereof "a qualified employee,",

(2) by striking out "owner-employee" in the caption thereof and inserting in lieu thereof "owner-employee and self-employed individuals", and

(3) by adding at the end thereof the following new subparagraph:

"(C) For purposes of this paragraph, the term 'qualified employee' means—

"(i) any owner-employee, or

"(ii) any employee (within the meaning of section 401(c)(1)) who participates in a plan whose plan administrator elects (at such time and in such manner as the Secretary prescribes by regulations) the application of this paragraph to all employees (within the meaning of section 401(c)(1)) who participate in such plan.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

SEC. 303. TERMINATION OF COST-OF-LIVING ADJUSTMENTS FOR CERTAIN LIMITATIONS OF QUALIFIED PLANS.

Subsection (d) of section 415 (relating to limitations on benefits and contribution under qualified plans) is amended by adding at the end thereof the following new paragraph:

"(3) NO ADJUSTMENT AFTER 1981.—No adjustment shall be made under paragraph (1) after December 31, 1981, and the amounts in effect on such date shall remain in effect for all years beginning after such date.".

SEC. 304. CERTAIN AMOUNTS CONSTRUCTIVELY RECEIVED UNDER EMPLOYEE PLANS OR ANNUITIES BY SELF-EMPLOYED INDIVIDUALS.

(a) IN GENERAL.—Paragraph (4) of section 72(m) (relating to annuities; certain proceeds of endowment and life insurance contracts) is amended by striking out "owner-employee" each place it appears and inserting in lieu thereof "employee (within the meaning of section 401(c)(1))".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1981.

By Mr. HEINZ:

S. 1320. A bill to amend the Internal Revenue Code of 1954 to modify the excise tax on trucks, buses, tractors, and so forth, and for other purposes; to the Committee on Finance.

MOTOR VEHICLE TAX ACT OF 1981

● Mr. HEINZ. Mr. President, today, I am introducing a bill designed to provide financial relief to hard-pressed truck dealers by amending present Federal truck excise tax provisions. The major change involves shifting the point of collection of the tax from the time of transfer between the wholesaler to the dealer to the time

of sale to the ultimate customer by the dealer.

The 10-percent Federal excise tax levied against trucks, and the 8-percent tax levied against truck parts, has for a long time now been an area of financial concern to the many small business heavy-duty truck dealers of this Nation. Under current law, this tax is imposed on the manufacturer at the time the truck is transferred to the dealer. This means the manufacturer includes the cost of the tax in his price, passing the tax on to the dealer in the process. Therefore, the dealer must finance not only the wholesale price of the vehicle, but must also carry the cost of a substantial excise tax. With today's heavy-duty "over the road" trucks costing between $50,000 and $75,000, the tax amounts to an extra $5,000 to $7,500 per truck.

Historically, truck dealers pay between 1 and 2 percent over prime to finance their inventory. At today's interest rates, inventory financing for the small truck dealer is a tremendous burden, and current Federal excise tax rules compound the problem. If a dealer were required to pay the excise tax at the time of retail transfer, he would be able to finance 11 trucks for the same amount that he now finances 10. Nationwide, the interest cost, to the dealer, of financing this tax reached into the tens of millions of dollars in 1980.

As a result of unprecedented interest rates, truck sales have become as depressed as auto sales, if not more so. These high interest rates have left hundreds of dealers perilously close to bankruptcy. The bill that I am introducing today is designed to provide immediate and much needed assistance to these dealers without altering the amount of revenue raised by the tax.

My bill would make the following changes in existing law:

First, the point of tax liability and collection would be the time of the first retail sale of trucks, trailers, or their parts, instead of the time of their wholesale transfer.

Second, to avoid increasing the Federal excise tax by taxing a dealer's profit margin, a compensation change in the tax base is made. Under existing law, the tax equals 10 percent on the wholesale price of trucks and trailers and 8 percent of the wholesale price of parts and accessories. Under this proposal, the tax would be computed on 90 percent of the actual retail sales price of these vehicles and on 75 percent of the actual retail sales price of their parts and accessories. The revenue raised from the tax under existing law and under this proposal is the same until fiscal year 1985 when the excise tax drops to 5 percent.

Third, a similar change is proposed for the treatment of the excise tax on heavy-duty truck tires, currently paid by the tire manufacturer at the time they are sold to the truck manufacturer. Under my bill, this tax is also collected at the time of the first retail sale of a truck or trailer. Should the Internal Revenue Service identify a need to segregate that portion of the excise tax attributable to tires, it would do so by regulation.

This legislation will not solve all the problems confronting heavy-duty truck dealers. However, it will provide them immediate, significant relief from their current financial bind brought about from sluggish sales and high interest rates.

I believe that this bill's concepts are sound, and I urge my colleagues to give it their consideration and more importantly their support.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1320

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Motor Vehicle Tax Act of 1981".

SEC. 2. (a) Section 4061 of the Internal Revenue Code of 1954 is amended by inserting the following at the end thereof:

"(c) SALES AFTER ENACTMENT OF MOTOR VEHICLE TAX ACT OF 1981.—The tax imposed by this section shall not apply to articles sold by the manufacturer, producer, or importer after the first day of the first taxable quarter which commences more than 30 days after the date of the enactment of the Motor Vehicle Tax Act of 1981."

(b) The chapter heading for chapter 31 of subtitle D of the Internal Revenue Code of 1954 is amended to read as follows:

"Chapter 31—RETAILERS EXCISE TAXES"

(c) Chapter 31 of such subtitle D is amended by inserting the following immediately before section 4041:

"Subchapter A—Trucks, Buses, Tractors, Etc.

"Sec. 4001. Imposition of tax.
"Sec. 4002. Articles classified as parts.
"Sec. 4003. Exemptions.
"Sec. 4004. Determination of price.
"Sec. 4005. Use considered sale.
"Sec. 4006. Certain tax free sales.
"Sec. 4007. Registration.

"SEC. 4001. IMPOSITION OF TAX.

"(a) TRUCKS, BUSES, TRACTORS, ETC.—

"(1) TAX IMPOSED.—There is hereby imposed upon the first sale at retail of the following articles (including in each case parts or accessories therefor sold on or in connection therewith or with the sale thereof) a tax of 10 percent of the wholesale price of the article (determined under subsection (c)), except that on and after October 1, 1984, the rate shall be 5 percent:

"Automobile truck chassis.
"Automobile truck bodies.
"Automobile bus chassis.
"Automobile bus bodies.
"Truck and bus trailer and semitrailer chassis.
"Truck and bus trailer and semitrailer bodies.
"Tractors of the kind chiefly used for highway transportation in combination with a trailer or semitrailer.

A sale of an automobile truck, bus, truck, or bus trailer or semitrailer shall, for the purposes of this subsection, be considered to be a sale of a chassis and of a body enumerated in this subsection.

"(2) EXCLUSION FOR LIGHT-DUTY TRUCKS, ETC.—The tax imposed by paragraph (1) shall not apply to a sale of the following articles suitable for use with a vehicle having a gross vehicle weight of 10,000 pounds or less (as determined under regulations prescribed by the Secretary)—

"Automobile truck chassis.
"Automobile truck bodies.
"Automobile bus chassis.
"Automobile bus bodies.
"Truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer having a gross vehicle weight of 10,000 pounds or less (as so determined).

"(b) PARTS AND ACCESSORIES.—

"(1) Except as provided in paragraph (2), there is hereby imposed upon the first retail sale of parts or accessories (other than tires and inner tubes) for any of the articles enumerated in subsection (a)(1) a tax equivalent to 8 percent of the wholesale price of the article (determined under subsection (c)), except that on and after October 1, 1984, the rate shall be 5 percent.

"(2) No tax shall be imposed under this subsection upon any part or accessory which is suitable for use (and ordinarily is used) on or in connection with, or as a component part of, any chassis or body for a passenger automobile, any chassis or body for a trailer or semitrailer suitable for use in connection with a passenger automobile, or a house trailer.

"(c) WHOLESALE PRICE.—For purposes of the tax imposed under this section—

"(1) the wholesale price of an article taxable under subsection (a) shall be deemed to be 90 percent of the actual retail selling price of such article; and

"(2) the wholesale price of an article taxable under subsection (b) shall be deemed to be 75 percent of the actual retail selling price of such article.

"SEC. 4002. ARTICLES CLASSIFIED AS PARTS.

"For the purposes of section 4001, spark plugs, storage batteries, leaf springs, coils, timers, and tire chains, which are suitable for use on or in connection with, or as component parts of, any of the articles enumerated in section 4001(a), shall be considered parts or accessories for such articles, whether or not primarily adapted for such use.

"SEC. 4003. EXEMPTIONS.

"(a) SPECIFIED ARTICLES.—The tax imposed under section 4001 shall not apply in the case of any article specified in section 4063(a).

"(b) EXEMPT PARTS.—Under regulations prescribed by the Secretary—

"(1) the tax imposed under section 4001 (b) shall not apply in the case of rebuilt parts or accessories; and

"(2) the tax imposed by section 4001(b) shall not apply to the sale of any article on or in connection with the sale of a light-duty truck as described in section 4001(a)(2) or which is sold for use by the purchaser on or in connection with an automobile bus.

"(c) ARTICLES TAXED UNDER MANUFACTURERS EXCISE TAX.—The tax imposed under section 4001 shall not apply in the case of any article on which a tax was paid under section 4061, as determined under regulations prescribed by the Secretary. Such regulations shall specify methods for identifying the articles which are exempt under this subsection and may include methods for apportioning inventory between articles which are exempt and articles which are not exempt.

"SEC. 4004. DETERMINATION OF PRICE.

"(a) CONTAINERS, PACKAGING, AND TRANSPORTATION CHARGES.—In determining, for the purposes of section 4001(c), the actual retail selling price for which an article is sold, there shall be included any charge for coverings and containers of whatever nature, and any charge incident to placing the article in condition packed ready for shipment, but there shall be excluded the amount of tax imposed by this subchapter, whether or not stated as a separate charge. A transportation, delivery, insurance, installation, or other charge (not required by the foregoing sentence to be included) shall be excluded from the price only if the amount thereof is established to the satisfaction of the Sec-

retary in accordance with the regulations. There shall also be excluded, if stated as a separate charge, the amount of any retail sales tax imposed by any State or political subdivision thereof, or the District of Columbia, whether the liability for such tax is imposed on the vendor or the vendee.

"(b) CONSTRUCTIVE SALE PRICE.—If an article is—

"(1) sold on consignment, or

"(2) sold (otherwise than through an arm's length transaction) at less than the fair market price,

the actual retail selling price for purposes of section 4001(c) shall be computed on the basis of the retail price for which such articles are sold, in the ordinary course of trade as determined by the Secretary.

"(c) LEASES, PARTIAL PAYMENTS, INSTALLMENTS, ETC.—The provisions of subsections (c), (d), and (f) of section 4216 and subsections (a), (b), (c), (d)(1), and (d)(2) of section 4217 shall apply for purposes of this subchapter in the same manner as such provisions apply for purposes of chapter 32.

"SEC. 4005. USE CONSIDERED SALE.

"If any manufacturer, producer, or importer uses an article (otherwise than as material in the manufacture or production of, or as a component part of, another article taxable under this subchapter), then he shall be liable for tax under this subchapter in the same manner as if such article were sold at retail by him. In any such case, the actual retail selling price for purposes of section 4001(c) shall be computed on the basis of the price at which such or similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary

"SEC. 4006. CERTAIN TAX FREE SALES.

"(a) GENERAL RULE.—Under regulations prescribed by the Secretary, no tax shall be imposed under section 4001 on the sales of an article—

"(1) for export,

"(2) to a State or local government for the exclusive use of a State or local government, or

"(3) to a nonprofit educational organization for its exclusive use,

but only if such exportation or use is to occur before any other use.

"(b) PROOF OF EXPORT.—Where an article has been sold free of tax under subsection (a) for export, or for resale by the purchaser to a second purchaser for export, subsection (a) shall cease to apply in respect of such sale of such article unless, within the 6-month period which begins on the date of the sale (or, if earlier, on the date of shipment), the seller receives proof that the article has been exported.

"(c) DEFINITIONS.—For purposes of this section—

"(1) The term 'export' includes shipment to a possession of the United States.

"(2) The term 'State or local government' means any State, any political subdivision thereof, or the District of Columbia.

"(3) The term 'nonprofit educational organization' means an educational organization described in section 170(b)(1)(A)(ii) which is exempt from income tax under section 501(a). The term also includes a school operated as an activity of an organization described in section 501(c)(3) which is exempt from income tax under section 501(a), if such school normally maintains a regular faculty and curriculum and normally has a regularly enrolled body of pupils or students in attendance at the place where its educational activities are regularly carried on.

"(d) RETAIL SELLER RELIEVED FROM LIABILITY IN CERTAIN CASES.—In the case of any article sold free of tax under this section (other than a sale to which subsection (b) applies), if the retail seller in good faith accepts a certification by the purchaser that the article will be used in accordance with the applicable provisions of law, no tax shall thereafter be imposed under this subchapter in respect of such sale by such retail seller.

"SEC. 4007. REGISTRATION.

"(a) GENERAL RULE.—Except as provided in subsection (b), section 4006 shall not apply with respect to the sale of any article unless the retail seller, the first purchaser, and the second purchaser (if any) are all registered under this section. Registration under this section shall be made at such time, in such manner and form, and subject to such terms and conditions, as the Secretary may by regulations prescribe. A registration under this section may be used only in accordance with regulations prescribed under this section.

"(b) EXCEPTIONS.—

"(1) Subsection (a) shall not apply to any State or local government in connection with the purchase by it of any article if such State or local government complies with such regulations relating to the use of exemption certificates in lieu of registration as the Secretary shall prescribe to carry out the purpose of this section.

"(2) Subject to such regulations as the Secretary may prescribe for the purpose of this section, in the case of any sale or resale for export, the Secretary may relieve the purchaser or the second purchaser, or both, from the requirement of registering under this section.

"(3) Subparagraph (a) shall apply to purchases and sales by the United States only to the extent provided by regulations prescribed by the Secretary.

"(4) The provisions of this section may be extended to and made applicable with respect to, the exemptions provided in section 4003(a) and section 4003(b)(2) to the extent provided by regulations prescribed by the Secretary.

"Subchapter B—Special Rules."

(c) Section 4221(e) of such Code is amended by adding the following new paragraph at the end thereof:

"(7) TIRES AND TUBES SOLD FOR USE ON VEHICLES TAXABLE UNDER SECTION 4001.—Under regulations prescribed by the Secretary, the taxes imposed under section 4071 shall not apply to any article which is sold for use by the purchaser, or by any subsequent purchaser, on any article described in section 4001(a)(1)."

(d)(1) Paragraph (1) of section 6412(a) of such Code (relating to floor stocks refunds) is amended—

(A) by striking out "4061(a)(1),"; and

(B) by striking out "TRUCKS, TIRES" in the paragraph heading and inserting in lieu thereof "TIRES".

(2) Section 6412(c) of such Code is amended by striking out "4061, 4071," and inserting in lieu thereof "4071".

(e)(1) Section 6416 of such Code is amended by striking out "chapter 31 (special fuels)" in paragraph (1) of subsection (a) and substituting "chapter 31 (retailer's excise taxes".

(2) Section 6416(b)(1) of such Code is amended by inserting "or by section 4001" after "by chapter 32".

(3) Section 6416(b)(2) of such Code is amended by adding the following at the end thereof: "The tax paid by a retail seller under section 4001 in respect of any article shall be deemed an overpayment if the tax did not apply to such article by reason of section 4003 or if such article was sold free of tax by reason of section 4006.

(4) Section 6416(h) is amended by inserting "(or the retail seller in the case of the tax imposed under section 4001)" before "may be identified" and by inserting "(or under section 4001)" after "under chapter 32".

(f)(1) Section 209(c)(1) of the Highway Revenue Act of 1956 is amended by—

(A) inserting "and under section 4001(a)(1) (retailer's excise tax on trucks, buses, etc.)" before the semicolon at the end of subparagraph (C); and

(B) inserting "and 4001(b)" after "4061(b)" in subparagraph (H).

(2) Section 209(c)(3) of such Act is amended by—

(A) striking out "4061(b)" and substituting "4001(b)" in subparagraph (A); and

(B) striking out "4061" and substituting "9001" in subparagraph (B).

(3) Paragraph (4) of section 409(f) of such Act is amended by striking out subparagraph (A) and by redesignating subparagraphs (B) and (C) as subparagraphs (A) and (B), respectively.

SEC. 3. The amendments made by section 2 of this Act shall take effect on the first day of the first taxable quarter which commences more than 30 days after date of the enactment of this Act.●

By Mr. COCHRAN:

S. 1321. A bill to provide access to small businesses and other persons, of information concerning rules applicable to such businesses or persons; to the Committee on the Judiciary.

SMALL BUSINESS REGULATORY INFORMATION ACT OF 1981

Mr. COCHRAN. Mr. President, there is growing sentiment throughout the country that Federal regulation of small businesses is counterproductive. Without question, a serious problem exists regarding the ability of businesses to plan for the future because of the regulatory maze that has been created.

We must make the Federal Government more responsive to small businesses which cannot afford a staff of regulatory experts to decipher applicable rules and regulations. Many times, it is next to impossible even to determine which rules are applicable.

In an effort to rectify this problem, I am introducing the Small Business Regulatory Information Act of 1981. This act will require each Federal agency to publish in the Federal Register, along with each rule proposed or promulgated, the standard industrial classification (SIC) for all affected industries. Within 5 years of enactment, all previously published regulations must be amended to include appropriate SIC numbers.

The SIC system is a classification system administered by the Information and Regulatory Affairs Office at OMB which assigns a code, or SIC number, to every business unit or establishment on the basis of its primary activities.

A Small Business Information Center will be established in the Office of the Federal Register which will, upon request, provide businesses with a listing of the rules that apply to them based on their SIC number.

Thus a business will be able to look at a proposed rule and at previously published rules and tell at a glance if the rule is applicable, or the Small Business Information Center can be contacted for this information.

This bill is designed simply to insure that small businesses are able to conduct their business planning in a rational manner and in reliance on the proper information.

Mr. President, I ask unanimous con-

sent that the bill be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1321

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Small Business Regulatory Information Act of 1981".

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. The Congress hereby finds that there is a serious problem regarding the ability of business to plan for the future because of the regulatory maze it finds itself in; and, with over seven thousand new rules promulgated each year, notification of the application of these rules to a particular industry or industries is a necessary responsibility of the Federal Government. The Congress hereby determines that small businesses and other persons should have access to a central information source in order to conduct their future business planning in a coordinated and rational fashion, and in reliance on the proper information. It is the policy of the Congress to ensure that business is able to function in a stable and predictable environment relative to Government Actions.

SEC. 3. For the purposes of this Act—

(a) the term "agency" has the same meaning as in section 552(e) of title 5, United States Code;

(b) the term "rule" has the same meaning in section 551(4) of such title, except that such term does not include a rule issued with respect to (A) a military or foreign affairs function of the United States, (B) agency management or personnel, or (C) agency organization, procedure, or practice; and

(c) the term "SIC" means the standard industrial classification for industries as administered by the Office of Information and Regulatory Affairs.

SEC. 4. Each agency shall publish in the Federal Register with each rule proposed or promulgated after the date of enactment of this Act, the SIC code for such industry to which the rule applies.

SEC. 5. The Director of the Federal Register ("Director") shall establish in the Office of the Federal Register, a Small Business Information Center ("Center"). Upon request, the Center shall provide to small businesses and other persons a listing of the rules which apply to any industry or industries within a specified standard industrial classification:

(a) within five years after the date of enactment of this Act, the head of each agency shall ensure that each proposed and final rule of the agency contains the current SIC code for each industry or industries to which the rule applies;

(b) each year after the date of enactment, the head of each agency shall amend at least 20 per centum of the rules of the agency to include the SIC code and shall complete the amendments within five years; and

(c) the head of each agency shall transmit such rules to the Director. The Director shall compile the rules received and incorporate them into the general index to the Code of Federal Regulations required by section 1510(b) of title 44, United States Code.

By Mr. TSONGAS (for himself and Mr. KENNEDY):

S. 1323. A bill to amend the Internal Revenue Code of 1954 with respect to the residential energy and investment tax energy credits, and for other purposes; to the Committee on Finance.

COMMERCIAL AND MULTIFAMILY ENERGY TAX CREDIT ACT

Mr. TSONGAS. Mr. President, today I am introducing legislation to broaden and improve the energy tax credits provided by the Internal Revenue Code. Energy tax credits provide a simple and effective mechanism to encourage investment in conservation. They depend upon consumers' decisions in the marketplace rather than a Federal bureaucracy. They are an accepted part of the administration's energy policy.

Unfortunately, there are problems with the existing energy tax credits. The credits exclude important segments of our economy. Some expire next year and others have a reduced effect due to inflation. These weaknesses help keep America from getting the optimal amount of energy conservation—which our economy and security require. The Commercial and Multifamily Energy Tax Credit Act of 1981 addresses these problems.

The current statute on energy tax credits for businesses is too limited. It covers complex investments which have specific industrial applications, such as cogeneration equipment, combustible gas recovery systems, and modifications to alumina electrolytic cells. In addition, the IRS has, through regulations, restricted credits on the few listed properties that commercial facilities can use—such as automatic energy control systems—to industrial applications. The legislation I am introducting today will end these regulatory limits. It will also make commercial facilities eligible to receive tax credits for insulation, storm windows, and other useful energy conservation investments. Further, it would increase the credit to 20 percent.

The existing residential energy tax credits exclude owners of rental housing. At present, neither the renter nor the rental property owner has an effective incentive to invest in energy efficiency. The average renter does not stay long enough to consider the investment warranted. The landlord often finds he can pass along most or all of the energy costs to renters. Because of their ownership interest, landlords are the most likely party to invest in energy conservation. Therefore, this bill extends the residential energy tax credits to them.

Both of these changes are vital to the energy security of our Nation and the welfare of our citizens. In 1977 the commercial sector used 10 quads of energy; rental housing used another five quads. Combined, this is 20 percent of our Nation's total energy demand—roughly 7.5 million barrels of oil equivalent per day. With cost-effective investments in energy conservation improvements, half of this energy could be saved. This represents two-thirds of all the oil we now import. Yet, because of regulatory restrictions and exclusions in the existing tax credits, this potential is virtually untapped today

In the New England States, the need for energy conservation improvements in commercial establishments and rental housing is particularly acute.

As a percentage of total energy used, the commercial sector in Massachusetts is 2½ times larger than that of the Nation as a whole. The percentage used in Massachusetts residences is almost two times larger than the national average. Further, in Massachusetts 40 percent of the residences are rental units.

For the New England States overall, 25 percent of the housing stock is multifamily. Of these, 60 percent were built before 1940 with little regard for energy efficiency.

In 1978, imported oil accounted for 74 percent of New England's energy compared to 20 percent nationwide. This represented a $16 billion cash outflow to foreign producers from New England

The rising costs of energy demands that we remove the IRS regulatory barriers to energy conservation in these sectors of our economy. We cannot afford not to.

As time passes, inflation and expiration dates threaten the energy tax credits. The Commercial and Multifamily Energy Tax Credit Act moves the termination date of the business energy tax credit from December 31, 1982, to December 31, 1985. It also adjusts the expenditure limits on the residential credits to compensate for inflation since the credits began in 1978. These changes will help maintain the effectiveness of the energy tax credits.

This bill is consistent with other bills filed in this area, such as Senator WALLOP's Industrial Energy Security Tax Credit Act (S. 750), Senator KENNEDY's Energy Productivity Act of 1981, (S. 787), and Senator DURENBURGER's Commercial Business Energy Tax Credit Act (S. 1288). I hope that the Finance Committee will hold hearings on these bills and on the issue of energy conservation tax credits for the industrial, commercial, and multifamily sectors.

Mr. President, I believe the committee will find that there is a clear need for such legislation. Modest economic incentives through the tax code can help insure that the investment that this Nation so desperately needs is done in an efficient and resource-conserving manner.

Mr. President, I ask unanimous consent that the full text of the Commercial and Multifamily Energy Tax Credit Act and a summary of its provisions be printed in the RECORD.

There being no objection, the bill and the summary were ordered to be printed in the RECORD, as follows:

S. 1323

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Commercial and Multifamily Energy Tax Credit Act".

SEC. 2. DEFINITION OF SPECIALLY DEFINED ENERGY PROPERTY.

(a) HOTELS, OFFICE BUILDINGS, RETAIL AND WHOLESALE TRADE FACILITIES, AND OTHER FACILITIES INCLUDED.—Paragraph (5) of section 48(1) of the Internal Revenue Code of 1954 (defining specially defined energy property) is amended by adding at the end thereof the following new sentence: "In the case of any property installed in connection with any commercial facility (including a hotel, office building, educational facility, health care facility, or retail or wholesale trade facility), any reduction of the amount of energy consumed in connection with such facility shall be treated as a reduction of energy consumed in a commercial process.".

(b) ADDITIONAL ITEMS.—Paragraph (5) of section 48(1) of such Code is amended by striking out "or" at the end of subparagraph (L), by redesignating subparagraph (M) as subparagraph (V), and by inserting

after subparagraph (I) the following new subparagraphs:

"(M) insulating material or coating installed in connection with a building, pipe, duct, container, or window,

"(N) a storm or thermal window or door for the exterior of a building, a second entry door, or a revolving door,

"(O) caulking or weatherstripping of an exterior door or window,

"(P) a furnace replacement burner designed to achieve a reduction in the amount of fuel consumed as a result of increased combustion efficiency,

"(Q) a device for modifying flue openings designed to increase the efficiency of operation of the heating system,

"(R) an electrical or mechanical furnace ignition system which replaces a gas pilot light,

"(S) an electrostatic precipitator, a charcoal filter, or any other air cleaner,

"(T) an automatic energy saving setback thermostat,

"(U) replacement or modification of heating distribution, cooling, ventilating, or lighting systems which increase their energy efficiency, or"

(c) The table contained in clause (1) of section 46(a)(2)(C) of such Code is amended by inserting after the last item the following new item:

"VII. SPECIALLY DEFINED ENERGY PROPERTY.—Property described in section 48(1)(5)—20 percent—June 30, 1981—December 31, 1985."

(d) EFFECTIVE DATES.—

(1) The amendment made by subsections (b) and (c) shall take effect as if included in the amendments made by section 301(b) of the Energy Tax Act of 1978.

(2) The amendments made by subsection (b) shall apply to periods after June 30, 1981, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954.

SEC. 3. EXTENSION OF RESIDENTIAL ENERGY CREDIT TO LESSORS.

(a) IN GENERAL.—Section 44C(d) of the Internal Revenue Code of 1954 (relating to special rules) is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraphs:

"(5) EXPENDITURES BY LESSORS.—

"(A) LESSORS.—Notwithstanding any provision of this section requiring the taxpayer to use a dwelling unit as a residence, if any taxpayer who is the lessor of a dwelling unit makes expenditures which, but for such provision, constitute energy conservation or renewable energy source expenditures, then, for purposes of this section, the lessor shall be treated as having made energy conservation or renewable energy source expenditures in connection with such dwelling unit.

"(B) AMOUNT OF CREDIT.—The amount of the credit allowed under subsection (a) in the case of a lessor shall be the amount otherwise determined under this section, except that in any case in which the depreciation allowance under section 167 (or amortization in lieu of depreciation) is allowed as a deduction with respect to the dwelling unit, subsection (b) shall be applied—

"(i) by substituting '10 percent' for '15 percent' in paragraph (1), and

"(ii) by substituting '30 percent' for '40 percent' in paragraph (2).

"(C) WHEN EXPENDITURE MADE.—An expenditure with respect to an item shall be treated as made when the original installation of such item is completed.

"(D) COORDINATION WITH OTHER PROVISIONS.—No credit or deduction shall be allowed under any other provision of this chapter with respect to any amount for which a credit has been allowed under subsection (a).".

(b) CONFORMING AMENDMENT.—Subsection (a) of section 44C of such Code (relating to general rule) is amended by striking out "In the case of an individual, there" and inserting in lieu thereof "There".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to expenditures made after June 20, 1981 in taxable years ending after such date.

SEC. 4. AMOUNT OF RESIDENTIAL ENERGY CREDIT.

(a) IN GENERAL.—Subsection (b) of section 44C of the Internal Revenue Code of 1954 (defining qualifying expenditures) is amended—

(1) by striking out "$2,000" in paragraph (1) and inserting in lieu thereof "$3,000," and

(2) by striking out "$10,000" in paragraph (2) and inserting in lieu thereof "$15,000".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after June 30, 1981.

SEC. 5. PERIOD TO WHICH ENERGY INVESTMENT CREDIT APPLIES.

Subclause (I) of section 46(a)(2)(C)(i) of the Internal Revenue Code of 1954 (relating to energy percentage) is amended by striking out "1982" and inserting in lieu thereof "1985".

BRIEF SUMMARY OF PROVISIONS

Section 2. Energy tax credits for commercial facilities.—Makes commercial properties eligible for energy conservation investments that the tax code lists in "Specially Defined Energy Property," such as automatic energy control systems. It also adds additional properties to the list of Specially Defined Energy Property. These properties include: materials to insulate buildings, pipes and containers, storm windows, weatherstripping, and changes in heating, cooling, ventilating, and lighting systems to improve energy efficiency. Finally, it increases the credit to 20 percent.

Section 3. Extension of residential credits to owners of rental housing.—Extends both the energy conservation and renewable energy tax credits to owners of rental residences. This section is similar to a provision which was approved by the Senate as part of the Windfall Profit Tax Bill. The Conference Committee deleted that provision of the Senate bill.

Section 4. Adjustment of residential energy tax credit limits for inflation.—Adjusts the limits on expenditures covered by the residential energy credit upward by 50 percent to compensate for inflation. Since the changes this section would make will remain in effect until the credit's termination date on December 31, 1985, a 50 percent increase will help maintain the effect intended in the enactment of the credit on 1978. (The CPI from January 1, 1978 to this bill's enactment date will total approximately 47 percent.)

Section 5. Extension of the time period for business tax credits.—Extends all the energy tax credits for business to December 31, 1985, the same expiration date that applies to residential credits. Under present law, most of the business energy tax credits expire on December 31, 1982.

COMMERCIAL AND MULTIFAMILY ENERGY TAX CREDIT ACT

SECTION 2—INCLUSION OF THE COMMERCIAL SECTOR AND OF TECHNOLOGICALLY SIMPLE PROPERTIES WITHIN THE BUSINESS ENERGY TAX CREDIT

Section 2 of the bill clarifies the definition of the "Specially Defined Energy Property" so that it specifically includes conservation investments in commercial facilities. The bill applies this change retroactively to the 1978 origin of the credit. Section 2 also adds several types of property within the category of "Specially Defined Energy Property" so that businesses can receive tax credits for investments in less technologically complex devices than those already listed (e.g. materials to insulate buildings, pipes, and containers; storm windows). The addition of these properties applies prospectively starting July 1, 1981. Finally, section 2 increases the credit to 20 percent.

The changes would retroactively provide commercial facilities with credits for expenditures on property presently listed within the category of "Specially Defined Energy Property." One such property, automatic energy control systems, many commercial facilities can use. The bill would also prospectively provide both commercial and industrial facilities with credits for the smaller, less complex items that the bill adds to the "Specially Defined Energy Property" category.

The retroactive aspect of the change of the Specially Defined Energy Property statute would normally create tax administration problems. However, since IRS just issued final regulations for this credit on January 23, 1981, few taxpayers would have intentionally not taken the credit in reliance on the regulations. Instead, most have probably taken the credit and face a deficiency. In addition, since the amendment clarifies rather than changes the intent of the statute the amendment should apply to the life of the statute.

SECTION 3—EXTENSION OF RESIDENTIAL CREDITS TO LANDLORDS

Section 3 of this bill allows landlords to use both the 15 percent energy conservation and 40 percent renewable energy residential credits for expenditures on rental residences. For residences upon which landlords deduct depreciation, the level of the tax credit is lower. This section copies a provision of the 96th Congress' S. 3919, the Senate version of The Windfall Profits Tax Bill. The Conference Committee deleted that provision.

SECTION 4—ADJUSTMENT OF RESIDENTIAL CREDIT LIMITS FOR INFLATION

Section 4 adjusts the limits on expenditures covered by the residential energy credit upward by 50 percent to compensate for inflation. The section raises the expenditures amount covered by the Energy Conservation Credit from $2,000 to $3,000 and raises the expenditure amount covered by the Renewable Energy Source Credit from $10,000 to $15,000.

The expenditure limits presently in the code came from the Energy Tax Act of 1978 and apply to expenditures made after April 20, 1977. Using the Consumer Price Index, inflation from January, 1978, to June 30, 1981, was 47.1 percent.[1] Using the more conservative GNP Deflator, inflation from January, 1978, to June 30, 1981, was 33 percent.[2] Since the changes the bill would make will presumably remain effective until the credit's termination date on December 31, 1985, a 50 percent increase seems appropriate to maintain the effect intended in enactment of the credit in 1978.

SECTION 5—EXTENSION OF TIME PERIOD FOR BUSINESS TAX CREDITS

Section 5 extends all the energy credits for businesses to December 31, 1985. Under present law, most of the business energy tax credits expire on December 31, 1982.

Mr. KENNEDY. Mr. President, there is a national consensus that energy conservation is an essential element of a balanced national energy policy. Yet that consensus is not reflected in Federal financial incentives. Federal financial incentives for energy production were seven times greater than energy conservation incentives at the end of 1980.

In recent years, a consensus has developed that energy conservation—or energy

[1] Figure assumes 6 percent CPI for the first two quarters of 1981.

[2] Figure assumes 5 percent GNP Deflator for the first two quarters of 1981.

efficiency—is an essential element of a balanced national energy program. The consensus involves every element of the energy policy community including academia, business, organized labor, and environmental and consumer groups. This consensus of support for energy conservation exists because conservation:

Is already succeeding in a major way—it has saved the equivalent of 6 million barrels per day of oil;

Is the most cost-effective, least inflationary alternative to insecure oil imports;

Has significant potential, especially over the next decade—it can save the equivalent of 16 million barrels per day by 1990;

Involves the least uncertainty about its energy benefits;

Is regionally and socially equitable; and

Has little or no political opposition.

In spite of the existence of this broad consensus in favor of energy conservation, conservation receives only one-seventh of the financial incentives that are available to energy production.

The Congress faces a critical decision—whether the Government should interfere in energy investments. If all energy subsidies were abolished, price would be a neutral determinant in decisionmaking between energy options. However, if the Government continues to interfere in the market to increase energy security, it should redress the present serious imbalance in Federal financial incentives.

If large production incentives are continued, as it now appears will be the case, it will be necessary to establish a comprehensive energy conservation program to achieve a balanced energy policy.

I am thus happy to join with Senator TSONGAS in introducing this legislation which will expand the present energy conservation tax credits to commercial buildings and rental housing.

Improving the efficiency of our commercial sector is critical to our energy security as a Nation—and to Massachusetts where the many industries are not eligible for the existing tax credits.

By Mr. PERCY:

S.J. Res. 86. Joint resolution authorizing the President to proclaim the month of November, 1981 as "National REACT Month"; to the Committee on the Judiciary.

NATIONAL REACT MONTH

Mr. PERCY. Mr. President, I am today introducing a joint resolution requesting that the President designate the month of November 1981 as National REACT Month. REACT is an acronym which stands for "Radio Emergency Associated Citizens Teams."

The purpose of the resolution is to honor and recognize the efforts of citizens across the country who have volunteered as members of a REACT team. REACT is a volunteer organization which involves more than 200,000 Americans who, using their own CB radios, work in their local communities to insure highway safety and emergency communications. Countless lives are saved through their efforts.

Their work speeds the arrival of medical or other emergency help to the scene of an accident or a natural disaster. REACT also has a formal cooperative understanding with the American Red Cross, and many REACT members have been trained by the Red Cross in emergency first aid techniques.

REACT International, Inc., the nonprofit coordinating body for the local groups, is headquartered in Chicago, and I am especially proud of the countless Illinoisans who participate in the REACT program. By providing 24-hour monitoring of the airwaves, they have been invaluable in giving warning of tornadoes and blizzards in Illinois and in assisting law enforcement officials to get help quickly to the scene of accidents on Illinois highways. A National REACT Month will be a good opportunity for all of us to thank REACT members for their selfless contribution to our communities.

Mr. President, I ask unanimous consent that a fact sheet published by REACT International, Inc., and the text of the joint resolution be printed in the RECORD at this point.

There being no objection, the joint resolution and the fact sheet were ordered to be printed in the RECORD, as follows:

S.J. RES. 86

Whereas, through REACT (radio emergency associated citizens teams), two hundred thousand citizens participate as volunteers to provide highway safety and emergency communications using their own citizens band radios in their local communities; and

Whereas, the cumulative effort, totaling over fifty million volunteer man-hours this year, has resulted in the savings of many lives because of the greater speed with which medical aid reaches the scene of an accident or natural disaster: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to designate the month of November 1981 as "National REACT Month", during which all citizens shall take notice and be aware of the significant contribution every local REACT team makes to the welfare of its local community and the Nation as a whole.

FACT SHEET

1. REACT is an independent non-profit public service organization fully IRS approved to receive tax deductible contributions.

2. Since its establishment in 1962, the organization has grown to 1,500 Teams and 32,000 dues paid members. Teams are active in all 50 U.S. States, 9 Canadian Provinces, Puerto Rico, Virgin Islands, Guam, Australia, Philippines, South Africa, West Germany, Trinidad-Tobago and Venezuela.

3. REACT Teams agree to develop a 24-hour monitor system on Chanel 9, the official emergency channel of the Citizens Band Radio Service. All operations must comply with local, state and Federal regulations, particularly those governing radio operations.

4. Local REACT Teams provide volunteer service in behalf of highway safety, and maintain emergency communications in case of disaster. Community service activities of all kinds are served by REACT communications including Special Olympics, March of Dimes, and other significant local activities.

5. REACT members, Teams and Councils are protected under a $500,000 General Liability Insurance Policy, covering REACT activities.

6. REACT International has created a training program for emergency channel monitors under a contract awarded by the U.S. Department of Transportation, National Highway Safety Administration. Prepared for NEAR (National Emergency Aid Radio), the program includes a 34-minute film, plus texts for instructors and students.

7. Since 1962 REACT Teams have handled an estimated 85 million emergency calls including more than 20 million highway accidents.

8. A formal cooperative understanding exists between the American National Red Cross and REACT. A large percentage of REACT Teams have taken Red Cross First Aid training and provide emergency communications coordinated through their Red Cross Chapters.

9. Research on a two-year REACT program in cooperation with the Ohio State Highway Patrol has been published by the Transportation Research Board of the National Academy of Sciences. Projecting results in Ohio, REACT members provide over 21-million volunteer man-hours per year in public service activities.

10. Through REACT Safety Break Time (co-sponsored by American Trucking Associations) REACT Teams serve over 1,000,000 cups of coffee and other refreshments annually to holiday weekend travelers along the nation's highways.

ADDITIONAL COSPONSORS

S. 63

At the request of Mr. RANDOLPH, the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 63, a bill to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization.

S. 254

At the request of Mr. SCHMITT, the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 254, a bill to authorize public land States to select certain public lands in exchange for land taken by the United States for military and other uses, and for other purposes.

S. 270

At the request of Mr. SCHMITT, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 270, a bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain radio services and to provide certain deregulation of such radio services, and for other purposes.

S. 354

At the request of Mr. PERCY, the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of S. 354, a bill to amend the Export Administration Act of 1979.

S. 441

At the request of Mr. NUNN, the Senator from North Carolina (Mr. EAST) was added as a cosponsor of S. 441, a bill to provide limited assistance by the Armed Services to civilian drug enforcement agencies.

S. 546

At the request of Mr. RANDOLPH, the Senator from New Hampshire (Mr. RUDMAN) was added as a cosponsor of S. 546, a bill entitled the Fish Restoration Act of 1981.

S. 716

At the request of Mr. NUNN, the Senator from Texas (Mr. BENTSEN), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 716, a bill to amend the Federal Property and Administrative Services Act of 1949 to permit State and county extension services, and any State agricultural experiment station, to obtain excess property from the United States.

S. 732

At the request of Mr. NUNN, the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 732, a bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of justice.

S. 814

At the request of Mr. NUNN, the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 814, a bill to improve the administration of criminal justice with respect to organized crime and the use of violence.

S. 886

At the request of Mr. ANDREWS, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 886, a bill to authorize the President of the United States to present on behalf of the Congress a specially struck gold medal to Louis L'Amour.

S. 890

At the request of Mr. SCHMITT, the Senator from New Mexico (Mr. DOMENICI), and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of S. 890, a bill to amend title 5, United States Code, to improve procedures for the issuance of agency rules.

S. 921

At the request of Mr. SARBANES, his name was added as a cosponsor of S. 921, a bill to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes.

S. 1010

At the request of Mr. NUNN, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1010, a bill to protect taxpayers' privacy regarding third-party recordkeepers summoned to produce records of taxpayers and at the same time to insure effective, efficient enforcement of Internal Revenue Service third-party summons.

S. 1131

At the request of Mr. DANFORTH, the Senator from Idaho (Mr. SYMMS), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1163

At the request of Mr. NUNN, the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 1163, a bill to increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor.

S. 1188

At the request of Mr. HEINZ, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1188, a bill to authorize critical inland navigation improvement projects on the Monongahela and Upper Ohio River Waterways.

S. 1189

At the request of Mr. HEINZ, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1189, a bill to amend the Social Security Act to provide for a program of block grants for energy and emergency assistance, to establish a trust fund to which receipts from the windfall profit tax may be transferred to pay for such program, and for other purposes.

SENATE JOINT RESOLUTION 29

At the request of Mr. HEINZ, the Senator from Nebraska (Mr. EXON) and the Senator from West Virginia (Mr. ROBERT C. BYRD) were added as cosponsors of Senate Joint Resolution 29, a joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with the first Sunday in June of each year as National Garden Week.

SENATE JOINT RESOLUTION 64

At the request of Mr. SIMPSON, the Senator from Maryland (Mr. MATHIAS), the Senator from Maryland (Mr. SARBANES), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of Senate Joint Resolution 64, a joint resolution designating August 13, 1981, as National Blinded Veterans Recognition Day.

SENATE JOINT RESOLUTION 73

At the request of Mr. GLENN, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of Senate Joint Resolution 73, a joint resolution to designate the week beginning June 1, 1981, and ending June 7, 1981, as Management Week in America.

SENATE CONCURRENT RESOLUTION 14

At the request of Mr. HEINZ, the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of Senate Concurrent Resolution 14, a concurrent resolution expressing support for a further extension of our footwear orderly marketing agreement with Taiwan and Korea.

SENATE RESOLUTION 139

At the request of Mr. ANDREWS, the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of Senate Resolution 139, a resolution to assure the access of farmer-owned refining businesses to crude oil at reasonable prices.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER RESOURCES

Mr. ABDNOR. Mr. President, on June 8 the Subcommittee on Water Resources will begin 4 days of hearings into various aspects of national water resources policy. I believe these hearings will be most important ones, laying the groundwork for a major water resources bill later this year.

Because of the significance of these hearings, I ask unanimous consent that a press release issued by the Committee on Environment and Public Works be printed at this point in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD as follows:

PRESS RELEASE

The Subcommittee on Water Resources will conduct hearings on national water resources policy, including cost-sharing for harbor and inland waterway development, on June 8, 12, 16, and 18, Senator James Abdnor (R–S.D.) announced today.

"These hearings will examine the key aspects of our national water resources policy," Abdnor explained. Abdnor is the Subcommittee's chairman. "We expect that these hearings will establish a foundation that will enable the Subcommittee to report, later this summer, the first significant water resources bill since 1976."

The Subcommittee's ranking minority member is Senator Moynihan. Other Subcommittee members are Senators Domenici, Gorton, Murkowski, Bentsen, and Baucus.

The hearings on June 8 and 18 will provide an overview of existing water resources policy and water problems, including the extent of Federal responsibility, the adequacy of existing programs to meet future water needs, and such issues as whether the Federal government should participate in major urban water supply projects. Interior Secretary Watt and Assistant Army Secretary-designate Gianelli will be invited to testify on June 8. In evaluating bills such as S. 621, the Subcommittee will expect the Administration and other witnesses to discuss the following questions:

(1) Why has spending, in uninflated dollars, on water projects declined sharply in recent years, and what can or should be done to reverse that decline?

(2) Why does project development take so long, and what impediments to development can be removed?

(3) How can past commitments for water development be fulfilled in a fair and rapid manner?

(4) Should the states be involved to a far greater degree in project consideration and development. If so, how?

(5) How should priorities be established among various types of water projects?

(6) Should there be changes in cost-sharing requirement?

The June 12 hearing will focus on the issue of harbor development. In addition to the Administration's proposal, S. 809, and Printed Amendment No. 31, the hearing will consider S. 68, S. 202, S. 576, S. 828, and S. 1094. The Subcommittee will ask the witnesses to address the following issues:

(1) Is it necessary now to deepen coastal harbors to take advantage of foreign markets for coal and other bulk exports? If so, how can that be accomplished in the shortest possible time?

(2) Who should pay for the costs for dredging and maintaining deep harbor channels? Will cost-sharing, by itself, establish the necessary priorities? How will that affect competition among ports?

(3) If a system of full cost recovery were

in place, should the Federal government continue to study the feasibility of harbor improvements, and oversee construction?

The June 16 hearing will evaluate the subject of inland waterway development and user fees, including the Administration's bill, S. 810, and Printed Amendment No. 32. The Subcommittee will ask the witnesses to discuss the following questions:

(1) Would a system of user-fees related to expenditures damage the barge industry? Would it alter the competition among the various transportation modes? How would it relate to the selection of priorities for future waterway projects?

(2) If a user-fee system were implemented, what would be the fairest way to phase-in such fees?

Each of the four hearings will be held in Room 4200 of the Dirksen Senate Office Building. The June 8 hearing will begin at 2 p.m. Each of the others will begin at 10 a.m.

In accordance with the Senate rules, witnesses will be asked to file twenty-five copies of their testimony with the Committee at least 24 hours prior to their appearance. Those wishing to testify or to submit written statements for the record should contact Ms. Debbie Perry at (202) 224-7866.

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

Mr. PACKWOOD. Mr. President, on June 3 and 4, 1981, the Subcommittee on Taxation and Debt Management generally is conducting hearings on the question of tuition tax credits. The bill scheduled for hearings is S. 550, introduced by Senators PACKWOOD, MOYNIHAN, ROTH, and several other Senators.

The purpose of this statement is to briefly explain the issues raised by this bill. This may help you track the progress of tax legislation before the Taxation Subcommittee. It helps assure greater public awareness of tax bills coming before hearings.

TUITION TAX CREDITS—S. 550

S. 550, introduced by myself, Senator MOYNIHAN, Senator ROTH, and several other Senators, provides tuition tax credits for tuition payments.

The credit equals 50 percent of tuition, with a maximum credit of $500 per student per year. The credit is refundable.

The tuition tax credit is applicable to tuition paid to private elementary, and secondary institutions, grades 1 through 12; and also to college and vocational schools. To be eligible for the credit, the tuition must be paid to an institution that is exempt under Internal Revenue Code section 501(c)(3), and it must not exclude persons from admission or participation based on race, color, or national or ethnic origin.

The bill is phased in three stages. In stage 1, effective August 1, 1982, the maximum tuition tax credit per student per year is $250. The credit would apply to full-time undergraduate college and vocational school students, as well as elementary and secondary students.

In stage 2, effective August 1, 1983, the maximum credit is increased to $500 per student per year. In stage 3, effective August 1, 1984, the tuition tax credit is extended to graduate college and vocational students, and to students enrolled with at least a one-half time academic load.

Different versions of tuition tax credit bills passed both the House of Representatives and the Senate in 1978. However, the two Houses did not agree on a final version of the bill, and the legislation died at the end of the session.

The hearings on June 3 and 4 are scheduled for both the morning and afternoon. All witnesses timely requesting to testify were scheduled, fully representative of a wide range of viewpoints on the subject of tuition tax credits.

Mr. President, I request unanimous consent that the witness lists for these hearings be inserted in the RECORD following these remarks.

There being no objection, the lists were ordered to be printed in the RECORD, as follows:

COMMITTEE ON FINANCE—SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

WEDNESDAY, JUNE 3, 1981

9:00 a.m.

The Honorable Alfonse M. D'Amato (R.-New York).

The Honorable Gary Hart (D.-Colorado).

The Honorable John E. Chapoton, Assistant Secretary of the Treasury for Tax Policy.

A panel consisting of:

Dr. James Skillen, Executive Director, Association for Public Justice, Washington, D.C.

Dr. Eugene Linse, Chairman, Citizens for Educational Freedom, Washington, D.C.

Robert L. Smith, Executive Director, Council for American Private Education, Washington, D.C.

A panel consisting of:

David E. Landau, Legislative Counsel, American Civil Liberties Union, Washington, D.C.

Richard Gene Puckett, Executive Director, Americans United for Separation of Church and State, Washington, D.C.

Nancy N. Neuman, Social Policy Director, League of Women Voters of the United States, Washington, D.C.

Marilyn Braveman, Director of Education, The American Jewish Committee, New York, New York.

Joanne T. Goldsmith, Executive Director, National Coalition for Education and Religious Liberty.

1:00 p.m.

A panel consisting of (3 minutes each):

Helen Brice, Washington, D.C.

Barbara Fields, Washington, D.C.

Lydia Jones, Landover, Md.

Carmen Madden, Washington, D.C.

Richard Sylvester, Washington, D.C.

Frances Bell, Washington, D.C.

A panel consisting of:

Professor E. G. West, Carleton University, Ottawa, Canada, representing the Heritage Foundation.

Professor Frank Brown, DePaul University, Chicago, Illinois, and Chairman, National Association for Personal Rights in Education.

Dr. Harold Buetow, Catholic University, Washington, D.C.

Joel Sherman, Esq., National Institute of Education, Washington, D.C.

A panel consisting of:

Professor Bernard L. Weinstein, the University of Texas at Dallas, Richardson, Texas.

Walter Berns, Resident Scholar, American Enterprise Institute for Public Policy Research, Washington, D.C.

William Ball, Esq., Ball & Shelly, Harrisburg, Pa.

Antonin Scalia, Stanford University Law School, Stanford, CA.

A panel consisting of:

Hope Smith, President, Towson State University, representing the American Association of State Colleges and Universities, Washington, D.C.

Steve Leifman, National Director, Coalition of Independent College and University Students, Washington, D.C.

Dr. Melvin A. Eggers, Chancellor, Syracuse University, representing the National Association of Independent Colleges and Universities.

Dr. Peter J. Cayan, Jr., President, North Country Community College, New York, representing the American Association of Community and Junior Colleges, Washington, D.C.

Paul E. Bragdon, President, Reed College, Oregon, representing the American Council on Education.

THURSDAY, JUNE 4, 1981

9:30 a.m.

The Honorable T.H. Bell, Secretary of Education.

A panel consisting of [3 minutes each]:

Bill Sadler, Annapolis, Md.

Mona Hanford, Bethesda, Md.

Jacob I. Friedman, New York, New York.

Juanita Ramirez, Irving, Texas.

Wallace G. Tolman, Jr., Manassas, Va.

Joseph E. Horton, Leesburg, Va.

Rabbi Morris Sherer, President, Agudeth Israel of America.

Most Reverend James P. Lyke, O.S.M., Auxiliary Bishop of Cleveland, representing the United States Catholic Conference.

Dr. Jerry Falwell, President, The Moral Majority, Inc.

A panel consisting of:

Dr. Thomas Vitullo-Martin, Director of Research, Metroconomy, Inc., New York, New York.

Professor James S. Coleman, University of Chicago, Chicago, Illinois.

A panel consisting of:

Willard McGuire, President, National Education Association, Washington, D.C.

Dorothy Shields, Director of Education, AFL–CIO, also representing American Federation of Teachers, Washington, D.C.

Dr. Harold J. T. Isenberg, President, Federation of Catholic Teachers, A.F.T., AFL–CIO, New York, New York.

A panel consisting of:

Jack Clayton, American Association of Christian Schools, Normal, Illinois.

Rabbi Bernard Goldenberg, National Director, National Society of Hebrew Day Schools, New York, New York.

William Billings, Executive Director, National Christian Action Coalition, Washington, D.C.

Dr. Michael T. Ruiter, Executive Director, Christian Schools International, Grand Rapids, Michigan.

2:00 p.m.

A panel consisting of:

Joan E. Reinthaler, The Sidwell Friends School, Washington, D.C.

Rabbi Chaim Dov Keller, Administrator, Telsheyeshiva and Chairman, Educational Committee, Beth Jacob Elementary School, Chicago, Illinois.

Wallie Simpson, Founder, Lower East Side Community School, Inc., New York, New York.

Abigail Wiebenson, Assistant Head, Georgetown Day School, Washington, D.C.

A panel consisting of:

Jeanne S. Frankl, Chairman, Coalition of Citizens Against Tuition Tax Credits and Executive Director, Public Education Association, New York, New York.

Grace Baisinger, Chairperson, National Coalition for Public Education, Washington, D.C.

Lynne Ein, National School Boards Association, Washington, D.C.

A panel consisting of:

Kirby J. Ducote, Executive Director, Louisiana Federation, Citizens for Educational Freedom, New Orleans, La.

Mary M. Patnaude, Chairperson and Executive Director, New Jersey Right to Educational Choice Committee, Inc., Westfield, N.J.

Dr. Timothy O'Brien, Catholic League for Religious and Civil Rights.

Lydia Kess, Esq., representing the National

Jewish Commission on Law and Public Affairs.

A panel consisting of:

William P. Gallagher, Executive Director, New York State Federation of Catholic School Parents, Binghampton, New York, also representing the National Catholic Education Association, Washington, D.C.

Julius Berman, Esq., representing the Union of Orthodox Jewish Congregations of America, New York, New York.

James C. Phillips, Christian Schools of Michigan, Ypsilanti, Michigan.

J. Wayne Hammond, Accelerated Christian Education, Inc., Lewisville, Texas.

The Honorable Gary Ackerman, The Senate, State of New York.

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public, that the Subcommittee on Energy Conservation and Supply has scheduled hearings on S. 1166, the National Home Weatherization Act.

The hearings will be held on Wednesday, July 15, at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

ADDITIONAL STATEMENTS

INTERNATIONAL INVESTMENT SURVEY ACT AUTHORIZATION—S. 1104

● Mr. PRESSLER. Mr. President, S. 1104 authorizes $4 million for fiscal year 1982 for the International Investment Survey Act. A reauthorization hearing was held before the Subcommittee on Business, Trade and Tourism, which I chair, on April 9, 1981. Testimony was received from representatives of the Commerce and Treasury Departments which are responsible for carrying out the act.

It is my belief that the conditions which originally prompted passage of the International Investment Survey Act still exist. There is considerable concern within the U.S. business community about the level of foreign involvement in the American economy. This involvement has been increasing rapidly, and in some cases is viewed as a threat to specific American industries as well as the stability of U.S. financial markets.

A number of economists feel that should foreign economic holdings in this country become too extensive that we would be vulnerable to economic shocks in the event of sudden shifts in these holdings. For instance, the movement of massive amounts of foreign capital in or out of U.S. securities could result in dangerous instability in the stock market.

While the likelihood of a concerted effort to cause disruption is minimal, it is still important that we have the means to monitor foreign capital flows. This is why continuation of the International Investment Survey Act is necessary. It is our primary source of statistical data on the movement of foreign money through our economy, and without it we would only be able to guess at the relative size of foreign investments at any one time.

For the reasons I have mentioned I am pleased that the Senate approved S. 1104 as reported by the Senate Committee on Commerce, Science, and Transportation.●

STRATEGIC PETROLEUM RESERVE FUNDING MUST NOT STOP SYNTHETIC FUELS PROGRAM; MARVIN STONE EDITORIAL IS VALID

● Mr. RANDOLPH. Mr. President, in recent weeks during Senate consideration of the proposed budget, the question of how to fund the Strategic Petroleum Reserve surfaced as the primary budget issue in the energy area. This weekend, I read and responded to an editorial by Marvin Stone in June 1 issue of U.S. News & World Report.

I submit for the RECORD and I ask our colleagues to review this editorial, "Three Billion Well Spent," and my response to it which represents what one observer feels should be the proper role for this reserve as we attempt to reconcile domestic energy development with our future national security.

The editorial follows:

$3 BILLION WELL SPENT

(By Marvin Stone)

It's time to stop playing politics with the nation's Strategic Petroleum Reserve.

This costly but vital project is supposed to protect the U.S. against a sudden cutoff of foreign oil by stockpiling enough to tide us over an emergency. The danger of such a cutoff is very real, especially if the tension now building between Israel and Syria flares into a new Mideast war.

Despite compelling reasons, neither Congress nor the White House seems willing to spend the 3 billion dollars needed to purchase oil for the reserve in 1982. Unless the nation's leaders show more resolve, the oil-stockpiling program—already lagging badly—will fall further behind schedule.

The idea of a Strategic Petroleum Reserve grew out of the 1973–74 Arab oil embargo that forced American motorists to line up for gasoline and left the U.S. economy in shambles. In 1975, President Ford asked Congress to approve a billion-barrel stockpile, enough oil to replace the nation's import needs for 90 days. The first 500 million barrels were to be stored by 1982.

So far, only 135 million barrels have been stored in salt-dome caverns along the Louisiana-Texas coast. That would be about a month's supply if all imports were halted. The delays have been blamed on oil shortages, bureaucratic mismanagement and opposition from foreign oil producers.

Perhaps the most important reason, however, is the escalating cost of oil. The price of a 42-gallon barrel of oil has risen from $10.38 in 1975 to around $36 today. In 1975, a billion-barrel reserve was estimated to cost 6 billion dollars. Now, the estimate is 47 billion dollars for a scaled-down reserve of 750,000 barrels.

President Reagan, attempting to keep a campaign promise to build up the reserve, asked for 3.9 billion dollars for the program in 1982. That would have enabled the government to buy about 230,000 barrels a day.

However, under pressure to trim federal spending and move toward a balanced budget, both the House and Senate have voted to reduce appropriations for the reserve by 3 billion dollars next year on the assumption that members will agree on some other financing method.

There is a wide variety of alternate plans now floating around on Capitol Hill.

The Senate Energy Committee has voted to borrow the money by selling government bonds, a bookkeeping gimmick that would not show up in the regular budget.

Senator Nancy Kassebaum (R-Kans.) wants to force major oil importers to contribute five days' worth of imports each year to the reserve in exchange for a 10 percent fee.

Representative Phil Gramm (D-Tex.) has introduced legislation that would allow the government to sell "oil bonds" to private investors. Each bond would be worth the price of a barrel of oil and could be redeemed at the end of 10 years or during an emergency at the then prevailing price of oil.

Another scheme would allow the government to borrow the 3 billion dollars from the 17 billion earmarked for the new U.S. Synthetic Fuels Corporation.

Although both Treasury Secretary Donald Regan and Budget Director David Stockman have testified that a straightforward appropriation would be the best way to fund the reserve, the White House has remained strangely silent. Without leadership from President Reagan, there is a real danger that Congress will not be able to reach agreement on a plan for financing the reserve.

It may take a certain amount of political courage to spend 3 billion dollars on oil that may never be needed at a time when programs such as Social Security, school lunches and prenatal care are facing sharp cuts. But the consequences could be much worse—for the administration and Congress—if another catastrophic oil shortage ever sends Americans back to the gasoline lines.

U.S. SENATE,
Washington, D.C., June 3, 1981.

Mr. MARVIN STONE,
Editor, U.S. News and World Report, Washington, D.C.

DEAR MARVIN: Your thoughtful editorial, "Three Billion Well Spent" in the June 1 edition of U.S. News and World Report, is valid.

This Nation needs secure domestic supplies of fuel. Your words concerning the possibility of upcoming foreign supply interruptions because of renewed Mideast conflict are accurate. Such beliefs were also accurate in 1943 and in 1961. I spoke then in the House of Representatives and before the Senate Interior Committee emphasizing that, "every year that passes in which we become more and more dependent on foreign oil to buttress our economy and security perhaps is one year nearer to disaster. We are gambling with our country's future."

The concept of the Strategic Petroleum Reserve highlights our national preoccupation with minimizing the short-term effects of inadequate domestic energy supplies while failing to forge a policy to solve longer term problems.

Recognizing this fact, the Synthetic Liquid Fuels Act of 1944 was introduced and passed during the Roosevelt Administration. This legislation mandated development of new technology to produce ethanol, methanol and other liquid fuels from coal, oil shale, and agricultural products.

In 1955, the decision was made by the then current Administration to eliminate all government participation in alternate synthetic fuels projects. The assumption was that if needed, private industry would anticipate and respond that the country have adequate fuel supplies. If we had continued government support for synthetic fuels initiated in the early forties, as in my bill, we would have realized domestic commercial production today.

When the Strategic Petroleum Reserve concept was acted on in 1975 I refused to support that short-term effort until we had developed, as a first priority, legislation we could use to recreate a synthetic fuels industry in the United States and establish complete energy independence.

Passage of the Energy Security Act of 1980 sent the message to OPEC that we again were encouraging the construction of synthetic fuel plants, not only through subsidy support where needed to assure early commericialization, but through protection against unwarranted regulation and inflationary impacts. It also signaled domestic energy industries that we were asking for immediate action on synthetic fuels by allowing the President to initiate necessary activities to reach this goal under the Defense Producton Act of 1950 while the Synthetic Fuels Corporation was being organized.

It is important now that we do not take a step backward in our long-term national commitment to synthetic fuels. The President must appoint the final two members of the Corporation Board and provide personal leadership in the activities of the organization to guarantee its vitality.

If these steps are taken by the new Administration on synthetic fuel development, full funding of the Strategic Petroleum Reserve will be a necessary and correct secondary step to take. Filling the oil reserve will guard against supply interruptions while our synfuels capacity is being constructed. We, however, can not use funds set aside for synthetic fuel development to purchase foreign oil. To borrow three billion dollars from appropriations for the Synthetic Fuels Corporation would erode public confidence in the government's ability to establish and consistently pursue policies to assure eventual and permanent energy independence. Such a funding scheme would be unacceptable.

A coordinated and balanced program encouraging an oil reserve and synthetic fuels industry will serve our Nation well. Neither are subsidies, but are investments for our future generations.

Truly,

JENNINGS RANDOLPH.●

REGULATORY REFORM NEEDED NOW

● Mr. SASSER. Mr. President, I rise to reiterate my suport for S. 1080, the Regulatory Reform Act of 1981. This bill can help stop the Federal Government from strangling the "free" out of the free enterprise system.

In 1982, the Federal Government will spend almost $7.5 billion on regulatory activties and will employ 89,000 people to administer Federal regulations.

And what has the burgeoning regulatory structure wrought? Well, in 1980, the Small Business Administration estimated that the Nation's private entrepreneurs waded through 2,000 separate forms, and filled out 850 million pages of paper answering more than 7.3 billion questions.

The effect? Well, let me give you just a couple of examples that have occurred in my home State of Tennessee.

For the past 20 years, Jakes Brothers Sausage Co. in Joelton, Tenn., has called the delicious product it makes "smoked pork sausage." That seemed quite reasonable, considering the fact that the product is made by smoking pork sausage. However, in one of the most patently ridiculous examples of regulatory excesses imaginable, the U.S. Department of Agriculture has decreed a change in the labeling. Henceforth, the label must read: "smoked sausage made with pork."

Now, I cannot believe that the USDA employs personnel who have nothing better to do than come up with absurd label changes. Yet there it is: USDA Regulation No. 319.160.

The point is this. The history of Tennessee does not record any irreparable harm being suffered by our citizens from the labeling of our hickory-smoked pork sausage as smoked pork sausage. In fact, the old name makes perfect sense considering the contents of the product.

Ellis Jakes, of Jakes Brothers Sausage, told me that he does not feel it will be an expensive matter to change the label on his sausage. Yet, as a matter of principle, he challenges the Department of Agriculture's right to require such a change.

And his story is, it seems to me, a good case of history of the problems caused by over regulation.

Another example was the attempt 2 years ago by the Department of Labor to require employees of Southern Clay, Inc., in Paris, Tenn., to take mine safety training. None of the 250 employees of Southern Clay, Inc. ever even come close to any mines.

Although the company owns three clay mines, the mining is done by independent subcontractors who employ a total of 12 persons.

Not only was the requirement that the Department of Labor give mine safety training to its employees unwarranted, costly, annoying, and downright absurd—but also, to add insult to injury, the Department of Labor insisted that the employees must have annual refresher training as well.

Fortunately, these regulations were never finally imposed after my intervention with the agency on behalf of Southern Clay, Inc. If they had been, the company would have been forced to spend a great deal of money to train its employees with the cost passed on to the consumer in the form of higher prices for the kitty litter.

Examples like these raise my hackles. I believe that S. 1080, for the most part, represents a constructive approach to doing away with ridiculous cases like these, thereby improving the regulatory system.

There are some things I would like to see added to this bill, however. First and foremost is the question of effective congressional control of the rulemaking process. S. 1080 should be amended to include a legislative veto provision drafted along the lines of S. 344, which I am cosponsoring with Senators LEVIN and BOREN and several other of my colleagues. The Congress has the duty to comment on the interpretation by the Federal agencies of the laws that we spend so much time shaping. It is our responsibility to oversee agency rulemaking so that it will not contravene legislative intent.

As the ranking minority member of the Subcommittee on Intergovernmental Relations, I am also particularly aware of the impact of the more than 1,200 Federal regulations imposed on State and local governments.

Why, for example, should the Environmental Protection Agency tell folks in Chattanooga, Tenn., that their garbage trucks are making too much noise? People in Chattanooga have ears. If the trucks bother them, they will bring their concerns directly to the mayor.

Yet, the EPA has seriously considered setting noise emission standards for garbage trucks in Chattanooga and other cities across the Nation. The cost? About $25 million a year. And are there alternatives the EPA hasn't considered?

Yes, indeed. For instance, the garbage trucks could alter their schedules so that they are not routed through residential neighborhoods in the early morning hours. This certainly seems more sensible to me than the expensive soundproofing of garbage trucks.

Now, I understand that the enforcement of the EPA garbage truck regulation has been suspended following a meeting between the agency and the garbage truck manufacturers. That means that, though the regulations still remain on the books, the manufacturers of garbage trucks need not comply. Yet, this is but a "stopgap" measure which gives EPA time to reconsider its noise control objectives in light of significant budgetary cutbacks this year.

Steps must be taken to improve a regulatory system that allows such ridiculous regulations to be imposed on business and on other levels of government. I believe that S. 1080, the regulatory reform act of 1981, is an excellent vehicle, building on democratic regulatory reform initiatives of the 96th Congress, for streamlining our regulatory system.

I urge the Judiciary and Governmental Affairs Committees to take early action on S. 1080.●

U.S. TRAVEL SERVICE AUTHORIZATION—S. 1105

● Mr. PRESSLER. Mr. President, S. 1105, a bill to reauthorize the U.S. Travel Service, was reported by the Committee on Commerce, Science, and Transportation on May 6, 1981, without amendment. This reauthorization must be approved if the activities of the U.S. Travel Service are to be continued.

Beginning with the International Travel Act of 1961, the Federal Government has supported efforts to promote foreign travel to the United States. Through the U.S. Travel Service the Federal Government has operated programs in several foreign countries to disseminate information on attractions and travel opportunities in the United States. The purpose of the travel sevice is not to advertise or promote individual businesses, but to foster interest in the great variety of geographic and cultural attractions which specific regions of the United States have to offer. The U.S. Travel Service has generally produced a large financial return from these activities. Depending on the figures used, the Travel Service returns between $10 and $20 dollars for each dollar spent on its promotional efforts. And this does not take into account the multiplier effect of these foreign expenditures as they work their way through the U.S. economy.

Both visitor arrivals and tourism expenditures have grown rapidly in the United States and worldwide over the past several years, and I am hopeful this

trend will continue. In 1980 it is estimated that foreign travelers spent some $12 billion in the United States, up from $10 billion in 1979. This has resulted in tourism receipts becoming one of the principal contributors to our foreign trade income.

However, we must realize that during the past few years many international travelers have been drawn to the United States by the dual attraction of low international air fares and very favorable exchange rates. These two situations are now changing and will be working against us in the future. This means that if the United States is to continue to garner its share of the international tourist dollar we will have to improve our promotion and facilitation efforts.

Unfortunately, this is not the direction in which we have been heading. Federal assistance to the tourism industry has declined sharply since 1979, with the budget of the U.S. Travel Service falling from $13.5 million to $8 million in 1981. The Reagan administration has proposed another decrease to $6.5 million for fiscal year 1982.

It has been, and continues to be the position of the Senate that more should be done by the Federal Government in the area of tourism promotion. The travel and tourism industry provides direct employment for 4.4 million Americans and indirectly accounts for another 2.2 million jobs. The industry contributes $140 billion to the U.S. economy each year. Yet despite these facts, few administrations have offered their firm support for this function.

In an effort to change this situation the Senate Commerce Committee spent 5 years and $250,000 conducting a national tourism policy study. This extensive research project made a number of conclusions about what would be the best ways for the Federal Government to foster growth in the tourism industry. These recommendations were incorporated in the National Tourism Policy Act which was passed by the 96th Congress in 1980 (S. 1097). However, the measure was pocket vetoed by President Carter.

The act, as passed, called for the creation of an independent agency within the Federal Government which would replace the U.S. Travel Service as the tourism promotion arm of the Federal Government. It was felt that the insulation provided by this independent status would result in a more autonomous, aggressive, and effective organization.

The measure also called for the creation of a Cabinet level coordinating council to monitor and make recommendations on the many disparate activities of Federal agencies which have an impact on the travel and tourism industry. The national tourism policy study had found that there existed over 100 programs within the Federal establishment which had a significant bearing on the industry, but for which there was no coordination regarding their impact on the travel and tourism industry. The committee felt it was very important that such a coordinating council be created to act as an advocate for travel and tourism within the Federal Government. Unfortunately, this provision was dropped in conference with the House during final discussions of S. 1097 and was not in the bill sent to President Carter.

Early in the 97th Congress, I introduced S. 304, a bill which is virtually identical to S. 1097 as it went to the President. This bill passed the Senate unanimously on January 27, 1981. While enactment of this legislation remains my primary goal, I realize that if it is not enacted then we must have an alternate plan. That is why I introduced this reauthorization. It will insure that the Federal Government's role in international tourism promotion continues even if the new system I am advocating does not become a reality.

This reauthorization, then, should be viewed as a backup measure whose purpose is to insure continuation of a Federal role in tourism in the event that the preferred legislation, S. 304, is not enacted. Therefore I am pleased the Senate acted favorably on S. 1105.●

VIETNAM VETERANS APPRECIATION WEEK

● Mr. SASSER. Mr. President. Claiborne County, Tenn., recently approved a resolution declaring the week of May 25 through 31, 1981 as Vietnam Veterans Appreciation Week. I commend Claiborne County for its initiative in recognizing the brave veterans of the Vietnam era.

For too long, Mr. President, Vietnam veterans have been forgotten. They are the veterans who were lost in a sea of domestic upheaval upon returning home from an unpopular war; their sacrifices and contributions were lost as the Nation tried to forget the fighting brought into their own homes by television.

It is altogether fitting, however, that the Nation, and in particular this body, begin to bridge the gap that sets Vietnam veterans apart. We began this process during the 96th Congress, when we approved legislation permitting a Vietnam Veterans Memorial to be built in Constitution Gardens. We are continuing the process by voting increased appropriations to the Veterans' Administration.

But more remains to be done before the wound is completely healed. Specifically, we must recognize the special problems facing the Vietnam veterans readjustment counseling program. I have cosponsored legislation, by the able Senators from California (Mr. CRANSTON) and Rhode Island (Mr. CHAFEE), which would accomplish these goals. We must not be a party to any attempt to break faith with the Vietnam veteran, and I look to the Senate to approve Senate printed amendment No. 42 and S. 872 in the near future.

I ask that Claiborne County's resolution designating Vietnam Veterans Appreciation Week be printed in full following my remarks.

The resolution follows:

PROCLAMATION

Know all Claiborne Countians by these presents:

That whereas, all Claiborne Countians are justly proud of the glorious heritage passed on to them by their forebears since the earliest settlers came into what is now Claiborne County, Tennessee;

And whereas, a noble aspect of the heritage is, and has always been, the willingness of our forebears and their descendants to take up arms in defense of their homes, their families, their communities, and their country when honor and duty made such a course of action necessary;

And whereas, the citizens of Claiborne County have continued with unabated cost and fervor to carry on this tradition through all of our wars and conflicts, up to and including the most recent hostilities in Vietnam and adjacent areas in Southeast Asia;

And whereas, the citizens of Claiborne County are especially proud of the courage, dedication, devotion to duty, and sacrifice of our young fighting men during the aforesaid Vietnamese conflict, in which we feel that they honorably carried on this noble tradition, and in which some gave their lives, and others still bear the horrible physical and mental scars of war;

And whereas, both during and after the aforesaid Vietnamese conflict, the citizens of Claiborne County have witnessed the sickening spectacle in certain quarters of our Nation of a lack of understanding of the sacrifices being made by our fighting men, and a lack of appreciation for their willingess to serve their country, which lack of understanding and appreciation, in many instances, manifested itself in abuse of, and contempt for, these noble young men and their dedication to honor and duty;

And whereas, the citizens of Claiborne County deplore the aforesaid treatment of our Vietnam veterans and firmly believe that we should express our sentiments by publicly honoring and paying tribute to these noble young men and the memory of those who gave their lives;

And whereas, Claiborne County Memorial Post No. 8779 of the Veterans of Foreign Wars, of the Department of Tennessee, and the ladies auxiliary of said post, have embarked upon a campaign to honor our Vietnam veterans, in which campaign they have requested the support of the governing bodies of our county and municipalities, all public officials of our county, and all citizens of our county, to assist in this endeavor;

Now, therefore, for the reasons hereinabove set forth, and pursuant to the aforesaid unanimous resolution of the county commission of Claiborne County; the endorsement of the county and municipal officials of Claiborne County; and the enthusiastic and whole-hearted support of the entire citizenry of Claiborne County, we, the undersigned, do hereby declare the week of May 25 through May 31, 1981, as Vietnam Veterans Appreciation Week in Claiborne County, Tennessee, and the municipalities therein,

We further call upon all citizens of Claiborne County, especially this week and in the future, to express their personal appreciation in every way possible to these noble veterans and their families, and to the families and relatives of those who gave their lives.

We further call upon all of the citizens of Claiborne County to assist Claiborne County Memorial Post No. 8779 of the Veterans of Foreign Wars, and the ladies auxiliary of said post, in compiling a roster of all Claiborne Countians who served in the Vietnamese conflict, in order that said roster can be given its rightful place of honor in our county's public records, and be indelibly engraved in the hearts and minds of all our citizens who treasure our freedom, and appreciate all of the efforts of our Vietnam veterans in furthering same.

We further call upon all of the news media in our county and our surrounding areas to widely publicize the proclamation, and join with us in paying tribute to our Vietnam veterans during this special week.

In testimony whereof, we, the undersigned, have herewith set our hands and seals upon this the 19th day of May, 1981.

Bill D. Herst, County Executive, Charles "Bud" Chadwell, Mayor, Town of New Tazewell, E. J. Hardin, III, Mayor of the Town of Tazewell, James D. Estep, Jr., Attorney, Town of New Tazewell, Bob Owen, City Recorder, Treasurer, City Judge, Town of Cumberland Gap.●

CONCLUSION OF MORNING BUSINESS

Mr. STEVENS. Mr. President, is there further morning business?

The PRESIDING OFFICER (Mr. HAYAKAWA). If there is not, morning business is closed.

BORROWING AUTHORITY FOR THE DISTRICT OF COLUMBIA

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate Calendar No. 104, S. 640.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 640) to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect to the borrowing authority of the District of Columbia.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 138

Mr. STEVENS. Mr. President, on behalf of Mr. MATHIAS I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. MATHIAS, proposes an unprinted amendment numbered 138.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 3, between the words "That" and "section" insert: "(a)".

On page 2, after line 5, insert the following:

(b) Section 723(c) of the District of Columbia Self-Government and Governmental Reorganization Act (Public Law 93-198) is amended to read as follows:

"(c) Subject to the limitation contained in section 603(b), there are authorized to be appropriated not more than $155,000,000 per year for fiscal years 1982 and 1983; and, to the extent that funds appropriated for this purpose exceed $145,000,000 per year for the fiscal years 1982 and 1983, such excess funds shall not be apportioned by the Office of Management and Budget nor shall such funds be made available for obligation for this purpose unless such appropriation act shall explicitly and specifically provide that such obligation limitation as is hereby created does not apply."

(By request of Mr. STEVENS, the following statement was ordered to be printed in the RECORD:)

● Mr. MATHIAS. Mr. President, today I am pleased to bring before the full Senate a bill which will enable the District of Columbia to proceed with its long-term plan to insure financial stability for the city.

Briefly, S. 640 would extend the borrowing authority of the District for 2 years to allow the city to move into the capital bond market without interrupting important ongoing construction and repair projects. The borrowing authority will be capped at $155 million in fiscal year 1982, as requested by President Reagan, and the Governmental Affairs Subcommittee on Governmental Efficiency and the District of Columbia received no unfavorable testimony during consideration of the bill.

On May 11, 1981, I received a letter from the Office of Management and Budget commenting on S. 640 with suggested changes in the procedure by which the city borrows from the Treasury. After discussions with the Office of Management and Budget and a review of the history of the city's borrowing, I feel it appropriate that these modifications be considered during hearings before my subcommittee, tentatively scheduled in late June.

Under current law, the District of Columbia may borrow such funds as are necessary to complete improvement projects for which construction and construction services funds were authorized or appropriated prior to October 1, 1980, or the date of enactment of the D.C. Appropriation Act of 1981, whichever is later. S. 640 extends this authority for 2 years. This interim authority is necessary to allow the city a smooth entry into the bond market.

The first full audit of the city's books has just been completed and the way is now paved to begin the change to financing with revenues from capital bonds. To delay or abandon important construction and repair projects would be a disservice to all who live and work in our Nation's Capital, as well as those who visit here each year. S. 640 will insure that this does not occur.

The Governmental Affairs Committee is adding a technical amendment to S. 640 which will bring the bill in line with President Reagan's budget for fiscal years 1982 and beyond. The amendment specifies that the loan authority granted in S. 640 is capped at a level of $155 million in budget authority and $145 million in outlays, in both fiscal year 1982 and fiscal year 1983. The Governmental Affairs Committee has already made this recommendation to the Budget Committee to be included in its reconciliation package. The technical amendment merely conforms S. 640 with the Governmental Affairs Committee reconciliation proposals to assure the savings are not nullified sometime in the future.●

Mr. FORD. Mr. President, I understand the amendment by the distinguished Senator from Maryland (Mr. MATHIAS) is a technical amendment and has been agreed upon, and there is no objection on this side.

Mr. STEVENS. I thank the Senator from Kentucky.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland.

The amendment (UP No. 138) was agreed to.

The bill, as amended, was ordered to be engrossed for a third reading, was read the third time, and passed as follows:

S. 640

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 723(a) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code. sec. 47-241 note) is amended by striking out "October 1, 1980, or upon enactment of the fiscal year 1981 appropriation Act for the District of Columbia government" in the first sentence and inserting in lieu thereof "October 1, 1982, or upon enactment of the fiscal year 1983 appropriation Act for the District of Columbia government.".

(b) Section 723(c) of the District of Columbia Self-Government and Governmental Reorganization Act (Public Law 93-198) is amended to read as follows:

"(c) Subject to the limitation contained in section 603(b), there are authorized to be appropriated not more than $155,000,000 per year or fiscal years 1982 and 1983; and, to the extent that funds appropriated for this purpose exceed $145,000,000 per year or the fiscal years 1982 and 1983, such excess funds shall not be apportioned by the Office of Management and Budget nor shall such funds be made available for obligation for this purpose unless such appropriation act shall explicitly and specifically provide that such obligation limitation as is hereby created does not apply.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR THE COMMITTEE ON ARMED SERVICES TO HAVE UNTIL 7 P.M. TODAY TO FILE REPORT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Armed Services have until 7 p.m. today, Wednesday, June 3, to file certain routine nominations and to file a report to accompany S. 1127, the Intelligence authorization bill for fiscal year 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

GRANTS BY THE VETERANS' ADMINISTRATION IN SUPPORT OF STATE MEDICAL SCHOOLS

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 2156.

The PRESIDING OFFICER laid before the Senate H.R. 2156, an act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended, which was read twice by its title.

The Senate proceeded to consider the bill.

(By request of Mr. FORD, the following statement was ordered to be printed in the RECORD:)

● Mr. GLENN. Mr. President, I want to express my thanks to the Committee on

Veterans' Affairs for its persistence in obtaining passage of a measure that is very simple, yet quite important. I refer to H.R. 2156, a measure identical in purpose to a bill (S. 380) that I have introduced. A similar provision has been ordered reported by the Committee on Veterans' Affairs. I might add that the Senate, last year, twice approved similar provisions, though they failed to be enacted.

In 1972, Congress established a program by which the Veterans' Administration could assist the establishment of no more than eight new State-affiliated medical schools. In actuality, five such schools were started under the program. The first of these was the Wright State University School of Medicine near Dayton, Ohio, which is associated with the VA Medical Center there. It, like the other schools, was authorized grant assistance for the alteration or repair of physical facilities and for faculty support during the first 7 years of its existence.

In the case of Wright State, that 7-year period will have run its course at the end of this month and the university will be left with unexpended grant funds. It will lack authority to spend those funds unless this measure is enacted.

Unanticipated delays in completing the faculty rosters in the earliest days of the Wright State Medical School's existence gave rise to this situation. In effect, Wright State now is facing a possible penalty for having exercised prudence in the expenditure of its grant awards. And the possibility exists that at least one or two of the other four medical schools that were established under Public Law 92–541 might also face this same problem further down the road.

Passage of this bill will extend by 12 months the time in which these medical schools can expend their grant awards for faculty support. It will authorize no new appropriations. Nor will it appropriate any additional funds. All that it will do is to help these schools adjust to termination of their grant programs.●

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONSTITUTION FOR THE U.S. VIRGIN ISLANDS

Mr. WEICKER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Joint Resolution 238.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (H.J. Res. 238) to approve a constitution for the United States Virgin Islands.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut?

There being no objection, the Senate proceeded to consider the bill (H.J. Res. 238) to approve a constitution for the U.S. Virgin Islands, which had been reported from the Committee on Energy and Natural Resources with amendments as follows:

On page 2, line 4, after "approved" insert "for submission to the people of the Virgin Islands in accordance with the provisions of Public Law 94–584 (90 Stat. 2809)";

On page 3, line 5, strike "the" and insert "due";

On page 9, line 5, strike "descendent" and insert "descendant";

On page 39, line 12, strike "Senate" and insert "legislature";

On page 40, line 6, strike "VIII" and insert "VII";

On page 41, in the signature clause strike "Ruby Simmonds, Vice" and insert "Ruby Simmonds, 1st Vice":

Mr. WEICKER. Mr. President, at the heart of the American experience is the principle of government by the consent of the governed. House Joint Resolution 238 expresses the consent of the Congress to the implementation of that principle in the Virgin Islands.

Since the Virgin Islands were acquired from Denmark, there has been a constant growth of local self-government. The Organic Act of 1936 and the revised Organic Act of 1954 placed increasing responsibility for local government in the hands of the U.S. citizens residing in the Virgin Islands. With the passage of the Elective Governor Act in 1968, the Virgin Islands became self-governing except for one basic fact. That fact is that their self-government was not a product of their wishes and desires, expressing their hopes and aspirations, but was a product of what the Federal Government determined would be best.

For local government to be truly self-government, it must be the result of the people themselves, pursuant to a constitution of their own design. This resolution, quite properly, does not express any opinion as to the merits of any provision of the constitution. That decision is reserved for the people of the Virgin Islands, as it should be. The resolution quite simply states that the constitution meets the requirements of the original authorization. It acknowledges the sovereignty of the United States and the supremacy of the U.S. Constitution.

It provides for a republican form of government and a bill of rights. It addresses the subject matter of local government provisions of Federal law. The judgment on how those requirements were met is now up to the people of the Virgin Islands. The committee has adopted an amendment to clarify that Congress is reserving to the people of the Virgin Islands the final decision on the constitution and several technical changes recommended by the convention.

Mr. President, the members of the Fourth Virgin Islands Constitutional Convention should be commended for their efforts and dedication. I urge the Senate to approve the joint resolution with the committee amendments so that the U.S. citizens residing in the Virgin Islands may enjoy true local self-government.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, House Joint Resolution 238, as reported by the Committee on Energy and Natural Resources, expresses the consent of the Congress to the submission of the fourth constitution of the Virgin Islands to the voters in the Virgin Islands for approval or rejection in accordance with the provision of Public Law 94–584.

The constitution was developed pursuant to the authorization of Public Law 94–584 by a local constitutional convention and submitted to the President for review and comment on August 26, 1980. The President transmitted the constitution to the Congress on October 25, 1980. In order to afford the Congress sufficient time to review the constitution for procedural compliance with the requirements of the authorization, the period for review was extended by section 501 of Public Law 96–597.

House Joint Resolution 238 was considered and approved by the House and was the subject of a hearing before the Committee on Energy and Natural Resources on May 8, 1981. As a result of that hearing and the committee review, the committee unanimously ordered the measure favorably reported on May 12, 1981, with technical amendments to correct typographical errors noted by the convention and to clarify that the congressional approval is procedural only and does not constitute enactment of the constitution nor any opinion as to the merits of any provisions.

This congressional review is important not only because the constitution places the plenary authority and responsibility for territorial affairs in the Congress, but because constitutional government is at the heart of the American experience. The efforts of the U.S. citizens in the territories to develop local self-government should receive congressional recognition and support.

In reviewing the document it was necessary to strike a careful balance between the desires of the local population and the continuing responsibility of the Congress. There are aspects of this constitution which I might not support were they proposed as Federal law, but they are not being so proposed. The Congress in approving the constitution will not be enacting it into law but will be consenting to permit it to be put before the voters in the Virgin Islands for final judgment. That is where the merits of this constitution should be judged.

The development of institutions and processes of local self-government has been the purpose of organic legislation for the territories since the northwest ordinance. In the Virgin Islands, organic legislation since 1917 has placed increasing control over local government in the hands of the U.S. citizens residing there. The most recent developments, such as the elective governor, were in large measure a response to the desires of the Virgin Islands, and to the recommendations of the first constitution of the Virgin Islands. The final step, as provided by Public Law 94–584, is to permit the Virgin Islands to formulate a constitution as the basic document for local self-government.

Approval of the constitution will not affect the status of the Virgin Islands as an unincorporated territory of the

United States, nor lessen the plenary authority and responsibility of the Congress for the Virgin Islands. It will represent, however, a commitment by the Congress to not exercise its authority in the future on matters of local government. To that end I have requested the administration to provide a drafting service to identify those provisions of Federal law affecting local government in the Virgin Islands which must be repealed before the constitution can become fully effective. It is my intention to consider those repeals expeditiously so that there will be no hiatus between the effective date of constitution and the removal of Federal law.

I congratulate the members of the convention for their dedication and their efforts. It is an exceedingly difficult job to balance competing interests, as the experience of the third constitution demonstrates. While, as I indicated, I might not agree with all their conclusions, I will respect their judgment.

Federal relations and ultimate status remain as issues for future discussion and are not foreclosed by this constitution. Those issues involve different considerations and require the active participation and specific consent of the Congress. This constitution should be the product of the people of the Virgin Islands and I believe we should defer to them. On questions, however, of status or Federal relations, I believe we should not attempt to avoid the responsibilities imposed on the Congress by the constitution, although we should be sympathetic to local wishes.

Last Congress, I cosponsored an amendment with Senator JOHNSTON, Senator JACKSON, and Senator MATSUNAGA which would have established a 4-year commission to examine the entire body of Federal law which constitutes Federal relations, that is, the allocation of authorities and responsibilities between the Federal and local government. I continue to believe that such a comprehensive review is essential. I am concerned that too often questions of Federal relations, such as environmental laws or coastwise legislation, become wrapped in the rhetoric of status. I would hope the Virgin Islands can avoid that.

Acceptance of this constitution by the voters in the Virgin Islands will make the territory self-governing. That is an important step and again I congratulate the members of the convention for their efforts.

Mr. President, I strongly support House Joint Resolution 238 and urge its passage.

● Mr. JOHNSTON. Mr. President, I strongly support the passage of House Joint Resolution 238 as amended by the Committee on Energy and Natural Resources. In 1976 I cosponsored the original legislation which authorized the convening of a constitutional convention in the Virgin Islands. That legislation was the direct result of the efforts of Congressman RON DE LUGO, with the effective support of the leadership in the Virgin Islands. It was their request that the Congress entrust to the U.S. citizens residing in the Virgin Islands the basic decisions in the institutions and processes of local self-government. I think that trust has been well rewarded.

Although I would not agree with every provision of the constitution, it does represent the judgment of the delegates to the convention. The ultimate decision will be with the voters in the Virgin Islands and their decision will be respected.

Over the past several years, I have had the pleasure of working with a great many individuals from the Virgin Islands including former Governor Paiewonsky, Congressman RON DE LUGO, and others for whom I have the highest respect and admiration. It has been their leadership and representation which forms the true basis for the development of constitutional self-government. Whatever the final decision of the people of the Virgin Islands may be, I think they, and we, can take pride in the importance and judgment which our fellow citizens in the Virgin Islands have exercised.

In addition to Congressman RON DE LUGO, the original sponsor of this resolution, a special commendation is owed to the members of the convention. During the committee hearings I was impressed by the delegates who testified. The president of the convention, Rupert Ross, Judge Henry Feuerzeig, Ruby Simmonds, and Bent Lawaetz, together with Alexander Farrelly, the counsel to the convention, demonstrated that the Congress' trust in the Virgin Islands was not misplaced. Mr. John James, another delegate, eloquently pointed out that drafting a constitution is not an easy process and that our fellow citizens in the Virgin Islands will have many issues to consider.

Mr. President, I agree with the comments made by the chairman of the committee and I urge the favorable consideration of this resolution.●

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, the minority has no objection, and we are delighted to support the joint resolution. We suggest we move to passage.

Mr. WEICKER. Mr. President, are there committee amendments that have to be agreed to at this time?

The PRESIDING OFFICER. Does the Senator wish that the amendments be agreed to en bloc?

Mr. WEICKER. The Senator so requests.

The PRESIDING OFFICER. Without objection, the committee amendments are agreed to en bloc.

The committee amendments were agreed to en bloc.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the joint resolution.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution (H.J. Res. 238) was read the third time, and passed.

The preamble was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. FORD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECESS UNTIL 11 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 11 a.m. tomorrow.

There being no objection, the Senate, at 5:23 p.m., recessed until Thursday, June 4, 1981, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate June 3, 1981:

DEPARTMENT OF DEFENSE

Russell D. Hale, of Virginia, to be an Assistant Secretary of the Air Force, vice Charles William Snodgrass, resigned.

COMMODITY CREDIT CORPORATION

Richard E. Lyng, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice James H. Williams, resigned.

Frank W. Naylor, Jr., of California, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice Malcolm Rupert Cutler.

Mary Claiborne Jarratt, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice Carol Tucker Foreman.

DEPARTMENT OF ENERGY

J. Erich Evered, of Nevada, to be Administrator of the Energy Information Administration, vice Lincoln E. Moses, resigned.

HOUSE OF REPRESENTATIVES—*Wednesday, June 3, 1981*

The House met at 12 o'clock noon.

The Reverend Howard Roberts, pastor, Broadview Baptist Church, Temple Hills, Md., offered the following prayer:

Almighty God, grant us peace and justice for our time and all times. When peace and justice are not known in our minds, felt in our hearts, and at work in our hands and feet, bitterness and prejudice prevail, with oppression and injustice for all.

May peace be more than a word, may it be our character. May we be makers of peace in home, in community, and in the world.

May justice be more than a deed; may it be our motivation. May we be practitioners of justice in our work and in our leisure.

May we develop wisdom, courage, and strength which will enable us to rise above special interest, party strife, and selfish nationalism to act out of concern for all humankind.

May our every word and deed cause justice to flow like a river and mercy like an everlasting stream. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agreed to the following resolution:

S. Res. 120. Resolution disapproving the proposed deferral of budget authority for Veterans' Administration medical care.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1040. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia;

S. 1050. An act to extend the authorization of appropriations for the National Historical Publications and Records Commission for the fiscal years 1982 and 1983;

S. 1104. An act to amend the International Investment Survey Act of 1976 to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes;

S. 1105. An act to amend the International Travel Act of 1961 to authorize appropriations for fiscal year 1982, and for other purposes;

S. 1116. An act to authorize appropriations for the international affairs functions of the Department of the Treasury for fiscal year 1982;

S. 1209. An act authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes;

S. 1210. An act amending the Environmental Quality Improvement Act of 1970;

S. 1211. An act to extend the Toxic Substances Control Act for 1 year; and

S. 1213. An act to amend title I of the Marine Protection, Research, and Sanctuaries Act, as amended.

THE REVEREND HOWARD WALLACE ROBERTS

(Mrs. HOLT asked and was given permission to address the House for 1 minute.)

Mrs. HOLT. Mr. Speaker, my colleagues, it is an honor and a privilege to be able to introduce and present to you the Reverend Dr. Howard Wallace Roberts.

Dr. Howard Roberts is the pastor of the Broadview Baptist Church in Temple Hills, Md., in the Fourth Congressional District which I am honored to represent.

Dr. Roberts is here with us today as we witness the swearing-in of our newest Member of Congress, Steny Hamilton Hoyer, who will represent Maryland's Fifth Congressional District.

Dr. Roberts has been a trusted friend and counselor to Steny and Judy Hoyer over the years so it is very fitting that he offer his beautiful prayer today as Steny begins his service to his district.

Dr. Robert has served 4 years at Broadview Baptist and has built a foundation in his community of a profound and heartfelt cooperation among all faiths and peoples. In tribute to his strong leadership in this area he was recently elected president of the Interchurch Club of Washington, D.C. Dr. Roberts has with him today his wife Peggy and two of their three children.

I am sincerely proud to represent a clergyman such as Dr. Howard Roberts, and my colleague-to-be and I thank him for his service to the community.

SWEARING IN OF THE HONORABLE STENY H. HOYER AS A MEMBER OF THE HOUSE

The SPEAKER. The Chair is in receipt of a communication which he is delighted to read:

WASHINGTON, D.C.,
June 3, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a copy of the Certificate of Election for the Honorable Steny H. Hoyer, who was duly elected Representative in Congress from the 5th Congressional District of the State of Maryland in a Special Election held on May 19, 1981.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

Mr. HOYER, accompanied by present and former members of the Maryland delegation and the junior Senator from Maryland appeared at the bar of the House and took the oath of office.

SALUTE TO THE HOUSE BY THE HONORABLE STENY H. HOYER

The SPEAKER. The Chair recognizes the gentleman from Maryland (Mr. HOYER) for his maiden address. He is entitled to 1 minute, without objection.

Mr. HOYER. Mr. Speaker, I would first of all like to thank my former colleagues: Richard Langford, who represented the Fifth Congressional District before I got there, a long time before; Congressman Carlton Sickles, who was Congressman-at-Large; Congressman Hervey Machen, who represented the Fifth Congressional District; and most recently, Congressman Lawrence Hogan, my Republican friend, who is now the county executive of Prince Georges County.

I am, as all the Members know, a constituent residing in the district represented by Congresswoman HOLT. I have told her, Mr. Speaker, that if she does not vote the way I like, I will vote against her in the next election, but she has told me, "No, we are going to redistrict you out of my district."

I hope we do, only so that I have my own district.

Mr. Speaker, I want to simply say that I have had the opportunity of

participating in two caucuses over the last week and a half, and I have been, as I knew I would be, tremendously impressed with the quality, the substance, and the obvious caring of the Members of this body.

Mr. Speaker, I look forward to serving with you and with them in the coming months and years.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may meet to mark up the bill, H.R. 2330, tomorrow, Thursday, June 4, 1981, during the 5-minute rule.

I would like to advise that the minority concurs in this request.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

ACTION NEEDED TO STRENGTHEN SOCIAL SECURITY SYSTEM

(Mr. SHAMANSKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAMANSKY. Mr. Speaker, it is clear that we must act to strenghten the social security system. Despite large tax increases approved 4 years ago to insure the system's solvency the old-age and survivors fund could be insolvent within 18 months. It is questionable whether the public would accept, and the economy support, additional large tax boosts.

Yet the proposals so far offered by the administration to correct the social security problems miss the target. It came as a shock to the administration to find out—after it recommended slashing early retirement benefits—that most American workers retire early if they can. We must wonder what other basic facts are missing from the President's economic program.

Administration social security changes also would hurt the disabled and drastically reduce family benefits, making reductions greater than those necessary to shore up the system.

Social security's ills are apparent, but we need not panic. I am certain that with bipartisan leadership the needed corrections can be made, protecting the benefits of those already on social security and those who will be tomorrow's recipients.

ADMINISTRATION DISABLES DISABILITY INSURANCE

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, the administration has attacked the heart of disability insurance protection vital to many older Americans. The President proposes that we no longer consider a person's age and prospect of finding another job in determining their eligibility for disability insurance. This creates a gaping hole in the so-called safety net. Are we going to turn away a 60-year-old man who, after a lifetime as a carpenter, loses a hand and cannot find work elsewhere in his community? The administration says that carpenter should leave his home in his twilight years and take up a new trade. Mr. Speaker, this is no safety net; this is a cruel form of forced welfare.

Mr. Speaker, the administration's attack on disability insurance protection is faulty and ill-advised. Fortunately, the Congress is working on positive solutions which keep the social security system solvent and keep the door open for disabled Americans.

HEARINGS HELD ON HOW REAGAN SOCIAL SECURITY PACKAGE AFFECTS WOMEN

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I really want to congratulate the Congresswoman from Ohio, MARY ROSE OAKAR, who is doing extensive hearings today on how the Reagan administration social security package affects women. I testified there today with the specifics, and in 1 minute obviously cannot give them all to the Members, but I hope they will all look at them.

I am delighted that Congresswoman OAKAR is going after this. We in the Congresswomen's Caucus find that it is absolutely critical, that one of the most urgent problems in this decade for this country was the feminization of poverty before the administration came out with its social security proposals. Now, it is even worse.

I wish that somehow everybody who cares about women and their role in America would write a letter to the President reminding him that every mother is a working mother, and that to punish them in their later lives for having done what we say we hold as a great value is absolutely wrong.

□ 1215

If you look today at the people who were surviving on social security alone, you will find that there are four women for every one man who is surviving solely on social security. And what is their average daily benefit? It is $6.39.

And the President wants to go after these people. I think that is cruel, and I hope everybody will get into the details of this and try and do what we can. We should not punish motherhood, and we should not push women into the poverty level.

NATURAL RESOURCES

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WEAVER. Mr. Speaker, the Washington Post this morning printed a Herblock cartoon, showing despoilers of the public lands while Secretary of the Interior, James Watt, has a sign reading, "Why save it? The end is near."

I thought the House would like to know the origin of this. It occurred in an exchange between Secretary Watt and myself in an Interior Committee hearing.

It reads:

Mr. WEAVER. We ought to leave a few drops of oil for our children, their children. They are going to need it just to eat, not to drive around in gas guzzling cars, just to produce the food they will need.

I wonder if you agree, also, in the general statement that we should leave some of our other resources for our children, that we should not just gobble them up all at once?

Secretary WATT. Absolutely. That is the delicate balance the Secretary of the Interior must have, to be steward for the natural resources for this generation, as well as future generations.

I do not know how many future generations we can count on before the Lord returns.

ADMINISTRATION'S PROPOSALS TO REFORM SOCIAL SECURITY SYSTEM EXACERBATE EXISTING INEQUITIES

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, Candidate Reagan promised the women of this country last October that he would "address any remaining inequities in the treatment of women under the social security system." Unfortunately, for the women of America, the administration's proposals to reform the social security system not only fail to address the present inequities in the system, but they further exacerbate those inequities.

One proposal of the administration is that a person be required to have worked in covered employment in 30 out of the last 40 quarters in order to be eligible for disability insurance, rather than 20 of the last 40 quarters, as is presently required. The administration's proposal requires a person to have worked at least 7½ years out of the previous 10 in order to be eligible for disability protection.

This proposal hits hardest at women who not only have shorter labor force participation rates than men, but also hurts women who frequently leave the labor force to raise children, to care for other family members, or who enter the labor force late in life as many displaced homemakers do.

Mr. Speaker, we in Congress have an obligation to the needy women of this country to reject such a proposal. It imposes undue hardship on women; and it represents a breach of promise made by this Congress and this President.

Thank you.

UNITED STATES HAS MORAL OBLIGATION TO PEOPLE OF NORTHERN IRELAND

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, as the tragic civil strife in Northern Ireland enters a new and perilous stage, the morality of the United States, and the conscience of its people, demand our constructive involvement in the quest for a peaceful settlement.

We must be vigilant in our efforts to elevate the importance of the situation in Northern Ireland, in our foreign policy formulation. As a nation committed to promotion of human rights and lasting peace throughout the world, we can no longer stand idly by as this conflict continues to claim the lives of countless antagonists and bystanders each year.

During the Presidential campaign of 1980, candidate Reagan declared that we should "leave no initiative untried in our pursuit of peace; be clear voiced in our resolve to resist any unpeaceful act wherever it may occur." The time has come, Mr. Speaker, for us to accept that challenge in Northern Ireland. Forging a lasting peace and meaningful freedoms in a united Northern Ireland must be the goal of all nations that view the needless bloodshed in strife-torn Northern Ireland with horror.

Our passion for human rights, and our close, historic ties with Catholics and Protestants in all of Ireland call our Nation to action. The people of Northern Ireland desire peace, and cry out for the United States to offer its assistance in the pursuit of political and social stability.

The Irish tragedy has been allowed to persist for too long without a genuine effort by the British to seek a cure. I call upon the President today to make the Irish conflict an integral part of all future discussions with our close ally, Great Britain. Our long and friendly relations with the British Government must not obscure our desire to achieve lasting peace in Northern Ireland. It must be recognized in this Congress that the United States has a moral obligation to the people of Northern Ireland that supersedes all else.

Mr. Speaker, we must renew our call for the British Government to embark on a new initiative toward resolution of this emotional, fraternal conflict. The time has come for the United States to engage itself as an active partner in that process with an eye toward promoting immediate discussions among the parties concerned. With no motivation other than to secure an end to the official and civilian violence in Northern Ireland, the United States is well suited to mediate an end to this conflict through either an international peace forum or a Camp David-style initiative. If we fail to assume such a role, it seems likely that the needless violence of recent days will intensify.

PRESIDENT'S PROPOSALS FOR SOCIAL SECURITY SYSTEM UNDERMINE CONFIDENCE OF THE PUBLIC

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, I wish to express my concern over the administration's proposal for the social security system.

Mr. Speaker, hardly a week had passed since President Reagan announced his plans for the social security system before I began to receive hundreds of letters in protest. Understandably so. The administration's proposal would slash benefits for 18.1 million people who plan to retire over the next 5 years.

Workers now aged 56 to 61 who expect to retire between 1982 and 1986 would suffer an average 10-percent cut in initial benefits because of a so-called technical change in the formula used to calculate benefits. This low primary benefit will affect the size of a retiree's benefit until death. In addition, more than 7 million workers and spouses who claim early retirement benefits would receive cuts equal to one-third of promised annuities because of the administration's plan to reduce early retirement benefits from 80 to 55 percent.

Today, over 35.6 million people receive social security benefits. Another 114 million workers and their employers are paying into the system and expect to be able to count on it should they become disabled or when they are ready to retire. Those who plan to retire in the next several years represent the first generation of workers to contribute to the social security system for their entire working lives. It looks as though the President also wants to make them the first generation to get stung by what was promised to be a dependable source of retirement income.

The administration expects to balance the books on social security by forcing those who had planned to retire early, or in the next several years, to stay on the job longer, contribute payroll taxes longer, and collect benefits for a shorter period of time. Unfortunately, the President does not realize that many of the people who will be most affected by the proposed cuts have made irreversible plans to retire and begin a new phase of their lives. In addition, he ignores the fact that most who opt for early retirement do not do so voluntarily. A 1976 social security report showed that 54 percent of early retirees were in poor health and another 20 percent had lost their jobs or were forced to retire.

Mr. Speaker, I recognize the need for major changes in the social security system. The social security 5-year budget forecast issued this past January demonstrated that steps would have to be taken soon to raise the amount of money going into the system or to reduce future benefits if the system is to remain solvent. Unfortunately, the Reagan administration has resorted to overkill in its effort to make the system sound. Studies of the proposed cuts indicate that twice as much money would be slashed from benefits than is needed to insure the fund's stability. Under the White House proposal, future benefits would be cut on a gradual basis from current projections, resulting in a 25-percent reduction in benefits over 75 years and a large surplus of money in the fund by 2055.

While the President's proposals are excessive and unfair to a select group of future retirees, they also present a greater injustice. They rob the system of its most important feature: The confidence of the public; the trust of the people who we asked to believe that their contributions would provide them with a dependable source of income should they become disabled or decide to retire and who are now having the rug pulled out from under them.

The social security system requires some first aid and then some long-term therapy. Our prescription, however, should be carefully chosen and administered fairly. In the end, we must have a plan which will provide dependable benefits to those who have counted on the system for their retirement, will not unduly burden the workers and employers who are paying into the system, and will not single out any particular group just so the books can be balanced on short notice.

LEGISLATION INTRODUCED THAT WOULD INSTRUCT ATTORNEY GENERAL TO USE FBI COMPUTER TO HELP LOCATE MISSING CHILDREN

(Mr. SIMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SIMON. Mr. Speaker, if a car is stolen, police departments nationwide are notified through a computer system operated by the FBI. In 1977 the FBI even investigated the disappearance of a horse in Kentucky. Yet at the Federal level we do practically nothing to find missing children.

It is a situation that must change. More than 1 million children run away each year and most of them return home, unharmed. But some 50,000 children who are not habitual runaways or the targets of parental kidnapings, also disappear. A majority of these children never return home. Many, like the children in Atlanta, are later found murdered.

Today I am introducing legislation that would instruct the Attorney General to use an existing FBI computer to help locate these children. The system would work in the same way as the FBI's stolen car file. When a child, who does not have a history of running away or is not involved in a parental kidnaping, disappears, identifying information would be available to the local police departments nationwide on the computer.

The legislation will not solve the problem, but it will be a first step toward preventing tragedies. Atlanta, unfortunately, is only the tip of the iceberg.

PRIVATE PENSIONS—AN UNINTENDED VICTIM

(Mr. TAUZIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAUZIN. Mr. Speaker, lost in the furor over the proposed Reagan administration cuts in social security is the negative effect on employers with private pension plans integrated with social security.

The proposed cuts would shift an unexpected and undue hardship on the backs of employers. They will be forced to increase annual contributions to pension plans by tens of billion dollars, according to Thomas Woodruff, executive director of the President's Commission on Pension Policy.

Even with those increased contributions, pensioners still will wind up with lower benefits.

I doubt whether the Reagan administration calculated on this ripple effect of its proposed social security cuts. If the administration had talked with many of America's corporations, the administration would have gotten a sobering lesson about how thoroughly social security is woven into our national economic fabric.

Ripping out a piece here and a piece there affects the entire blanket protecting America's retired workers, workers about to retire, and the companies that employed or employ those workers.

It seems odd that at a time when everyone is striving to revitalize America's private sector economy, the administration would propose an action that will increase costs for American business.

I am certain the Reagan administration did not intend its proposed cuts in social security to be harsh and cruel for senior citizens. I am doubly certain that in its rush to cut social security, the Reagan administration did not realize it was being harsh and cruel on American business.

Considering this administration's concern for business, I cannot think of a more compelling reason for them to go back to the drawing boards with this idea.

A BILL TO ALLOW PRODUCERS TO RECOVER AGRICULTURAL PRODUCTS FROM WAREHOUSES THAT ARE DEBTORS IN BANKRUPTCY

(Mr. BAILEY of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAILEY of Missouri. Mr. Speaker, today I am pleased to introduce a bill to allow producers to recover agricultural products from warehouses that are debtors in bankruptcy.

Under current law, if a farmer stores his soybeans in a warehouse and the warehouse owner files for bankruptcy, the farmer's beans—or other products—become tied up in court proceedings.

This bill would amend a portion of the United States Code and enable owners of any agricultural products with valid warehouse receipts to obtain the products from the warehouse. The bill would eliminate a current situation in my home State of Missouri, where farmers have been denied by Federal marshals the removal of their stored grain because the warehouse owner has gone bankrupt. When this bill becomes law, the grain will be exempt from bankruptcy proceedings.

Mr. Speaker, I am pleased that the gentleman from Missouri (Mr. EMERSON) and the gentleman from South Carolina (Mr. NAPIER) have joined in cosponsoring this bill and I welcome any of my colleagues to join us in aiding the agricultural producers of this Nation.

HOUSE SHOULD RESTRAIN GOVERNMENT SPENDING

(Mr. TRIBLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. TRIBLE. Mr. Speaker, when this House agreed to the conference report on the budget, we stated that the growth of Federal spending must be curtailed. We must keep that goal firmly in mind. We must not be deterred by the actions of a few or by a loss of will.

Our good work will be undone if we vote to control spending 1 day, and go on a spending spree the next. The conditions which demanded our first budget resolution have not changed: They call to us now, as before, to restrain Government spending.

I urge my colleagues to remember this while considering the many proposals before us.

Congress has spoken on the budget. We have set ourselves a responsible goal—to get our affairs in order. But there are among the leadership of this body a willful few who believe that when the Congress speaks they need not obey. They forget they are servants of Congress and of the people—not laws unto themselves. My colleagues, the will of the American people must not be frustrated. This is the time for us to act decisively.

H.R. 3705—THE BANKRUPTCY TECHNICAL AMENDMENTS ACT OF 1981

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, the bill which I am cosponsoring with the chairman of the Judiciary Committee (Mr. RODINO), the Bankruptcy Technical Amendments Act of 1981, H.R. 3705, is a purely technical measure. The measure is to be distinguished in the minds of Members from the bill which passed the House in the last Congress described as a technical amendments bill but which was swollen into a measure containing numerous controversial and substantive provisions. The measure is to be distinguished also from the substantive bills to be introduced later which I anticipate will lead to hearings responsive to many of the concerns being brought to the attention of Members by their constituents.

As ranking minority member on the Judiciary Committee, which has jurisdiction over the subject of bankruptcy, I have heard many complaints from both my constituents and my colleagues in this House to the effect that the bankruptcy code enacted in 1978 is not working as many of us had

intended. I am advised that there is widespread abuse of the chapter 13 proceedings. This is of particular concern to small- and medium-size businessmen, who have been bearing the brunt of what many perceive to be an easy escape on the part of many debtors from their solemn obligations to their creditors.

I want to assure Members of my personal awareness of and sensitivity to their concerns and of my commitment to having our committee give them careful and appropriate consideration in the context of remedial legislation.

Mr. Speaker, the measure which the chairman of the committee (Mr. RODINO) and I are introducing relates solely to noncontroversial, technical amendments.

COST OF LIVING ADJUSTMENTS

(Mr. GEPHARDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEPHARDT. Mr. Speaker, the other day Mr. Stockman delivered a stern warning to Congress not to, in his words, "sabotage" the budget Congress adopted last month by allowing amendments to be offered on the House floor when the reconciliation package is considered. And last week, the minority whip, the gentleman from Mississippi, similarly warned of the dire consequences of allowing certain exemptions form the spending cuts directed by the budget resolution, evoking the spectre of the *Titanic*, no less, to describe the magnitude of the disaster that will follow such action.

Before all this talk of sabotage and shipwrecks gets out of hand, I think it is important to tone down the rhetoric and look at the record.

This will not be the first time the House considers a reconciliation package. We did so last fall in ordering spending cuts for fiscal 1981. And during consideration of the measure the House voted overwhelmingly to restore funds to allow continued cost-of-living adjustments in benefits to Federal, military and civilian retirees.

A majority of Democrats voted for that restoration. So did Republicans. In fact the amendment itself, the so-called COLA amendment was offered by a Republican, the former Member from Maryland. On the vote, three-fourths of the Republicans voted in favor of making an exception from the spending cuts on this issue.

During debate on the rule for reconciliation last year on the question of how open or closed it should be, the former Member from Maryland had this to say:

> Frankly, whether you are for or against these given propositions, including COLA, the least we ought to have . . . is the right to vote.

The same point applies today. Frankly, I am pleased to learn that responsibility for governing has put past behavior in a different light.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. MCCURDY) laid before the House the following communication from the Clerk of the House of Representatives:

JUNE 2, 1981.

Hon. THOMAS P. O'NEILL, JR.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 3:48 p.m. on Tuesday, June 2, 1981 and said to contain a message from the President concerning the extension of the Jackson-Vanik Waiver Authority for a further period of twelve months and the continuation of the waivers applicable to the Socialist Republic of Romania, the Hungarian People's Republic and the People's Republic of China, together with a copy of the President's Determination in connection therewith.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, JR.,
Clerk, House of Representatives.

RECOMMENDATION FOR EXTENSION OF WAIVER AUTHORITY OF PORTIONS OF TRADE ACT OF 1974—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-57)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means and ordered to be printed:

(For message, see proceedings of the Senate of today, Wednesday, June 3, 1981.)

□ 1230

THE 1980 ANNUAL REPORT OF FEDERAL PREVAILING RATE ADVISORY COMMITTEE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee on Post Office and Civil Service.

(For message, see proceedings of the Senate of today, June 3, 1981.)

POSTPONEMENT OF SPECIAL ORDER UNTIL MONDAY, JUNE 8, 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DERWINSKI) is recognized for 60 minutes.

● Mr. DERWINSKI. Mr. Speaker, due to the death of our former colleague, Carl Vinson, and with the absense of many of our Members, I have decided to postpone my special order honoring the primate of Poland, Stefan Cardinal Wyszynski, who passed away on May 28. I have rescheduled the special order for Monday, June 8.●

THE 1982 BUDGET AND A TROUBLED ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 20 minutes.

Mr. GREEN. Mr. Speaker, in 1979 and 1980, America suffered back-to-back double digit inflation for the first time since World War I. The value of a 1960 dollar has now shrunk to 36 cents. A pound of hamburger that cost 48 cents in 1960 now costs about $1.58 nationwide and even more in New York City. Mortgage interest rates averaged nearly 13 percent in 1980—the highest level in U.S. history and double the levels of the early 1960's. There were more Americans out of work last year—7.4 million—than in any year, save one, since World War II. Unemployment for blacks, Hispanics, and other minorities was much higher than the average. During much of the postwar period, U.S. productivity rose about 3 percent a year; for the last 2 years, it has actually declined. The U.S. personal savings rate is now at the lowest level we have experienced over any 3-year period in the last 30 years. Indeed, the United States now stands at the bottom among all the major industrial democracies in its level of personal savings and investment. Our personal savings rate is not even half that of our major trading partners. There is general agreement that our economy is in serious trouble and that certain reforms of Government policy are in order.

I do not agree with every change this administration has requested. In fact, I think many of the proposals are unrealistic and misguided. However, I do believe that one element of our approach should be to reduce the Federal deficit, something I have consistently advocated since coming to the Congress. In addition, very few Government programs have operated so perfectly that they should be immune from review. In general, I intend to support changes which will make programs simpler, more efficient, and closer to local governments. As a member of the Appropriations Committee, which determines the exact funding for Government programs, my budget philosophy is to seek a reduction in the deficit, reorganize certain programs, and shift some of the emphasis from military spending—which is the only area of increase—to some

of the social programs which are vital to America's poor and its cities.

Consequently, in my remarks today I want to explain five important subjects: First, Government programs of priority which I think should be saved and not cut as has been proposed; second, areas of the budget which should receive less spending than proposed by the administration; third, the budget process; fourth, my votes on the first budget resolution for fiscal year 1982; and fifth, my assessment of where we should go from here. Throughout all sections of my remarks, I want to emphasize how I have attempted and will continue to influence formation of the budget.

BILL GREEN PRIORITIES

MASS TRANSIT

Good mass transit systems spur economic activity, hold urban centers together, and provide a particularly valuable service to our cities' poorest citizens. The White House has properly recognized the importance of stimulating new economic productivity. However, this will be most difficult in many large cities if the mass transit operating subsidy is phased out by 1985, as has been proposed by the administration. The administration used sound judgment in its proposal to shift capital funding for mass transit away from emphasis on new fixed rail systems and toward existing systems, but this policy will be undercut if we eliminate operating subsidies. This route could very well take our mass transit systems down the same path traveled by our Nation's passenger railroads.

New York City's Mayor Ed Koch has indicated that—

> The proposed cut will be counterproductive to the Administration's intention to encourage economic growth. In New York City, 85 percent of the persons entering Manhattan's central business district during morning rush hours use some form of public transportation, and more than 60 percent ride the subway.

As Mayor Koch also indicated in that same statement, an efficient mass transit system contributes significantly to the city's relative energy efficiency.

I might also point out that, of the 14 major cities with mass transit systems, New York covers the highest proportion of its expenditures with fares. I fully agree with the mayor when he said, "Reductions in this (subsidy) will force further fare increases and increase expenses to low-income people who rely on mass transit to get to work."

We would not be constructing sound economic or energy policy by significantly reducing mass transit operating subsidies, and a number of Republican Members from New York, including me, have requested that the President meet with us to discuss this.

ARTS AND HUMANITIES

I recognize that there was some measure of politicization of the National Endowments for the Arts and Humanities under the Carter administration, and there undoubtedly could be savings by elimination of what have come to be known as basketweaving projects. However, I defy anyone to show me where reductions of 50 percent can be achieved in that fashion. Incredibly, that is exactly what the administration has proposed—reducing funding for the Endowments by 50 percent next year.

The Office of Management and Budget (OMB) contends that private funds could replace public funding of the arts. However, it is often Government funds which have stimulated the private investment in the first place. Most Government grants are matching in nature and often result in considerably more private contributions than could otherwise be expected. As many private arts contributors confirmed in a Wall Street Journal article I placed in the RECORD March 4, there is almost no evidence to substantiate the claim that private contributions can make up for the cut in public funding. Indeed, the evidence is just the opposite.

In recent days I have learned that OMB is now considering reductions in 1981 for the Endowments. This was particularly shocking news because it indicates that officials at OMB have very little knowledge of how funding for the arts and humanities works. The threat of rescission of funds this year jeopardizes several projects currently underway. Because of the urgency of this situation, I have requested that an administration official meet with National Endowment for the Arts Chairman Livingston Biddle and me in my office so that we can explain what such a rescission would mean. I will certainly fight in the Appropriations Committee any rescission request for Endowments funding.

SOLAR AND CONSERVATION BANK

There can be little dispute that the energy crisis is at the heart of our economic problems. Experts also agree that the only short-term approach which holds the promise of any significant energy progress is conservation. Consequently, I see no logical reason to follow the proposal to terminate the Solar and Conservation Bank this year. As the author of the conservation portion of the act creating the bank, I can assure my colleagues that my committee at the time received overwhelming evidence to justify the value of this bank and its conservation mission.

I acknowledge that we currently have tax incentives to encourage energy conservation. I would also point out, however, that these incentives were carefully considered at the time the Solar Bank legislation was being formulated, and the bill was specifically designed to dovetail with current tax law.

In addition, tax incentives really do not help low-income households very much because so few of these households itemize their returns. On the other hand, an institution such as the Solar and Conservation Bank could be of significant benefit to the poor. The longer we delay implementation of solar and conservation practices, the longer it will be before we achieve energy independence and the more serious will continue to be our economic difficulties. I was pleased that I was able to persuade my own Appropriations Subcommittee that we should not go along with the President's request to rescind all funds for the bank in 1981. We produced and the full House accepted a bill which continues funds for the conservation portion of the bank. Unfortunately, this funding was lost in the conference. I intend to continue to work for funding of the bank in the 1982 appropriation.

LEGAL SERVICES FOR THE POOR

I have always actively supported legal services for the poor. While I sympathize with the efforts of the Reagan administration to consolidate narrow categorical programs into block grants, I am concerned that access to the courts for the poor not get lost in the shuffle. Because of the need for backup services and research capabilities, there is also logic in keeping legal services as a national program and not including it in the block grant approach. Consequently, I am opposed to elimination of the Legal Services Corporation, which in fiscal year 1981, received $321 million in budget authority to provide legal aid to approximately 1.5 million low-income people across the country.

FOOD STAMPS

I do not think the current food stamp program is perfect, but a reduction of $150 million this year and $1.8 billion next year is extreme. I am very concerned for the poor and the elderly who depend so much on this program.

A cutoff of $11,000 for a family of four may be generous in some parts of the country, but I assure the Members of this body that it is not generous or even adequate in New York City. I am urging my colleagues to structure a program which will allow greater flexibility and which can take cost-of-living variations into account.

Many of the changes proposed by the administration would increase the administrative complexity of the program with the potential for increasing a State's error rate. My own State of New York, for example, is most concerned about the proposal to institute retrospective accounting and adjust benefits for families with children participating in the school lunch program. New York is in the process of

implementing a computer system to mange the food stamp program. Prospective budgeting is at the base of the system. Mandatory retrospective budgeting would require major reprograming at a substantial cost to the State in terms of money, time, and staff resources. Again, I see the wisdom of allowing greater flexibility for the States in administering such Government programs.

LOW-INCOME ENERGY ASSISTANCE

I have contended for some time that we should not view high winter heating costs as being of an emergency nature in the sense of being unexpected or one-time occurrences. Instead, because of the incredible increase in energy prices since 1974, we should view heating assistance to low-income persons as a legitimate Government responsibility and one which should be on-going. The last Congress created such a program on which needy persons and local administrators could rely and plan. This legislation incorporated my amendment to the 1979 emergency heating legislation that insured that renters who pay heating costs indirectly would be eligible for assistance.

Governor Carey's office estimates that the administration proposal will mean a reduction of $55 million for New York State in 1982. As a Member of the House Select Committee on Aging in the last Congress, I held hearings in New York State on the subject and was told that even current funds were most inadequate. Witnesses told members of the committee of incidents where elderly and poor people were sacrificing adequate nutrition in order to pay heating costs. The Federal Government cannot afford to do everything, and some kinds of programs must be cut. This should not be one of them, particularly since decontrol of oil prices, which I support, obviously increases the need for this program.

MEDICAID

I opposed the administration's intention to reduce medicaid funding in fiscal year 1981 by $100 million. The only justification given us was that the funds could be made up for by reducing fraud and abuse. My own State has done a commendable job of significantly reducing such waste, and I do not know how we could reduce our share further without cutting people who need assistance out of the program.

The administration has also proposed a cap on medicaid expenditures pending a comprehensive reorganization of the program. Unfortunately, such a cap would discriminate against States which already suffer discrimination in medicaid payments. New York State, for example, receives Federal payment for only 50 percent of its costs while some other States receive almost 80 percent. Thus, a cap would freeze into the system current injustices.

STRATEGIC PETROLEUM RESERVE

Energy costs are at the heart of our economic problems. We should have no higher priority than to expand domestic energy capacity and free ourselves from OPEC domination. We will always be intimidated by instability in the Middle East until we have a reasonable stockpile of petroleum. Congress has mandated that the Strategic Petroleum Reserve be filled for this purpose by the purchase of oil with Government funds. It is essential that we continue with this effort. Several Members of the House have proposed that some type of private financing for the Reserve be developed.

A May 4, 1981, Washington Post editorial claimed—

> Private funding will not work. In an emergency, the private owners' interest would be to keep holding the oil as the price rose. If private financing merely means selling oil reserve bonds on the private market, like the bonds of other Federal agencies, it's hardly worth doing. Since the impact on the economy is the same in both cases, it makes little difference whether Congress calls it spending or borrowing.

Indeed, on May 13, during consideration of the fiscal 1981 rescission and supplemental appropriations bill, I voted against a successful amendment cutting $3 billion for the Reserve.

AID TO HIGHER EDUCATION

I wish to emphasize that many people rely on student assistance programs in order to finance an education. The guaranteed student loan, for example, is an extraordinarily important program and we should be most cautious about changing it. I think that it is reasonable to consider some type of income limitation for the program, but I doubt that we should go as far as the administration has suggested.

GREEN PROGRAM TO ENCOURAGE PERSONAL SAVINGS

At the beginning of my remarks, I decried the terrible savings rate we are now experiencing. This is important because money saved is available for investment. It is also available to fund Federal deficits without the need to print money. This is crucial because it is clear that the Reagan plan cannot provide a stimulus that can instantly eliminate deficits.

I believe that the administration should add a specific saving incentive to its economic proposal and that such an incentive should be geared to the lower and middle-income levels where the average propensity to save is the lowest. My saving incentive proposal—embodied in H.R. 1397—differs from those that have previously been offered. Most others involve tax deductions or exclusions which largely aid upper income households, which are already the major immediate beneficiaries of the Reagan proposals. Such households also already tend to save a larger proportion of their income on average than more modest income households. Therefore, I suspect the additional savings induced by such saving programs would be minimal.

I propose, instead, that we subsidize low- and moderate-income saving. My program is modeled on a program that worked well in West Germany. The ingredients of the plan include the following: Participants would have to commit to save or invest for 7 years. The savings could be held at banks or invested in mutual funds or other vehicles similar to those allowed under Keogh and IRA programs. The United States would commit to pay a substantial interest bonus of 14 percent of the value of the initial investment at the end of the investment period. The program would have an investment limit per year of $500 per individual and $1,000 for a married couple. Finally, my plan would have an income limit of $15,000 adjusted gross income for an individual or $30,000 for a married couple.

Instituting a saving incentive program that is targeted to modest-income savers would be even more urgent if the Kemp-Roth tax cut or something similar to it is enacted. In short, I believe that my saving incentive program can have an inflation dampening effect on the deficits which the Reagan administration admits must accompany the first years of its tax cut.

WHERE WE SHOULD CUT

As I said at the outset, I do believe that Federal spending should be pared and the deficit reduced. Consequently, I would like to suggest several programs which I think should be funded at levels lower than that suggested by the administration.

MILITARY SPENDING

The President has requested the largest increase in defense spending in the peacetime history of this country—a 30-percent increase over the original fiscal year 1981 budget request. It is an increase of more than $1 trillion in 5 years. For those of us who have difficulty comprehending such figures, it would take 2,740 years to spend $1 trillion at the rate of $1 million a day. The President wants to spend all that on a new manned bomber, a sixth nuclear-powered aircraft carrier, and dozens of ships and hundreds of planes beyond what the previous administration had ordered. The President's request would result in defense spending—as a percent of total budget outlays—rising from 25 percent in 1982 to 38 percent in 1986.

I recognize the current critical needs of our Armed Forces, especially in the areas of readiness, spare parts, and pay. We have serious defense problems in those areas and I support increased funding for them. However, I do not

think that the defense budget should be immune from the same scrutiny being applied to social programs. There are areas of the defense budget which can be reduced and we should not hesitate to criticize waste wherever we find it. As examples, I question the need for the new MX missile and the need for additional aircraft carriers. The request for additional carriers is especially perplexing at a time when the primary constraint on our having carriers on the water has more to do with crew restrictions and maintenance inadequacies than with the quantity of aircraft carriers available.

AGRICULTURAL SUBSIDIES

Agricultural subsidies are inflationary and difficult to justify. I was pleased to see the House take some action with respect to dairy subsidies when it passed H.R. 1986 earlier this year, and I was encouraged when the President signed the measure from his hospital bed. This should be only a beginning. Last year, as in previous years, I called for an initial reduction for the Commodity Credit Corporation of 10 percent. This would result in a $210 million savings in 1982. Given that many administration proposals call for program eliminations or cuts of 25 to 50 percent, I think this is a modest and reasonable course.

WATER PROJECTS

Every Member of Congress is familiar with water projects which cannot be justified on a cost/benefit basis and which hold a significant threat to the environment. Over the years I have been working with the Coalition for Water Project Review—a group of private environmental organizations—to eliminate funding for some of the projects which represent the greatest abuses, such as the O'Neill unit in Nebraska and the Tennessee-Tombigbee Waterway.

THE BUDGET PROCESS

Fashioning a Federal budget is a lengthy, complicated process which normally begins with the President's request in January and concludes in September. I am a member of the House Appropriations Committee, which determines the exact funding level for Government programs, and, as such, play a direct role in constructing the budget. On February 3, Office of Management and Budget (OMB) Director Dave Stockman met with the other Republican members of the committee and me and sought our reaction to some of the proposals then being considered by the new administration. I discussed my concerns with him at that time and followed up with a more detailed letter to him on February 14. Shortly thereafter, Stockman, Treasury Secretary Regan, and Council of Economic Advisers Chairman Weidenbaum appeared before my committee and I had the opportunity to impress upon them the needs of New York City and how urban areas would be affected by the Reagan proposals. Finally, I carried the concerns of my constituents through the budget process by writing a letter to the House Budget Committee on April 1, making specific suggestions as to which programs should be retained and which should be cut. My comments put forward earlier in these remarks reflect the priorities I stressed in that letter and in my conversations with Mr. Stockman and the other administration officials.

GRAMM-LATTA BUDGET VERSUS THE JONES BUDGET

The House Budget Committee wrote a version of what is known as the first concurrent resolution on the budget, which sets nonbinding broad spending goals for the Congress—the second resolution will be adopted next fall and will be binding. This was known as the Jones budget—after the chairman of the Budget Committee—a different version, or substitute, known as the Gramm-Latta budget—after Congressman GRAMM of Texas and LATTA of Ohio—then emerged as the major alternative. As we all know, the President endorsed the Gramm-Latta proposal as his own. To be honest, I did not think that either the Jones or the Gramm-Latta budgets accurately reflected my thinking on the budget or the needs of New York City. I also resented the fact that Gramm-Latta had been put together without any input from Republicans from the Northeast and was obviously designed to attract conservative southern Democrats. As a result, I was undecided which proposal I would support and called a meeting in my office of other concerned House Republicans from the Northeast and Midwest to discuss our approach to the budget. Prior to the budget coming to the House floor, I had the opportunity to talk also with Secretary Regan and other members of the Cabinet, and finally on April 30 I met with President Reagan and Vice President BUSH in the Oval Office. I explicitly outlined my disappointment that moderate Republicans from the Northeast and Midwest had not been consulted during the formation of Gramm-Latta, and I was encouraged when the President responded that he did not want that to happen again and that he would direct his advisers to construct a mechanism for receiving our advice. I then explained to the President that I do not think there is any way that the Defense Department can begin to spend a 30-percent increase in a single year without gross mismanagement and inefficiency. After acknowledging my concern, the President emphasized that the first budget resolution is not binding and that the process leaves plenty of opportunity for shifting spending from area to area. I left the Oval Office thanking the President for his time and assuring him that I certainly did intend to use my position on the Appropriations Committee to fight for a shift of funds from defense to a variety of social programs.

On the day before the final votes on the first budget resolution, several other moderate Republicans joined me in holding a press conference to announce that we could not support the Jones budget. We reiterated that neither package precisely reflected our budget priorities, and, had we been free to fashion our own budget, we would have provided less money for military spending than either the Jones budget or the Gramm-Latta substitute. We would then have used those funds for a variety of nondefense programs.

In short, all of us opted for Gramm-Latta for three basic reasons. First, the most important reason to stress is that Gramm-Latta came closest to the overall spending level we preferred. However, we made it clear to the administration and the House Republican leadership that our votes in favor of Gramm-Latta did not commit us to the ratio of defense and nondefense spending embodied in that substitute.

Second, Gramm-Latta gave the Ways and Means Committee greater flexibility in determining tax policy. While not all of us who attended that press conference support the exact approach of the Kemp-Roth tax cut proposal, we do agree with the administration that basic tax revisions are desirable and necessary to get the American economy moving again.

Third, we felt that the revenue estimates in Gramm-Latta were more accurate than those of the Jones budget. The Jones proposal was able to provide as much as Gramm-Latta for defense, provide more for many nondefense programs, and still produce a smaller deficit only because it projected $18 billion more revenue from our current tax structure than Gramm-Latta. This unrealistic revenue estimate was calculated deliberately for the sole purpose of making the Jones package attractive enough to succeed on the House floor. We were not willing to institutionalize such an approach, and neither was a majority of our colleagues.

VOTES ON BUDGET RESOLUTION

THE GREEN TRANSFER AMENDMENT

I drafted an amendment to the budget which would have transferred money from certain spending categories to others of greater need. Specifically, my amendment would have reduced the national defense function by $3.8 billion, reflecting elimination of $300 million for the *Oriskany* carrier, $600 million for the new nuclear carrier, and $2.9 billion for the MX missile. The Green transfer amendment would also have reduced the natural resources and environment func-

tion by $500 million to phase out several insupportable water projects.

The total of $4.3 billion in reductions would then have been redistributed in the following ways: $389 million for the solar and energy conservation bank, $200 million for mass transit operating subsidies, $171 million for the National Endowments for the Arts and Humanities, $347 million for Legal Services, $1.993 billion for food stamps and low income energy assistance and $1.2 billion for medicaid.

Unfortunately, the Rules Committee—which governs consideration of legislation on the floor—voted to allow only four amendments to be offered: One each by Congressmen HEFNER, FAUNTROY, and OBEY, and the one by Congressmen GRAMM and LATTA. Thus, the House was not permitted the opportunity to vote on the Green transfer amendment. Because of my dissatisfaction with the Jones proposal and the Gramm-Latta substitute and because the Rules Committee was unreasonably restrictive in not allowing members to fine tune either proposal, I spoke April 30 and urged my colleagues to vote against the manner in which the budget resolution was to be considered. I regret that I was in the minority. Thus, only the amendments I mentioned were permitted.

OTHER AMENDMENTS

The Hefner amendment brought defense spending in the Jones proposal to precisely the same level as that contained in Gramm-Latta, and it was adopted by voice vote. The Fauntroy amendment had merit in certain of its provisions, such as reductions in defense—although they were a bit more than I would consider ideal—water projects and tobacco subsidies. Unfortunately, it also called for reductions in the strategic petroleum reserve. Most significantly, however, it also projected substantially higher revenues—$39 billion more than Jones and $60 billion more than Gramm-Latta—which were to result from significant tax increases. Because of that feature of the Fauntroy proposal, I voted with the majority of the House in rejecting the amendment 69-356. The Obey amendment also had some admirable features, such as full funding for the strategic petroleum reserve, restoration of money for weatherization for elderly and low-income households, and reasonable funding of title I of the Elementary and Secondary Education Act, handicapped education programs, and the national direct student loans. Again, however, Mr. OBEY's substitute was predicated upon enormous tax increases which have virtually no change of being approved by Congress, and his amendment was, therefore, insupportable. The amendment lost 119-303.

Finally, then, the House moved to a vote on the amendment by Messrs. GRAMM and LATTA, which was designed as a substitute for the Jones proposal. I have already listed my major reasons for giving it my reluctant vote. Obviously, someone who was as dissatisfied as I was with both the Jones and Gramm-Latta proposals could have voted "no" on both of them, but that would have seemed to me to be an empty gesture. Having voted for Gramm-Latta, I am now in a better position to work for the funding shifts to the social programs I talked about earlier. In addition, as one of the few Republican voices in the House who speaks for America's cities, I am concerned that I maintain reasonable relations with the administration which will be governing this Nation for at least the next 4 years. In the past New York City has benefited in several ways by having a Republican advocate to help win support on my side of the aisle. This is now all the more important with a Republican administration and Senate. There will be countless times over the coming years when I will need to go to the Reagan administration to press the case for urban America. To have futilely opposed the President on the Gramm-Latta vote would have severely affected my ability to negotiate with the administration on a host of issues; and, over the long run, this would have been detrimental to the citizens of New York City. The Gramm-Latta substitute passed easily on a vote of 253-176. Differences between this proposal and that passed by the Senate were quickly resolved and on May 20 I voted with the majority of the House in approving the final version of the first budget resolution. I was pleased that this final version not only retained the same revenue projections as the House-passed resolution, but also increased spending in several nondefense areas, such as natural resources and environment; transportation; and education, jobs and social services.

CONTINUING TO REVISE THE BUDGET

The question now comes, "Where do we do go from here?" Despite the vote on Gramm-Latta, I continue to be concerned at the overall budget impact on the Northeast and Midwest regions. Since these areas have a shrinking tax base, it is more difficult for my State and others to manage the additional financing burdens they are being asked to assume. I am gratified at President Reagan's pledge to me to seek the counsel of Northeast and Midwest Republicans prior to future budget decisions.

Finally, I wish to reemphasize my continuing work on the Appropriations Committee to shift some of the defense increase to the nondefense priorities I have described. This will be an ongoing effort until September when the budget is completed. I shall then resume my efforts when work is begun on the 1983 budget to see that my concerns and the needs of urban America are addressed.

JACK KEMP REINTRODUCES THE URBAN JOBS AND ENTERPRISE ZONE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlemen from New York (Mr. KEMP) is recognized for 60 minutes.

● Mr. KEMP. Mr. Speaker, just a year ago, when BOB GARCIA and I were first introducing the Urban Jobs and Enterprise Zone Act, we emphasized that "what we are trying to do is reopen the debate" on the problems of urban poverty and decay "by introducing a new concept—the Jobs and Enterprise Zone."

Today I think it is fair to report success beyond our wildest dreams in sparking this debate.

The National Urban League, the NAACP, the National League of Cities, the National Urban Coalition, and members of the Congressional Black Caucus all have endorsed this new concept of enterprise zones. Both the Republican and the Democratic platforms urged that the idea be explored. Mayors across the Nation—in my own city of Buffalo, Baltimore, New York, New Orleans, Miami, San Diego, and many other cities—have applauded this initiative. Enterprise zone committees and conferences spring up everywhere. State legislatures are debating, and some have passed, enterprise zone legislation—Washington D.C., for instance, has enterprise zone legislation introduced by Councilman Arrington Dixon. Finally, President Reagan has committed his administration to establishing enterprise zones in the Nation's poorest communities.

This enthusiasm is not the result of some legislation wizardry by BOB GARCIA or JACK KEMP, or our Senate sponsors RUDY BOSCHWITZ or JOHN CHAFEE. Rather it reflects in large part the frustration we see today with the wasteland of ideas for helping cities. After a year of discussing enterprise zones all around the Nation I have concluded that anyone with a new idea for confronting urban poverty and decay not only get a hearing—but may even get the key to the city.

What is the new idea behind the Kemp-Garcia bill? Simply this: People below the poverty line are not some special helpless class, to be set apart as if they suffered from some permanent affliction. Columnist William Raspberry has made this point particularly well:

A lot of us are beginning to question the assumption, implicit in many of our social welfare programs, that poor people are essentially beyond salvation and that the only humane thing to do is to take care of them. We are learning, at last, that the better care we take of people, the more helpless they become. And we are starting to think less

about how best to take care of people and more about ways to move them toward self-sufficiency.

Despite their predicament, the poor are no different in their goals from other Americans. They want to be productive and self-sufficient in providing for their families. They want jobs, they want to save and even invest. But they need tangible economic opportunities, which are now missing from our inner cities.

Now some people have suggested that it will take impossibly high wages to lure inner-city residents back to work. That is nonsense. We must never underestimate just how quickly human capital can be mobilized in our inner cities.

Such capital is far more than money: It is productive capability, and exists in the minds, hands, and creativity of the people. When the Social Security Administration opened 77 beginning level jobs in Baltimore last year, 15,000 people showed up before 7 in the morning to apply.

People will take a chance on a better future, they will invest their human capital, if they believe they have some chance to succeed. This is true of the inner-city poor, and it is true of the potential inner-city entrepreneur as well.

Everyone agrees that it is risky to start up a business in the inner city. Some of these risks we can reduce, for instance by improved police protection. But many of them are inherent in the nature of inner city businesses and communities.

Recognizing that risk is likely to remain greater in the inner city—and that risk is, anyway, an inevitable part of entrepreneurship—the Urban Jobs and Enterprise Zone Act concentrates its efforts on the other half of the risk-reward calculation: the rewards.

Why, anyway, does an individual take a chance and start up a business? The entrepreneur surely is not looking for immediate profits. Most new small businesses do not make a profit for several years. Instead, entrepreneurs choose the risky course of starting their own business because they calculate that, in the long run, they will reap a greater personal and financial reward. The Urban Jobs and Enterprise Zone Act increases that record by providing dramatic tax incentives to entrepreneurs who create jobs for disadvantaged workers in the inner city.

Many people have raised the objection that what small businesses—which provide virtually all the new jobs in the inner city—need is not more incentive, but instead, more capital. They criticize this bill for not creating a new Federal loan guarantee program, or providing startup grant money.

I personally do not believe that the Federal Government is very efficient at picking successful entrepreneurs. This is not a criticism of bureaucrats, it is just a reflection of the fact that large institutions have a hard time understanding or coping with individuals who have innovative, crazy, new ideas. But even if the Federal Government were a highly efficient capital provider, it still is not a significant one. We could triple Federal business assistance programs and they would still be providing less than 10 percent of all startup capital. By far the greatest part—89 percent—of this capital comes from personal savings. Seventy-five percent of all new businesses start without using any outside debt or equity; and even when they do use outside debt or equity it is more likely to come from family and friends than from financial institutions.

What makes a person decide to put his or her savings into a new enterprise instead of, say, a house, or money market funds, or a yacht? Once again, the answer is that entrepreneurs—like the inner-city poor—make some calculation of future risk and reward.

This is why future-oriented tax incentives make more capital available in the present. By reducing capital gains and income taxes, in particular, the Urban Jobs and Enterprise Zone Act promises a greater reward to those who succeed in their initial risk-taking investment. In this way we tap the greatest resources available for our inner cities: the huge pool of private resources seeking a significant, after-tax rate of return in these uncertain and inflationary times.

The essence of the Kemp-Garcia Urban Jobs and Enterprise Zone Act is that it "greenlines" some of our poorest communities by dramatically increasing incentives for working, producing, and risk-taking within these areas.

Because the poor on welfare face what are, effectively, the very highest marginal tax rates of all, the bill provides a 5-percent refundable personal income tax credit for wages earned by zone employees, up to a cap of $1,500. This reduces the tax rate faced by individuals leaving welfare for work, and will also provide an important incentive for badly needed skilled workers and managers to take jobs in the inner city.

To provide an additional incentive to employers for hiring disadvantaged workers, the Urban Jobs and Enterprise Zone Act offers a 5-percent refundable business income tax credit equal to 5 percent of the wages paid to CETA-eligible employees. Along with the personal income tax credit, this is designed to offset the disincentives of the payroll tax, which discourages employers from hiring the untrained poor, particularly teenagers. In addition, because this credit applies as long as the originally eligible worker is employed by a zone enterprise, it offers an important incentive for training and retaining employees.

Finally, to create a new sense of economic buoyancy and expand entrepreneurial activity in the zone, the bill eliminates capital gains taxes, excludes half of all income earned by zone enterprises, and interest income earned on loans to zone enterprises, from taxation, and extends the loss carryforward to 20 years. This last provision makes the income tax reduction more valuable, by allowing early losses to be written off against later gains. To qualify for these incentives a business needs to hire 40 percent of its new employees from among CETA eligible workers.

During the past several months BOB GARCIA and I have reached out to community groups, mayors, and local officials, small businessmen and women, academic experts, and many other interested groups, seeking suggestions about how we could improve our bill. At their advice we have made the designation criteria more flexible, increased the importance of local and State participation and support, deepened the tax incentives and tied them more closely to the needs of disadvantaged workers. In the months to come we look forward to working with these same groups, the administration, and our colleagues from both parties on perfecting the bill and enacting it into law.●

CARDINAL STEFAN WYSZYNSKI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 5 minutes.

● Mr. ADDABBO. Mr. Speaker, it is with tremendous sadness and great spiritual loss that I rise today to join my distinguished colleagues in paying tribute to Cardinal Stefan Wyszynski who passed away last week after an heroic and unrelenting fight against cancer. Cardinal Wyszynski's passing leaves a great political, religious, spiritual, and social void that I pray the people and nation of Poland will be able to overcome in this, their hour of struggle.

As leader of the Catholic Church in Poland for 32 years, years that were at times fruitful, and other times frustrating, Cardinal Wyszynski rose to become a nationally loved leader and teacher in Poland and an internationally respected and admired religious figure the world over. He was a fighter in every sense of the word, a man who would not be intimidated by an opponent and who never thought of seeking the easy way out. He remained until his death an outspoken opponent of communism because of the shackles it thrust upon a person's ability and right to think, speak out against injus-

tice, and grow in one's culture, past and present. Few men have ever loved Poland as devotedly as Cardinal Wyszynski. It is most tragic that he will be remembered most by many for his work near the end of his life, being the voice heard above the roar of the crowds as he urged moderation on his people, acting as an intermediary between the Polish Government and the independent Solidarity trade union. It is tragic because he will never see the final fruits of that fight.

The Polish people have lost a very special part of their culture and tradition. Though they mourn his passing they would be best to glorify his life and use the lessons in their future he so aptly taught them in the past.●

CONFERENCE REPORT ON H.R. 3512

Mr. WHITTEN submitted the following conference report and statement on the bill (H.R. 3512) making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 97-124)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3512) making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 7, 8, 10, 11, 23, 26, 28, 30, 31, 32, 39, 63, 64, 69, 73, 74, 78, 88, 89, 90, 91, 92, 95, 97, 104, 119, 120, 121, 122, 124, 125, 126, 130, 132, 133, 134, 135, 136, 137, 141, 149, 153, 181, 182, 183, 186, 187, 203, 211, 212, 213, 214, 217, 232, 252, 254, 270, 271, 274, 279, 288, 291, 317, 324, 327, 328, 329, 330, 332, 334, 336, 345, 347, 354, 355, 360, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 407, 408, 409, 410, 411, 412, 413, 414, 416, 418, 419, 420, 423,.424, and 425.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 5, 6, 9, 12, 14, 16, 19, 22, 34, 35, 36, 43, 67, 71, 85, 93, 99, 106, 107, 108, 112, 127, 128, 129, 138, 144, 146, 156, 160, 163, 165, 167, 168, 170, 172, 175, 176, 177, 179, 180, 188, 200, 218, 219, 224, 233, 239, 243, 248, 249, 250, 257, 258, 263, 265, 281, 292, 309, 310, 315, 316, 318, 320, 323, 326, 333, 335, 338, 341, 344, 346, 348, 349, 350, 352, 358, 359, 362, 363, 364, 373, 375, 379, 380, 381, 382, 385, 386, 404, 405, 406, 415, 417, 422, 426, 427, 430, 431, and 432, and agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$23,640,000"; and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$6,000,000"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: "Restore the matter stricken by said amendment, amended to read as follows: $7,251,000, of which" and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows: In lieu of the matter proposed by said amendment insert: Restore the matter stricken by said amendment, amended to read as follows:

SALARIES AND EXPENSES

(RESCISSION)

Of the funds appropriated for the Small Business Administration, "Salaries and expense" in Public Law 96-536, $700,000 are rescinded: *Provided*, That $8,500,000 shall be available for Small Business Development Centers for fiscal year 1981 pursuant to section 20(i)(6) of the Small Business Act, as amended.

And the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows: In lieu of the sum named by said amendment insert "$73,400,000"; and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$8,400,000"; and the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$46,500,000"; and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$466,149,000"; and the Senate agree to the same.

Amendment numbered 52: That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$561,605,000"; and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$923,568,000"; and the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$111,675,000"; and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$15,300,000"; and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$17,737,000"; and the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$25,400,000"; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$26,150,000"; and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$70,900,000"; and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$6,000,000"; and the Senate agree to the same.

Amendment numbered 62: That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$116,700,000"; and the Senate agree to the same.

Amendment numbered 65: That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$27,700,000"; and the Senate agree to the same.

Amendment numbered 66: That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$598,750,000"; and the Senate agree to the same.

Amendment numbered 70: That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$241,400,000"; and the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$753,285,000"; and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$205,869,000"; and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said

amendment insert "$150,206,000"; and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$41,017,000"; and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$113,609,000"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$308,976,000"; and the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$44,346,000"; and the Senate agree to the same.

Amendment numbered 86: That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$82,511,000"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$105,688,000"; and the Senate agree to the same.

Amendment numbered 94: That the House recede from its disagreement to the amendment of the Senate numbered 94, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$40,000,000"; and the Senate agree to the same.

Amendment numbered 96: That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

(RESCISSION)

Of the funds appropriated for the Nuclear Regulatory Commission in the Energy and Water Development Appropriation Act, 1981, $5,000,000 are rescinded.

And the Senate agree to the same.

And the Senate agree to the same.

Amendment numbered 376: That the House recede from its disagreement to the amendment of the Senate numbered 376, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$17,788,000"; and the Senate agree to the same.

Amendment numbered 377: That the House recede from its disagreement to the amendment of the Senate numbered 377, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$20,716,000"; and the Senate agree to the same.

Amendment numbered 378: That the House recede from its disagreement to the amendment of the Senate numbered 378, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows: ", of which $2,500,000 shall be derived by transfer from 'Promote and develop fishery products and research pertaining to American fisheries' "; and the Senate agree to the same.

Amendment numbered 383: That the House recede from its disagreement to the amendment of the Senate numbered 383, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,497,000"; and the Senate agree to the same.

Amendment numbered 384: That the House recede from its disagreement to the amendment of the Senate numbered 384, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$1,000,000"; and the Senate agree to the same.

Amendment numbered 421: That the House recede from its disagreement to the

amendment of the Senate numbered 421, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$230,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 13, 15, 17, 20, 21, 25, 29, 33, 37, 38, 40, 41, 42, 47, 49, 50, 53, 68, 72, 81, 84, 100, 101, 103, 111, 113, 115, 118, 123, 131, 140, 142, 143, 145, 147, 148, 154, 155, 157, 158, 159, 161, 164, 169, 171, 173, 184, 185, 189, 190, 191, 192, 193, 194, 195, 197, 198, 202, 204, 205, 206, 207, 208, 210, 222, 223, 225, 226, 228, 237, 240, 241, 245, 246, 253, 255, 259, 260, 261, 262, 264, 266, 267, 268, 269, 272, 273, 275, 277, 278, 280, 282, 284, 285, 290, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 311, 312, 313, 314, 325, 331, 337, 339, 342, 343, 351, 356, 357, 361, 365, 366, 367, 368, 369, 370, 371, 372, 374, 428, and 429.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3512), making supplemental appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I

CHAPTER I—DEPARTMENT OF AGRICULTURE

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Amendment No. 1: Appropriates $13,250,000 for the Animal and Plant Health Inspection Service as proposed by the Senate instead of $7,000,000 as proposed by the House. The additional funds will be used to meet emergency outbreaks of plant and animal diseases and infestation such as the khapra beetle, the grasshopper and the Mediterranean fruitfly; and to meet a shortfall in brucellosis indemnity funding and to continue whole herd depopulation.

Amendment No. 2: Deletes House language providing that the funds are only for emergency control programs.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

DAIRY AND BEEKEEPER INDEMNITY PROGRAMS

(Rescission)

Amendments No. 3 and 4: Defer $1,500,000 for the Beekeeper Indemnity Program until October 1, 1981, as proposed by the House. The Senate amendment proposed to rescind the $1,500,000.

FEDERAL CROP INSURANCE CORPORATION

Administrative and operating expenses

Amendment No. 5: Appropriates $28,181,000 for administrative and operating expenses for the Federal Crop Insurance Corporation as proposed by the Senate instead of $42,181,000 as proposed by the House.

The Federal Crop Insurance Act of 1980 has resulted in the marketing and servicing of Federal Crop Insurance by private brokers and companies, represented by over 10,000 agents. The conferees are concerned over the potential for misrepresentation (either intentional or inadvertant) on the part of agents performing the sale and servicing of policies, as well as loss adjustment work. The conferees are aware of misunderstandings between insurance salesmen and farmers which have been substantial enough to result in litigation. The conferees direct that the Corporation take appropriate steps to ensure that both the insurance agent and the farmer have a clear understanding of the salesman's limited delegation of authority as an agent of the Federal Government.

Subscription to capital stock

Amendment No. 6: Deletes House language appropriating $150,000,000 for subscription to capital stock.

FARMERS HOME ADMINISTRATION

AGRICULTURAL CREDIT INSURANCE FUND

(Rescission)

Amendments No. 7 and 8: Restore House language rescinding $50,000,000 in farm ownership loans.

RURAL DEVELOPMENT INSURANCE FUND

Insured water and sewer facility loans

Amendments No. 9: Deletes House language deferring $110,000,000 and rescinding $50,000,000 for water and sewer facility loans.

Alcohol fuel production facility loans

The Department of Agriculture has developed procedures for loan guarantees for alcohol fuel production facilities. Therefore, it is the intent of the conferees that the Department expeditiously implements the program as specified in the House and Senate Reports.

Rural development planning grants

(Deferral)

Amendments No. 10 and 11: Defer $2,000,000 for rual development planning grants as proposed by the House. The Senate proposed that these funds be rescinded.

Rural housing supervisory assistance grants

(Rescission)

Amendment No. 12: Changes sub-title from "(Deferral)" to "(Rescission)" as proposed by the Senate.

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which rescinds $500,000 in rural housing supervisory assistance grants. The House language had proposed that these funds be deferred.

RURAL ELECTRIFICATION ADMINISTRATION

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

Amendment No. 14: Deletes House language deferring $62,000,000 in electric loans and $50,000,000 in telephone loans as proposed by the Senate. The conferees agree that these loan funds shall continue to be available for generation and transmission facilities, including loans for distribution cooperatives which involve transmission facilities. Furthermore, the conferees expect that the Rural Electrification Administration will continue to have access to the Federal Financing Bank for loan guarantee borrowers.

SOIL CONSERVATION SERVICE

Watershed and flood prevention operations

The Conferees direct that the Soil Conservation Service return immediately to the States all funds which have been withdrawn in the last 60 days for projects, where local taxes have been paid or plans for construction have been completed or bids announced. The Conferees expect to be notified that such action has been taken prior to the reporting of the Agriculture Appropriations Act for fiscal year 1982. Furthermore, the Conferees concur in the Senate report language which directs that the Office of Management and Budget not act as an impediment to the timely authorization of watershed projects and to forward these projects to the Congress at the earliest possible time.

FOOD AND NUTRITION SERVICE

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

Child nutrition programs

For an additional amount for "Child nutrition programs", $109,875,000: *Provided*, That this appropriation shall be available only to the extent an official supplemental request is transmitted to the Congress.

Food stamp program

For an additional amount for the "Food stamp program", $1,740,724,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation, but pending the enactment

into law of such legislation, funds received from the sale of surplus agricultural commodities shall be available to the extent and in the manner provided in this paragraph: *Provided further,* That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: *Provided further,* That of the amounts provided herein, $536,124,000 shall be available upon certification by the Secretary of Agriculture that the Department of Agriculture is using all regulatory and administrative methods available under law to curtail fraud, waste, error, and abuse in the program: *Provided further,* That this appropriation shall be available only to the extent an official amended supplemental request is transmitted to the Congress: *Provided further,* That the funds provided herein shall remain available until September 30, 1981.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Child nutrition programs

Appropriates $109,875,000 for the Child Nutrition Programs as proposed by the Senate. The conference agreement provides that this appropriation shall be available only to the extent an official supplemental request is transmitted to the Congress.

Food stamp program

Appropriates $1,740,724,000 for the Food Stamp Program instead of $1,204,600,000 as proposed by the House and $1,742,600,000 as proposed by the Senate. This appropriation, together with the previously appropriated $9,739,276,000, provides a total of $11,480,000,000 for the Food Stamp Program for 1981. This total amount is equal to the fiscal year 1981 "cap" on the Food Stamp Program contained in pending legislation (S. 1007 and H.R. 3603). The conference agreement provides: (1) that this appropriation shall be available only upon enactment of authorizing legislation, except that pending enactment of such legislation, funds received by the Commodity Credit Corporation from the sale of surplus agricultural commodities shall be available to the extent and in the manner provided in this paragraph; (2) that the appropriation shall be subject to any work registration or workfare requirements as may be required by law; (3) that of the amounts provided, $536,124,000 shall be available upon certification by the Secretary that all methods available under the law are being used to curtail fraud, waste, error, and abuse; (4) that this appropriation shall be available only to the extent an official amended supplemental request is transmitted to the Congress, and (5) that this appropriation shall remain available until September 30, 1981.

CHAPTER II—DEPARTMENT OF COMMERCE

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

(Rescission)

Amendment No. 16: Rescinds $187,850,000 as proposed by the Senate instead of $181,350,000 as proposed by the House.

The conferees are agreed that with regard to the projects funded as a result of the Federal Government's "moral commitment" to do so, first priority and consideration will be given those projects listed in House Report No. 97-29, and should any of those projects fail to continue to meet legal and technical requirements for funding, EDA should have the flexibility to:

1. Make such adjustments to the funding levels of individual projects as may be appropriate based on the final review of applications and

2. Fund projects not previously identified on which it is determined that a commitment exists.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which prohibits any funds available to the National Oceanic and Atmospheric Administration from being used to either reduce or plan for a reduction in full-time permanent employment of less than 12,580.

The conferees are agreed that the personnel reductions proposed by the Administration for the National Oceanic and Atmospheric Administration would seriously impair the ability of this agency to carry out the responsibilities and programs mandated by the Congress. The conferees have therefore limited the Administration's proposed reduction in force (RIF) to allow for an employment level of not less than 12,580 permanent full-time employees. It is the intent of the conferees that the reduction in the level of the NOAA RIF should not be allocated to other bureaus and agencies within the Department of Commerce or other departments and agencies of the Federal Government. Employment in these other areas of the Department of Commerce or in other departments and agencies of the Government should be maintained at levels consistent with other provisions of this conference agreement.

(Rescission)

Amendment No. 18: Rescinds $23,640,000 instead of $26,236,000 as proposed by the House and $22,645,000 as proposed by the Senate. The following table displays the conference agreement on each individual item in the amendment:

[In thousands of dollars]

	House bill	Senate bill	Conference agreement
Salmon tagging with Japan	−800,000		
Conversion of Pacific Regional Headquarters, National Weather Service to an administrative office	−348,000		
Oceanographic instrumentation		−100,000	
Pascagoula Fisheries Laboratory renovation and expansion		−650,000	
Flood program		−325,000	
Purchase of local warning radars		−1,845,000	
NOAA undersea research program	−500,000		
Anadromous/grants	−1,000,000		
Campeche oil spill	−500,000	−500,000	−500,000
Striped bass	−750,000		
Vessel buy-back program	−10,000,000	−15,000,000	−11,100,000
National Oceanic Satellite System (NOSS)	−6,000,000		−6,000,000
Marine resources monitoring	−2,074,000	−3,175,000	−3,175,000
Commercial fisheries grants to States	−1,632,000		−1,632,000
Regional fishery management councils	−333,000	−500,000	−500,000
Columbia River fisheries	−733,000	−550,000	−733,000
Sea Grant			
National Marine Fisheries	−1,566,000		
Total	−26,236,000	−22,645,000	−23,640,000

The conferees are agreed that of the $3,900,000 remaining available for the vessel buy-back program, the Department of Commerce shall make available not to exceed $1,400,000 for supplemental pay costs.

Construction

(Rescission)

Amendment No. 19: Rescinds $11,000,000 as proposed by the Senate instead of $9,000,000 as proposed by the House.

COASTAL ENERGY IMPACT FUND

(Deferral and Transfer of Funds)

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

COASTAL ENERGY IMPACT FUND

(DEFERRAL)

Of the funds appropriated under this head in Public Law 95-86, $7,000,000 are deferred for obligation until October 1, 1981.

COASTAL ZONE MANAGEMENT

(TRANSFER OF FUNDS)

For an additional amount for "Coastal zone management", $33,000,000, to be derived by transfer from "Coastal energy impact fund", to remain available until expended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are agreed that Coastal States should not anticipate receiving any Federal funding beyond the funds provided in this Act, and that these funds shall be used to phase-down the grants to States for the period fiscal year 1982-fiscal year 1984.

PROMOTE AND DEVELOP FISHERY PRODUCTS AND RESEARCH PERTAINING TO AMERICAN FISHERIES

(Disapproval of Deferral)

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

PROMOTE AND DEVELOP FISHERY PRODUCTS AND RESEARCH PERTAINING TO AMERICAN FISHERIES

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $2,500,000 of the proposed deferral D 81-105, relating to Department of Commerce, National Oceanic and Atmospheric Administration, "Promote and Develop Fishery Products and Research Pertaining to American Fisheries", as set forth in the message of April 27, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act, and the amount of the proposed deferral disapproved herein shall be made available for obligation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

FISHERMEN'S GUARANTY FUND

Amendment No. 22: Inserts language proposed by the Senate which permits $450,000 of the appropriation of $1,900,000 to be derived from receipts instead of deriving the entire $1,900,000 from receipts as proposed by the House.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

(Rescission)

Amendment No. 23: Restores rescission of $163,000 as proposed by the House.

PUBLIC TELECOMMUNICATIONS FACILITIES, PLANNING AND CONSTRUCTION

(Rescission)

Amendment No. 24: Rescinds $6,000,000 instead of $12,858,000 as proposed by the House and $4,000,000 as proposed by the Senate.

MARITIME ADMINISTRATION

SHIP CONSTRUCTION

(Disapproval of Deferral)

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate as follows:

SHIP CONSTRUCTION

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $55,000,000 of the proposed deferral D81-80 relating to the Department of Commerce, Maritime Administration, "Ship construction" as set forth in the message of March 10, 1981, which was transmitted to the Congress by the President. The disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

DEPARTMENT OF JUSTICE

LEGAL ACTIVITIES

Salaries and Expenses, United States Attorneys and Marshals

(Including Transfer of Funds)

Amendment No. 26: Restores the word "including" as proposed by the House.

Amendments No. 27 and 28: Appropriate $7,251,000 of which $6,371,000 shall be derived by transfer instead of appropriating $8,131,000 of which $6,371,000 shall be derived by transfer as proposed by the House, and $6,371,000 to be derived by transfer as proposed by the Senate.

Fees and Expenses of Witnesses

(Including Transfer of Funds)

Amendment No. 29: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Fees and Expenses of Witnesses

(Including Transfer of Funds)

For an additional amount for "Fees and expenses of witnesses", $6,200,000, of which $2,931,000 is to be derived from Office of Justice Assistance, Research, and Statistics, "Law enforcement assistance".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes $2,931,000 to be derived by transfer from the Juvenile Justice program of the "Law enforcement assistance" appropriation. However, the conferees intend that the Office of Juvenile Justice and Delinquency Prevention shall make available whatever resources are necessary to permit participation in the formula grant program by those States not currently participating, if they establish eligibility by August 1, 1981. In a manner consistent with the preceding sentence and the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, the Office may identify those sources of funding necessary to transfer the $2,931,000 as required by this conference agreement.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

Amendment No. 30: Appropriates $12,203,000 as proposed by the House instead of $13,687,000 as proposed by the Senate.

Amendment No. 31: Restores language proposed by the House which prohibits the Federal Bureau of Investigation from using any funds in this Act or any funds appropriated to the FBI in Public Law 96-536 in excess of $35,218,000 for payment to the General Services Administration for standard level user charges for space and services.

IMMIGRATION AND NATURALIZATION SERVICE

SALARIES AND EXPENSES

Amendment No. 32: Appropriates $8,869,000 as proposed by the House instead of $9,519,000 as proposed by the Senate.

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

(Disapproval of Deferral)

Amendment No. 33: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which disapproves deferral D81-86 relating to the Department of Justice, Federal Prison System, "Salaries and Expenses" as set forth in the message of the President of March 10, 1981.

DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

Salaries and Expenses

(Including Transfer of Funds)

Amendment No. 34: Inserts the word "Including" as proposed by the Senate.

Amendment No. 35: Appropriates $1,475,000 as proposed by the Senate.

THE JUDICIARY

SUPREME COURT OF THE UNITED STATES

Acquisition of Property as an Addition to the Grounds of the United States Supreme Court Building

Amendment No. 36: Appropriates $645,000 as proposed by the Senate instead of $585,000 as proposed by the House.

The conferees are agreed that the Architect of the Capitol should proceed expeditiously with the purchase of the property to be used as a parking lot for the Supreme Court. However, the amount provided by the conference agreement is not intended to be an installment on the purchase price of the property, and if the amount provided is not sufficient to acquire the property, the Architect should resubmit the entire proposal to the Congress.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES

BANKRUPTCY COURTS, SALARIES AND EXPENSES

(Transfer of Funds)

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $2,000,000 to be derived by transfer from "Space and facilities".

BOARD FOR INTERNATIONAL BROADCASTING

GRANTS AND EXPENSES

Amendment No. 38: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

The amounts provided in Public Law 96-536 for the Board for International Broadcasting may be expended without regard to the limitation on $2,400,000 for the purpose of transferring RFE/RL positions to the United States.

Notwithstanding section 8(b) of the Board for International Broadcasting Act of 1973, not to exceed $1,600,000 of the amounts placed in reserve pursuant to that section, or which would be placed in reserve pursuant to that section, shall be available to the Board for carrying out that Act.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

(*Rescission*)

Amendment No. 39: Rescinds $8,957,000 as proposed by the House instead of $7,357,000 as proposed by the Senate.

DEPARTMENT OF THE TREASURY

BUREAU OF GOVERNMENT FINANCIAL OPERATIONS

Fishermen's protective fund

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $8,300,000 to remain available until expended.

The conferees note the significant increase in the number of seizures of American fishing vessels by foreign countries during the last two years. The conferees are concerned that in these instances, the Secretary of State did not exercise his authority under 22 U.S.C. 1975 which permits the withholding of foreign assistance payments, as appropriate, for those countries that seize American fishing vessels and fail or refuse to reimburse the United States Government for payments made to owners of fishing vessels for certain losses sustained by such seizures. If the Secretary withholds such foreign assistance payments, he is required to deposit such amounts in the Fishermen's Protective Fund in accordance with the above section of law. The conferees are agreed that the Secretary should exercise his authority to withhold foreign assistance payments as appropriate with regard to any future seizures of American fishing vessels by foreign countries, so that requirements for payments from the fund will not have to be financed wholly from additional appropriations as has been the case in the past.

INTERNATIONAL COMMUNICATION AGENCY

SALARIES AND EXPENSES

(Transfer of Funds)

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

SALARIES AND EXPENSES

(TRANSFER OF FUNDS)

For an additional amount for "Salaries and expenses", $350,000, to be derived by transfer from "Salaries and expenses (special foreign currency program)".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

(*Disapproval of Deferral*)

Amendment No. 42: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $350,000 of the proposed deferral D 81-75 relating to the International Communication Agency, "Salaries and expenses (special foreign currency program)" as set forth in the message of February 13, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

MARINE MAMMAL COMMISSION

SALARIES AND EXPENSES

Amendment No. 43: Deletes rescission of $4,000 as proposed by the Senate.

SMALL BUSINESS ADMINISTRATION

SALARIES AND EXPENSES

(Rescission)

Amendment No. 44: Rescinds $700,000 and designates $8,500,000 for Small Business Development Centers instead of rescinding $1,405,000 and designating $9,500,000 for Small Business Development Centers as proposed by the House. The Senate proposed no rescission or designation of funds.

BUSINESS LOAN AND INVESTMENT FUND

(Disapproval of Deferral)

Amendment No. 45: Disapproves $73,400,000 of the proposed deferral D 81-41A instead of $113,400,000 as proposed by the House and $9,900,000 as proposed by the Senate.

The conferees are agreed that the direct funding levels for the section 7 (h) program and the section 7 (l) program shall be maintained at $25,000,000 and $10,000,000 respectively for fiscal year 1981.

Chapter III—DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

The following items addressed by the Conferees apply to more than one appropriation. Specific dollar amounts by military service will be reflected under each summary appropriation table.

Special Pay for Aviation Officers.—The Conferees agreed to provide $55,500,000 in a special account as discussed elsewhere in this report as recommended by the Senate instead of a total of $50,140,000 in the separate service military personnel accounts as recommended by the House.

Mileage Reimbursement.—The Conferees agreed to provide a total of $71,100,000 for reimbursement of military personnel undergoing a change of station move at an estimated incremental cost of 13¢ per mile of vehicle operation.

Military personnel, Army

Amendment No. 46: Appropriates $8,400,000 instead of $15,400,000 as proposed by the Senate. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budet estimate	House	Senate	Conference
Subsistence	10,900	10,400	8,300	8,300

Military personnel, Navy

Amendment No. 47: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment appropriating $290,089,000 instead of $305,329,000 as proposed by the House and $297,289,000 as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Aviation officer bonus	38,540	24,940	.....	.....
Mileage reimbursement	33,800	19,400	33,800	26,600

All other programs	.....	262,454	262,454	262,454

Military personnel, Marine Corps

Amendment No. 48: Appropriates $46,500,000 instead of $36,150,000 as proposed by the House and $49,250,000 as proposed by the Senate. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Reenlistment bonus	4,000	14,000	30,100	30,100
Mileage reimbursement	12,000	6,500	12,000	9,250
Aviation officer bonus	11,000	9,200	.....	.....
Offsets/inflation	−350	−350	350	350
All other programs	.....	6,800	6,800	6,800

Military personnel, Air Force

Amendment No. 49: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment appropriating $140,150,000 instead of $152,100,000 as proposed by the House and $142,700,000 as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Aviation officer bonus	30,000	16,000	.....	.....
Mileage reimbursement	11,800	6,700	11,800	9,250
Offsets/inflation	−1,000	−1,000	500	500
All other programs	.....	130,400	130,400	130,400

Amendment No. 50: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert:

Special Pay for Aviation Officers

For the payment of special pay under section 301b of title 37, United States Code, $55,500,000, to be transferred to the various military personnel accounts.

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Pending transfer to the proper appropriations, the Conferees agreed to provide $55,500,000 in a special account as recommended by the Senate instead of a total of $50,140,000 in the separate service military personnel accounts as recommended by the House. The Conferees agreed that DOD should submit a prior approval reprogramming request to the House and Senate Appropriations Committees outlining which aviators DOD plans to include in the bonus program and the amounts to be transferred to the military personnel appropriation of each service. The Conferees agreed that no bonuses are to be paid directly from the special account.

Operation and maintenance

The supplemental request was developed with the assumption of an 8 percent inflation rate for non-stock funded Operation and Maintenance purchases in fiscal year 1981. The conferees have agreed that the estimating assumptions are unrealistically low and consequently, have added funds to provide for a rate of inflation of approximately 10 percent. The conferees direct the Department of Defense to seek the prior approval of the Appropriations Committees for the expenditure and allocation of the additional inflation funds within each appropriation. The Department shall provide a detailed plan for the use of the funds to the Appropriations Committees by July 15, 1981.

The following tables provide a summary of the agreements reached by the conferees on the Operation and Maintenance Appropriations in conference.

Operation and Maintenance, Army

Amendment No. 51: Appropriates $466,149,000 instead of $327,049,000 as proposed by the House and $489,699,000, as proposed by the Senate.

The conference agreement on items in conference is as follows:

[Dollars in thousands]

	Budget	House	Senate	Conference
Weteye bomb movement	1,500	.....	1,500	1,500
National Training Center, Fort Irwin, Calif	27,900	.....	27,900	10,000

Total	.....	16,700	14,800	15,300

Operation and Maintenance, Navy Reserve

Amendment No. 57: Appropriates $17,737,000 instead of $12,113,000 as proposed by the House and $21,737,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[Dollars in thousands]

	Budget	House	Senate	Conference
Reserve ship maintenance	4,000	.....	4,000	.....
Inflation	.....	.....	5,624	5,624
All other programs	.....	12,113	12,113	12,113
Total	.....	12,113	21,737	17,737

Operation and Maintenance, Air Force Reserve

Amendment No. 58: Appropriates $25,400,000 instead of $24,300,000 as proposed by the House and $26,400,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[Dollars in thousands]

	Budget	House	Senate	Conference
AFR/ANG beddown	1,000	.....	1,000	.....
Inflation	.....	1,100	2,200	2,200
All other programs	.....	23,200	23,200	23,200
Total	.....	24,300	26,400	25,400

Operation and Maintenance, Army National Guard

Amendment No. 59: Appropriates $26,150,000 instead of $26,400,000 as proposed by the House and $25,650,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Supplies for early deploying units	15,000	15,000	10,000	10,000
Indirect fuel costs	1,000	1,000	.....	500
Inflation	.....	5,500	10,750	10,750
All other programs	.....	4,900	4,900	4,900
Total	.....	26,400	25,650	26,150

Operation and Maintenance, Air National Guard

Amendment No. 60: Appropriates $70,900,000 instead of $66,200,000 as proposed by the House and $77,400,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Puerto Rico security	1,300	.....	1,300	1,300
AFR/ANG Beddown	6,500	.....	6,500	.....
Inflation	.....	3,500	6,900	6,900
All other programs	.....	62,700	62,700	62,700
Total	.....	66,200	77,400	70,900

Claims, Defense

Amendment No. 61: Appropriates $6,000,000 instead of $49,000,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Army	41,000	.....	41,000	.....
Navy	8,000	.....	8,000	6,000
Total	.....	.....	49,000	6,000

The conferees approved $6,000,000 related to personnel claims for Navy. The Conferees did not approve any funds for maneuver damage claims due to DOD failure to undertake negotiations with the NATO allies concerning peacetime host nation support and related status of forces matters.

Procurement

Aircraft Procurement, Army

Amendment No. 62: Appropriates $116,700,000 instead of $105,000,000 as proposed by the House and $150,600,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimates	House	Senate	Conference
UH 60 Blackhawk helicopter	32,000	16,000	32,000	20,700
UH 60 Blackhawk (advanced procurement)	14,000	7,000	14,000	14,000
Offsets/inflation	−9,500	−9,500	13,100	−9,500

Missile Procurement, Army

Amendment No. 63: Appropriates $25,100,000 as proposed by the House instead of $54,140,000 as proposed by the Senate.

Procurement of Weapons and Tracked Combat Vehicles, Army

Amendment No. 64: Appropriates $796,000,000 as proposed by the House instead of $859,020,000 as proposed by the Senate.

Procurement of Ammunition, Army

Amendment No. 65: Appropriates $27,700,000 instead of $12,700,000 as proposed by the House and $57,160,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Offsets from program delays (VIPER)	.....	−26,000	−11,000	−11,000
Offsets/inflation	−20,400	−20,400	9,060	−20,400

VIPER

While approving $15,000,000 procurement funding for VIPER, the Conferees are concerned that the Army may make a production decision that is premature and unjustified. Despite the technical and cost problems that have plagued VIPER through development, the Army now proposes to decrease the number of weapons fired in Operational Testing II and to shorten the testing and analysis time. The Conferees agree that before a production decision is made, the correction of all significant technical problems should be demonstrated by testing. Furthermore, a rigorous analysis should be made of the cost-benefit of VIPER. The Conferees further direct the Army to secure the prior approval of the House and Senate Committees on Appropriations before signing a production contract. The Army should be able to support its conclusion that testing and analysis demonstrate the VIPER system to perform according to specification and to be cost effective.

Other Procurement, Army

Amendment No. 66: Appropriates $598,750,000 instead of $523,400,000 as proposed by the House and $696,580,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
34-ton semitrailer	60,500	12,000	60,500	60,500
5-ton trucks	68,000	34,000	68,000	34,000
10-ton trucks	47,400	23,700	47,400	35,550
M–915 line haul tractor-trailer	59,000	.....	59,000	59,000
Administrative support vehicles	88,000	44,000	.....	.....
Offsets/inflation	−22,800	−22,800	29,180	−22,800

Amendment No. 67: Deletes language which was included in the House bill to increase the limitation on procurement of passenger motor vehicles.

Aircraft Procurement, Navy

Amendment No. 68: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $143,600,000 instead of $117,100,000 as proposed by the House and $132,400,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
F/A–18 aircraft	95,900	95,900	.....	95,900
CH–53E cost growth	26,500	.....	26,500	26,500
Offsets/inflation	−30,000	−30,000	54,700	−30,000

Weapons Procurement, Navy

Amendment No. 69: Deletes the appropriation of $51,200,000 which was proposed by the Senate. The House bill did not include this appropriation.

Shipbuilding and Conversion, Navy

Amendment No. 70: Appropriates a total of $241,400,000 instead of $156,900,000 as proposed by the House and $263,200,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
CG–47 Aegis cruiser	149,900	149,900	152,400	152,400
LSD–41 LSD program	21,800	.....	21,800	.....
Trident	−26,000	−26,000	.....	.....
SSN–688	−26,200	−26,200	.....	.....
FFG–7	−3,300	−3,300	.....	.....
T–AGOS Surtass	−2,100	−2,100	.....	.....
ARS salvage ships	−900	−900	.....	.....
Craft, outfitting, post delivery, and escalation	−23,500	−23,500	.....	.....

Amendment No. 71: Appropriates $152,400,000 for the CG–47 Aegis cruiser program as proposed by the Senate instead of $149,900,000 as proposed by the House.

Amendment No. 72: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: "and $89,000,000 for advance procurement for reactivation of a battleship, to remain available for obligation until September 30, 1985".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Battleship Reactivation

In agreeing to appropriate $89,000,000 for reactivating the battleship *New Jersey*, the conferees note the Secretary of the Navy has publicly stated the Navy will "commit to a reactivation/modernization of *New Jersey* in a West Coast Shipyard for a top price of $326M SCN/$3M R&D". The conferees will expect the Navy to honor this $329,000,000 ceiling for all appropriations for phase I improvements as outlined in testimony; and if the Navy is not certain the work can be performed for this amount, the *New Jersey* reactivation project should not proceed.

Other Procurement, Navy

Amendment No. 73: Deletes the appropriation of $56,700,000 which was proposed by the Senate. The House bill did not include this appropriation.

Procurement, Marine Corps

Amendment No. 74: Appropriates $19,200,000 as proposed by the House instead of $28,600,000 as proposed by the Senate.

Aircraft Procurement, Air Force

Amendment No. 75: Appropriates $753,285,000 instead of $739,885,000 as proposed by the House and $965,125,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
F–15 (adv. proc.)	40,040	20,000	40,040	30,000
F–16 (adv. proc.)	.....	65,700	.....	65,700
ALCA/ARIA contract aircraft	23,700	20,300	23,700	23,700
Various modifications	44,606	1,606	44,606	1,606
Offsets/inflation	−119,876	−119,876	104,624	−119,876

F–15 (Advance Procurement)

The conferees are in agreement that $30,000,000 is provided for advance procurement of 12 additional F–15 aircraft in fiscal year 1982.

F–16 (Advance Procurement)

The conferees are in agreement that $65,700,000 is provided for advance procurement for an additional 60 aircraft in fiscal year 1982 for a total buy of 180 aircraft.

ALCA/ARIA Contract Aircraft

None of these funds are for the procurement of aircraft to be used for purposes related to the M–X program.

Missile Procurement, Air Force

Amendment No. 76: Appropriates $205,869,000 instead of $164,663,000 as proposed by the House and $275,869,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Ground-launched cruise missile	59,206	18,000	59,206	59,206
Minuteman III expansion	.....	.....	5,000	.....
Offsets/inflation	−29,698	−29,698	35,302	−29,698

Minuteman III Expansion

The conferees agreed to delete the $5,000,000 included in the Senate bill for Minuteman III expansion without prejudice to consideration of this matter in the fiscal year 1982 appropriation.

Other Procurement, Air Force

Amendment No. 77: Appropriates $150,206,000 instead of $138,206,000 as proposed by the House and $218,206,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Hawaiian air defense	.....	.....	12,000	12,000
Offsets/inflation	−44,211	−44,211	23,789	−44,211

Procurement, Defense agencies

Amendment No. 78: Appropriates $16,436,000 as proposed by the House in-

stead of $21,436,000 as proposed by the Senate.

Research, development, test and evaluation

Research, Development, Test and Evaluation, Army

Amendment No. 79: Appropriates $41,017,000 instead of $17,150,000 as proposed by the House and $127,650,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
BMD systems technology	36,183		36,183	
SINCGARS–V	9,825	4,925	9,825	7,375
Patriot	23,417		23,417	23,417
Viper		2,000		
Offsets/inflation	−25,541	−25,541	22,459	−25,541

SINCGARS Radio

The conferees are in agreement that a total of $7,375,000 is provided for the SINCGARS Radio program. The conferees urge that the process be expedited for selecting which of the three radios under development should be recommended for procurement and urge that the radio most capable of meeting the future threat to our communications be selected.

Research, Development, Test and Evaluation, Navy

Amendment No. 80: Appropriates $113,609,000 instead of $101,664,000 as proposed by the House and $211,407,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
DDG–X	14,298		14,298	
Sub tac warfare (MK 48 ADCAP)	19,662	14,662	19,662	19,662
Ship dev (eng)	29,308	14,008	14,508	14,008
SMAW	6,945		6,945	6,945
Offsets/inflation	−57,532	−57,532	25,468	−57,532

DDG–X Program

The conference denies the $14,298,000 request for the DDG–X. The conferees believe that the Navy must more sufficiently define the engineering goals and performance specifications for the DDG–X before funds be appropriated for a new surface ship combatant. The conferees request that the Department of the Navy present a written report to both Appropriations Committees of Congress defining the engineering goals and peformance specifications for the DDG–X program similar to that requested by the Senate Armed Services Committee in its fiscal year 1982 Defense Authorization report. Until DDG–X design goals and performance parameters are more sufficiently defined to meet capability requirements, rather than cost constraints, further R. & D. funding for the DDG–X program should be deferred. The denial of the Administration's supplemental request for the DDG–X is made without prejudice for fiscal year 1982, pending full justification of the DDG–X development effort.

Ship Development (Engineering)

The Senate recedes to the House on the elimination of the TAH hospital ship. The conference appropriation for this account includes $2,000,000 for research and development for the reactivation of the battleship *New Jersey* and $1,000,000 for research and development for the reactivation of the battleship *Iowa*.

Special Activities

The conference agreement includes $5,000,000 for special activities.

Amendment No. 81: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: "of which not to exceed $2,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. *New Jersey* and not to exceed $1,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. *Iowa*,".

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Research, Development, Test and Evaluation, Air Force

Amendment No. 82: Appropriates $308,976,000 instead of $285,127,000 as proposed by the House and $423,706,000 as proposed by the Senate.

The Conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Space communications	5,021		5,021	5,021
LANTIRN	4,828		4,828	4,828
Chem/bio defense equip (BIGEYE)	1,870	1,870		1,870
Airfield attack system (JP–233)	66,000	25,400	66,000	25,400
MRASM	14,000		14,000	14,000
M–X Water Surveys			8,000	
Offsets/inflation	−15,089	−15,089	52,911	−15,089

Space Communications

The conferees are in agreement that $5,021,000 is approved for Space Communications. The funds are to be used to upgrade existing systems and the issue of providing funds for a new satellite system will be addressed in the regular fiscal year 1982 bill.

Chemical/Biological Defense Equipment (BIGEYE)

The House recommended $1,870,000 for BIGEYE binary agent bomb development. The Senate recommended no funds. The Senate recedes.

The Committee of Conference has agreed to fund initiatives in chemical weaponry, but remains deeply concerned about the many as yet unanswered questions surrounding this effort. Therefore, the committee directs the Administration to determine the long-range costs of the chemical warfare modernization program and provide a country-by-country report from our NATO allies with respect to their official views on that long-range program. The information provided to the Committee has been insufficient in this regard.

The Committee also believes it imperative that the Administration provide an overview of the mission-oriented requirements for the various binary weapons, as well as an arms control impact study of such requirements, before further funding is approved.

M–X Water Surveys

The conferees agreed that no funds will be provided in this supplemental appropriation for M–X Water Surveys, and that this denial is without prejudice to consideration of a reprogramming request following submission by the Administration of its report on the M–X basing mode.

Low Altitude Airfield Attack System (JP–233)

The conferees agreed to provide $25,400,000 only to pay termination costs of the cancelled JP–233 system. These funds are not to be used for continuation of the program.

Research, Development, Test and Evaluation, Defense Agencies

Amendment No. 83: Appropriates $44,346,000 instead of $30,763,000 as proposed by the House and $74,958,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget estimate	House	Senate	Conference
Def Res Sci (Particle Beam)	5,000		5,000	5,000
Defense Nuclear Agency	4,702	2,702	4,702	2,702
Defense Mapping Agency	583		583	583
Long Haul Comm (DSC)	3,612		3,612	
Blue-green laser			8,000	8,000
Offsets/inflation	−1,828	−1,828	23,172	−1,828

Long Haul Communications

The conferees deny this request without prejudice, and agree that the examination of the fiscal year 1982 budget will include a thorough review of the justification and projected costs of this program.

General Provisions

Amendment No. 84: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken by said amendment, insert:

"None of the funds appropriated to the Department of Defense for fiscal year 1981 and hereafter shall be available for obligation to reimburse a contractor for the cost of commercial insurance (other than insurance normally maintained by the contractor in connection with the general conduct of his business) that would protect against costs of the contractor for correction of the contractor's own defects in materials or workmanship incident to the normal course of construction (those defects in materials or workmanship which do not constitute a fortuitous or casualty loss)."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees adopted language which will preclude the funds appropriated from being available to reimburse defense contractors for the cost of commercial insurance which would cover the cost of correcting the contractors' own defects in materials and workmanship incident to the normal course of construction.

The denial of premium payments would extend to all contractors' own workmanship and material defects (such as mismanagement, improper or omitted work) except those which were fortuitous or casualty losses. This latter category for which premium payments would not be denied, would be the unforeseeable, out of the ordinary incidents—such as a negligent workman causing an extensive fire, material defects resulting

in a catastrophic loss, or other defects which cannot be anticipated in the normal course of construction.

In summary, this language makes clear that the funds appropriated for fiscal year 1981 and hereafter will not be available for the reimbursement of commercial insurance premiums for contractor workmanship and material defects which management would be expected to avoid.

Amendment No. 85: Deletes House language relating to the inflation factor used for the military and other governmental activities.

Chapter IV—DEPARTMENT OF ENERGY

OPERATING EXPENSES

Energy supply, research and development activities

(Rescission and Deferral)

Amendment No. 86: Rescinds $82,511,000 from Operating Expenses, Energy Supply, Research and Development Activities instead of $44,430,000 as proposed by the House and $134,225,000 as proposed by the Senate.

Amendment No. 87: Defers obligation of $105,688,000 from Operating Expenses, Energy Supply, Research and Development Activities until October 1, 1981, instead of $143,769,000 as proposed by the House and $38,448,000 as proposed by the Senate.

The following table sets forth the conference agreement with respect to the individual programs funded in this account:

ENERGY SUPPLY RESEARCH AND DEVELOPMENT—OPERATING EXPENSES

	Conference allowance	
	Rescissions	Deferrals
I. Solar energy R. & D.:		
A. Solar applications for buildings:		
1. Active solar heating and cooling	−2,300,000	
2. Passive solar heating and cooling	−1,500,000	
3. Photovoltaic energy systems	−8,600,000	−12,400,000
Subtotal solar applications for buildings	−12,400,000	−12,400,000
B. Solar applications for industry:		
1. Solar thermal energy systems	−3,480,000	−14,570,000
2. Biomass energy systems	−14,850,000	
Subtotal solar applications for industry	−18,330,000	−14,570,000
C. Solar applications for power:		
1. Wind energy systems	−8,300,000	−17,300,000
2. Ocean energy systems	−4,400,000	
Subtotal solar applications for power	−12,700,000	−17,300,000
E. Other solar programs: International solar energy program	−1,200,000	
Total solar energy R. & D	−44,630,000	−44,270,000
II. Geothermal:		
A. Hydrothermal industrialization		−6,500,000
B. Geopressured resources		−2,539,000
C. Geothermal technology development		−461,000
Total geothermal		−9,500,000
III. Hydropower:		
A. Small scale hydropower	−4,602,000	
B. Feasibilities studies loan program	−14,000,000	−5,944,000
Total hydropower	−18,602,000	−5,944,000
Total solar, geothermal and hydropower	−63,232,000	−59,714,000
IV. Nuclear fission reactor programs:		
A. Conventional reactor systems:		
1. High temperature reactor technology		−1,026,000

ENERGY SUPPLY RESEARCH AND DEVELOPMENT—OPERATING EXPENSES—Continued

	Conference allowance	
	Rescissions	Deferrals
2. Light water reactor systems	−1,000,000	
Subtotal conventional reactor systems	−1,000,000	−1,026,000
B. Commercial nuclear waste: Commercial waste management		−5,000,000
C. Spent nuclear fuel: Spent fuel storage:		
a. Domestic	−1,000,000	
b. International	−1,000,000	
Subtotal spent nuclear fuel	−2,000,000	
D. Advanced nuclear systems:		
1. Space and terrestrial applications	−1,000,000	
2. Advanced systems evaluations	−500,000	
Subtotal advanced nuclear systems	−1,500,000	
E. Breeder reactor systems:		
1. Liquid metal fast breeder reactor		−3,000,000
3. Water cooled breeder reactor		−1,000,000
5. Fuel cycle research and development		−1,000,000
Subtotal breeder reactor systems		−5,000,000
Total nuclear fission reactor programs	−4,500,000	−11,026,000
V. Fusion energy R. & D.:		
B. Development and technology		−1,000,000
C. Applied plasma physics		−1,000,000
D. Planning and projects		−500,000
Total fusion energy R. & D		−2,500,000
VII. Environment: Environmental research and development:		
1. Overview and assessment	−4,000,000	
2. Biological and environmental research	−3,979,000	
3. Program direction	−1,000,000	
Total environment	−8,979,000	
VIII. Supporting research and technical analysis:		
A. Basic energy sciences:		
2. Materials sciences		−2,000,000
3. Chemical sciences		−1,000,000
4. Engineering, mathematical, and geosciences		−2,000,000
Subtotal basic energy sciences		−5,000,000
B. Technical assessment projects: Advanced technology projects	−3,000,000	
Total supporting research and technical analysis	−3,000,000	−5,000,000
IX. Remedial action programs:		
B. Remedial action for former DOE contractor installation MED/AEC sites		−1,000,000
D. Remedial action for inactive uranium mill tailing sites		−1,000,000
E. West Valley, N.Y.		−2,000,000
Total, remedial action programs		−4,000,000
Total in disagreement	−79,711,000	−82,240,000
Items not in disagreement	−2,800,000	−23,448,000
Total amount in bill	−82,511,000	−105,688,000

Both the House and Senate Committees on Appropriations have requested data from the Department with regard to the proposed implementation of P.L. 96-368. The conferees agree with the Senate report language directing that the Department not proceed beyond its planning activities until this information has been provided and considered by the Committees on Appropriations in connection with the fiscal year 1982 appropriation request.

OPERATING EXPENSES

General science and research activities

(Deferral)

Amendment No. 88: Restores matter proposed by the House and stricken by the Senate to defer obligation of $5,000,000 from Operating Expenses, General Science and Research Activities until October 1, 1981. The conferees agree that the deferral of funds should be made against lowest priority funding requirements so as to minimize any programmatic impact.

OPERATING EXPENSES

Atomic energy defense activities

The conferees agree that $10,000,000 of the $41,000,000 supplemental appropriation shall be available for the Special Isotopes Separations program.

(Disapproval of Deferral)

Amendment No. 89: Restores matter proposed by the House and stricken by the Senate to disapprove the proposed deferral of $10,000,000 from Operating Expenses, Atomic Energy Defense Activities, set forth in D81-29A submitted March 10, 1981. The conferees agree that the proposed redirection of the inertial confinement fusion program will be further considered in connection with the fiscal year 1982 bill.

Plant and capital equipment

Energy Supply, Research and Development Activities

(Rescission and Deferral)

Amendment No. 90: Restores language in heading stricken by the Senate.

Amendment No. 91: Rescinds $2,500,000 from Plant and Capital Equipment, Energy Supply, Research and Development Activities as proposed by the House instead of $16,100,000 as proposed by the Senate.

Amendment No. 92: Defers obligation of $36,647,000 from Plant and Capital Equipment, Energy Supply, Research and Development Activities until October 1, 1981, as proposed by the House instead of $1,367,000 as proposed by the Senate.

The conferees agree that the fiscal year 1982 funding levels for the individual projects included in this account will be considered further in connection with action on the fiscal year 1982 appropriation bill.

GEOTHERMAL RESOURCES DEVELOPMENT FUND

Geothermal loan guarantee and interest assistance program

(Rescission and Deferral)

The conferees agree with Senate report language regarding the rescission of funds from the loan guarantee reserve and the authority to guarantee loans.

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

Corps of Engineers—Civil

Construction, General

The conferees agree with the House report language relating to the Burns Waterway and Burns Ditch, Indiana project and the Senate report language relating to the Tug and Levisa Fork areas of the Big Sandy River Basin and the Upper Cumberland River Basin project and the Treasure Island, Pinellas County, Florida project.

DEPARTMENT OF THE INTERIOR

WATER AND POWER RESOURCES SERVICE

General investigations

(Transfer of Funds)

Amendment No. 93: Deletes House language which would have transferred $1,300,000 from the Construction Program to General Investigations for the Wind-Hydroelectric Energy Project.

INDEPENDENT AGENCIES

FUNDS APPROPRIATED TO THE PRESIDENT

Appalachian regional development programs

(Rescission)

Amendment No. 94: Rescinds $40,000,000 instead of $25,000,000 as proposed by the House and $110,000,000 as proposed by the Senate.

(Deferral)

Amendment No. 95: Restores language proposed by the House and stricken by the Senate to defer obligation of $15,000,000 for area development programs until October 1, 1981.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

(Rescission)

Amendment No. 96: Restores language proposed by the House and stricken by the Senate amended to rescind $5,000,000 from the Nuclear Regulatory Commission instead of $10,000,000 as proposed by the House. The conferees direct the Commissioners to eliminate all unnecessary travel and agree that travel by Commissioners for emergencies, to visit facilities currently licensed or under consideration for license or permit, laboratories engaged in NRC research and NRC regional offices is permissible under the terms of the rescission. No funds are provided for official entertainment activities without approval of the Committees on Appropriations. Because the Commission has taken steps on its own initiative to reallocate staff to licensing activities, a total of 25 additional positions shall be allocated, as the Chairman determines appropriate, to NRR and the Executive Legal Director. The Commission's personnel ceiling for FY 1981 is 3,300. No funds are to be used for public hearings on the "safety goal", but previously planned safety goal workshops may continue. The Committees agree to review progress made by the Commission in licensing during review of the FY 1982 budget.

TENNESSEE VALLEY AUTHORITY

(Rescission)

Amendment No. 97: Rescinds $85,500,000 as proposed by the House instead of $177,500,000 as proposed by the Senate.

(Deferral)

Amendment No. 98: Restores language proposed by the House and stricken by the Senate amended to defer obligation of $42,000,000 until October 1, 1981, for the coal gasification project, instead of $57,800,000 as proposed by the House.

The conferees agree that the remaining funds for the proposed coal gasification project may be available only for detailed design and other activities, while the Synthetic Fuels Corporation evaluates a proposal submitted for the project.

Further, the conferees understand and are in agreement that no additional funds will be appropriated for the project, including termination and close-out costs.

WATER RESOURCES COUNCIL

Water resources planning

(Rescission)

Amendment No. 99: Rescinds $5,000,000 for water resources planning as proposed by the Senate instead of $7,288,000 as proposed by the House.

Amendment No. 100: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds language relating to grants to States under Title III of the Water Resources Planning Act.

Chapter V—MULTILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

International Financial Institutions

Contribution to the International Finance Corporation

(Rescission)

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which rescinds $33,447,900 for the International Finance Corporation.

Constribution to the International Development Association

Amendment No. 102: Appropriates $500,000,000 for the International Development Association instead of $534,600,000 as proposed by the House and $408,000,000 as proposed by the Senate.

BILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

International Development Cooperation Agency

Agency for International Development

Amendment No. 103: Reported in technical disagreement. American Schools and Hospitals Abroad (Foreign Currency Program): The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides $14,300,000 in foreign currency for the American University in Cairo.

(Rescission)

Amendment No. 104: Sahel Development Program: Rescinds $1,500,000 from the Sahel Development Program to be used for the African Development Foundation as proposed by the House instead of $2,000,000 as proposed by the Senate.

Amendment No. 105: Provides $10,170,000 for "Operating Expenses" instead of $8,651,000 as proposed by the House and $10,476,000 as proposed by the Senate. This will allow for the effective implementation as of July 1, 1981 of new allowances and benefits authorized by the Foreign Service Act of 1980.

(Rescission)

Amendment No. 106: Contingency Funds: Deletes a rescission of $1,400,000 as proposed by the House.

(Rescission)

Amendment No. 107: Indochina Postwar Reconstruction Assistance: Deletes a rescission of $1,800,000 as proposed by the House.

(Rescission)

Amendment No. 108: Middle East Special Requirements Fund and Security Supporting Assistance (Syria): Deletes a rescission of $25,000,000 as proposed by the House.

The Managers on the part of the House and Senate insist that no additional funds for Syria will be disbursed during the remainder of fiscal year 1981 and that the issue of the remaining undisbursed funds in the Syrian "pipeline" should be resolved in the fiscal year 1982 authorization and appropriation process.

DEPARTMENT OF STATE

INTERNATIONAL NARCOTICS CONTROL

(Rescission)

Amendment No. 109: Rescinds $12,785,000 instead of $2,600,000 as proposed by the House and $13,285,000 as proposed by the Senate.

EXPORT-IMPORT BANK OF THE UNITED STATES

LIMITATION ON PROGRAM ACTIVITY

Amendment No. 110: Provides $5,461,000,000 for the principal amount of direct loans instead of $5,524,000,000 as proposed by the House and $5,398,000,000 as proposed by the Senate.

Chapter VI—DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

(Rescission and Deferral)

Amendment No. 111: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $30,611,609 for existing units under section 8, including section 8(j), of such Act, $197,102,148 for newly constructed and substantially rehabilitated units assisted under such Act, and $5,219,104,150 of budget authority, are rescinded.

(Deferral)

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $15,000,000 for modernization of existing low-income housing projects and $300,000,000 of budget authority shall be withheld from obligation until October 1, 1981.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees stress that the reduction in the 1981 Indian housing program in no way reflects a retreat from a commitment to provide adequate levels of subsidized Indian housing.

SOLAR ENERGY AND ENERGY CONSERVATION BANK

(Rescission)

Amendment No. 112: Rescinds $121,000,000 from assistance for solar and conservation improvements as proposed by the Senate, instead of $101,000,000 as proposed by the House.

COMMUNITY PLANNING AND DEVELOPMENT

(Rescission)

Amendment No. 113: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

COMPREHENSIVE PLANNING GRANTS

(Rescission)

Any amount not reserved from appropriations provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Acts, 1981 and prior years, including any amounts becoming available from cancellation of prior year reservations, but excluding $19,000,000, are rescinded.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree that the $19,000,000 made available for comprehensive planning grants includes $2,000,000 to be used only

for the work study program. The conferees further agree that the $19,000,000 shall be made available only to metropolitan and non-metropolitan areawide planning organizations.

The Senate report indicated that no funding has been requested for the comprehensive planning grants program for 1982 and that 1981 is expected to be the program's final year. The Committee of Conference emphasizes that it expects no funding will be provided for the comprehensive planning grants program after 1981. The conferees' recommendation will allow areawide planning organizations to transition to other funding sources.

NEIGHBORHOODS, VOLUNTARY ASSOCIATIONS AND CONSUMER PROTECTION

(Rescission)

Amendment No. 114: Restores language proposed by the House and stricken by the Senate amended to rescind $3,000,000 from housing counseling assistance, instead of $6,000,000 as proposed by the House.

(Rescission)

Amendment No. 115: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate making available $501,500 from the Secretary's Discretionary Fund for the balance of grant commitments to nine neighborhood self-help development projects.

INDEPENDENT AGENCIES

ENVIRONMENTAL PROTECTION AGENCY

(Rescission)

Amendment No. 116: Rescinds $499,300 from research and development, instead of $849,300 as proposed by the House and $149,300 as proposed by the Senate.

The conferees are concerned that the total Federal radiation research effort is in disarray. Many departments and agencies have inadequately defined and partially overlapping radiation research responsibilities. The Administration is urged to review current assignments and recommend alternatives with the objective of better coordinated and more effective Federal radiation research.

(Rescission)

Amendment No. 117: Rescinds $4,953,100 from abatement, control and compliance, instead of $6,371,100 as proposed by the House and $1,253,100 as proposed by the Senate. The conferees agree that the $1,418,000 made available above the House recommendation is for resource conservation and recovery technical assistance panels.

(Rescission)

Amendment No. 118: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Of the funds appropriated under this head, $880,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1980, and $756,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, are rescinded. The reduction in each appropriation will be distributed among the States according to the allotment formula specified in section 205(c) of Public Law 92-500, as amended by Public Law 95-217. Whenever a State's share of the reduction from an appropriation, as determined by the formula, is greater than its unobligated balance for that appropriation, as determined by the Administrator of the Environmental Protection Agency upon the date of enactment of this Act, the shortfall will be distributed according to the allotment formula among all the States which still have funds remaining from that appropriation. This process of distributing the shortfall will continue until the amount of the reduction has been allocated among the States.

Of the funds appropriated under this head in the Public Works Employment Appropriation Act, 1977, $64,000,000 are rescinded.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees urge the Environmental Protection Agency, in the use of funds remaining, to place high priority on projects under Federal court order.

FEDERAL EMERGENCY MANAGEMENT AGENCY

(Rescission)

Amendment No. 119: Rescinds $8,000,000 from funds appropriated to the President, disaster relief as proposed by the House, instead of $20,000,000 as proposed by the Senate.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

(Rescission)

Amendment No. 120: Rescinds $4,500,000 from research and development as proposed by the House, instead of $37,900,000 as proposed by the Senate.

The conferees agree that NASA may reprogram $52,000,000 to the space shuttle of the $60,000,000 proposed for such purpose. The conferees direct that the remaining $8,000,000 be made available for the following program activities:

International Solar Polar Mission	$3,000,000
Solar Electric Propulsion System	3,000,000
Technology Utilization	2,000,000

The conferees have restored $3,000,000 for the International Solar Polar Mission (ISPM). The European Space Agency (ESA) has invested over $100,000,000 in this program with the understanding that the United States would provide one of the two spacecrafts. The Administration has now indicated its intent to terminate the development of the U.S. spacecraft and has requested the transfer of $14,600,000 from the program to the space shuttle.

Various spokesmen for the Administration have expressed different opinions as to the proper course of action relative to terminating work on the U.S. spacecraft. Furthermore, ESA has submitted a proposal to NASA for the development of a second European spacecraft in lieu of a U.S. spacecraft. This ESA proposal would permit many of the originally envisioned mission objectives to be accomplished—but it would eliminate some U.S. instrumentation, including the important coronagraph.

The conferees understand that restoring $3,000,000 will maintain the viability of a fully instrumented U.S. spacecraft option, including the coronagraph, until a final mission configuration can be determined. Retaining $3,000,000 for ISPM expresses the support of the conferees to keep open various options for a two-spacecraft mission. However, it is clear that if any option is to succeed, the Administration must make a firm commitment to support that option over the life of the program.

To assist the Administration and Congress in making a decision, the conferees instruct NASA to initiate a review of ISPM, with the National Academy of Sciences, through the procedures established in House Report 96-1476. The conferees expect this review to consider the scientific merits and costs of all of the two spacecraft options. Because of the time criticality of the decision, the conferees expect to be briefed by the review panel on its recommendations by September 11, 1981.

NATIONAL CONSUMER COOPERATIVE BANK

(Rescission)

Amendments No. 121 and 122: Rescinds $16,990,000 from self-help development and establishes a loan limitation of $19,700,000 as proposed by the House, instead of $29,990,000 and $6,700,000, respectively, as proposed by the Senate.

NATIONAL SCIENCE FOUNDATION

(Rescission)

Amendment No. 123: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Of the funds appropriated under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, $46,000,000 are rescinded, and of the amounts remaining for research and related activities under Public Law 96-526: (1) not more than $37,000,000 shall be available for scientific, technological, and international affairs; (2) not more than $83,000,000 shall be available for engineering; (3) not more than $18,053,000 shall be available for earthquake hazards mitigation; (4) not more than $1,240,000 shall be available for the establishment and operation of three university-based Innovation Centers; (5) not more than $2,800,000 shall be available for grants to two-year and four-year colleges for equipment and instrumentation costing $35,000 or less; (6) not more than $300,000 shall be available for small business innovation for projects to aid the handicapped; and (7) not more than $1,400,000 shall be available for special programs for women and minorities in science and technology. None of these funds shall be available for separately targeted programs for appropriate technology, science faculty improvement programs for two-year and four-year college faculty research participation, and research opportunity grants and visiting professorships for women.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree that the $20,000,000 restored for research and related activities shall be allocated on a priority basis at the discretion of the Foundation.

(Rescission)

Amendment No. 124: Rescinds $10,000,000 from science education activities as proposed by the House, instead of $16,000,000 as proposed by the Senate.

Amendment No. 125: Earmarks not more than $500,000 for science education programs related to appropriate technology as proposed by the House, instead of $1,200,000 as proposed by the Senate.

DEPARTMENT OF THE TREASURY

(Rescission)

Amendment No. 126: Deletes language proposed by the Senate rescinding

$59,849,284 from investment in National Consumer Cooperative Bank, establishing a loan limitation of $55,949,284, and halting further commitments to guarantee loans.

VETERANS ADMINISTRATION

Amendment No. 127: Appropriates $990,000,000 for compensation and pensions as proposed by the Senate, instead of $973,600,000 as proposed by the House.

Amendment No. 128: Appropriates $467,500,000 for readjustment benefits as proposed by the Senate, instead of $217,500,000 as proposed by the House.

Amendment No. 129: Appropriates $3,555,000 for veterans insurance and indemnities as proposed by the Senate, instead of $4,740,000 as proposed by the House.

(Deferral)

Amendment No. 130: Restores language proposed by the House disapproving the deferral of medical care funds.

(Rescission)

Amendment No. 131: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate rescinding $25,789,000 of medical care funds. The committee of conference supports the February 19, 1981, opinion of the General Accounting Office regarding section 5010(a)(4) of title 38 of the United States Code. The conferees intend that this rescission of medical care funds not adversely affect any court suit concerning the withholding of funds or reduction in funded personnel ceiling.

(Deferral)

Amendment No 132: Restores language proposed by the House disapproving the deferral of medical and prosthetic research funds.

(Deferral)

Amendment No. 133: Restores language proposed by the House disapproving the deferral of medical administration and miscellaneous operating expenses funds.

(Rescission)

Amendment No. 134: Rescinds $162,160,000 from construction, major projects as proposed by the House, instead of $165,760,000 as proposed by the Senate.

(Deferral)

Amendment No. 135: Restores language proposed by the House disapproving the deferral of $85,965,000 of construction, major projects funds.

Amendment No. 136: Deletes administrative provision proposed by the Senate limiting funds provided for agencies funded in the HUD-Independent Agencies Appropriation Act for personnel compensation and benefits to be used for other purposes without the approval of the Committees on Appropriations.

Chapter VII—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

Amendment No. 137: Appropriates $55,200,000 for management of lands and resources as proposed by the House instead of $56,353,000 as proposed by the Senate. The managers agree that BLM should make every effort to accelerate land conveyances to the State of Alaska and to the Alaskan Natives, including the hiring of sufficient staff for that purpose at the most expeditious rate possible.

Amendment No. 138: Deletes the rescission proposed by the House of $108,000,000 for payment in lieu of taxes.

OFFICE OF WATER RESEARCH AND TECHNOLOGY

Amendment No. 139: Inserts heading "(Rescission and Deferral)" instead of "(Deferral)" as proposed by the House and "(Rescission)" as proposed by the Senate.

Amendment No. 140: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$2,745,000 shall not become available for obligation until October 1, 1981, and shall remain available for obligation until September 30, 1983, and $5,900,000 are rescinded".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. Amounts of $1,545,000 for water resources R&D, $3,600,000 for saline water R&D, $480,000 for technology transfer, and $275,000 for program support are rescinded. Amounts of $775,000 for water resources R&D, $1,800,000 for saline water R&D, and $170,000 for technology transfer are deferred.

UNITED STATES FISH AND WILDLIFE SERVICE

Amendment No. 141: Appropriates $2,000,000 for resource management as proposed by the House instead of $2,750,000 as proposed by the Senate.

NATIONAL PARK SERVICE

Amendment No. 142: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$4,776,000 including $576,000 to complete construction of the Savage River Bridge at Denali National Park and Preserve, Alaska".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The net increase over the amount proposed by the House consists of decreases of $328,000 for payment to Brewster County, Texas, and $1,300,000 for continued development of units of the National Park Service created or expanded by the Alaska lands bill; and increases of $1,700,000 for maintenance of facilities needed to provide for the health and safety of NPS visitors and employees, and $576,000 to complete construction of the Savage River Bridge in Denali National Park and Preserve, Alaska.

Amendment No. 143: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment rescinding $19,000,000 for the Urban Park and Recreation Fund instead of $35,000,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The $16,000,000 made available by this amendment is for those projects for which a commitment has been made but no funds obligated.

LAND AND WATER CONSERVATION FUND

Amendment No. 144: Deletes language proposed by the House which prohibited use of funds for a contingency reserve.

Amendment No. 145: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter proposed by said amendment, insert the following:

(Rescission)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514) and previous Interior Department Appropriations Acts, $90,000,000 are rescinded in the following amounts: $55,000,000 for payments to the States; $133,000 for the Bureau of Land Management; $4,918,000 for the Forest Service; $12,217,000 for the United States Fish and Wildlife Service; $14,782,000 for the National Park Service; and $2,950,000 for the Pinelands National Reserve: *Provided*, That notwithstanding the provisions of 16 U.S.C. 460l-8, the unobligated balances of the contingency reserve and funds appropriated and apportioned for the various States and Territories upon enactment of this Act shall be reallocated among the States and Territories so that each shall receive not less than seventy-five percent of the amount each would have received under the statutory allocation of the amount appropriated for payment to the States under this head in Public Law 96-514.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amounts allocated to the various agencies are for priority land acquisitions.

In addition, the managers agree that the Forest Service is to use $1,500,000 to acquire the Dillworth tract in Cascade Head Science Research Area and is also to acquire land within the Manistee N.F. under option from the Boy Scouts of America.

Amendment No. 146: Deletes House language as proposed by the Senate which prohibited use of funds for a discretionary reserve.

Amendment No. 147: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment rescinding $6,500,000 for the Historic Preservation Fund instead of $8,000,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The $1,500,000 made available by this amendment is for those states that have not received their survey and planning grants.

Amendment No. 148: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the sum proposed by said amendment, insert the following: "$12,000,000 available from the Highway Trust Fund to liquidate contract authority provided under section 105(a)(8) of Public Law 94-280 for engineering services, roadway excavation, and pilot boring for the Cumberland Gap Tunnel, as authorized by section 160 of Public Law 93-87".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The managers agree that the funds restored will be used to complete preliminary engineering and design activities but will not be used to begin actual construction.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

Amendment No. 149: Restores title as proposed by the House:

(Rescission and Deferral)

Amendment No. 150: Rescinds $3,154,000 for regulation and technology instead of $1,954,000 as proposed by the House and $8,954,000 as proposed by the Senate. The increase of $1,200,000 over the amount proposed by the House is state regulatory grant funds that are no longer required because of delays in establishing permanent state regulatory programs.

Amendment No. 151: Defers $5,800,000 instead of $7,000,000 as proposed by the House. The increase of $5,800,000 over the Senate amount is for state regulatory grant funds that will be required in fiscal year 1982 instead of fiscal year 1981 as originally appropriated.

OFFICE OF THE SECRETARY

Amendment No. 152: Rescinds $34,000,000 in Youth Conservation Corps instead of $30,000,000 as proposed by the House and $38,194,000 as proposed by the Senate.

Amendment No. 153: Deletes amendment proposed by the Senate providing that no valid obligations would be invalidated.

Amendment No. 154: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter proposed by said amendment, insert the following: "*Provided*, That notwithstanding provisions of 16 U.S.C. 1704(d) and 1706 the unrescinded balance of the amount appropriated under this head in Public Law 96-514 shall be allocated as follows: $18,000,000 for the purposes of 16 U.S.C. 1704; $4,000,000 to the Secretary of the Interior; and $4,000,000 to the Secretary of Agriculture".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. This allocation provides that the States recieve 30% of the amount appropriated in the regular fiscal year 1981 appropriation and the Departments of Agriculture and Interior receive equal amounts for management and closeout of the 1981 program.

Amendment No. 155: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: Restore the matter stricken by said amendment amended to read as follows:

RURAL WATER TREATMENT AND DISTRIBUTION SYSTEM

(Deferral)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514), $1,900,000 shall not become available for obligation until the conditions of Section 9(b) of Public Law 96-355 regarding deauthorization of the Oahe unit have been met.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. Section 9(b) of Public Law 96-355 authorizes $68,100,000 for construction of the WEB project. It further states that if the Oahe unit is not deauthorized by September 30, 1981, the authorization for appropriations is terminated. This amendment defers the planning and design funds until the conditions of Section 9(b) are met. The managers are in agreement that the project be reauthorized through the Farmers Home Administration and that appropriations be authorized to be made to that organization.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

Amendment No. 156: Appropriates $62,542,000 for construction and land acquisition as proposed by the Senate instead of $78,442,000 as proposed by the House. Funds for salvage of timber damaged by the eruption of Mount Saint Helens are provided by transfer in Amendment No. 158.

Amendment No. 157: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which permits the Forest Service to waive the public works contracting procedure, if necessary, to construct the permanent roads required for salvage of timber damaged by the eruption of Mount Saint Helens.

Amendment No. 158: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further*, That $22,607,000 appropriated in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514), for timber management and any related activities, including roads, on the Tongass National Forest, Alaska, that are replaced by funds provided under the authority of section 705(a) of Public Law 96-487 (which fund is hereby established at not less than $25,000,000 for fiscal year 1981), are transferred to this account, to remain available until expended, to facilitate timber salvage activities in the Mount Saint Helens volcano area of the Gifford Pinchot National Forest as follows: construction of forest development roads and trails by the Forest Service $18,812,000; land line location $300,000; timber sales preparation $800,000; and road maintenance $2,695,000".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The amounts provided by this transfer will permit the Service to provide for all road and land line location to salvage by the end of 1984 about 770 million board feet of timber damaged by the eruption of Mount Saint Helens.

Additional funds for timber sales preparation and road maintenance will be provided in the fiscal year 1982 bill. The anticipated receipts from salvage of this timber are $177,000,000—a "profit" of $115,000,000.

DEPARTMENT OF ENERGY

ALTERNATIVE FUELS PRODUCTION

(Rescission)

Amendment No. 159: Reported in technical disagreement. The managers on the part of the house will offer a motion to recede and concur in the amendment of the Senate which rescinds $875,000,000 from the "Solar and conservation reserve". This amendment rescinds the balance in the reserve rather than transferring it to the Strategic Petroleum Reserve.

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

Amendment No. 160: Inserts "Rescission and" in the heading as proposed by the Senate.

Amendment No. 161: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment rescinding $53,036,000 for fossil energy research and development instead of $66,850,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Funds for the SRC-I pilot plant ($1,000,000), peat gasification ($5,000,000) and a study of a methanol from coal facility in Beaverdale, PA ($4,814,000) are made available in fiscal year 1981. In addition, $3,000,000 for enhanced gas recovery are not rescinded.

Amendment No. 162: Defers $9,000,000 for fossil energy research and development instead of $60,536,000 as proposed by the House and $6,000,000 as proposed by the Senate. In addition to the amount proposed by the Senate, $3,000,000 for enhanced gas recovery are deferred.

FOSSIL ENERGY CONSTRUCTION

Amendment No. 163: Inserts "Rescission and" in the heading as proposed by the Senate.

Amendment No. 164: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate rescinding $89,400,000 for fossil energy construction.

Amendment No. 165: Defers $235,000,000 for fossil energy construction as proposed by the Senate. The $100,000,000 contained in the deferral for SRC-II is in addition to amounts deferred in administration deferral No. D81-33B.

ENERGY PRODUCTION, DEMONSTRATION, AND DISTRIBUTION

Amendment No. 166: Inserts heading "(Rescission and Deferral)" instead of "(Deferral)" as proposed by the House and "(Rescission)" as proposed by the Senate.

Amendment No. 167: Deletes language proposed by the House deferring $7,248,000 for energy production, demonstration, and distribution.

Amendment No. 168: Deletes the House-proposed language "of the funds appropriated under this head".

Amendment No. 169: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$400,000 shall not become available for obligation until October 1, 1981, and $10,348,000 are rescinded".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. Funds for a coal loan guarantee reserve ($2,500,000) will be made available for obligation in fiscal year 1981 and $400,000 for leasing activities will be deferred.

ENERGY CONSERVATION

Amendment No. 170: Deletes heading "(Deferral)" and inserts heading "(Rescission and Deferral)" as proposed by the Senate.

Amendment No. 171: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$67,762,000 shall not become available for obligation until October 1, 1981, and $153,180,000 are rescinded".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. From the amounts proposed for rescission

by the Senate $81,390,000 are made available for obligation in fiscal year 1981 as follows: $2,000,000 for the urban consortium, $3,000,000 for gas turbine engine development, $3,100,000 for Stirling engine development, $68,700,000 for schools and hospitals conservation grants, and $4,590,000 for biomass energy studies. From the amounts proposed for rescission by the Senate $63,925,000 is deferred until fiscal year 1982 as follows: $6,705,000 for building systems, $5,150,000 for residential/commercial retrofit, $2,190,000 for the residential conservation service, $3,192,000 for community systems, $7,630,000 for technology and consumer products, $2,258,000 for appliance standards, $28,400,000 for industrial energy conservation (excluding coke process development of $19,300,000 and program direction of $500,000), $4,400,000 for gas turbine energy development, $1,700,000 for Stirling engine development, and $2,300,000 for vehicle systems.

Amendment No. 172: Changes title to:

(Rescission and Deferral)

Amendment No. 173: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment rescinding $17,167,000 for economic regulation instead of $39,167,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The $22,000,000 deferred will be used in FY 1982 for the fuels conversion and compliance programs rather than for gasoline rationing as originally appropriated.

Amendment No. 174: Defers $38,200,000 instead of $61,967,000 as proposed by the House and $16,200,000 as proposed by the Senate. The $22,000,000 increase over the amount deferred by the Senate is for continuation of the compliance program through FY 1982 and for the fuels conversion program.

STRATEGIC PETROLEUM RESERVE

Amendment No. 175: Deletes heading "(Including Transfer of Funds)" as proposed by the Senate.

Amendment No. 176: Deletes transfer of $875,000,000 proposed by the House from the "Solar and conservation reserve" appropriated in Public Law 96-126 to the Strategic Petroleum Reserve. The funds in the "Solar and conservation reserve" are proposed for rescission in Amendment No. 159. The effect is to increase new budget authority in the Strategic Petroleum Reserve, offset by an equivalent rescission in the "Solar and conservation reserve".

Amendment No. 177: Deletes advance appropriation of $883,408,000 proposed by the House for the Strategic Petroleum Reserve for fiscal year 1982.

Amendment No. 178: Rescinds $13,700,000 for the Energy Information Administration instead of $11,700,000 as proposed by the House and $14,000,000 as proposed by the Senate. The $2,000,000 increase in the rescission over the amount proposed by the House is for Emergency Energy Conservation Act data collection. The $300,000 retained is for the Financial Reporting System.

DEPARTMENT OF THE TREASURY

ENERGY SECURITY RESERVE

(Rescission)

Amendment No. 179: Rescinds $250,600,000 for the purposes of subtitle A of Title II of the Energy Security Act as proposed by the Senate. The amendment would not provide a $30 million loan guarantee reserve for biomass energy projects.

Amendment No. 180: Rescinds $218,900,000 for subtitle B of Title II of the Energy Security Act as proposed by the Senate. The amendment would not provide a $23 million loan guarantee reserve for urban waste energy projects.

Amendment No. 181: Restores language stricken by the Senate which removes the mandatory June 30, 1981 transfer date to the Synthetic Fuels Corporation for funds currently administered by the Department of Energy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES ADMINISTRATION

Amendment No. 182: Appropriates $120,000 for Indian health services as proposed by the House for the Masters in Public Health program for American Indians and Alaska Natives. The managers are informed that $1,100,000 is being administratively withheld as a result of not awarding any new scholarships to Indian students in Indian health profession. These funds should either be used for the purpose for which they were appropriated or reported as a rescission or deferral as required by the Impoundment Control Act of 1974.

Amendment No. 183: Deletes language proposed by the Senate providing that (1) medicaid and medicare reimbursement could be used for planning and design of new and replacement facilities and (2) that appropriated funds could be used for lease of 200 units of housing to be constructed near the Chinle Hospital and at Inscription House Health Center. The managers prefer that planning and design funds be provided in the construction account and that fiscal year 1981 reimbursements be used for accreditation and certification. The matter of leasing housing units will be addressed in connection with the fiscal year 1982 bill.

Amendment No. 184: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter stricken by said amendment, insert the following: "For an additional amount for "Indian health facilities," $2,500,000, to remain available until expended, for site reviews, water investigations, and preliminary engineering and design of sanitation facilities for 2,840 Indian housing units."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers are aware that the Department of Housing and Urban Development will not approve housing projects for construction unless a commitment has been made for the provision of sanitation facilities. Because of this, more than 1,700 HUD Indian housing units scheduled for construction this fiscal year will be delayed because the Indian Health Service does not have funds to provide essential sanitation facilities.

In order that these housing projects, as well as housing provided by the Bureau of Indian Affairs and others not be delayed, an additional $2,500,000 is provided to the Indian Health Service to initiate preliminary engineering design, rights of way and archeological clearances, soil and water source investigations, and other related preproject planning for 2,840 Indian housing units.

The managers recommend that the housing agencies also request funds for sanitation facilities rather than continuing the existing procedures.

Amendment No. 185: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment rescinding $3,916,000 instead of $8,871,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The funds restored by this action are for the following projects:

Planning and design:	
Crownpoint, NM, hospital	$1,326,000
Kanakanak, AK, hospital	1,259,000
Browning, MT, hospital	1,050,000
Anadarko, OK, outpatient facility	200,000
Tsaile, AZ, outpatient facility	250,000
Huerfano, AZ, outpatient facility	220,000
Construction:	
Lodge Grass, MT, 10 units of personnel quarters	650,000
Total	$4,955,000

DEPARTMENT OF EDUCATION

INSTITUTE OF MUSEUM SERVICES

Amendment No. 186: Deletes language rescinding $12,357,000 proposed by the Senate.

SMITHSONIAN INSTITUTION

Amendment No. 187: Appropriates $200,000 for salaries and expenses for events observing the 100th anniversary of the birth of Franklin Delano Roosevelt as proposed by the House.

Administrative provision

Amendment No. 188: Deletes language proposed by the House which protected deferred funds from further executive impoundment action.

Chapter VIII—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

EMPLOYMENT AND TRAINING ASSISTANCE

(Rescission)

Amendment No. 189: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment amended to read as follows:

EMPLOYMENT AND TRAINING ASSISTANCE

(RESCISSION)

Of the funds provided for "Employment and training assistance" for fiscal year 1981 in Public Law 96-536, as amended, $82,500,000 are rescinded: Provided, That notwithstanding any other provision of law, $696,000,000 shall be available for the Youth Employment and Training Program authorized under title IV, part A, subpart 3, of the Comprehensive Employment and Training Act: Provided further, That notwithstanding any other provision of law, $70,136,000 shall be available for title II, part A, section 202(e), of the Comprehensive Employment and Training Act.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are concerned about the precipitous staffing reductions planned for the Bureau of Apprenticeship and Training during fiscal year 1981. The planned reductions amount to about 20 percent of the Bureau's staff. The conferees believe that this should not take place without Congressional review and therefore direct the Department of Labor to postpone any reductions in the

Bureau until the Congress has an opportunity to consider the matter in connection with the fiscal year 1982 appropriation bill. At the same time, the conferees direct that no further offsetting reduction in other Labor Department staff be made in order to maintain Bureau of Apprenticeship and Training staff.

LABOR-MANAGEMENT SERVICES ADMINISTRATION

Salaries and expenses

(Rescission)

Amendment No. 190: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $570,000. The House bill included no rescission in this account.

EMPLOYMENT STANDARDS ADMINISTRATION

Salaries and expenses

(Rescission)

Amendment No. 191: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $406,000. The House bill included no rescission in this account.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

Salaries and expenses

(Rescission)

Amendment No. 192: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $920,000. The House bill included no rescission in this account.

MINE SAFETY AND HEALTH ADMINISTRATION

Salaries and expenses

(Rescission)

Amendment No. 193: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $660,000. The House bill included no rescission in this account.

BUREAU OF LABOR STATISTICS

Salaries and expenses

(Rescission)

Amendment No. 194: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $160,000. The House bill included no rescission in this account.

DEPARTMENTAL MANAGEMENT

Salaries and expenses

(Rescission)

Amendment No. 195: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $300,000. The House bill included no rescission in this account.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES ADMINISTRATION

Health Services

(Rescission)

Amendment No. 196: Rescinds $49,776,000 instead of $45,679,000 as proposed by the House and $56,383,000 as proposed by the Senate. In addition to the amounts rescinded by the House, the conferees have agreed to a rescission of $4 million in the home health demonstration program as proposed by the Senate and to a rescission of $2,097,000 in program support activities of the Bureau of Medical Services as proposed by the Senate.

Amendment No. 197: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: "*Provided*, That not more than $128,399,000 shall be available under this head for operation of Public Health Service hospitals and clinics."

The managers on the part of the Senate will move to recede and concur in the amendment of the House to the amendment of the Senate. This language establishes a ceiling on obligations for the operation of the hospitals and clinics program. The amount approved is $2,157,000 higher than the amount in the Senate bill. This funding level is consistent with the President's budget request for this activity.

The Committee directs the Department of Health and Human Services to use the fiscal year 1981 funds available for the Public Health Service hospitals first for the operation, maintenance and transition costs of those hospitals and clinics whose communities have made a firm commitment to assume their operations which is acceptable to the Secretary; and, second, to maintain as many of the services of the other facilities as is possible. The conferees are agreed that any community may submit a plan for community use of these facilities and that no hospital should be closed prior to October 1, 1981.

CENTERS FOR DISEASE CONTROL

Preventive Health Services

Amendment No. 198: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which reappropriates $2,000,000 from unobligated swine flu balances. The conferees are agreed that this shall be a one-time appropriation to conduct the Mt. St. Helens health effects study.

(Rescission)

Amendment No. 199: Rescinds $44,981,000 instead of $43,975,000 as proposed by the House and $51,676,000 as proposed by the Senate. The conference agreement contains the following changes from the House bill:

Chronic diseases	−$506,000
Environmental hazards	+1,348,000
Occupational safety and health research	−1,348,000
Buildings and facilities	−500,000

Amendment No. 200: Rescinds $9,400,000 from unobligated swine flu balances as proposed by the Senate, instead of $11,400,000 as proposed by the House.

NATIONAL INSTITUTES OF HEALTH

The amounts agreed upon by the conferees for the National Institutes of Health are intended to permit funding of training grant awards supporting 10,000 research trainees together with full institutional allowances and indirect costs associated with those awards as well as 5,000 new and competing research project grants.

NATIONAL CANCER INSTITUTE

(Rescission)

Amendment No. 201: Rescinds $10,785,000, instead of $7,730,000, as proposed by the House, and $14,264,000, as proposed by the Senate.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

(Rescission)

Amendment No. 202: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $9,950,000, instead of $10,131,000 as proposed by the House, and $11,325,000, as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL INSTITUTE OF DENTAL RESEARCH

(Rescission)

Amendment No. 203: Deletes rescission of $347,000 proposed by the Senate.

NATIONAL INSTITUTE OF ARTHRITIS, METABOLISM, AND DIGESTIVE DISEASES

(Rescission)

Amendment No. 204: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $2,113,000, instead of $2,316,000 as proposed by the House and $3,237,000, as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL INSTITUTE OF NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE

(Rescission)

Amendment No. 205: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $997,000, instead of $2,456,000, as proposed by the House and $1,791,000, as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

(Rescission)

Amendment No. 206: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $1,571,000, instead of $2,757,000, as proposed by the House, and $1,720,000 as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

(Rescission)

Amendment No. 207: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $2,694,000, instead of $3,335,000, as proposed by the House and $3,360,000, as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL EYE INSTITUTE

(Rescission)

Amendment No. 208: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $2,137,000, instead of $2,619,000, as proposed by the House, and $2,381,000, as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

(Rescission)

Amendment No. 209: Rescinds $3,630,000, instead of $3,455,000, as proposed by the House, and $4,056,000, as proposed by the Senate.

NATIONAL INSTITUTE ON AGING

(Rescission)

Amendment No. 210: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the Senate amendment with an amendment which will rescind $377,000, instead of $598,000, as proposed by the House, and $659,000, as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

RESEARCH RESOURCES

(Rescission)

Amendment No. 211: Rescinds $8,623,000, as proposed by the House, instead of $10,561,000, as proposed by the Senate. The amount provided includes full restoration of funds for the Minority biomedical support program. The rescission should be distributed equitably among the other programs of the Division.

JOHN E. FOGARTY INTERNATIONAL CENTER FOR ADVANCED STUDY

(Rescission)

Amendment No. 212: Deletes rescission of $500,000 proposed by the Senate.

NATIONAL LIBRARY OF MEDICINE

(Rescission)

Amendment No. 213: Deletes rescission of $341,000 proposed by the Senate.

OFFICE OF THE DIRECTOR

(Rescission)

Amendment No. 214: Deletes rescission of $360,000 proposed by the Senate.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH

(Rescission)

Amendment No. 215: Rescinds $112,244,000 instead of $80,244,000 as proposed by the House and $144,244,000 as proposed by the Senate. In addition to the amounts rescinded by the House the conferees have agreed to rescind an additional $20 million from the alcoholism formula grant program and an additional $12 million from the drug abuse formula grant program. This action results in total rescissions for these two programs of $30 million and $18 million respectively.

HEALTH RESOURCES ADMINISTRATION

HEALTH RESOURCES

(Rescission)

Amendment No. 216: Rescinds $158,189,000 instead of $180,934,000, as proposed by the House, and $154,854,000 as proposed by the Senate.

The conferees are agreed that the rescission includes the following changes from the amounts proposed by the House:

Local health planning agencies	+$6,000,000
Dental health team grants	+250,000
Public health capitation grants	−2,100,000
Health administration grants	+750,000
Public health traineeships	−250,000
Health administration traineeships	+250,000
Family medicine/general dentistry residencies and training	+6,975,000
General internal medicine and pediatrics	+1,500,000
Nursing:	
Advanced training	+3,000,000
Nurse practitioners	+3,000,000
Traineeships	+3,000,000
Program support	+370,000
Total	+22,745,000

ASSISTANT SECRETARY FOR HEALTH

Salaries and Expenses

Amendment No. 217: Appropriates $40,000,000 as proposed by the House instead of $37,700,000 as proposed by the Senate.

(Rescission)

Amendment No. 218: Rescinds $38,270,000 as proposed by the Senate, instead of $37,630,000 as proposed by the House.

HEALTH CARE FINANCING ADMINISTRATION

Payments to health care trust funds

(Rescission)

Amendment No. 219: Rescinds $6,520,000 as proposed by the Senate instead of $4,346,000 as proposed by the House. This rescission relates to the Professional Standards Review Organization program which is also affected by amendment numbers 220 and 221.

Program management

(Rescission)

Amendment No. 220: Rescinds $7,494,000 instead of $3,996,000 as proposed by the House and $8,694,000 as proposed by the Senate. In addition to the amounts rescinded by the House the conferees have agreed to additional rescissions of $2,000,000 in research, demonstrations and evaluation and $1,498,000 for the Professional Standards Review Organization program.

Amendment No. 221: Reduces the amount which can be transferred from the Medicare trust funds to support Federal administrative costs by $16,982,000 instead of $12,322,000 as proposed by the House and $20,349,000 as proposed by the Senate. In addition to the rescissions approved by the House the conferees have agreed to an additional rescission of $3,000,000 in research, demonstrations, and evaluation and $1,660,000 in the Professional Standards Review Organization program. The combined impact of the conference agreements on amendment numbers 219, 220, and 221 is displayed in the following table:

	Continuing resolution	Rescission			Conference
		President	House	Senate	
Professional Standards Review Organizations:					
Hospital review (payments account):					
Medicaid, direct appropriations	$40,120,000	−$8,693,000	−$4,346,000	−$6,520,000	−$6,520,000
Medicare, nonappropriated funds	(78,180,000)	(−16,940,000)	(−8,470,000)	(−12,705,000)	(−12,705,000)
Nonhospital activities:					
Federal funds	22,372,000	−5,992,000	−2,996,000	−4,494,000	−4,494,000
Trust funds	(32,996,000)	(−6,643,000)	(−3,322,000)	(−4,982,000)	(−4,982,000)
Total, PSRO budget	173,668,000	−38,268,000	−19,134,000	−28,701,000	−28,701,000
Research, demonstration, and evaluation:					
Federal funds	30,000,000	−1,000,000	−1,000,000	−4,200,000	−3,000,000
Trust funds	(20,000,000)	(−3,000,000)	(−3,000,000)	(−9,367,000)	(−6,000,000)
Total, research and evaluation	50,000,000	−4,000,000	−4,000,000	−13,567,000	−9,000,000

SOCIAL SECURITY ADMINISTRATION

LIMITATION ON ADMINISTRATIVE EXPENSES

Amendment No. 222: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which increases the amount of funds available in the contingency reserve for Social Security administrative expenses from the $50,000,000 currently appropriated to $80,000,000. The President had proposed a contingency of $117,667,000. The House had not approved any increase in this contingency reserve. The conferees are agreed that the additional funds made available may only be used to the extent necessary to support an increased workload which may result from legislation currently pending before the Congress but not yet enacted.

LOW INCOME ENERGY ASSISTANCE

(Rescission)

Amendment No. 223: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $500,000 from federal administrative funds for the low income energy assistance program.

REFUGEE ASSISTANCE

(Rescission)

Amendment No. 224: Rescinds $41,805,000 as proposed by the Senate instead of $74,805,000 as proposed by the House.

CUBAN AND HAITIAN ENTRANTS RECEPTION AND PROCESSING

(Rescission)

Amendment No. 225: Reported in technical disagreement. The managers on the part

of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

CUBAN AND HAITIAN ENTRANTS RECEPTION AND PROCESSING

(Rescission)

"Of the funds for 'Cuban and Haitian entrants reception and processing' for fiscal year 1981 in Public Law 96-536, as amended, $10,000,000 are rescinded."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The House bill contained no rescission in this budget account.

CUBAN AND HAITIAN ENTRANTS DOMESTIC ASSISTANCE

Amendment No. 226: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which appropriates $6,000,000 for assistance to local school districts with a high concentration of Cuban and Haitian immigrants. The House bill did not include any funds for this purpose.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

Human Development Services

(Rescission)

Amendment No. 227: Rescinds $13,500,000 instead of $5,100,000 as proposed by the House and $24,700,000 as proposed by the Senate. The conferees are agreed that the rescission includes:

Child welfare research	−$850,000
Child welfare training	−400,000
Grants for State and community activities on aging	−5,000,000
Aging research and training	−5,000,000
National Clearinghouse on Aging	−200,000
Federal Council on Aging	−100,000
Developmental disabilities	−1,750,000
Social services research	−200,000

DEPARTMENTAL MANAGEMENT

Policy research

(Rescission)

Amendment No. 228: Reported in technical disagreement. The Managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $2,500,000 of funds appropriated for 1981 for policy research.

DEPARTMENT OF EDUCATION

ELEMENTARY AND SECONDARY EDUCATION

(Rescission)

Amendment No. 229: Rescinds $410,455,000 for Title I, parts A and B instead of $351,477,000 as proposed by the House and $463,885,000 as proposed by the Senate.

Amendment No. 230: Rescinds $25,270,000 for Title IV, part C instead of $9,140,000 as proposed by the House and $41,400,000 as proposed by the Senate.

Amendment No. 231: Rescinds $8,925,000 for Title V, part B instead of $5,100,000 as proposed by the House and $12,750,000 as proposed by the Senate.

Amendment No. 232: Rescinds $500,000 for sections 1524 and 1525 of the Education Amendments of 1978 as proposed by the House instead of $3,000,000 as proposed by the Senate.

Amendment No. 233: Deletes rescission of $100,000 proposed by the House for Public Law 92-506.

Amendment No. 234: Earmarks $100,000,000 for section 117 (concentration grants) instead of $130,500,000 as proposed by the House and $71,070,000 as proposed by the Senate.

Amendment No. 235: Earmarks $266,400,000 for Title I, part B, subpart 1 (migratory children) instead of $259,200,000 as proposed by the House and $273,600,000 as proposed by the Senate.

Amendment No. 236: Earmarks $152,625,000 for Title I, part B, subpart 2 (handicapped children) instead of $148,500,000 as proposed by the House and $156,750,000 as proposed by the Senate.

Amendment No. 237: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which prohibits the use of funds appropriated for Title IV, part C of the Elementary and Secondary Education Act to be used for purposes of Title V, part B; and provides that reductions in Title IV, part C and Title V, part B shall be proportionate among the States.

EQUAL EDUCATIONAL OPPORTUNITIES

(Rescission)

Amendment No. 238: Rescinds $97,563,000 instead of $36,876,000 as proposed by the House and $131,719,000 as proposed by the Senate. The conferees are agreed that the rescissions by program are as follows:

Grants to school districts	−$74,400,000
Special programs and projects	−7,724,000
Grants to non-profit organizations	−2,500,000
Educational television and radio	−2,000,000
Evaluation	−500,000
Training and advisory services	−8,564,000
Women's educational equity	−1,875,000

LIBRARIES AND LEARNING RESOURCES

(Rescission)

Amendment No. 239: Rescinds $10,000,000 for Title IV, part B of the Elementary and Secondary Education Act, school libraries program, as proposed by the Senate, instead of $21,375,000 as proposed by the House.

Amendment No. 240: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: ", $2,000,000 of the amount provided for title II, part A of the Higher Education Act".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 241: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: ", and $250,000 of the amount provided for title II, part B of the Higher Education Act".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

EDUCATION FOR THE HANDICAPPED

(Rescission)

Amendment No. 242: Rescinds $76,819,000 instead of $68,719,000 as proposed by the House and $89,995,000 as proposed by the Senate. The conferees are agreed that the rescissions by program are as follows:

State grant program	−$47,500,000
Severely handicapped	−625,000
Early childhood	−2,500,000
Regional, vocational and adult and postsecondary programs	−1,050,000
Innovation and development	−5,000,000
Media services and captioned films	−2,000,000
Regional resource centers	−2,094,000
Recruitment and information	−250,000
Special education personnel development	−14,500,000
Special studies	−1,300,000

The conferees direct that the funds appropriated for special education personnel development be equitably distributed among the 50 States by renegotiating proportional reductions in the contracts of the cycle projects already approved, and making comparable percentage reductions in the new qualifying proposals for the States on the current cycle. Further, the conferees expect that the parent training programs operated by parent coalitions will be funded as planned for fiscal 1981.

Amendment No. 243: Earmarks $25,000,000 for section 619 of the Education of the Handicapped Act (pre-school incentive grants) as proposed by the Senate instead of $21,875,000 as proposed by the House.

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

(Rescission)

Amendment No. 244: Rescinds $12,126,000 instead of $7,875,000 as proposed by the House and $18,723,000 as proposed by the Senate. The conferees are agreed that the rescissions by program are as follows:

Rehabilitation:	
Service projects	−$3,000,000
Training	−3,825,000
National Institute for Handicapped Research	−5,250,000
National Clearinghouse on the Handicapped	−51,000

The conferees are agreed that the amount available for fiscal year 1981 includes $3,000,000 for special recreation projects as approved by the House. With regard to these projects, as well as spinal cord injury demonstration centers, the Department should follow the directives contained in the House report (No. 97-29).

The National Institute of Handicapped Research shall give serious attention to addressing the pressing needs of the Pacific Basin under their Research and Training Center authority.

Amendment No. 245: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which earmarks $2,800,000 for section 112 of the Rehabilitation Act of 1973 (client assistance), notwithstanding other provisions of law.

Amendment No. 246: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which earmarks $650,000 for the Navajo Tribal Council to carry out section 130 of the Rehabilitation Act of 1973.

VOCATIONAL AND ADULT EDUCATION

(Rescission)

Amendment No. 247: Rescinds $98,442,000 for vocational education instead of $7,236,000 as proposed by the House and $124,201,000 as proposed by the Senate. The conferees are agreed that the rescission by program are as follows:

Basic grants	−$44,127,000
Program improvement	−31,494,000
Programs of national significance	−2,523,000
Special programs for disadvantaged	−5,046,000
Consumer and homemaking education	−13,150,000
Bilingual vocational training	−840,000
State planning	−1,262,000

Amendment No. 248: Rescinds $20,000,000 for grants to States for adult education as proposed by the Senate instead of $15,000,000 as proposed by the House.

Amendment No. 249: Rescinds $5,000,000 for the Career Education Incentive Act as proposed by the Senate instead of $2,500,000 proposed by the House.

Amendment No. 250: Rescinds $6,862,000 for Title VIII of the Elementary and Secondary Education Act (community schools) as proposed by the Senate instead of $4,431,000 as proposed by the House.

Amendment No. 251: Rescinds $2,261,000 for Title III, part E of the Elementary and Secondary Education Act (consumers' education) instead of $904,000 as proposed by the House and $3,617,000 as proposed by the Senate.

Amendment No. 252: Earmarks $93,323,000 for part A, subpart 3 of the Vocational Education Act (program improvement and supportive services) as proposed by the House instead of $118,576,000 as proposed by the Senate.

Amendment No. 253: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which earmarks $7,477,000 for part B, subpart 2 of the Vocational Education Act (programs of national significance), and $2,243,100 for the National Occupational Information Coordinating Committee.

Amendment No. 254: Deletes language proposed by the Senate relating to payments for State advisory councils.

Amendment No. 255: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which earmarks $3,138,000 for sections 809, 810, and 812 of the Elementary and Secondary Education Act (community schools).

STUDENT FINANCIAL ASSISTANCE

Amendment No. 256: Appropriates $445,000,000 for Title IV, part A, subpart 1 of the Higher Education Act (basic opportunity or Pell grants) instead of $661,000,000 as proposed by the House and $391,000,000 as proposed by the Senate.

Amendments No. 257 and 258: Deletes language proposed by the House relating to the maximum grant a student may receive in the 1981–82 academic year.

Amendment No. 259: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which inserts substitute language establishing a maximum grant of $1,750, notwithstanding section 411(a)(2)(A)(i)(I) of the Higher Education Act.

Amendment No. 260: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: ": *Provided further,* That notwithstanding section 411(b)(3)(B)(i) each Pell grant be reduced by $80 after taking the cost of attendance limitation of section 411(a)(2)(B)(i) into account".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 261: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which authorizes the Secretary of Education to establish cost of attendance rules for Pell grant eligibility.

Amendment No. 262: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which authorizes the Secretary of Education to ratably reduce 1981 State allocations under the National Direct Student Loan program, notwithstanding any other provision of law.

STUDENT LOAN INSURANCE

Amendment No. 263: Deletes limitation included by the House for expenses related to the guaranteed student loan program.

Amendment No. 264: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which inserts language prohibiting the reservation or payment of administrative expenses incurred by educational institutions.

HIGHER AND CONTINUING EDUCATION

(Rescission)

Amendment No. 265: Deletes phrase proposed by the House.

Amendment No. 266: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $12,800,000 of the amount provided for Title I, part B of the Higher Education Act.

Amendment No 267: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: ", $3,000,000 of the amount provided for section 417".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 268: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: ", $6,020,000 of the amount provided for section 420 and".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 269: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: "$2,150,000 of the amount provided for title IX, part B of the Higher Education Act are rescinded".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are agreed that $1,000,000 is rescinded from the amount available for graduate and professional educational opportunities and $1,150,000 from mining fellowships.

Amendment No. 270: Deletes rescission of $3,000,000 proposed by the Senate for Title IX, part E of the Higher Education Act.

Amendment No. 271: Deletes rescission of $1,000,000 proposed by the Senate for Title III, part G of the Elementary and Secondary Education Act.

Amendment No. 272: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows: ": *Provided,* that the funds appropriated in Public Law 96-536, as amended, for title IX, part B are available notwithstanding the provisions of section 922(b)(2) of the Higher Education Act".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 273: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which earmarks $2,200,000 for Title I, part B of the Higher Education Act only for section 115(d).

HIGHER EDUCATION FACILITIES LOAN AND INSURANCE FUND

(Deferral)

Amendment No. 274: Restores paragraph inserted by the House disapproving deferral D 81-82.

The Senate recedes to the House position on deferral D 81-82. The conferees instruct the Secretary of Education to release the funds to Boston College and Georgetown University in accordance with the report language in House Report #97-29.

COLLEGE HOUSING LOANS

(Rescission)

Amendment No. 275: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

COLLEGE HOUSING LOANS

(RESCISSION)

Of the funds appropriated for participation sales insufficiencies for fiscal year 1981 in Public Law 96-536, as amended, $14,271,000 are rescinded. Payments of insufficiencies in fiscal year 1981 as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717) shall be made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749) using loan repayments and other income available during fiscal year 1981.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

SCHOOL IMPROVEMENT

(Rescission)

Amendment No. 276: Rescinds $37,843,000 instead of $14,642,000 as proposed by the House and $61,218,000 as proposed by the Senate. The conferees are agreed that the rescissions by program are as follows:

Basic skills improvement	−$3,500,000
Arts in education	−350,000
Metric education	−460,000
Cities in schools	−305,000
Push for excellence	−175,000

Alcohol and drug abuse education	−150,000
Ethnic heritage studies	−750,000
National diffusion program	−1,250,000
Teacher corps	−7,500,000
Teacher centers	−3,900,000
Follow through	−18,000,000
Gifted and talented	−628,000
Migrant high school equivalency	−250,000
Precollege science teacher training	−625,000

With regard to arts in education, the conferees are agreed that the remaining funds for this program would be sufficient to support most of the activities of the National Committee for Arts for the Handicapped.

Amendment No. 277: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which inserts Part A of Title III of the Elementary and Secondary Education Act.

Amendment No. 278: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which inserts Title III, section 303(c)(2) of the Comprehensive Employment and Training Act, as amended.

Amendment No. 279: Restores legal citation proposed by the House for the Alcohol and Drug Abuse Education Act.

Amendment No. 280: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which inserts section 422(a) of the General Education Provisions Act.

Amendment No. 281: Earmarks $17,225,000 for Title II, part A of the Elementary and Secondary Education Act (basic skills national program) as proposed by the Senate instead of $18,000,000 as proposed by the House.

EDUCATIONAL STATISTICS

(Rescission)

Amendment No. 282: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $1,000,000 for section 406 of the General Education Provisions Act.

RESEARCH AND RELATED ACTIVITIES

(Rescission)

Amendment No. 283: Rescinds $8,500,000 for section 405 of the General Education Provisions Act, instead of $7,000,000 as proposed by the House and $10,000,000 as proposed by the Senate.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

(Rescission)

Amendment No. 284: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

(Rescission)

Of the funds appropriated under this head for fiscal year 1981 in Public Law 96-536, as amended, $500,000 for the purposes of part D of the General Education Provisions Act are rescinded.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

RELATED AGENCIES

ACTION

Operating expenses, domestic programs

(Rescission)

Amendment No. 285: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment amended to rescind $5,187,000, instead of $3,207,000 as proposed by the House and $3,907,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement contains the following rescissions:

Volunteers in service to America (VISTA)	−$3,207,000
Citizen participation and volunteer demonstration	−1,480,000
Administrative overhead	−500,000

COMMUNITY SERVICES ADMINISTRATION

Community services program

(Rescission)

Amendment No. 286: Rescinds $16,915,000, instead of $16,500,000 as proposed by the House and $22,915,000 as proposed by the Senate. The conference agreement contains the following changes from the House bill:

Community economic development	−$200,000
Administrative overhead	−215,000

CORPORATION FOR PUBLIC BROADCASTING

Public Broadcasting Fund

(Rescission)

Amendment No. 287: Rescinds $35,000,000 for fiscal year 1983, instead of $60,000,000 as proposed by the House. The Senate bill included no rescission for this account.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Salaries and expenses

(Rescission)

Amendment No. 288: Deletes rescission of $687,000 proposed by the Senate.

NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

Amendment No. 289: Appropriates $250,000 instead of $750,000 as proposed by the House. The Senate had proposed to delete all funds for this purpose.

NATIONAL LABOR RELATIONS BOARD

Salaries and expenses

(Rescission)

Amendment No. 290: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds $1,060,000. The House bill included no rescission for this account.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

Salaries and expenses

(Rescission)

Amendment No. 291: Rescinds $54,000 as proposed by the House. The Senate bill included no rescission for this account.

General provisions

Amendment No. 292: Deletes language proposed by the House which would have required that no part of any appropriation contained in this chapter shall be used in connection with the issuance, implementation, or enforcement of any rule, regulation, standard, guideline, recommendation, or order which includes any ratio, quota, or other numerical requirement related to race, creed, color, national origin, or sex, and which requires any individual or entity to take any action with respect to (1) the hiring or promotion policies or practices of said individual or entity, (2) the admissions policies or priorities or such individual or entity.

Amendment No. 293: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

Of the total amounts appropriated for the Department of Health and Human Services for fiscal year 1981, $13,500,000 are hereby rescinded from funds available for travel, consultants, consultant services, training, and furniture and equipment purchases.

The managers on the part of the Senate will move to recede and concur with the amendment of the House to the amendment of the Senate. This language rescinds $13,500,000 from administrative funds of the Department of Health and Human Services instead of $27,123,000 as proposed by the Senate. The conferees have agreed not to rescind $5,277,000 of Department of Education administrative funds proposed to be rescinded by the Senate. The conferees are further agreed that the Social Security Administration should be exempted from any reductions required by this section.

Chapter IX—Legislative Branch

SENATE

Amendments No. 294 through 308: Reported in technical disagreement. Inasmuch as these amendments relate solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments No. 294 through 308.

HOUSE OF REPRESENTATIVES

Amendments No. 309 and 310: Change section numbers as proposed by the Senate.

ARCHITECT OF THE CAPITOL

Capitol Buildings and Grounds

Capitol Buildings

(Rescission)

Amendment No. 311: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $97,000, including $47,000 from intrusion alarm systems and $50,000 from electronic system maintenance. The conferees have been informed that, based on a February 13, 1981, first-come, first-serve priority list maintained by the Architect of the Capitol, the rescission will have no effect on systems scheduled for installation in House offices.

Capitol Grounds

Amendment No. 312: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $10,000 in snow removal funds.

Senate Garage

Amendment No. 313: Reported in technical disagreement. The managers on the part of the House will move to recede and concur

in the amendment of the Senate which rescinds $102,000.

CAPITOL POWER PLANT

(Rescission)

Amendment No. 314: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which rescinds $70,000 that had been appropriated under this heading in H.R. 7593.

LIBRARY BUILDINGS AND GROUNDS

Structural and Mechanical Care

(Rescission)

Amendments No. 315-316: Rescind $508,000, $430,000 of which was contained in H.R. 7593, as proposed by the Senate instead of $241,000, $163,000 of which was contained in H.R. 7593, as proposed by the House. Included is a $202,000 rescission of architectural/engineering funds intended for design work on the restoration, renovation, and fire safety project at the Thomas Jefferson and John Adams buildings. This rescission is made without prejudice since the question of the extent of design work needed before the construction phases of the project commence will be examined during consideration of the annual appropriation bill for fiscal year 1982.

LIBRARY OF CONGRESS

Furniture and furnishings

Amendment No. 317: Deletes $450,000 rescission proposed by the Senate. The conferees agree that the $450,000 may be used for a motorized book shelf contract settlement.

Administrative provisions

Amendment No. 318: Deletes section number as proposed by the Senate.

GOVERNMENT PRINTING OFFICE

Office of Superintendent of Documents

Salaries and Expenses

Amendment No. 319: Appropriates $400,000 instead of $1,300,000 proposed by the House.

General provisions

Amendment No. 320: Deletes section number as proposed by the Senate.

Chapter X—MILITARY CONSTRUCTION

MILITARY CONSTRUCTION, AIR FORCE

Amendment No. 321: Appropriates $76,100,000 instead of $70,240,000 as proposed by the House and $81,100,000 as proposed by the Senate. The conferees have agreed to the following additions to the amounts and line items as proposed by the House:

RDF, Planning and Design	+$5,000,000
Cannon AFB, N.M.: Sound Suppressor Support Facility	+420,000
Luke AFB, Arizona: Sound Suppressor Support Facility	+440,000

Amendment No. 322: Limits expenditures for study, planning, design, architect and engineering services to $35,000,000 instead of $30,000,000 as proposed by the House and $40,000,000 as proposed by the Senate.

The increase in limitation relates only to the Air Force request for additional design funds for the Rapid Deployment Program.

Amendment No. 323: Deletes language proposed by the House requiring that planning and design funds for the MX basing mode not be obligated until the final environmental impact statement has been completed.

The conferees believe that a similar provision in Section 118 of Public Law 96-436 (Fiscal Year 1981 Appropriations) will prevent the Department from designing any site-specific facilities until the provisions of the National Environmental Policy Act (42 U.S.C. 4332) are met. The conferees agree that the Department is not to enter into any site-specific design contracts for any purpose while awaiting final site selections and completion of the requirements directed by Section 118, Public Law 96-436.

The conferees also agree that the $92 million deferment proposed by the House and accepted by the Senate relates specifically to the award on new contract starts. Therefore, no new starts are to be initiated on MX planning and design; no new architect-engineer contracts are to be awarded; no options on existing contracts are to be exercised nor are any call-type contracts for design-related services to be exercised; and no additional personnel are to be hired or physically transferred by the Corps of Engineers. Corps of Engineers personnel on the payroll as of the date of the Senate report may continue with inhouse planning and design funds.

Chapter XI—DEPARTMENT OF TRANSPORTATION

COAST GUARD

RETIRED PAY (INCLUDING TRANSFER OF FUNDS)

Amendment No. 324: Inserts transfer of funds language in the heading as proposed by the House.

Amendment No. 325: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment amended to read as follows: "$12,000,000, and, in addition, not to exceed $2,000,000 shall be derived by transfer from the unobligated balance in the appropriation "Acquisition, construction, and improvement" ".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

POLLUTION FUND

Amendment No. 326: Appropriates $15,000,000 as proposed by the Senate instead of $12,000,000 as proposed by the House.

RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT ASSISTANCE

Amendment No. 327: Deletes appropriation of $2,000,000 proposed by the Senate. In disapproving the initiation of this new program, the conferees agree that the user taxes which have been collected should be utilized to offset the cost of programs which benefit the boating public. In order to reach such an equitable solution, the conferees direct that the Secretary shall submit to the appropriate committees of the Congress, not later than September 30, 1981, a proposal outlining his recommendation of how this should be accomplished.

FEDERAL AVIATION ADMINISTRATION

FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)

(Disapproval of Deferral)

Amendment No. 328: Disapproves deferral of $30,000,000 as proposed by the House. The Senate amendment proposed to reserve $25,000,000 for subsequent obligation. In disapproving the proposed deferral, the conferees direct the Federal Aviation Administration to immediately make available funds for the following projects: airport control towers at Mesa, Az. and Kodiak, Ak.; instrument landing systems at Charleston, W. Va., Williston, N. Dk., and Cavern City, N.M.; automated radar terminal system (ARTS II) at Baton Rouge, La.; very high frequency omnidirectional range (VOR) at Circleville, Ohio; and localizer at Montgomery County, Pa. The conferees further direct the FAA to give high priority to the following locations in the Administration's next radar procurement: Hillsboro, Oreg.; Mid-Hudson Valley, N.Y.; and Moses Lake and Pasco, Wash.

Amendment No. 329: Inserts language making the disapproved deferral available for obligation as proposed by the House.

Amendment No. 330: Deletes rescission of $25,000,000 proposed by the Senate.

GRANTS-IN-AID FOR AIRPORT PLANNING AND DEVELOPMENT

Amendment No. 331: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment amended to read as follows:

GRANTS-IN-AID FOR AIRPORT PLANNING AND DEVELOPMENT

(LIMITATION ON OBLIGATIONS)

The limitation in section 302 of the Department of Transportation and Related Agencies Appropriation Act, 1981 (Public Law 96-400), is amended by deleting "$700,000,000" and inserting in lieu thereof "$450,000,000".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. Of the obligation level provided, $3,000,000 shall be available only for the Grand Forks International Airport.

AIRCRAFT PURCHASE LOAN GUARANTEE PROGRAM

Amendment No. 332: Limits guarantees to $350,000,000 as proposed by the House instead of $300,000,000 as proposed by the Senate. The conferees direct FAA not to use regulations or administrative procedures to exclude any class of carrier from the program. The conferees also direct that in administering these funds the FAA give first priority to applications which are part of ongoing procurements of qualifying aircraft. If applications are filed subsequent to those previously submitted, the House and Senate Committees on Appropriations will consider, at the appropriate time, any requests for additional authority for the aircraft purchase loan guarantee program.

FEDERAL HIGHWAY ADMINISTRATION

NATIONAL SCENIC AND RECREATIONAL HIGHWAY (LIQUIDATION OF CONTRACT AUTHORIZATION)

Amendment No. 333: Deletes the words "Trust Fund" from the heading as proposed by the Senate.

FEDERAL-AID HIGHWAYS (LIQUIDATION OF CONTRACT AUTHORIZATION) (TRUST FUND)

The conferees take note of the Senate language and direct the Secretary of the Department and the Administrator of the Federal Highway Administration to return any and all interstate discretionary fund allocations to the State of Florida.

URBAN HIGH DENSITY TRAFFIC PROGRAM

Amendment No. 334: Increases contract authority by $33,959,000 as proposed by the House.

ACCESS HIGHWAYS TO PUBLIC RECREATION AREAS ON CERTAIN LAKES

Amendment No. 335: Appropriates $10,000,000 as proposed by the Senate.

FEDERAL RAILROAD ADMINISTRATION

RAIL SERVICE ASSISTANCE

Amendment No. 336: Deletes language proposed by the Senate authorizing the Secretary of Transportation to expend $10,000,000 from the sale of fund anticipation notes to the Secretary of the Treasury.

Amendment No. 337: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment amended to read as follows:

After reserving funds for the grant agreements executed prior to March 10, 1981, for the remainder of fiscal year 1981, the Secretary shall obligate available funds up to the extent of the entitlements which existed immediately prior to March 10, 1981, or on the basis of the rail transportation needs to be addressed by the project to be funded.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees direct that within the funds available for the local rail service assistance program priority consideration be given to providing funds to permit the start of rehabilitation of the Woodland to Tennessee line portion of the Illinois Central Gulf Railroad, and to enable the purchase by the Rosedale Port Commission of the segment of the Illinois Central Gulf Railroad that serves that Port.

CONRAIL WORKFORCE REDUCTION PROGRAM

(Including Transfer of Funds)

Amendment No. 338: Deletes $50,000,000 appropriation proposed by the House.

Amendment No. 339: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment providing $15,000,000, of which $5,000,000 shall be derived by transfer.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING FUNDS

(Rescission)

Amendment No. 340: Rescinds $1,000,000 instead of $37,000,000 as proposed by the House. The conferees direct that, of the total amount available for railroad rehabilitation and improvement, at least $30,000,000 shall be available only for the Milwaukee Road (Milwaukee II) Miles City Line.

NORTHEAST CORRIDOR IMPROVEMENT PROGRAM

Amendment No. 341: Deletes language proposed by the House to disapprove deferral D81-92. The conferees note the language contained in the House Committee report regarding existing electrification contracts and agree that the conference action should not be interpreted by the Federal Railroad Administration as approving or directing that these contracts be terminated.

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

(Including Transfer of Funds)

Amendment No. 342: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment amended to read as follows:

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Grants to the National Railroad Passenger Corporation", for operating losses incurred by the Corporation, $15,300,000 to be derived by transfer from the unobligated balances under the appropriations "Department of the Treasury, Office of the Secretary, Investment in Fund Anticipation Notes" and "Federal Railroad Administration, Railroad Rehabilitation and Improvement Financing Funds". Not to exceed $24,900,000 of amounts previously appropriated for capital improvements may be used for operating expenses incurred by the Corporation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

PAYMENTS TO THE ALASKA RAILROAD REVOLVING FUND

Amendment No. 343: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment appropriating $2,000,000.

SETTLEMENTS OF RAILROAD LITIGATION

Amendment No. 344: Deletes language proposed by the House limiting the issuance of notes under section 210(e) of Public Law 93-236 to amounts provided in appropriation Acts. The conferees direct that no notes or other obligations be issued by the Secretary of Transportation without prior approval of the House and Senate Committees on Appropriations.

URBAN MASS TRANSPORTATION ADMINISTRATION

RESEARCH, DEVELOPMENT, AND DEMONSTRATIONS AND UNIVERSITY RESEARCH AND TRAINING

(Transfer of Funds)

Amendment No. 345: Provides $2,000,000 to be derived by transfer as proposed by the House. The conferees direct that $2,000,000 be provided for the vehicle access demonstration project in the Nation's Capital along Canal Road, which is to be implemented expeditiously.

URBAN DISCRETIONARY GRANTS

(Deferral)

Amendment No. 346: Defers $220,000,000 as proposed by the Senate instead of $238,500,000 as proposed by the House. The conferees direct that this deferral be allocated as follows:

	Thousands
Bus and bus facilities	$14,000
Existing fixed guideway modernization and extensions	20,000
New systems and downtown people movers	92,500
Urban initiatives	48,500
Planning and technical studies	20,000
Innovative techniques	15,000
Technology introduction	10,000

Under the conference agreement a total of $392,500,000 of the fiscal year 1981 appropriation will be available for new systems and downtown people movers. These funds are to be allocated as follows:

	Thousands
Miami: rail construction	$195,000
Buffalo: light rail	125,000
Baltimore: rail construction	4,000
Atlanta: rail construction	40,000
Portland: light rail (Banfield)	9,000
Miami: circulator	11,500
Detroit	8,000

In agreeing on $8,000,000 in urban discretionary funds for Detroit, the conferees have given due consideration to the concept that the primary responsibility for selecting mass transit projects should reside with state and local governments. Officials who are most familiar with Detroit's transportation problems have articulated the need for a downtown light rail component of an integrated transportation system, and the conferees expect the Secretary to work with these officials in order that Detroit's actual needs are most responsibly addressed within the parameters of federal policy.

The conferees intend to consider preliminary engineering funding for the Los Angeles rail system in connection with the fiscal year 1982 appropriations legislation.

Under the conference agreement a total of $41,500,000 of the fiscal year 1981 appropriation will be available for the urban initiatives program. In addition to those projects already under construction, these funds are to be used to initiate projects in the following cities: Buffalo, N.Y., Harrisburg, Pa., Gary, Ind., Asbury Park, N.J., Altoona, Pa., Charlestown, W. Va., Los Angeles, Calif., Miami, Fla., Baltimore, Md., Fargo, N. Dak., Indianapolis, Ind., Boston, Mass.

WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

(Rescission)

Amendment No. 347: Rescinds $20,700,000 as proposed by the House instead of $24,700,000 as proposed by the Senate.

INTERSTATE TRANSFER GRANTS

Amendment No. 348: Appropriates $65,000,000 as proposed by the Senate instead of $50,000,000 as proposed by the House. The conference agreement includes $50,000,000 for the City of Chicago and $15,000,000 for eligible projects in the State of Oregon.

The conferees agree with the Administration's policy for the use of Interstate transfer funds, which has been stated as follows:

"The Interstate Transfer Program is an entitlement and, therefore, state and local officials have discretion to use these funds for substitute highway or transit projects—including new fixed guideway systems—as they deem appropriate."

OFFICE OF THE INSPECTOR GENERAL

Salaries and expenses

Amendment No. 349: Appropriates $1,000,000 as proposed by the Senate instead of $600,000 as proposed by the House.

RELATED AGENCIES

CIVIL AERONAUTICS BOARD

Payments to air carriers

Amendment No. 350: Appropriates $20,000,000 as proposed by the Senate instead of $27,900,000 as proposed by the House.

INTERSTATE COMMERCE COMMISSION

Payments for directed rail service

(Transfer of funds)

Amendment No. 351: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment amended to read as follows:

INTERSTATE COMMERCE COMMISSION

PAYMENTS FOR DIRECTED RAIL SERVICE

(TRANSFER OF FUNDS)

For necessary expenses for "Payments for directed rail service", $2,500,000, to be derived by transfer from Interstate Commerce Commission, "Salaries and expenses", to remain available until expended.

NATIONAL CLEAN-UP AND FLAG-UP AMERICA'S HIGHWAYS WEEK

The week of June 28 through July 4, 1981, is designated as "National Clean-up and Flag-up America's Highways Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

MOTOR CARRIER RATEMAKING STUDY COMMISSION

Salaries and expenses

Amendment No. 352: Appropriates $2,000,000 as proposed by the Senate instead of $1,500,000 as proposed by the House.

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

INVESTMENT IN FUND ANTICIPATION NOTES

(Rescission)

Amendment No. 353: Rescinds $1,000,000 instead of $37,000,000 as proposed by the House.

Amendment No. 354: Deletes transfer of $10,000,000 proposed by the Senate.

GENERAL PROVISION

Amendment No. 355: Inserts language proposed by the House providing an exception to section 16 of the Federal Airport Act of 1946 for the City of Gary, Indiana.

Chapter XII—DEPARTMENT OF THE TREASURY

UNITED STATES CUSTOMS SERVICE

Amendment No. 356: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert the following:

UNITED STATES CUSTOMS SERVICE

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", $10,000,000, to be used for the implementation of the Air Module Concept; including acquisition (purchase of four), operation and maintenance of aircraft: *Provided:* That none of the funds made available by this Act shall be available for administrative expenses in connection with effecting the reduction of employment in the U.S. Customs Service below the level on April 30, 1981.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

In view of the tremendous rise in violent crime involving the criminal misuse of firearms and the epidemic level of drug abuse in this country, the Conferees are agreed that the level of employment (including administrative and support personnel) in the U.S. Customs Service and in the Bureau of Alcohol, Tobacco and Firearms, be maintained at the April 30, 1981, level.

The Secretary of the Treasury is directed to inform the Committees on Appropriations of the House and Senate, as soon as possible, of the actual level of employment in these two agencies on April 30, 1981.

INTERNAL REVENUE SERVICE

Amendment No. 357: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $500,000 for Taxpayer Service and Returns Processing and making the funds available to be used retroactively.

UNITED STATES SECRET SERVICE

Amendment No. 358: Appropriates $11,629,000 for salaries and expenses as proposed by the Senate instead of $9,250,000 as proposed by the House.

BUREAU OF GOVERNMENT FINANCIAL OPERATIONS

Amendment No. 359: Appropriates $7,563,000 for salaries and expenses as proposed by the Senate.

GENERAL SERVICES ADMINISTRATION

Amendment No. 360: Appropriates $150,000,000 for the General Supply Fund as proposed by the House instead of $135,000,000 as proposed by the Senate.

INTERGOVERNMENTAL PERSONNEL ASSISTANCE

(Rescission)

Amendment No. 361: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate rescinding $5,600,000.

GENERAL PROVISION

Amendment No. 362: Inserts language proposed by the Senate. This exact language passed the House in another part of this bill (see Amendment No. 426). The Conferees are agreed that this provision applies to funds made available by Title IV of this Act.

Chapter XIII—DISTRICT OF COLUMBIA

Amendment No. 363: Inserts chapter number and heading as proposed by the Senate.

FEDERAL FUNDS

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

Amendment No. 364: Inserts heading and appropriates $4,600,000 for "Federal Payment to the District of Columbia" as proposed by the Senate.

DISTRICT OF COLUMBIA FUNDS

Amendment No. 365: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

DISTRICT OF COLUMBIA FUNDS

GOVERNMENTAL DIRECTION AND SUPPORT

(Rescission)

Of the funds appropriated for "Governmental direction and support" for fiscal year 1981 in Public Law 96-530, $3,665,500 are rescinded: *Provided,* That outstanding settlements of claims and suits not to exceed $200,000 in total shall be paid in the same manner as judgments rendered against the District of Columbia government.

ECONOMIC DEVELOPMENT AND REGULATION

(Rescission)

Of the funds appropriated for "Economic development and regulation" for fiscal year 1981 in Public Law 96-530, $40,500 are rescinded.

PUBLIC SAFETY AND JUSTICE

For an additional amount for "Public safety and justice", $3,394,000.

PUBLIC EDUCATION SYSTEM

(Including Rescissions)

For an additional amount for "Public education system", $2,970,000, to be allocated as follows: $1,100,000 for the District of Columbia Public Schools, and $1,870,000 for the School Transit Subsidy: *Provided,* That of the funds appropriated under this heading for the Public Library for fiscal year 1981 in Public Law 96-530, $298,800 are rescinded: *Provided further,* That of the funds appropriated under this heading for the Commission on the Arts and Humanities for fiscal year 1981 in Public Law 96-530, $5,000 are rescinded: *Provided further,* That of the funds appropriated under this heading for the Educational Institution Licensure Commission for fiscal year 1981 in Public Law 96-530, $3,500 are rescinded.

HUMAN SUPPORT SERVICES

For an additional amount for "Human support services", $20,754,100: *Provided,* That $3,500,000 of this appropriation, to remain available until expended, shall be available solely for District of Columbia employees' disability compensation.

TRANSPORTATION SERVICES AND ASSISTANCE

(Rescission)

Of the funds appropriated for "Transportation services and assistance" for fiscal year 1981 in Public Law 96-530, $3,031,600 are rescinded.

ENVIRONMENTAL SERVICES AND SUPPLY

(Rescission)

Of the funds appropriated for "Environmental services and supply" for fiscal year 1981 in Public Law 96-530, $121,600 are rescinded.

WATER AND SEWER ENTERPRISE FUND

For an additional amount for "Water and Sewer Enterprise Fund", $3,017,800.

WASHINGTON CONVENTION CENTER ENTERPRISE FUND

For establishment of the Washington Convention Center Enterprise Fund, $382,600.

CAPITAL OUTLAY

For an additional amount for "Capital outlay", $696,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Governmental direction and support

The conference action rescinds $3,665,500 in budget authority as proposed by the Senate. The conferees have not approved the language proposed by the Senate concerning the collection and use of program fees collected from the issuance of debt by the District of Columbia government. The conferees have approved language which will allow for claims and suits not to exceed $200,000 in total to be paid in the same manner as judgments rendered against the District of Columbia government. The settlement of these claims is authorized under D.C. Code 1-904, and involve property damage in excess of $1,500 and personal injury in excess of $5,000, but not to exceed $10,000 in either category.

Economic development and regulation

The conference action rescinds $40,500 instead of appropriating $19,400 including an increase of $3,527,300 in new authority and a reduction of $3,507,900 in current authority as proposed by the Senate. This action by the conferees reflects approval of $136,400 in new budget authority for the Public Service Commission instead of $196,300 as proposed by the Senate.

Public safety and justice

The conference action appropriates $3,394,000 instead of $2,919,400 including an increase of $3,874,900 in new authority and a reduction of $955,500 in current authority as proposed by the Senate. The conferees were concerned about the possible shortfall in juror fees, witness fees and indigent defense funds in the criminal justice system of the District of Columbia courts which could have resulted in a cessation of criminal trials in the district during the remainder of the fiscal year. Accordingly, the conferees have included an additional $474,600 for the courts to insure that jury trials will be continued throughout the balance of fiscal year 1981. This increase will provide an additional $236,800 for witness and juror fees and an

additional $237,800 for the Criminal Justice Act Program. This action by the conferees coupled with reprogramming requests presently being considered by District officials will provide the district of Columbia Courts with their full supplemental budget request of $436,800 for witness and juror fees and $759,600 for the Criminal Justice Act Program.

METROPOLITAN POLICE DEPARTMENT

The conferees are displeased that District of Columbia officials have not followed the directive of Congress with respect to the Metropolitan Police Department. The Congressional directive was explicitly expressed in the Joint Explanatory Statement of the Committee of Conference (House Report No. 96-1477) that accompanied the regular fiscal year 1981 District of Columbia appropriations bill. Because of the low level of staffing, District officials were directed to move aggressively toward a hiring and training program which would bring the Police Department employment level above that of 3,800 filled sworn police officer positions immediately. Although an additional $6 million was appropriated for this purpose, District officials have neither complied nor offered a suitable explanation for their noncompliance.

The conferees hereby place District officials on notice that if this critical problem is not resolved at once, future Federal payments to the City will be jeopardized.

Public education system

The conference action appropriates $2,970,000 instead of $2,662,700 as proposed by the Senate, and allocates $1,100,000 to the District of Columbia Public Schools and $1,870,000 to the School Transit Subsidy. The conferees have also approved rescissions of $298,800 in the Public Library, $5,000 in the Commission on the Arts and Humanities, and $3,500 in the Educational Institution Licensure Commission.

Human support services

The conference action provides $20,754,100 instead of $20,922,000 including an increase of $7,300,000 in new authority and an increase of $13,622,000 in current authority as proposed by the Senate. This action by the conferees will provide a total of $3,632,100 for the unemployment compensation program, instead of $3,800,000 as proposed by the Senate. The conferees have also approved language providing that $3,500,000 for the disability compensation program should remain available until expended as proposed by the Senate. A total of $13,622,000 is provided for the Department of Human Services instead of $17,436,000 as proposed by the Senate.

Transportation services and assistance

The conference action rescinds $3,031,600 instead of $2,724,900 including an increase of $4,432,100 in new authority and a reduction of $7,157,000 in current authority as proposed by the Senate. This action by the conferees will provide a total of $4,125,400 to cover electricity costs for streetlighting in accordance with a court judgment against the District of Columbia government and to cover other utility costs under the Department of Transportation.

Environmental services and supply

The conference action rescinds $121,600 of budget authority available to the Department of Environmental Services as proposed by the Senate.

Water and sewer enterprise fund

The conference action appropriates $3,017,800 to cover debt service requirements and sludge disposal costs under the Department of Environmental Services as proposed by the Senate.

Washington Convention Center enterprise fund

The conference action provides $382,600 to establish the Washington Convention Center Enterprise Fund as proposed by the Senate.

Capital outlay

The conferees have agreed to provide $696,000 to increase the capacity of storm sewers to eliminate the periodic flooding of basements and backyards which residents in the areas of Kearney and Jackson Streets, N.E. experience during heavy rainfalls.

TITLE II—INCREASED PAY COSTS

LEGISLATIVE BRANCH—SENATE

Amendments No. 366 through 372: Reported in technical disagreement. Inasmuch as these amendments relate solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs therein without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments No. 366 through 372.

ARCHITECT OF THE CAPITOL

Office of the Architect of the Capitol

Salaries and Expenses

Amendment No. 373: Appropriates $106,000 as proposed by the Senate instead of $114,000 as proposed by the House.

Senate garage

Amendment No. 374: Reported in technical disagreement. Inasmuch as this amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs therein without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

Library buildings and grounds structural and mechanical care

Amendment No. 375: Deletes $7,000 proposed by the House.

DEPARTMENT OF AGRICULTURE

FOOD SAFETY AND QUALITY SERVICE

Amendment No. 376: Appropriates $17,788,000 for the Food Safety and Quality Service instead of $16,988,000 as proposed by the House and $18,588,000 as proposed by the Senate.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

(Including Transfer of Funds)

Amendment No. 377: Appropriates $20,716,000 instead of $20,000,000 as proposed by the House and $22,116,000 as proposed by the Senate.

Amendment No. 378: Provides that $2,500,000 shall be derived by transfer from "Promote and develop fishery products and research pertaining to American Fisheries" instead of $5,000,000 as proposed by the House. The Senate proposed no transfer.

MILITARY PERSONNEL, ARMY

Amendment No. 379: Appropriates $1,079,432,000 as proposed by the Senate instead of $1,067,132,000 as proposed by the House.

MILITARY PERSONNEL, NAVY

Amendment No. 380: Appropriates $745,583,000 as proposed by the Senate instead of $743,183,000 as proposed by the House.

MILITARY PERSONNEL, MARINE CORPS

Amendment No. 381: Appropriates $236,714,000 as proposed by the Senate instead of $235,614,000 as proposed by the House.

NATIONAL GUARD PERSONNEL, ARMY

Amendment No. 382: Appropriates $104,803,000 as proposed by the Senate instead of $103,303,000 as proposed by the House.

DEPARTMENT OF EDUCATION

DEPARTMENTAL MANAGEMENT

Amendment No. 383: Appropriates $2,497,000 instead of $497,000 as proposed by the House and $4,497,000 as proposed by the Senate.

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

Amendment No. 384: Appropriates $1,000,000 for increased pay costs for the Federal Energy Regulatory Commission instead of $2,031,000 as proposed by the Senate.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES ADMINISTRATION

Amendment No. 385: Appropriates $5,310,000 for Health Services, as proposed by the Senate.

Center for Disease Control

Amendment No. 386: Appropriates $2,000,000 for Preventive Health Services, as proposed by the Senate.

Amendment No. 387: Deletes heading proposed by the Senate.

Amendment No. 388: Deletes appropriation of $3,479,000 for the National Cancer Institute, proposed by the Senate.

Amendment No. 389: Deletes appropriation of $1,375,000 for the National Heart, Lung, and Blood Institute, proposed by the Senate.

Amendment No. 390: Deletes appropriation of $419,000 for the National Institute of Dental Research, proposed by the Senate.

Amendment No. 391: Deletes appropriation of $1,124,000 for the National Institute of Arthritis, Metabolism, and Digestive Diseases, proposed by the Senate.

Amendment No. 392: Deletes appropriation of $794,000 for the National Institute of Neurological and Communicative Disorders and Stroke, proposed by the Senate.

Amendment No. 393: Deletes appropriation of $952,000 for the National Institute of Allergy and Infectious Diseases, proposed by the Senate.

Amendment No. 394: Deletes appropriation of $149,000 for the National Institute of General Medical Sciences, proposed by the Senate.

Amendment No. 395: Deletes appropriation of $666,000 for the National Institute of Child Health and Human Development, proposed by the Senate.

Amendment No. 396: Deletes appropriation of $244,000 for the National Eye Institute, proposed by the Senate.

Amendment No. 397: Deletes appropriation of $426,000 for the National Institute of Environmental Health Sciences proposed by the Senate.

Amendment No. 398: Deletes appropriation of $282,000 for the National Institute on Aging proposed by the Senate.

Amendment No. 399: Deletes appropriation of $43,000 for Research Resources proposed by the Senate.

Amendment No. 400: Deletes appropriation of $58,000 for the John E. Fogarty In-

ternational Center for Advanced Study in the Health Sciences proposed by the Senate.

Amendment No. 401: Deletes appropriation of $339,000 for the National Library of Medicine proposed by the Senate.

Amendment No. 402: Deletes appropriation of $524,000 for the Office of the Director proposed by the Senate.

Office of the Assistant Secretary for Health

Amendment No. 403: Deletes appropriation of $1,062,000 for the Assistant Secretary for Health proposed by the Senate.

Health Care Financing Administration

Amendment No. 404: Provides $3,000,000 for Program Management to be derived by transfer from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund, as proposed by the Senate.

Office of Human Development Services

Amendment No. 405: Appropriates $1,116,000 for Human Development Services, as proposed by the Senate.

Departmental Management

Amendment No. 406: Deletes appropriation of $1,116,000 for the Office for Civil Rights, as proposed by the Senate.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

(Including Transfer of Funds)

Amendment No. 407: Provides $20,494,000 for salaries and expenses as proposed by the House, instead of $27,066,000 as proposed by the Senate.

DEPARTMENT OF LABOR

Amendment No. 408: Restores heading as proposed by the House.

EMPLOYMENT AND TRAINING ADMINISTRATION

Amendment No. 409: Restores pay cost transfer language as proposed by the House.

LABOR-MANAGEMENT SERVICES ADMINISTRATION

Amendment No. 410: Restores pay cost transfer language as proposed by the House.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

Amendment No. 411: Restores pay cost transfer language as proposed by the House.

MINE SAFETY AND HEALTH ADMINISTRATION

Amendment No. 412: Restores pay cost transfer language as proposed by the House.

BUREAU OF LABOR STATISTICS

Amendment No. 413: Restores pay cost transfer language as proposed by the House.

DEPARTMENTAL MANAGEMENT

Amendment No. 414: Restores pay cost transfer language as proposed by the House.

DEPARTMENT OF THE TREASURY

Amendment No. 415: Appropriates $216,000 for the Office of Revenue Sharing as proposed by the Senate, instead of $100,000 as proposed by the House.

VETERANS' ADMINISTRATION

Amendment No. 416: Appropriates $265,205,000 for medical care as proposed by the House, instead of $258,967,000 as proposed by the Senate.

Amendment No. 417: Deletes language proposed by the House limiting the number of other than full-time permanent and nonceiling personnel. The conferees have deleted the limitation in recognition of the Administration's intention to immediately lift the ceiling on full-time permanent appointments in the medical care account for fiscal year 1981 and 1982. The language was included in the bill to resolve the full-time permanent personnel ceiling issue. The Committee of conference believes the lifting of the ceiling on full-time permanent appointments will contribute to a more efficient and effective utilization of resources.

Amendment No. 418: Appropriates $7,917,000 for medical and prosthetic research as proposed by the House, instead of $7,785,000 as proposed by the Senate.

Amendment No. 419: Appropriates $1,591,000 for medical administration and miscellaneous operating expenses as proposed by the House, instead of $2,106,000 as proposed by the Senate.

Amendment No. 420: Appropriates $15,659,000 for general operating expenses as proposed by the House, instead of $14,267,000 as proposed by the Senate.

OTHER INDEPENDENT AGENCIES

ACTION

Amendment No. 421: Appropriates $230,000 for "Operating expenses, domestic programs", instead of $460,000 proposed by the Senate. The House bill included no funds.

INTERNATIONAL SALARIES AND EXPENSES COMMUNICATION AGENCY

Amendment No. 422: Appropriates $9,846,000 as proposed by the Senate instead of $9,585,000 as proposed by the House.

NATIONAL SCIENCE FOUNDATION

Amendment No. 423: Appropriates $4,759,000 for research and related activities as proposed by the House, instead of $3,259,000 as proposed by the Senate.

Amendment No. 424: Increases the limitation on program development and management by $759,000 as proposed by the House, instead of by $1,759,000 as proposed by the Senate.

TITLE III—GENERAL PROVISIONS

Amendment No. 425: Restores provision proposed by the House and stricken by the Senate limiting funds provided for agencies funded in the HUD-Independent Agencies Appropriation Act for personnel compensation and benefits to be used for other purposes without the approval of the Committees on Appropriations.

SECTION 304

Amendment No. 426: Deletes language proposed by the House. This exact language was included in the Senate passed bill and is included in Chapter XII of Title I of this Act (see Amendment No. 362).

SECTION 305

Amendment No. 427: Deletes language proposed by the House. The House language provided that no funds would be available to pay for an abortion or for administrative expenses in connection with any health plan under the Federal Employees Health Benefit Program which provided any benefits or coverage for abortions under such negotiated plans after the last day of the contracts currently in force.

Amendment No. 428: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment amended as follows:

In lieu of the section number named in said amendment insert the following: "304".

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 429: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 305. None of the funds in this Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in World trade at competitive prices as authorized by law.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment reaffirms the authority and responsibility for the Commodity Credit Corporation to protect the government's investment, to make food available to the people of the world and to prevent commodities from being held and counted to reduce the American Farmers production. This amendment does not remove or amend the restrictions contained in Agricultural Acts relating to the sale of surplus commodities, but rather only denies funding to agencies and activities which prevent or interfere with the normal sale of surplus agricultural commodities in World Trade at competitive prices.

Also, this amendment deletes section 304 proposed by the Senate which would have provided that none of the funds in this Act could be used to pay for employee travel involving the taking of annual leave while away from the official duty station.

TITLE IV—FURTHER CONTINUING RESOLUTION

Amendments No. 430, 431, and 432: Change section numbers as proposed by the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

The total net new budget (obligational) authority recommended by the Committee of Conference, with comparisons to the budget estimates, and the House and Senate bills follow:

Budget estimates of net new (obligational) authority	[1] $8,374,139,259
House bill	6,810,285,916
Senate bill	6,695,450,041
Conference agreement	6,649,301,016
Conference agreement compared with:	
Budget estimates of net new (obligational) authority	−1,724,838,243
House bill	−160,984,900
Senate bill	−46,149,025

[1] Includes a net of $776,325,000 in budget estimates not considered by the House. Of this amount, $536,124,000 for the food stamp program has not yet been officially transmitted to the Congress.

Mr. COELHO.
Mr. GARCIA.
Mr. JONES of Tennessee in six instances.

ADJOURNMENT

Mr. RATCHFORD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 34 minutes p.m.), the House adjourned until tomorrow, Thursday, June 4, 1981, at 10 a.m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee of conference. Conference report on H.R. 3512 making supplemental and further continuing appropriations (Rept. No. 97-124). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BAILEY of Missouri (for himself, Mr. EMERSON, and Mr. NAPIER):

H.R. 3773. A bill to amend title 11, United States Code, to permit certain acts to recover agricultural products from warehouses that are debtors in bankruptcy; to the Committee on the Judiciary.

By Mr. PHILIP M. CRANE:

H.R. 3774. A bill to amend the Internal Revenue Code of 1954 to provide income and estate tax deductions for decedents who donate organs for use as transplants; to the Committee on Ways and Means.

By Mr. MCEWEN:

H.R. 3775. A bill to amend the Internal Revenue Code of 1954 to allow self-employed individuals an income tax deduction for one-half of the social security tax on self-employment income; to the Committee on Ways and Means.

H.R. 3776. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for certain life insurance premiums; to the Committee on Ways and Means.

H.R. 3777. A bill to amend the Internal Revenue Code of 1954 to provide that the amounts paid for health insurance will be allowed as a deduction without regard to the 3-percent limitation on the medical deduction and whether or not the individual itemizes his deductions; to the Committee on Ways and Means.

By Mr. MURPHY:

H.R. 3778. A bill to amend section 3 of the Federal Mine Safety and Health Act of construction contractors who are engaged in certain activities conducted on the surface area of any coal or other mine, and for other purposes; to the Committee on Education and Labor.

By Mr. MURPHY (for himself and Mr. BINGHAM):

H.R. 3779. A bill to amend the Export Administration Act of 1979 to impose export restrictions on agricultural commodities to the Soviet Union; to the Committee on Foreign Affairs.

By Mr. SCHUMER:

H.R. 3780. A bill to amend title II of the Social Security Act to extend child's insurance benefits to full-time students who have not attained the age of 26, and for other purposes; to the Committee on Ways and Means.

By Mr. SIMON:

H.R. 3781. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children; to the Committee on the Judiciary.

By Mr. MURPHY (for himself, Mr. LEBOUTILLIER, and Mr. BINGHAM):

H. Con. Res. 141. Concurrent resolution urging the President to reinstate the export restrictions on agricultural commodities to the Soviet Union; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. JONES of North Carolina introduced a bill (H.R. 3782) to revitalize the pleasure cruise industry by clarifying and waiving certain restrictions in the Merchant Marine Act, 1936, and the Merchant Marine Act, 1920, to permit the entry of the steamship vessel *Oceanic Constitution* into the trade, which was referred to the Committee on Merchant Marine and Fisheries.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 741: Mr. EDWARDS of Alabama, Mr. VOLKMER, Mr. BAFALIS, Mrs. BOGGS, Mr. SUNIA, Mr. WOLF, Mr. LEHMAN, Mr. DREIER, Mr. D'AMOURS, Mr. EVANS of Georgia, Mr. MYERS, Mr. WHITEHURST, Mr. NEAL, Mr. BARNES, Mr. WORTLEY, Mr. BURGENER, Mr. FIELDS, and Mr. MURPHY.

H.R. 1643: Mr. CORCORAN.

H.R. 1765: Mr. COURTER, Mr. LENT, and Mr. DYMALLY.

H.R. 2322: Mr. DASCHLE.

H.R. 2326: Mr. HEFTEL and Mr. BROWN of Ohio.

H.R. 2389: Mr. WOLPE, Mr. MOLINARI, and Mr. WALKER.

H.R. 3091: Mr. RODINO, Mr. MILLER of California, Mrs. BOUQUARD, Mr. BARNARD, and Mr. DWYER.

H.R. 3274: Mrs. SCHNEIDER, Mr. BEVILL, and Mr. BEDELL.

H.R. 3705: Mr. BUTLER, Mr. MCCLORY, and Mr. EDWARDS of California.

H.J. Res. 89: Mr. SIMON, Mr. TRIBLE, Mr. LUJAN, Mr. DORNAN of California, Mr. COURTER, Mr. CHENEY, Mr. JAMES K. COYNE, Mr. HAGEDORN, Mr. LEE, Mr. LUKEN, Mr. MCCOLLUM, and Mr. NAPIER.

H. Con. Res. 28: Mr. HANSEN of Idaho, Mr. GINGRICH, Mr. PASHAYAN, Mr. BROYHILL, Mr. WILSON, Mr. PHILIP M. CRANE, Mr. DANNEMEYER, Mr. BAILEY of Pennsylvania, Mr. GINN, Mr. NELSON, Mr. ROBERT W. DANIEL, JR., Mr. BROWN of Ohio, Mr. BADHAM, Mr. PANETTA, Mrs. BOUQUARD, Mr. COLEMAN, Mr. MARTIN of North Carolina, Mr. HYDE, Mr. MITCHELL of New York, Mr. ERTEL, Mr. CLINGER, Mr. HILER, Mr. GIBBONS, Mr. HENDON, Mr. BETHUNE, Mr. BEILENSON, Mr. DANIEL B. CRANE, Mr. PARRIS, Mr. STANGELAND, Mr. EMERSON, Mr. LEWIS, Mr. JEFFRIES, Mr. RITTER, Mr. LOWERY of California, Mr. STATON of West Virginia, Mr. WOLF, Mr. HUNTER, Mr. WIRTH, Mr. LAFALCE, Mr. MCCOLLUM, and Mr. NAPIER.

H. Res. 142: Mr. ATKINSON, Mr. LAGOMARSINO, Mr. ROSENTHAL, Mr. SEIBERLING, Mr. YATES, Mr. GORE, Mr. LEHMAN, Mr. WILLIAMS of Ohio, Mr. KILDEE, Mr. BONKER, Mr. FRANK, Mr. DENARDIS, Mr. JEFFORDS, Mr. ROE, Mr. FORSYTHE, Mr. WEBER of Ohio, Mr. DERWINSKI, Mr. PETRI, Mr. BEILENSON, Mr. LEBOUTILLIER, Mr. UDALL, Mr. PRITCHARD, Mr. IRELAND, Mr. EMERY, Mr. LONG of Maryland, Mr. SIMON, Mr. SOLARZ, Mr. CLINGER, Mr. FRENZEL, Mr. GILMAN, Mr. MARKEY, Mr. FINDLEY, Mr. ROTH, Mr. WEISS, Mr. WORTLEY, Mr. FOGLIETTA, Mr. LUNGREN, and Ms. FIEDLER.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3455

By Mr. MARRIOTT:

—Page 27, line 11, insert "(a) after "SEC. 305.".

Page 27, after line 25, insert the following new subsection:

(b) No funds appropriated pursuant to the authorization for the MX missile system in section 301 may be obligated or expended with respect to any basing mode for the MX missile unless—

(1) a plan to minimize the economic, social, and cultural, impacts of the basing mode selected for such missile on the affected State and local communities (including minimization through the provisions of Federal financial assistance) is submitted by the Secretary of Defense to the Congress; and

(2) a period of sixty days has elapsed after the plan submitted under paragraph (1) has been received by the Congress and during which both Houses of Congress have not adopted resolutions of their respective Houses expressing disapproval of such plan.

—Paragraph (2) of section 305, as proposed to be inserted by the amendment, is amended to read as follows:

(2) the Secretary of Defense submits to the Committees on Armed Services of the Senate and House of Representatives a report in writing (A) justifying the selection of the President referred to in paragraph (1), (B) containing a comparison and evaluation of alternative basing modes to the basing mode selected by the President, and (C) recommending a plan to mitigate the economic, social, and cultural impacts of the selected basing mode on the affected State and local communities, including through the provision of Federal financial assistance; and

EXTENSIONS OF REMARKS

FARMERS FEAR ANOTHER CROP WILL BITE THE DUST

HON. ED JONES
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. JONES of Tennessee. Mr. Speaker, this is a particularly busy time for all of us in this body as we take up important legislation that affects this entire Nation. In the House Committee on Agriculture, of which I am a member, we are currently trying to draft a multiyear farm bill that will establish agricultural policy for this country for the next 4 years.

I realize that many of my colleagues may not be as familiar with the issues pertaining to agriculture as I am, just as I may not be as familiar with some urban problems as they are. However, as this body and the Senate takes up a new farm bill, it is going to be important that we all try to understand the issues that affect the small minority of families that provide us with food and fiber. For that reason, I am inserting today in the RECORD a series of newspaper articles recently published in the Memphis Commercial Appeal newspaper. They were written by Ms. Deborah Clubb and Mr. William Thomas, both very capable and diligent reporters.

I want to bring these articles to the attention of my colleagues because I think they represent a very accurate portrayal of what many American farmers are facing. Possibly from this material, all of us might gain a greater appreciation for the legislation we have to debate later this year.

Today I am inserting part 1 of this 5-part series. This story focuses on the drought problem that our Nation's breadbasket suffered last year and that we may be confronting again this summer.

FARMS TILLING FEAR THAT ANOTHER CROP BITES THE DUST

Not since the 1930s, when 50 million acres turned to dust and people like Woody Guthrie and John Steinbeck set out to define the "brother-can-you-spare-a-dime" era, not since then has so much attention been focused on a change in the weather—on an American drought.

Ever since last summer's unequaled heat wave and this winter's record river lows, all kinds of people—from mountaineers in Arkansas and government drouth-mappers in Washington to media lords in New York—have expressed growing alarm over the lack of rain and vanishing reserves in lakes and underground aquifers that furnish more than half the nation's drinking water.

There is no real comparison between the 1980s and the 1930s—that storied decade marked by dust storms eclipsing the sun; this one marked by river closings, extreme temperatures and mounting evidence that large sections of the country are, indeed, running out of water. But there are some similarities:

For one thing, the present drouth has arrived in the midst of the new "hard times"—times when people have money but the money won't buy much; times when the last thing anyone needs is higher food prices at the supermarket. For another, the drouth has hit farmers the hardest, causing a sharp rise in a nervous condition sometimes referred to as "farmer stress."

A rash of peculiar theories as to what caused this drouth has broken out. Early on, scientists weighed the notion that the volcanic eruption of Mt. St. Helens might be a factor. Later, they discarded that theory when they found that not enough volcanic ash had been blown into the atmosphere to make much of a difference.

There are other theories:

An apparently God-fearing Mississippian believes the drouth is punishment for the nation's sins.

Then, there's the fisherman in Arkansas who thinks the daffy weather is the consequence of all the satellites that have been put into orbit and "junked up" the sky.

The most likely explanation, according to the National Climate Analysis Center, is that abnormal wind streams in the upper atmosphere have scrambled weather patterns. It apparently started when a high-pressure ridge of air stalled over the West late last spring, causing moist Pacific winds to detour over Canada bypassing the United States altogether. Why it happened, meteorologists don't know.

No matter. The important thing is that it has left farmers so deeply in debt that the only way many can finance another crop this spring is through government drouth disaster loans. Drouth aid to farmers in Tennessee, Mississippi and Arkansas through last month totaled more than $600 million.

Although no farmers are yet piling their bedsprings onto their jalopies and striking out for California, many say that another season in the sun like the last one's will be the end of their careers as growers.

Already, a fair number of veteran farmers have rented out their land and become inactive rather than make heavy investments to plant a crop and risk losing their farms to something as unpredictable as the weather.

Although farmers historically complain about rain—it's either too little or too much, too early or too late—this time, the Joint Agriculture Weather Facility in Washington has supported their complaints by distributing a series of drouth maps showing that things are just about as bad as farmers say they are—and maybe worse. At least, in places.

Surprisingly, Memphis and a large section of North Mississippi and West Tennessee are exceptions. Here, rainfall is now considered to be "near normal." Also, there has been no threat of water restrictions here as there have been in other cities across the land, thanks to an enormous artesian aquifer 500 feet deep in what is known as the Memphis Sands.

Nevertheless, Memphis has continued to be a focal point for national drouth stories.

In late January when the Mississippi River fell to its lowest point in 111 years, pictures of long stretches of sandbar became classic illustrations for TV, newspaper and magazine reports on the scope and intensity of the drouth. The media line is that this drouth closed the Mississippi River.

And for a while it did. After Christmas, the U.S. Coast Guard reported more than 200 accidents involving tows in shallow water. The result was a series of traffic jams that slowed movement on the river to a crawl. A normal, 14-day trip between Chicago and New Orleans took 25 days during the lowest of the low water. For the public, the upshot likely will be higher prices on any number of products due to increased transportation costs.

Actually, had it not been for the scrawny appearance of the Mississippi River, most Memphians probably would have assumed that the drouth ended when the heat wave stopped late last summer. There had been 19 straight days, July 3–21, when temperatures topped 100 degrees. When it was over, the heat had taken 67 lives. Nationwide, the death toll was 1,265, an awesome figure, but not nearly as high as the Dust Bowl year of 1936 when 4,678 people died.

Although the sandbars have now disappeared under rising waters and the river has "reopened," it is not that easy to consign the 1980–81 drouth to history.

In the northwest quarter of Arkansas—an area where eight million chickens died in the heat—conditions are still as dry as any place in the country. Hundreds of water wells have never recovered from last summer's demands. Water haulers are still at work there. And they expect business to pick up even more as the weather warms.

With rains as the only hope for replenishing the wells and the subsoil, it is hardly surprising that the arrival of spring this month is being awaited with a heightened sense of expectation.

The problem is an ordinary wet spring won't do. The past nine months have been so dry that some parts of the country are so far behind it will take an unusually wet season to catch up.

What it means is that although the land will be greening soon—patches of early grass already have turned—the green might not last without some good rains to sustain it.

For brown is the color of the drouth: Brown fields, brown woods, brown earth long since plowed up and prepared during a winter so dry that farmers at least could get out and turn the ground. What is not so clear is whether brown is the color of the immediate future.●

CREDIT RISING WATER LEVEL SINKING

HON. ED JONES
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. JONES of Tennessee. Mr. Speaker, I have been inserting into the RECORD a series of articles on agricultural problems written by Ms. Deborah Clubb and Mr. William Thomas of the Memphis Commercial Appeal newspaper. Part two of this series discusses the credit situation as it pertains to farmers.

The article follows:

[From the Commercial Appeal, Memphis, Mon., Mar. 9, 1981]

U.S. FARMERS STAY AFLOAT ON RISING SEA OF CREDIT

(By Deborah M. Clubb)

A darkening cloud of debt is hovering over America's farms.

A growing number of American farmers cannot pay crop expenses with the cash flow generated on their land. Their debt has become four or five times larger than their income, compared with two-to-one or three-to-one in the 1960s and early 1970s.

To get from their farms a portion of that absent return, they mortgage and remortgage to borrow money to cover expenses to produce food and fiber products.

Inflation and other factors have pushed their land values to incredible numbers, making paper millionaires out of the same farmers who scrimp to cover skyrocketing crop production costs.

In the last three years, American agriculture has become more and more dependent on a number of U.S. Department of Agriculture (USDA) programs that provide risk relief to farmers through economic emergency and crop disaster lending. This year that dependence is astounding.

It came about through an almost imperceptible change in the 1978 Agriculture Credit Act that established Farmers Home Administration economic emergency loans. It has kept in business some farmers who otherwise would have gone under in recent economic storms.

The government support price systems that flourished until 1973 were designed to guarantee farmers a profit by direct payments from the government if production was kept within crop quotas. When the quota system was ended target prices set a floor for crop prices.

But that system came under attack from urban and consumer-oriented legislators and administrators who favored market-oriented farm programs over support programs.

As another omnibus farm bill begins hearings in Washington, President Reagan's market-oriented agriculture secretary, John Block, is helping plan budget cuts for farm credit programs and other changes in farm programs.

"I'm not satisfied to see in some counties major reliance on Farmers Home for operating and ownership loans to farmers," Block said in an interview last week. "I think we should be relying on the private sector, PCAs (Production Credit Associations) and country banks primarily.

"I think agriculture's been living off of borrowed money. Just borrowing money to say in business doesn't make any sense at all.

"We need profitability in the industry," Block said. "The President's economic program will get inflation and costs under control. Then I'd like to see strengthening demand for our products abroad. That will strengthen prices. Then we're creating a climate for profitability out of the marketplace."

The USDA-funded credit programs in the FmHA have been attacked in Congress with charges that the money is not going to farmers who genuinely need it. Hearings revealed cases in which money was approved for hotel and condominium projects far removed from farming purposes. However, USDA officials said no charges have been proved by federal investigators and often the misunderstood loans came from the agency's business and industrial or housing programs.

But problems in the agriculture community run deeper than the administrative pitfalls of FmHA or other farm lending programs.

At the heart of the trouble is a major policy question that, in most opinions, has never been answered.

"The federal government, not by policy but by program, is sustaining perhaps marginal farmers," said Marlin Jackson, board chairman of Security Bank in Paragould, Ark.

It's all part of an effort to preserve an ill-defined notion called "family farmers," Jackson said.

"We have a mutation in which a great variety of programs are slugging away at something that is existing contrary to all rules of the universe. We're preserving these at any cost and burden to the taxpayer . . .

"Farming is a way of life but it's also a business. Can farmers continue to absorb high costs, undergirded not by a farm policy but by credit? . . . Are we doing people a favor by keeping them comatose economically—neither alive with any hope of success nor dead?"

Forrest City, Ark., PCA president John Stite said, "The big problem we have is projecting how a fellow can pay money expenses and production expenses and debt load on the commodity prices we've got."

Cookeville, Tenn., PCA president Jerry Rose said, "The best thing we could do is increase the margin of profit between production costs and what they sell their products for. That's not very popular with consumers. Cheap money helps but that doesn't solve the problem. The problem is not enough margin of profit."

Farmers agree.

Jack Cothran, Wynne, Ark., farmer and president of the Arkansas American Agricultural Movement (AAM) said the solution to profitability is a loan price that is not a subsidy. "It's a rate at which we can borrow money to pay our loan without being forced to sell our crop at a price below what it cost to produce it."

Brownsville, Tenn., farmer and Tennessee AAM president Tommy Willis, is angry. "It's cheapest for 96 percent of the population to finance 20 percent of farmers every year to keep them in business than to have 80 or 90 percent of them make a profit."

Willis preferred the acreage set-aside program that controlled commodity supplies by paying farmers to idle land. "(Former Georgia) Sen. Herman Talmadge had a bill for a set-aside that would have cost between $800 and $900 million. But loans have exceeded that six times.

"If we had had a set-aside, we would have had less food during the drouth," Willis admitted, "but how long can we affort to produce it for less than the cost of production and export it for less than the cost of production?"

John E. Lee Jr., director of USDA's National Economic Division, a policy research arm of the department, said, "Small and beginning farmers need a certain amount of help, but if good-size operators go out on a limb, the philosophy is it may not be the government's place to bail him out.

"The emphasis in the next four years will likely be on bringing more land into production just to meet export demand. There will be programs in place to protect farmers if there are two bumper years in a row."

As Lee sees it, the United States needed policies to deal with crop surpluses from the 1920s to the early 1970s. With blossoming export markets, "that slack is pretty much gone. We will be in a position to need more land in production.

"The question is whether production costs will eat up net profits."

That, said Lee, is why Reagan's administration will work so hard to get inflation down. That would help farm incomes come up and might slow the trend to fewer, larger farms, Lee said.

It might add up to a future where farmers will be set loose and forced to plan for bad years without a federal safety net there to catch them. The eventual result could be fewer farmers, fewer so-called family farmers, and fewer young or new farmers.

As it is now, a farm must operate 10 to 20 years before farm income will make purchase payments on the land.

"Young farmers and tenants will be hurt and some farmers that, let's just face it, have not done as well as they would like to have done (will also be hurt)," said Allan H. Brock, deputy administrator of FmHA farm and family programs in Washington. Current programs "are keeping them going until good times come. And I think they are coming."

"Farmers Home (an agency funded by USDA) has become a rural development agency," said Dr. George D. Irwin, an economist with the Farm Credit Administration that supervises the privately funded farm credit system. "Agriculture lending is less than one-third the total program. The rest has gone for community facilities—water and sewer projects and housing."

FmHA has 10 per cent of total agriculture credit, up from 3 per cent a few years ago. Interest in 1980 was around 10 per cent on operating loans and will be around 12 or 13 per cent this year.

"Probably 15 per cent of my total ag loan volume is being lost to Farmers Home because of cheaper interest rates, mostly in the form of disaster loans," said Grenada (Miss.) Bank's agriculture loan vice president W. R. Jones.

As for disaster loans, if farmers bale supposedly ruined crops for cattle feed, FmHA is basically stuck with trusting what farmers report. "We have no way of climbing every barn loft and going into every field. It's like income tax—we have to trust their word on it."

Said Brock, "If they give us false information, they've violated federal statute."

What astounds many onlookers, including officials who make the loans, is that eligibility for disaster loans is based strictly on loss—so the farmer with a net worth of $14 million who walked into a Mid-South Small Business Administration office was legally

able to apply for and receive a loan at 8¼ per cent this winter.

The intent of the Farmers Home program is to sustain family-size farmers with a reasonable chance of success, Brock said.

"The first thing we do is find out what's wrong on the farm and correct the program. When they come to us for refinancing, we make our plans so we can graduate him to other programs. At the end of the year, he brings in his record book and compares it to that plan. We just do not finance the status quo . . . In the fifth year we can ask them to graduate, and they have to do it."

Arkansas FmHA acting director Mike Dunaway defended the farm loans. "Every farm we keep in business the more competition there is. The more that go out the more big farms and corporate farms and prices would skyrocket."

Economist Irwin said, "The Reagan team is more inclined to provide a stable environment and let them survive or fail."

AMERICAN FARM ROLLCALL: 1978

The country has 2,479,866 farms with $1,000 or more in agricultural product sales versus 2.6 million in 1974.

100,000 farms account for half of all farm output, and the largest 800,000 account for 90 percent.

1.6 million farms had sales of less than $20,000.

2.2 million were operated by families or individuals; 241,000 by partnerships and 54,000 by corporations of which 48,000 were family held corporations.

Farming was the principal occupation of 1.3 million operators while another 1.2 million spent most work-time at off-farm occupations.

The average age of farmers is 50.1 years, down from the 51.7 found in 1974.

Seventy percent of all farmland is owned by persons over 50 years of age.

PROFITABILITY

Costs and incomes	Per acre [1]	
	1960	1980
Cotton:		
Gross income	$180	$436

FARMERS PRAY FOR SPRING RAINS

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. JONES of Tennessee. Mr. Speaker, I am continuing to insert into the CONGRESSIONAL RECORD a series of stories on agriculture which have appeared in the Memphis Commercial Appeal newspaper. These stories were written by Ms. Deborah Clubb and Mr. William Thomas, and they cover a wide range of agriculture-related topics. This part outlines weather problems of farmers.

FORECASTERS VARY AS FARMERS PRAY FOR SPRING RAINS

(By Deborah M. Clubb)

Two things about the 1980-81 drouth are undeniable.

It was a major drouth abetted by extreme heat over most of the Eastern United States.

And it's not over yet.

The situation remains critical for soil moisture needs in many states and for surface and groundwater supplies throughout the area. Farmers, community water officials, utility operators, government hydrologists and water-dependent industries share a mutual desire for abundant spring rains.

The drouth was an unexpected blip on the trend charts of the nation's climatologists and meteorologists. It began when a large fair weather system set in over most of the eastern half of the United States in late June—and just stayed. Or, as the weather pros say, "maintained itself from day to day, all summer and into the fall."

As long as that fair weather system stalled there, no significant rain fell and temperatures went beserk. The weather pros drew great maps tracing the dry, drier and driest regions.

Finally, that system moved west in September to hover over Arkansas, Oklahoma and west Texas. But after a bit of rain near year's end, Mid-South weather dried out again, and got colder, until the last days of February brought scattered showers and spring-like warmth.

It's not over. Before last week's rains, the drouth was as bad as had been experienced in the Mid-South, government experts said. The rains helped soil moisture considerably, bringing southern Mississippi and southern Louisiana back to normal. At the same time, snow and rain came to other dry areas of the West. But other parts of the Mid-South still need three to five inches, with areas of East Tennessee, Northwest Arkansas and Northwest Louisiana remaining in critical need. Much of Texas, Oklahoma and Kansas are still very dry.

Will the dryness of 1980 continue through the spring and summer and wreak havoc once again on all growing things? Or, worse, was the 1980 drouth the beginning of a critically dry cycle of years, reminiscent of the dry years preceding the great Dust Bowl?

Predictably, few forecasters agree on weather predictions.

What is clear is that the amount of spring rainfall this year is especially critical.

Since nothing much was growing through February, all rain that fell went to recharging the soil moisture. Excess rain will run off into rivers and streams.

With late February's warm temperatures, however, Mid-South vegetation came alive, making more demands on the water that fell last week.

With solid moisture levels so low, a wet spring is needed to raise levels and give plants a reserve on which to draw during typically dry summer periods. Only after the soil moisture level is normal will water begin to collect again in underground and surface systems that have dropped considerably.

"The spring rains could make or break a lot of farmers," said meteorologist John Kwiatkowski at the National Weather Service station in Stoneville, Miss.

"If this year stays dry, that (subsoil) reserve will be lower than normal, so if we have even usual dry spells, plants would have little to fall back on. If we had another dry year like last year, plants would really be in bad shape."

Through early March, the Mid-South got about one-third the amount of rainfall it usually gets.

Even now, weather service experts expect the Mississippi River to remain below its normal level through the spring and summer since the Upper Mississippi area does not have the usual snow cover to gradually melt and fill the tributaries.

Mike Looney, a leading forecaster at the Memphis National Weather Service office, said, "It's likely the river will not reach normal height although we don't expect it to be as low as in January. At the same time, maybe we won't have to worry about floods."

Said Kwiatkowski: "In a normal year, winter rain is usually surplus and runs off into the rivers and doesn't do farmers any good—but still it (the subnormal rain) is not a good sign."

Much of Mississippi, Arkansas, Tennessee and Louisiana has a 50-75 percent chance of getting enough moisture to get new crops off to a good start, except for Northwest Arkansas which has about a 25 percent chance of getting normal soil moisture, the weather service said.

"We've had about 6 inches stored in the soil now. Most of these soils can only hold 10 inches, so if we get 4 or 5 inches in March, we'll be starting off at ground zero," Kwiatkowski said.

Dr. Gene Rench at the Stoneville station added, "If we don't start the season full by May 1, we are looking at a serious situation because the probability of getting the full

amount of rain you need—when a plant begins to grow and weather gets warmer—is not good."

Lyle Denny, a climatologist with the U.S. Department of Agriculture (USDA), tracks drouth conditions around the nation, month by month, every year by figuring previous dry months with current temperature, precipitation and plant use demands. In early March, most of the area in West Tennessee and North Mississippi was in a "mild drouth" which Denney interpreted as "threatening." The southern part of the Mississippi Delta was a few degrees worse, in a moderate drouth while Middle and East Tennessee were in the extreme drouth category.

"Once the dryness is over, it's going to be apparently over before I say it's over. After we get soil moisture up, we have to replenish rivers, lakes and reservoirs and the shortage in groundwaters and aquifers," Denny said.

The present drouth threat is totally hydrologic instead of agricultural—affecting storage facilities, such as rivers, lakes and reservoirs.

But that is only true for another few weeks.

Government forecasters predicted above-normal spring rains from the Gulf north to Kansas and Iowa and across to the East Coast. So far, that volume of rain hasn't come to Arkansas, Tennessee or Mississippi, but it is still predicted for March.

As of yesterday, most of New England, the Great Lakes area and the North Central Plains were moist. The Southeast Gulf Coastal states had improved significantly, although they were not removed from the official drouth designation. An area from Kansas, south to east Oklahoma and east Texas and across central Missouri, Arkansas, southern Illinois, Kentucky and Tennessee had also improved. The worst drouth areas continued to be a stretch from central and eastern Montana and parts of the Dakotas through Nebraska and the Red River Valley of Texas, Oklahoma and Arkansas.

"What this means is that, while there is potential for a crop-yield reduction in 1981 . . . we still have the spring rain period to go through, and the spring rain can rapidly change this around," said Norton Strommen, chief meteorologist at USDA's World Food and Agricultural Outlook and Situation Board. The Great Plains have experienced drier years than 1980, yet rains in April and timely showers afterward have produced excellent yields, Strommen said.

Jim McQuigg, a meteorological consultant in Columbia, Mo., believes it is too early "to say it was so dry that it will stay dry and write it off. We still have plenty of time to get our moisture back." Records show that many years were dry in the fall and winter but still allowed good crops, he said. "The odds are in favor of fairly good moisture."

Without adequate spring rains and normal rainfall during the summer, an agriculture-threatening drouth will recur, experts say.

John McWhorter, an agricultural and biological engineer at Mississippi State University, said that, based on rainfall records, it is probable a drouth will occur in 1 of 10 years—"but we don't know which one."

Normal rainfall or above was usual for years after 1967, but amounts 4–12 inches below normal formed the trend in a period before 1967, McWhorter said.

In 1979, Starkville recorded 82 inches, but only 40 inches fell in 1978.

"One might conclude that over the next few years, there might be a pretty good chance that we're going to have some dry years."

Tim Campbell, president of Mid-South Weather, Inc., private weather consultant and student of the upper atmosphere, has a more frightening scenario:

"The only forecast I can give is that a drouth could occur again this summer. It would be very foolish for anyone in agribusiness to bet against it. They would be betting against the odds."

If the pattern holds, the drouth center will shift north-northeast or due east which could put it over the Midwest or over the Delta, he said.

While dry cycles usually have come in 20-year patterns, with dryness in the 1930's, 1950's and 1970's, a 50-year pattern could emerge. "The year 1930 was like 1980, extremely hot and dry with moisture deficits across the Great Plains," Campbell said. "So if you go back and forth (in the patterns), you can get into a pretty bad picture."

According to the USDA Yearbook of Agriculture for 1932, a major portion of the Mid-South was involved in the drouth of 1930 that extended over the area from southern Pennsylvania, Maryland and Virginia to southern Kansas on the north, Alabama on the south and Texas on the west. Relief came to some parts in time to improve production, but the damage showed in the measure of yields per acre as a percentage of the 1919–1928 average yields. For example, Kentucky's yields were 60.5 percent of the average; Arkansas, 62.8; Missouri, 66.8; Tennessee, 75.6; Texas, 86; Mississippi, 91.5; Louisiana, 100.3, and Alabama, 111.3.

Another drouth came in the northern wheat states in 1931, and the central states faced others in 1934 and 1935. The result in the 1930's, when fierce winds swept up the badly eroded, over-cropped fields, lives in legend as the Dust Bowl.

The drouths of the 1950's involved the normally semiarid Great Plains and Southeastern states. Later drouths concentrated over the Northeastern states but the dryness returned to the Southwest in 1969 and recurred several times through the '70's. That series culminated in the major drouth of 1977 that extended from California and Washington to the Plains and brought choking dust storms back to Oklahoma, Kansas and neighboring states.

Said Campbell: "Farmers should plan for the worst and hope for the best. And plant early—I do not expect a cold spring. I expect normal rain in March, April and May and normal to above-normal temps. If they plant early and the crop is up and looking well, it might survive if a drouth happens."

Government weather professionals disagree with Campbell.

"Since we have never seen one develop like last year, the probability is low that we will see it again," said climatologist Strommen.

USDA meteorologist D. J. Haddock's forecast was more cautious: "I cannot officially tell you anything about what next summer or fall is going to bring," he said.

"If we repeat 1980, the results will be much worse. We're going to go into this summer with below-normal water tables east of the Rockies. Even normal rainfall in the summer would not lead to average yields, much less if a drouth occurred. The only way we could get above-average yields is with above-average rains.

"There's already severe depletion of the water table where they're irrigating in Iowa, other parts of the Midwest and Plains states. This raises several questions: Will they have to stop? How much did it deplete the table? How much will we have to be called on to do here?

"Our importance will increase exponentially in the next five to seven years because we'll have water when other areas won't."●

WATER, A FIGHTING MATTER

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. JONES of Tennessee. Mr. Speaker, this insertion is part 4 of a five part series which recently appeared in the Memphis Commercial Appeal outlining some of the problems experienced by the American farmer. These articles were written by Ms. Deborah Clubb and Mr. William Thomas:

[From the Commercial Appeal, Mar. 11, 1981]

U.S. WATER SUPPLIES CONTINUED TO SHRINK DURING FALL, WINTER

(By Deborah M. Clubb)

Americans have a hard time believing they can be in short supply of anything—and when the shortage is water, the most essential of all elements, their skepticism hardens.

Yet the 1980–81 drouth has reminded water users in many parts of this country that nothing is limitless about the nation's water inventory.

Even in the Mid-South, where water is generally considered abundant, the drouth of 1980–81 has highlighted water habits and just how tricky the inventory is.

After the summer drouth destroyed the profit and profitability of many farmers throughout the East, the fall and winter drouth tripled the dryness and crippled major water supplies.

It dried wells, streams, lakes and reservoirs throughout the region. Parts of the densely populated Northeast, which uses 10 times more water from surface as from underground systems, were forced into water rationing.

In January, the U.S. Geological Survey (USGS), official tracker of the nation's water, ordered all division and district offices to report twice a month on supplies. By early March, streamflow conditions, an official measure of availability of surface water, had improved in the Delaware, Potomac and Chesapeake rivers. Virginia lifted its water restrictions, but still more rain was needed to get a level that would hold through summer.

New York City reservoirs doubled, but drouth emergency procedures stayed on because still more water was needed to last through demands of spring and summer.

Mid-South rivers, streams, lakes and other surface waters showed immediate effects of the drouth, with the historic-low Mississippi River level giving a dramatic measure of the broad reach of the dryness.

Wells, for drinking water and crop irrigation, reflected the shortage of rainfall, too. Some dried up and most fell to surprising lows. Towns and rural residents searched for water supplies wherever they could find them and many farmers redug wells at great cost.

Agriculture is the biggest consumer of water in the United States.

Nationally, the biggest battles over water are being fought between farmers and the federal government and farmers and cities.

California is the battleground for a trio of confrontations between the U.S. Department of Interior and farmers who for years have irrigated crops from federally built surface water systems.

The dispute revolves around government enforcement of its interpretations of the Reclamation Act of 1902 and other water-related measures like the Federal Flood Control Act. As officials began to enforce limits on the amount of acreage that could be legally irrigated from federal water projects, farmers have gone to court with several suits, battling to prevent having to sell cropland or stop irrigating it.

In Phoenix and other expanding Western cities, depletion of groundwater makes it doubtful that farmers, developers and residents will get all the water they want in a few years.

As the Western United States' Ogallala Aquifer disappears, irrigation is decreasing in some limited areas, particularly parts of Texas and Arizona and state water officials are talking about water transfer projects to draw supplies from the Missouri River or Arkansas-White rivers.

At the same time, farmers in the Plains states of eastern Colorado, Nebraska, Kansas and Oklahoma continue to invest in irrigation, and Agriculture Department (USDA) water resource officials expect even more development in Nebraska and the Southeast.

Three irrigation issues have begun to worry water managers and agriculturalists:

Continuing depletion of groundwater aquifers—water-bearing layers of permeable rock, sand or gravel.

"The most important single issue is depletion of groundwater aquifers that's not slowing down any," said Harold Stults, USDA deputy director for water resources. "It is inevitable that it will cause some adjustments (but) it will have a bigger effect on the communities than on agriculture."

Farmers can switch from irrigated to nonirrigated crops in many parts of the country without great difficulty. For example, Colorado sugar beet growers might shift to wheat and make roughly the same money—but items bought to grow wheat might be a third the cost of beet needs. The reduced purchases would be reflected in the businesses and other economic fabric of the communities.

Economic sense of irrigation in the humid Eastern states. "It may be an opportunity for increased production with some investment in equipment," said Stults.

Irrigation's impact on water quality.

Even now, irrigation is cited as a major reason for groundwater depletion in parts of the Mid-South.

Rice irrigation has sucked the water out of Arkansas.

Water officials agree that a rapid increase in rice acreage is the most direct cause of depletions in state aquifers.

Rice irrigation accounted for 73 per cent of groundwater used in the state in 1975—a total of 2,596,000 gallons a day. One acre of rice needs about three acre feet of water. Groundwater use for rice was 1,882 million gallons in 1975, and surface water supplied 304 million gallons.

Generally, water levels in Arkansas' Alluvial Aquifer haven't changed much in the last 20 years after a rapid decline from 1910-1950 stabilized. However, the Sparta Sand went down 20 feet from 1970-1980 as production increased.

Arkansas and federal water officials are closely watching depleting groundwater supplies in three areas:

The major rice area west of Crowley's Ridge between Brinkley and Jonesboro won't have problems this year—but could have serious trouble in 20 years. "Water levels will continue down with current use," said Forest Lyford, hydrologist with the USGS in Little Rock.

The Pine Bluff area of the Grand Prairie uses the Sparta Sand Aquifer "and it's going down from irrigation and industry," Lyford said.

The south central part of the state, around El Dorado and Magnolia, also uses the Sparta Sand. "Water tables have been dropping for some time from municipal and industrial use," Lyford said. Yearly drop is 1-2 feet a year.

Lyford said there is no problem with the water supply east of Crowley's Ridge or west of the Cache River because both the St. Francis and White rivers that recharge the areas are reliable sources. But the smaller Cache River does not feed much water back into saturated soil layers during summer months.

Many wells respond quickly to changes in stream stage and will come up when rivers come up. Others, particularly in the rice-growing areas, do not recharge easily, probably because of a clay layer up to 24 feet thick that forms rice paddies but has a low permeability, Lyford said.

For municipal water supplies, Arkansas officials report a trend toward more use of surface water since groundwater reserves are being depleted. Some communities can use running rivers, but others must fund construction of impoundments that can cost millions of dollars.

John Saxton, director of the state's soil and water conservation commission, said his agency has loaned money to help some towns that needed new water supplies because of the drouth. Also, as a way to better prepare for future water needs, his staff this year will monitor wells in a six-county area to check the drawdown before and during irrigation.

The Mississippi Delta might eventually not have enough irrigation water to go around, said Charles Branch, director of the bureau of land and water resources in the Mississippi Department of Natural Resources.

"We in Mississippi have been using groundwater generally extensively for decades," Branch said. "We're withdrawing water at a much more rapid rate than we are replacing it . . . Generally, statewide water levels have been falling for the last 30 years as population demand has grown."

Eighty-eight per cent of the state's drinking water comes from groundwater. Most of it has historically been of such high quality that little or no treatment is necessary before use. Only three communities—parts of Jackson, Meridian and Columbus—rely on surface water, Branch said. Fifty per cent of industrial needs, exluding power generation, comes from the groundwater.

In most of Mississippi, the groundwater comes from confined aquifers that generally do not show immediate effects of short-term drouth, but the Delta water supply is different. That water table is not confined and reacts to drops in surface water. Tupelo and Lee County present an area where industrial and municipal demands have rapidly and critically reduced the aquifer.

Widespread pumping for rice irrigation and catfish ponds have caused large depressions in the surface of the groundwater body near Cleveland, the Sunflower-Leflore counties area and north-central Tallahatchie County.

"Our people are beginning to realize that these are not endless supplies," Branch said. "We have surface water coming out our ears but it's not generally been looked at for drinking water."

Municipal and some industrial users take water from a level 750-1,200 feet below ground. The deeper water is of higher quality than the shallow water that is used for irrigation, Branch said. "The shallow has some taste and odor and a higher color level. Some private homes in rural areas use it where over the years they have used it and there's no other alternate within economic reason."

Groundwater levels drop 1-5 feet a year across the state. This year, the USGS measured about 50 wells in September and again at the end of February. "Water levels are generally at the same level as in September," Branch said.

"There's potential that we will be facing critical water supply problems as far as irrigation in the Mississippi Delta in the coming years."

Preliminary USGS estimates show the shallow alluvium aquifer can only support 500,000 acres in rice production, but in 1980, 250,000 acres of rice and 30,000-40,000 acres of catfish were watered. Rice acreage increased 30,000-40,000 acres a year for the past 5 years in parts of the Delta.

"Based on potential yield of 500,000 acres, we're moving toward the upper limit of its capabilities."

Branch's staff is gathering data to help better understand the groundwater system. They will take measurements again this spring to determine the amount of recharge in the winter and spring months. Also, the USGS, Mississippi Research and Development Center and Branch's bureau are planning a joint three-year study of irrigation effects on groundwater, using satellite data to map irrigated land and catfish ponds.

Experts hope the water studies will tell the capacity of the aquifer "and then someone will have to limit the water use to match that capacity," said Eddy Downing, manager of the regional planning branch at the Mississippi Research and Development Center. Water use and well permits now issued by the state bureau of land and water resources "never have been used to control water use in the past, but the day is coming," said Downing.

Ironically, the low water situation is not bad news for owners and operators of land that usually floods in the spring. Billy Bridges at the U.S. Engineers office at Vicksburg, Miss., said, "Normally, when we have a flood, it has already begun before March."

Parts of West Tennessee might experience usual spring floods when heavy rains roll off steep hillsides and through straightened, channelized waterways. But so far, most of the streams and lakes of the state are below normal levels.

Middle and East Tennessee rely on surface water for most municipal purposes. From October to January, half of normal precipitation has fallen. "Although precipitation was almost normal for February, we need normal or above normal to keep streams flowing during summer months," said Jeff May, chief of data management for the USGS in Nashville.

What little irrigation is done east of the Tennessee River is done from streams, May said. Many industries and homes have wells and some smaller towns use springs. West Tennessee homes, towns and industry rely on groundwater while farmers can use dig-wells or pump from a stream.

So far this year, most residents have enough water.

Only in Scott County, northwest of Oak Ridge, have communities had to pump water from a private lake to satisfy the utilities district, said Bob Hunt, director of the state's water resources division.

A group of state and local water and agriculture officials are working with the Tennessee Civil Defense on actions to prevent and prepare for water emergencies such as conservation activities and exploration for groundwater in the consolidated rock that underlies two-thirds of the state.

"We ought to go ahead and be prepared," Hunt said, "and have emergency conditions ready and priorities set."

As Craighead County, Ark., extension agent Albert Swaty said, "Things are going to have to be done or we're going to have trouble down the road. We could be fighting over water in the future.

"It's going to be clear gold."●

WATER LEVELS LOWER SPIRITS

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. JONES of Tennessee. Mr. Speaker, I am inserting into the RECORD on this occasion part 5 of a five-part series on agriculture. This part of the series examines the impact of last year's drought on agriculture and is the final part in a series of stories by Mr. Deborah Clubb and Mr. William Thomas for the Memphis Commercial Appeal newspaper.

SEEING WATER VANISH SINKS VETERAN'S SPIRITS LOWER THAN THE RIVER

(By William Thomas)

LAKE CITY, ARK.—Cotton Taft, so-named because he could whop a baseball into a cotton field every time somebody flung one at him, has lived on the St. Francis River for 81 years. Until this year he plucked his livelihood from the river in the form of fish and fur. Then came the drouth.

"It just about dried up the river," said Taft, a crusty, corncob-pipe-smoking character who lives on the riverbank in a boxy dwelling not far from the Arkansas 18 Bridge at Lake City. He has lived there so long that the sapling trees he planted 21 years ago are now fully grown.

Despite the shade they make, Taft said it was the hottest, driest, most pitiful year he's experienced on the river.

"It was so dry I couldn't get my boat up and down the river to fish. And it hasn't changed much this winter. Normally, I make enough money in a month to do me a whole year. This year, I couldn't make enough to pay my trapping license. The river stayed so low I couldn't catch no fur."

Taft, who was born on the edge of the St. Francis in 1899, son of a fisherman, said this was the first time in his life that trapping was a complete flop.

"See that boat?" he said, aiming his pipe at a homemade skiff turned bottom-up on the bank. "That's a million-dollar boat. I can take that boat and go up around the island, make a 30-mile circle in six or eight hours and come back loaded. But not this year. This is the first time I never took her out."

And a drouth that big, said Taft, is something to think about.

"I never went to school but I was born more sensible than most folks," he said. "And I know about life on the river. Fish, for example, have a hell of a nature when you've been studying 'em long as I have. And animals have a hell of a sense of humor. I was raised on hoot owls, hawks, beaver, coon, muskrat, squirrel, ducks and stuff like that. Anything that runs from me, I eat. I don't like anything that don't run.

"You couldn't pile back in the river the fish I've taken out of it. I caught a catfish that weighted 74 pounds and a buffalo that weighed 54 pounds. So when it comes to this river, I know what I'm talking about. And something bad is happening."

Taft put his pipe in his mouth, struck a match to it, sucked hard, blew forth a plume of blue smoke and went on:

"You'd have to see it like it was before the levees," he said. "My grandpa had a steamboat on this river. A steamboat. I was just a kid when that played out. My dad was a fisherman and he moved up on Goat Island and stayed till 1918, when it froze the river. Then we came down here.

"This was a rich town once. There were so many people here you couldn't walk down Main Street. We had five cafes and you couldn't get a place to sit down. You'd go in and get a plate of grub and have to stand up to eat. I don't know where all those people went.

"I had a fish market here and four people working. We'd have a line of cars going both ways all day long. That was during the war and you had to have stamps to get meat, but not fish. I could catch a mountain of fish then. But we just about caught 'em up. They ain't in there now."

Once, there was more water in the river, too.

"Back before these ditches were dug, the water stayed up all the time. There was a lot of timber then. You could go out and work three or four days and make a hundred dollars and come back and throw one hell of a drunk."

Taft grinned around his pipe.

"There were even two whorehouses up there. They had hamburgers downstairs, girls upstairs. You'd pay the hamburger man 50 cents and then you could go upstair where the girls were. There were fights up and down the sidewalk. The police chief didn't say anything about the fights. But if you spit on the sidewalk, he'd take you to the mayor. They don't fight like that no more. Now, they just shoot, shoot, shoot.

Taft, who started fishing and trapping when he was 7 and never did anything else, remembers when he could fill the boat with fish. "I used to catch 300, 400 pounds a day. Now I'm lucky if I get 15 or 20 pounds. And this year, I couldn't even get that."

Taft believes the fish were poisoned by insecticides. "Some places, we ain't got a crawdad, a minnow, nothing. I think the poison ran off the farms and into the river and our fish miscarried. The eggs stay in the fish now. I used to find them every summer on the nets. Now, I never find any."

But it's the vanishing river that troubles Taft more than anything.

"I raised a boy and a girl out here," he said, "and I made plenty of money. If I had another 80 years, I'd come right back and do it again. But I'm not sure the river would be here. Something has happened. I seen the hottest day last summer and the coldest day this winter that I've ever seen.

"I think they messed up our weather by putting all that stuff in the sky. You know what I mean—satellites. I think that's part of it. They spent all our money, got shed of our taxes and changed everything. For years, I sat our here and never saw a skeeter. Last year, the skeeters ate me up."

Taft pointed his pipe at the sky and narrowed his eyes.

"But the worst thing that happened," he said, "is that it never rained. The river almost dried up. I've never seen it that low. Before, the water was always there when you needed it. It was right there. But this year it wasn't."●

CLARK PORTEOUS

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. JONES of Tennessee. Mr. Speaker, I rise today to pay tribute to a distinguished member of the media in my district who is retiring. He is Mr. Clark Porteous whose byline has appeared in the Memphis Press-Scimitar for the past 47 years. Throughout his long and distinguished career, Clark Porteous has maintained a reputation for thoroughness, fairness, and objectivity. He is going to be missed by all of us who enjoyed reading his work and especially by his employer, the Press-Scimitar.

For me personally, I am going to miss an old and cherished friend in the media. He has been as rough on me as anyone, but I could always count on Clark to be fair in his reporting. More than that, I respected him and the work he did. I know he is still going to be around the city of Memphis which has been his home for so many years, and I take some measure of solace in that. I want to wish for him a very happy and productive retirement.

[From the Memphis Press-Scimitar, May 27, 1981]

CLARK PORTEOUS RETIRING AS NEWSMAN

(By David Rapp)

Clark Porteous, whose Press-Scimitar byline has been a byword in the Mid-South for close to half a century, is retiring.

His departure from the newsroom Friday will end a career that spans 47 years and thousands upon thousands of news and human interest stories—from politics and parades, fires and festivals, to lynchings and assassinations.

Through it all, he earned a reputation among his readers, his news sources and his colleagues alike as an aggressive and thorough, but fair and impartial reporter.

The late Edward J. Meeman, the first of three editors Porteous served under, once wrote: "Clark Porteous is objective. He gets the facts, and lets the facts speak for themselves. He gets all the facts. He does not

color them. Neither does he take their natural color out of them. He reproduces the actual color of the facts, be those facts bright or drab."

Milton R. Britten, the present editor of The Press-Scimitar, said:

"He's just a great information getter. No matter what it is, if you need information, one way or another Clark can always get it. He was and is widely known in Memphis and the Mid-South. He's also widely trusted by news sources, even when writing about things they'd just as soon not see in the paper.

"Clark was always The Press-Scimitar's star reporter and he still is. He was an example to every person who came to work for the paper. He's just in love with being a newspaper reporter and he has done an exceptional job."

THE EARLY YEARS

Thomas Clark Plaisance Porteous, a high school track star and debater in Laurel, Miss., came to Southwestern at Memphis with a track scholarship and soon joined the college newspaper, later becoming its editor. He was graduated June 7, 1934, and one day later joined The Press-Scimitar as a reporter.

It didn't take long for him to prove he had a nose for news and an ear for the colorful quote.

After a Memphis man shot his 20-year-old son, young Porteous managed to get an interview with the father in his jail cell.

"I didn't know exactly what to ask a man who had shot his son, so I told him the good news that his son would live," Porteous recalled years later. "But he swore an ugly oath."

When Porteous asked the man if he wasn't glad that his son was going to recover, the father replied, "Hell, no, what do you think I shot him for?"

Clark's account of the unusual interview appeared across the top of Page 1 in The Press-Scimitar.

Two years later, in 1936, an American Airlines plane, the Southerner, crashed on a Sunday evening between Memphis and Little Rock. Porteous was sent with a photographer to find the plane, if possible.

Near Goodwin, Ark., some parked vehicles led them to a man who thought he had seen a ball of fire plummet into the swamps. Anxious to continue the search, Porteous borrowed a flashlight and led a posse through the swamps.

"We began to find pieces of aluminum in the broken trees," he remembered later. "Finally I stumbled over something, and it was the body of a man, at least the torso, as the part below the waist was missing."

The cause of the crash is still a mystery, but Porteous' account in the next day's Press-Scimitar scooped the nation's press.

WIDE RANGING

In the following years Porteous pursued other stories with equal persistence. Whether it was covering the Maid of Cotton tours, digging up political stories or running down a new City Hall angle from E.H. "Boss" Crump, Porteous was usually on the scene first.

In 1946 he took a year's leave of absence when he won a Nieman Fellowship to Harvard University along with 12 other journalists from across the nation.

His tenure at Harvard resulted in a novel, South Wind Blowing, based on a 1937 lynching he witnessed in Mississippi. The book took an unusual approach, with each of 19 characters describing the lynching of a black man from a schoolyard tree.

"First-rate reporting by a fearless and respected Memphis newspaperman," said a review in the New York Star. "It is much more than good reporting, it is a high artistic achievement," read the St. Louis Post-Dispatch.

The story of the lynching also reveals Porteous' resourceful ability.

Told that a posse had captured a black man wanted for killing a white man in Slayden, Miss., Porteous went to Slayden where he found several men in a store discussing what to do with the black man. He noticed them leaving through a back door one by one, then followed them to the schoolyard.

"They brought the man out, stood him on the front of a Model A Ford, put a noose around his neck and tied the rope to the limb of a tree," Porteous wrote later. "Behind this you could see the little desks in the school through an open window. We were running towards the scene when they drove the truck out from under the man, left him dangling."

Porteous and photographer Mervin Rosenbush pretended to be commercial photographers and began snapping pictures and taking orders for prints from the men standing next to the body, backs to the camera. Some became suspicious and the pair lit out for Memphis "in Rosy's souped up Ford," and though they were chased for a while, they got away.

DIG, DIG, AND DIG

The late Robert Johnson, long-time columnist for The Press-Scimitar, wrote a 1955 column describing Porteous in terms familiar to most of his colleagues and sources.

"Through the years, Press-Scimitar readers have come to know Mr. Porteous as one who had a way all his own of getting at the bottom of things. (His) stubborn and resourceful tactics have won the high respect of his colleagues, made him known as an expert in dig-dig-and-dig uncovering of facts.

"He has handled many of the biggest news happenings, from major crime to big labor news, politics and features. But one thing which makes Clark a top newspaperman is that, even if it's just a small item, they're all 'big stories' to him."

Some of the big stories he covered were the 1961 admission of James Meredith as the first black to enter Ole Miss at Oxford, where he dodged bullets and "had to go into the YMCA now and then to try to wash the tear gas out of my eyes"; the January 1956 Emmett Till trial, when Porteous served as the main liaison between blacks and whites; and the 1977 death of Elvis Presley, when he wrote the Page 1 obituary of the famed entertainer.

But he also was known as the "people's reporter" and for his constant efforts to get a "new angle" on every assignment.

He gave first-person accounts of everything from riding a jet plane in the early 1960s to a tour of Memphis topless clubs in 1975.

Some examples:

A "bombsight view of Memphis," when he took a ride in a B-17 in October 1943. "I sat in the top gun turret, with its two .50-caliber machine guns . . . I had a big time, whirling about as if on a miniature merry-go-round, looking through the turret's plastic top into the clouds for 'enemy' fighters I knew weren't there."

The perils of growing a beard in August 1939, when beautiful girls stopped him on the street to stroke his jowls, and politicians stopped their speeches to point him out.

About marching (and playing trumpet) with the Treadwell High School Band in the 1956 Cotton Carnival Parade; and, in 1961, covering the parade as King Midas, dressed in gold lame robe, gold crown and bushy gray beard. "The final touch was my own long Church Warden pipe, wrapped in gold foil."

The many years of covering City Hall during the reign of "Mister Crump." He described the "countless hours, waiting outside of closed-door meetings, waiting for Mister Crump—not some elected offical—to come out and talk to the press." He also remembered the impromptu parades of Crump and his entourage marching down Main, bowing and shaking hands: "Everybody knew Mister Crump and he knew everybody."

He bought Crump's wrath down on him when he reported an anecdote told by Gordon Browning during Browning's successful 1948 comeback campaign for governor. The anecdote involved a supposed voter-hunting expedition by Crump and one of his allies, Will Gerber, into a cemetery. "Gerber was on his knees scraping moss off an old tombstone, and saying finally he couldn't read the name, to put down any name, and Crump said, 'No, Willie, we've got to have an honest election.'

"Good memories and bad," Porteous would write later about the Crump era. "How different it is with truly elected officials, all speaking for themselves, making their own mistakes. Democracy, it's wonderful."

Of the "joys" of smoking. He had started puffing a pipe as a Southwestern student, later owned nearly 300 pipes, and never went anywhere without one. "Someone should speak up for the evil of smoking," he wrote in 1964. "I guess this tobacco-stained wretch should qualify."

Of quitting smoking cold turkey. He put away his trademark in 1979 after a car accident fractured one of his ribs. "I had thought it would be difficult to quit. But I had not smoked in a couple of weeks, and I was surviving. I began to think, no more burned clothes, my teeth wouldn't be so badly stained next time I went for my semi-annual dental checkup and cleaning, I would not annoy others, I would save on my mounting weekly tobacco bill. And it would be bound to help my health."

He gave away all but a token few of his pipes.

"Best thing, I don't cough any more," he wrote. "But I do feel a subtle sort of longing when I see someone else enjoying a pipe of tobacco."

SUMMING UP

Porteous, who speaks in a characteristically matter-of-fact way about his retirement, is keeping his options—like his contacts—on an open line. His plans include spending more time with his wife, former Press-Scimitar reporter Elizabeth Colling, their six children and five grandchildren.

"I've done what I wanted to do. I've enjoyed every minute of it," he said. "The Press-Scimitar has been a great place to work, and I've worked for three fine editors—Ed Meeman, Charles Schneider and Milt Britten. When Meeman hired me in 1934, he said he'd give me a trial at $10 a week. No one has ever said that I'm not still on trial.

"I'd like to keep on but the calendar just caught up with me," he added. "There will always have to be reporters * * * someone has to go out and cover the City Hall meetings.

"That's why I'm glad I've been a newspaperman."●

A TRIBUTE TO CANTOR DAVID SHIFF

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. OTTINGER. Mr. Speaker, I rise to bring to the attention of my colleagues the outstanding achievements of Cantor David Shiff of the Midchester Jewish Center in Yonkers, N.Y. On June 13, Cantor Shiff will be honored for 25 years of dedicated service to the Yonkers community.

Born in New York City, Cantor Shiff began his career at the age of 8 at the Sterners Choir in New York. After a short period, he became leading soloist. He received his first position as cantor at the Gun Hill Jewish Center in the Bronx in 1954 and then, in 1956, moved on to serve in his present position. He formed a congregational choir to help beautify the holiday services, and has appeared in many television and radio specials. He is also involved in many community activities and organized and is featured in the annual spring concerts held at the Midchester Jewish Center.

Cantor Shiff has made some invaluable contributions to his community. I commend him for 25 years of distinguished service and wish him good luck in the future.●

SOCIAL SECURITY: RUN IT AS WELFARE

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. WINN. Mr. Speaker, there is little doubt that the crisis facing the social security system is serious and inescapable. Unless changes are made, the system will be unable to make benefit payments to the 36 million Americans depending on social security by 1982 and it could be in debt by as much as $111 billion in the next 5 years. In view of the financial crisis facing the system, it is clear that action must be taken.

I have been alarmed by the amount of confusion that has developed as a result of the announced proposed changes in the system. Unlike many previous proposals, the Reagan administration will not raise the traditional retirement age from 65: They will not raise social security taxes for the 114 million workers paying into the system and they will not remove from the rolls, or cut benefits for, those currently receiving benefits. The administration will, however, phase out the retirement earnings test. These provisions will allow the younger worker to receive a small tax cut and the older worker to earn income.

What the Reagan administration's proposal does do is discourage workers from early retirement. Early retirees now get 80 percent of what they would get at age 65. Under the Reagan proposal they would get 55 percent at age 62.

The administration has also proposed changing the disability insurance program so that eligibility is limited to medical factors alone, thus restoring the program to its original purpose. Proposals have also been offered to lower the amount of the social security benefits for those who receive a pension from a noncovered employer such as the Federal Government.

The administration's plan would move the automatic cost-of-living increase from July to October in 1982. Finally, the administration has proposed altering the formula for computing the benefits of future retirees. While this would mean a reduction in future benefits, it will correspond with a reduction in the amount a worker pays into the system.

There are no easy answers to solving the crisis we face. It has resulted from previously liberalizing the programs which have drained the funds. If changes are not made, consideration will have to be given to using general revenue funds to save the system.

I was interested in a column which appeared recently in the Kansas City Star. Mr. Heaster proposes that future eligibility for social security recipients be based upon need: In other words, turn it into a welfare-type program. I agree with Mr. Heaster that workers must have more flexibility and control over their economic destiny after retirement, and submit his column for my colleagues' review:

SOCIAL SECURITY: RUN IT AS WELFARE

(By Jerry Heaster)

The problems confronting the Social Security system will never be resolved unless everyone affected is up to facing some unpleasant facts of life. The first harsh reality is this:

In economic terms, that which cannot be financed cannot occur.

This means current beneficiaries and those nearing eligibility age would be ill-served by any massive lobbying effort to defeat proposals aimed at restoring the system's integrity. If this group chooses to use its massive political clout to maintain the status quo, it will be trading off short-term gains for long-term disaster.

This is a certainty because given current income and expenditure patterns, Social Security will become insolvent before the end of next year. If this hemorrhage isn't stopped by bringing benefits into line with taxes, the only alternative will be to raise Social Security taxes to levels far above the increases previously mandated for the years ahead.

But if Congress attempts to do this, it risks sparking a revolt among the workers and employers for whom Social Security contributions have become an almost intolerable burden during the past decade. In political terms, any such revolt would bring a destructive inter-generational conflict and spell ultimate doom for the system.

Besides, the higher taxes of the past 10 years seem only to have exacerbated the problem, and the reason for this is simple: As long as Congress can keep bleeding workers and their employers, it removes the need to get at the structural problems that are the real cause of Social Security's problems.

There are many reasons for the demise of the Social Security system—the main one being that the elected representatives charged with keeping the system viable have used it as a slush fund to buy votes.

But pointing fingers of blame for past mistakes won't solve the problem. Thus, any outrage felt over the legislative misfeasance that has brought Social Security to the brink of bankruptcy must be sublimated.

So, too, must all of the outdated attitudes toward Social Security.

The most dangerous of all the fallacious perceptions regarding the system is that of Social Security as an insurance program. It isn't, and the fact that people have been forced to pay into it regularly doesn't make it so. Only responsible administration and productive nurturing by its caretakers would have allowed it to function as a true insurance program. (How many insurance companies, for instance, would dare think of trying to raise customers' premium payments arbitrarily simply because beneficiaries demanded more money than they had contracted to receive?)

The quickest way to get rid of this psychological hurdle is to do away with the trust fund and fold it into the general budget with other social programs. Benefits then should be scaled down gradually over the next couple of decades. This would allow Social Security to be returned to the role it originally was intended to serve—that of a retirement income supplement.

And all of this gradual realignment should be predicated on the assumption that—as a welfare program—future eligibility should be based upon need.

Meantime, if workers really do want insurance to protect them against reduced earnings after retirement, they could begin to set up their own programs and tailor them to fit individual needs. Workers could finance such voluntary retirement with the money they would save as the burden is eased as result of decreased taxes.

One way of allowing workers more control over their economic destiny after retirement would be to expand the concept of the Individual Retirement Account to all workers, regardless of whether they're covered by a company-sponsored pension fund.

Returning the job of retirement planning to individuals would serve another important function—that of fostering much needed capital formation.

As it stands now Social Security is a nonproductive use of resources. It is a hand-to-mouth arrangement under which money is transferred on a current basis from the productive to the nonproductive sector of the economy to finance consumption exclusively.

The expanded use of private retirement plans would mean more savings and investment by individuals, and this money would be plowed into the economy to finance growth as well as consumption.

All this would take time, of course, But a reform program that allowed 20 to 25 years of lead time would give younger workers

enough time to adjust before the Golden Years arrived.●

GRIFFIN HIGH CHESS TEAM HAS GREAT YEAR

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. GINGRICH. Mr. Speaker, the game of chess is a very old and popular game played by thousands of high school students all over the Nation. In my own district one team in particular has done well at national tournaments and is considered to be one of the leading teams in the Nation.

The Griffin High School chess team has won honor and distinction. In only 5 months the team has won dozens of trophies. The club membership is one of the largest in the country for a high school chess club.

The members of the varsity team for the 1981-82 school year were Milton McCarthney, Larry Brindley, David Clark, Kevin Oglesby, Jeff Wright, Mark Hartman and alternates Jeff Morrow and Ed Henderson.

I would like to share with you this resolution passed by the city council of Griffin that exemplifies the respect of the people of Griffin for this outstanding team:

RESOLUTION BY THE CITY COUNCIL OF GRIFFIN

Whereas chess has been a part of the extra-curricular activities at the Griffin High School for several years and has grown in popularity since that time; and

Whereas Griffin-Spalding County High School is very fortunate to have Mr. Larry Foster to advise the team comprised of eight devoted players; and

Whereas this team, during the 1981 season, won the Regional Championship, placed second in the Southeastern Invitational Tournament, captured the State Championship and traveled to Philadelphia to compete in the National Tournament where they placed 10th out of 38 teams from across the United States that were competing; and

Whereas several members of the Griffin High Chess Team were awarded individual trophies and recognition, among them national titles: Now therefore,

I, Louis W. Goldstein, Mayor of the City of Griffin do hereby proclaim Wednesday, May 13, 1981 as "Griffin High Chess Team Day" in the City and express the Board's pride in the unprecedented accomplishments of this team of fine young men and congratulate Mr. Foster for his most important part in their victory.

This 12th day of May, 1981 A.D.

Signed: Louis W. Goldstein, Mayor.

Attest: Roy L. Inman, City Manager.●

A LOOK AT CORPORATIONS NEEDED IN THE TAX CUT DEBATE

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. WALGREN. Mr. Speaker, most of the debate on the tax cut legislation has been focused on the personal tax cut for individuals. We must also take a comprehensive look at the business side of the tax cut. I would like to share with my colleagues two articles which may help provide some answers.

The first, from the February 5 Washington Post, points out that new Government figures show that business investment in recent years has been much higher than previously thought. Indeed, its share of the Nation's total output of goods and services has been bigger in the last 5 years than at any other time since World War II. The major reason for these revisions was the discovery by the Commerce Department that a chunk of investment in leased equipment was not being recorded. Firms invested more money through leasing equipment, rather than buying it, since high inflation gave this method a tax advantage.

The second article, from the April 20 issue of Business Week, shows that the "corporate income tax is well on its way to extinction," accounting for 23 percent of all Federal revenues in 1960 and falling to 12.4 percent last year. Moreover, under the Reagan plan, in 1986 the corporate income tax will provide only 7.7 percent of Washington's receipts, a figure that I find most disturbing.

My Subcommittee on Oversight and Investigations has been holding a series of hearings on the issue of capital formation and investment, and I would like to commend Chairman DINGELL and the staff for the fine job they are doing in exploring these issues. The 97th Congress must give serious and focused attention to the productivity problems of this Nation. Capital formation and tax policies play a significant role.

[From the Washington Post, Feb. 5, 1981]

ARGUMENT FOR TAX CUT TO AID BUSINESS WEAKENED BY NEW STATISTICS

(By Caroline Atkinson)

Late last year, the federal government published without fanfare a new set of economic statistics which suggest that, as a nation, we are thriftier and much less self-indulgent than we have been taught to think in recent years.

The critics say reprovingly that we have abandoned the worthy tradition of investing to build for the future, and become a nation of undisciplined consumers, spendthrifts. Their favorite answer: business should be given a tax cut to encourage it to invest again.

The new figures, however, show that business investment in recent years has been much higher than previously thought—indeed, that its share in the nation's total output of goods and services has been bigger in the last five years than at any other time since World War II.

Far from "embark(ing) on the dangerous path of consuming its own capital and living off its own savings," as David A. Stockman, director of the Office of Management and Budget, said last week, the nation has put aside more of its income into investment in the last few years than during the 1950s or 1960s.

Last year, for example, total investment (apart from housing) accounted for 11.3 percent of the nation's gross national product. In 1970 the proportion was 10.5 percent, in 1960 it was 9.6 percent and 10 years before that it was 9.5 percent.

On the latest figures from the Commerce Department, investment was 6.1 percent higher on average in each of the last 10 years than previously thought. In 1979 it totaled $279.7 billion, up by $25.8 billion, or nearly one-tenth, from the previous estimate. The pre-Christmas revisions thus wiped out in one shot much of the rationale for a big tax break for business—although this remains part of the tax program of the Reagan administration and congressional Democrats alike.

A major reason for the revisions was the discovery by the Commerce Department that a chunk of investment in leased equipment was not being recorded. Firms have invested more and more money by leasing equipment, rather than buying it, as high inflation has given this a tax advantage.

A new survey of business spending on plant and equipment also showed officials that the old benchmarks they had been using from the previous survey were too low.

Personal savings were revised upward in December, too, largely because of an increase in the figures for personal incomes, unmatched by a spending rise. The income rise came mainly from higher than estimated interest payments. Money has poured into higher yielding deposits such as money market funds and savings certificates, as these have become available to small investors.

Some people say that despite this impressive investment record, America still needs to spend more on building up capital. They argue that the country has to gird for a faster-growing labor force; to compensate for mandated investment in "nonproductive" areas such as pollution control, and to replace energy inefficient plants and equipment. But this is a call for more investment than ever, not for a return to a glorious past.

Moreover, it is far from certain that the tax breaks suggested would actually bring forth much more investment, let alone a big rise in productivity, even though they are very generous.

If the accelerated depreciation proposals backed by President Reagan during the election campaign are enacted, business tax liabilities would be more than halved by 1985. Business will almost certainly come off much better out of the coming tax bill than individuals, although corporations already shoulder only a small proportion of the total tax burden.

Many economists, however, doubt the arguments for such a cut in business tax. Congress and the rest of the political establishment appear to be convinced that lower corporate taxation will lead to more investment and that more investment will give a big

boost to productivity (and a helping hand in the fight against inflation).

But neither of these linkages is proven. Productivity experts Edward Denison and Lester Thurow, for example, believe that investment has very little to do with the recent slowdown in productivity growth.

And economists Robert Eisner and Robert Chirinko of Northwestern University concluded from a recent study for the Treasury's Office of Tax Analysis that "one can get almost any answer one wants as to the effects of tax incentives" from economic models.

Eisner earlier carried out a survey of business reaction to the investment tax credit. He found "while business welcomes the tax reduction," firms said they "buy little or no additional equipment as a consequence of the tax credit."

Tax experts in the Treasury do not agree on the likely effects of more generous depreciation or other aids to business. But even those who believe that there is a measurable boost to investment from tax incentives do not, on the whole, believe that it is the major determinant of how much business invests. A boom in the economy is a more reliable way of encouraging firms to expand.

Joseph Pechman of the Brookings Institution pointed out in a recent article that "the major constraint on investment in current conditions is the decline in demand." He added: "A three-year period of recession and catch-up would reduce investment by a third to half a year's worth of investment. I know of no technique, tax or otherwise, that would raise investment by that amount over the next three years."

Pechman comes down in favor of some kind of business tax break this year although he warns against exaggerating its potential effect on investment or productivity. "Most analysts agree that an increase of one percentage point in the ratio of investment to the gross national product—about $28 billion in 1981—would generate a 0.2 percentage point increase in the annual rate of productivity growth."

This is only a modest payoff from a huge tax cut. It also depends on the unlikely assumption that all of the tax cut goes into more investment.

It is often claimed by lobbyists for business tax cuts that overseas governments treat their firms more generously, thus helping them to compete more effectively against American business. But a recent study of how business is taxed in eight major countries shows a very different picture.

The industrialized country that consistently has the lowest tax or biggest subsidy on investment is Britain, according to a study by International Monetary Fund economist George F. Kopits. But Britain also has probably the worst productivity record.

Meanwhile West Germany and Japan, the two countries whose economic performance Americans would most like to emulate generally tax their firms much more heavily than does the United States.

The business tax proposals endorsed by Reagan would shoot the United States to the top of the list of countries subsidizing investment. The 10-5-3 proposals, which classify all assets into one of three groups to be written off over 10, five, or three years, would cut a huge $60 billion from corporate taxes by 1985, according to congressional estimates.

And, Kopits estimates, of the eight countries studied, the United States would then have the most generous tax treatment of investment in each of six major classes of assets, with an effective subsidy, rather than a tax, on investment of all kinds.

The United States now has the second-largest subsidy on investment in four out of the six groups: transportation equipment, electrical, and non-electrical, machinery, and other producer durables. Britain has the largest. In the other two groups, nonresidential buildings and other construction, the United States ranks sixth and third in the generosity stakes.

Even if Congress ends up passing the cheaper version of 10-5-3 that was approved by the Senate Finance Committee last summer, Kopits estimates that American business will be better off than most. The subsidy rate on transportation equipment will be the highest among the eight countries; that on the two types of machinery and the "other producer durables" category, the second highest; and that on construction, the third highest.

[From Business Week, Apr. 20, 1981]

WHITTLING AWAY AT THE CORPORATE TAX BURDEN

(By Stuart Jackson and Norman Jonas)

With little lamentation and hardly any notice so far, the corporate income tax is well on its way to extinction. In 1960 it accounted for more than 23% of all federal revenues; after a succession of business tax incentives starting with the Kennedy-Johnson cuts, it dropped to a share of roughly 14% throughout the 1970s, bottoming at 12.4% last year (chart). If President Reagan has his way, by 1986 the corporate income tax will provide a scant 7.7% of Washington's receipts, and top Reagan Administration officials would like to reduce this proportion even further.

If businessmen have not been jubilant about this trend, it is because corporations have absorbed a big increase in effective tax rates in recent years as a result of inflation, to say nothing of such government-imposed costs as antipollution controls. According to Harvard University economist Dale W. Jorgenson, the effective corporate rate jumped to 25% this year from 13.5% in 1977, almost entirely because "a doubling of inflation and interest rates has substantially eroded the value of capital consumption allowances."

As depreciation write-offs have lost their value as a way to replace capital because of chronic inflation, business has responded with a drive for such sweeping reforms as the 10-5-3 tax plan, which the Reagan Administration has essentially adopted as its own in what it calls the Accelerated Cost Recovery System (ACRS). This write-off schedule would virtually break the traditional link between the economic and tax lives of business assets and, in theory, permit capital allowances to cover today's inflated replacement costs.

DEMISE PLANNED

By the Administration's own calculations, the revenue impact of its plan is huge—a drop of almost $60 billion by 1986. Some of this would go to unincorporated businesses and individuals, but the effect on corporations would hold corporate tax collections, in nominal dollars, to $72.8 billion in 1986, up only $8 billion from the 1980 level. In inflation-adjusted dollars, this would represent a substantial decline. At the same time, total budget receipts will be rising to $940 billion from $520 billion, according to the Reagan scenario.

The Administration makes no bones about its intention, beyond 10-5-3, to reduce the corporate income tax drastically. Says Norman B. Ture, Treasury Under Secretary for tax and economic affairs: "There's a huge philosophical sentiment to get the corporate tax out of the system." In addition to liberalized depreciation, Ture says that a direct cut in corporate tax rates "is on the list" for a future tax package, along with liberalized dividend treatment and tax incentives for research and development.

While these moves would, indeed, bring the demise of the corporate income tax much closer, even Ture has a few misgivings about the way it is being done. "It would be preferable not to do it piecemeal," he says, noting that the Administration intends to make "a serious investigation" of proposals to integrate the corporate and personal income taxes. Integration is a method of eliminating the double taxation of corporate profits and dividends and is already in effect in several other industrial nations.

The problem with the piecemeal approach, as most economists and quite a few executives have noted, is that the overall benefits of corporate tax reduction may be distributed very unevenly, with many capital-intensive companies wiping out most of their federal tax liabilities while others gain little. Says Jorgenson: "At current inflation rates, ACRS would reduce the effective tax rate on assets acquired in 1981 by industry in general to a negative 16%" but it would nonetheless widen the current disparity in tax rates among different assets and industries.

TAX SHELTERS

While many businesses have begun lobbying in Congress to narrow these disparties, tax experts see another potential problem in cutting corporate taxes by beefing up depreciation. Some fear it could generate a new tax-shelter game, encouraging investments on the basis of tax advantage rather than economic justification. Businesses with write-offs to spare might scurry to buy nondepreciable assets, such as land and financial claims, or racing into curious mergers and acquisitions—all to shelter income.

Despite all the problems of the ACRS and other ideas for speeding up capital recovery, Congress seems determined to produce a depreciation reform bill this session. The final version is almost certain to be less generous than the Administration proposal, but it will mark another long step in the direction of eliminating the corporate income tax.●

SALUTE TO REPUBLIC OF ITALY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. RODINO. Mr. Speaker, I want to salute the Italian nation and its people as they celebrated yesterday, June 2, the 35th anniversary of the founding of the Italian Republic.

Like all Americans of Italian descent, I take pride in my heritage, and I am particularly proud of the role that democratic Italy plays in modern Europe. I served during World War II with the 1st Armored Division of the U.S. Army in Italy, and when the war ended, I became involved in a letter-

writing campaign from the United States as Italy elected its new Parliament. At a time when totalitarianism was taking hold in other parts of Europe and around the globe, the Italian people made a commitment to rebuild their nation into a strong democratic state.

The principles that were established in Italy in 1946 have girded that country in confronting much difficulties in the past three decades—a struggling economy, high unemployment, social unrest, and incidences of domestic terrorism. In meeting these adversities, the Italian people have demonstrated the same creativity and character that gave the world Michelangelo, Botticelli, DaVinci, Verdi, Puccini, Galileo, Marconi, and Fermi. The accomplishments of these and other Italian artists, composers, authors, and scientists have helped to shape the face of Western civilization, and we in America are fortunate to share in this rich culture. The contributions of Americans of Italian origin in the fields of science, medicine, education, law, and the arts have continued this tradition and enhanced our Nation's culture.

On this 35th anniversary of the Italian Republic, I join all Americans in paying tribute to the Italian nation and its people in the spirit of friendship and appreciation.●

INVESTING IN PUBLIC INFRASTRUCTURE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. HAMILTON. Mr. Speaker, I insert my Washington Report for Wednesday, June 3, 1981, into the CONGRESSIONAL RECORD:

INVESTING IN PUBLIC INFRASTRUCTURE

A large portion of a Congressman's time is spent helping local public officials to improve streets, highways, bridges, sewers, water systems, harbors, and ports. In recent years, I have detected a growing interest among Hoosiers in the need to upgrade this public "infrastructure." Rarely do I meet with Hoosier public officials who do not express their concern to me about the neglect of public infrastructure.

Extensive segments of the interstate highway system are badly deteriorated. One out of every five bridges in the country is in need of total rebuilding or major repair. Water mains in the nations's largest cities are riddled with leaks. Poorly maintained track is causing derailments of trains and delays in shipping. Coal ships languish outside crowded ports. These are all evidence of the decay of public infrastructure. It is helpful to think of public infrastructure as durable goods that are purchased for the nation's communities, very much like the durable goods—cars, refrigerators, homes, and so forth—that are purchased for private use. The public assets, just like the private, will wear out and break down if they are not cared for. However, as public infrastructure decays, communities become less desirable places in which to live and work.

Given our interest in revitalizing the economy, these matters take on added significance. Studies have revealed that public facilities are almost always more important than tax breaks or other incentives when businesses decide where to locate. We have been too narrow in our understanding of the types of investment the economy needs. While we must stimulate investment in the private sector to strengthen the economy, we also have to make an equally important commitment to rebuild and repair the public infrastructure needed to support economic growth.

Although there are many causes of decay of public assets, two stand out. The first, and more obvious, is time. All structures wear out eventually or become outdated as the years go by. Some water systems now in use, for example, were built in the 1800's, and some bridges currently in use were never designed to handle the volume and weight of today's traffic. The lack of investment in maintenance is a second factor. There has been a decline in investment in public works since the mid-1960's. In terms of gross national product, spending for public works fell from 3.6% in 1965 to 1.7% in 1979. In terms of constant dollars, spending for public works was less in 1977 than it was in 1963.

Several reasons for the neglect of public infrastructure have been discussed. During the last two decades, society tended to concentrate on spending for social services. Inflation and the desire to restrain the rapid growth of government meant that improvements would cost more, that there would be a limited amount of money for them, and that governments would postpone spending for public infrastructure to meet many other demands. The neglect can also be attributed to a sluggish economy, an energy crisis which reduced the gasoline tax revenues used to maintain roads and bridges, and a shift in population which cut into the tax base of many governments. Congress cannot evade its share of responsibility. Several critics blame the fragmentation of jurisdiction among various committees, the bias toward new construction in may federal programs, and the absence of a national policy on public works.

The decline of public infrastructure is not a new problem. Evidence of it has been accumulating ever since the mid-1970's. Further inaction will make the job of rebuilding and repair more difficult and costly, yet we procrastinate. Moreover, we should be aware that about 20%, or $16 billion, of our annual appropriation for public works is used to finance the costs of delays in construction—a major waste of scarce public capital. The main reason for the delay is the enormously complex regulatory structure that has been put in place since the mid-1960's. While this structure reflects a diverse society whose competing interests must be balanced, its impact shows the need for regulatory reform.

When policy makers discuss how best to remedy the problem of decay of public assets, one of the most popular suggestions is a greater reliance on user fees. User fees can be used as added leverage for borrowing to help finance some maintenance, repair, and construction. Unfortunately, today's high interest rates make it hard for smaller communities to exercise this option. Expanded private operation of public facilities has been used to some degree in such areas as transit, education, and sanitation. The drawbacks of this option, however, appear whenever there are disagreements about rate increases, contract provisions, or methods of monitoring the quality of services. Other ideas abound, but none addresses the most critical issue: how to generate public support for measures that go against the current mood of fiscal restraint. The public must be persuaded that a sound economy and a good infrastructure are inseparably linked.

We cannot continue to follow a policy of "build it and forget it." The longer we delay the restoration of public infrastructure, the harder and more expensive the task will be. America's private economy is nourished by public infrastructure. Starving the infrastructure will surely keep the economy from growing.●

WILLIAM A. "BILL" WHITE

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. GRISHAM. Mr. Speaker, it is my pleasure to bring to the attention of the House the accomplishments of a personal friend and outstanding citizen, William A. "Bill" White.

Bill will be retiring this month after 32 years with the Los Angeles Unified School District. During that time he used his skills and experience to educate and to train our Nation's most precious resource, our youth.

As a former New York Yankee farmhand, Bill got the firsthand experience needed to be a teacher of physical education, passing on his knowledge to the students of Los Angeles County. He expanded his role and became a teacher of driver education as well.

By no means were Bill's activities limited to the school system. For 10 years he served on the Southeast Parks and Recreation Board. Many residents of my home district know Bill best as the top baseball umpire in college ranks and the high school leagues.

In devoting his life to his community, Bill has fulfilled the ideal of an outstanding American. I am sure that this Congress, along with Bill's wife Sandy, his sons Danny and Billy and daughters Laurie and Susan, join me in saluting a model citizen. We all wish Bill best of luck in the years ahead.●

REAGAN STALLS RICH-POOR TALKS ON TRADE, AID, RESOURCES, FUEL

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. SIMON. Mr. Speaker, the Christian Science Monitor has a discouraging article written by Louis Wiznitzer

titled, "Reagan Stalls Rich-Poor Talks on Trade, Aid, Resources, Fuel."

The article quotes a Western diplomat as saying:

What this administration is really saying is that it intends to use naked power to further its interests in the Third World; that sounds very much like Russia.

If we think we are being politically sophisticated by being insensitive to the hopes and aspirations of the developing nations and the world's poor, we are not showing sophistication we are showing shortsightedness.

I hope that as the new administration considers what it should be doing in the world of foreign affairs that in our foreign diplomacy that some wisdom and compassion will modify what appear to be incredibly shortsighted policies.

I am inserting the Christian Science Monitor article in the RECORD at this point:

REAGAN STALLS RICH-POOR TALKS ON TRADE, AID, RESOURCES, FUEL

(By Louis Wiznitzer)

UNITED NATIONS, N.Y.—"You have done to us by land what you did to us last month by sea," said a Latin American diplomat to the US delegation after the Reagan administration announced its decision to pull out of the North-South dialogue.

The United States effectively blocked the United Nations Law of the Sea Conference in April by pulling out just before the conference was about to begin its work in New York. Last week the US informed the United Nations General Assembly that it would not participate in projected global negotiations on trade, raw materials, energy, finance, and development until it had reviewed its position on these matters. This review is not expected to be completed before October. The latest US blow to the third world (and to lesser degree to its Western allies) stunned the representatives of the world community at UN headquarters.

The North-South dialogue between industrial and developing nations has not brought about a new economic order as the world's "have-nots" had hoped, but it has made some progress and led to some concrete results, advantageous to both rich and less-developed countries (LDCs), such as:

The creation of a Common Fund aimed at stabilizing the prices of raw materials.

The rescheduling (in the cases of some of the poorest countries, the canceling) of LDC debts.

Last fall, the dialogue ran into a snag when the US adopted a rigid stance on the competence and the mandate of a projected global negotiations conference. The industrial nations and particularly the US wanted the negotiations on economic problems to take place in specialized agencies such as the International Monetary Fund (IMF), the General Agreement on Tariffs and Trade (GATT), and the World Bank, where they play a leading role. The LDCs wanted the conference to be responsible for all phases of the negotiations.

Baron Rudi von Wechmar, West Germany's ambassador to the United Nations and president of the General Assembly, managed to work out a compromise formula that proved acceptable to all member states except the US. It attempted to placate US fears that the UN might take over the IMF and dictate its economic policies to the US government.

Since the beginning of the year Baron von Wechmar has continued his consultations with representatives and high officials of two dozen countries (selected because of their regional or political importance or because of their wealth) and had hoped to hammer out an agreement before the summer.

Global negotiations would have lasted for several years in any event before producing concrete arrangements. The negotiations would have helped in the meantime to avoid acrimonious recriminations by the LDCs against the rich countries and might have helped to narrow the political and philosophical gaps between them. By including energy among the items to be negotiated, the LDCs had made a major concession to the industrial nations, which otherwise would not have agreed to discuss the other items.

A senior diplomat of a Western country admitted to being dismayed: "It is clear to us that the new [Reagan] administration, for ideological reasons, has decided to concentrate on the East-West rivalry and to ignore the South. We are now convinced that come the end of the year, having finished its review of its relations with the third world, the U.S. will announce that it will not participate in the global negotiations. There is even some doubt as to President Reagan's intention to attend the summit conference in Mexico to be cohosted by Mexican President López Portillo and Austrian Chancellor Bruno Kreisky in October."

The Reagan administration has made no secret of its belief that U.S. interests are best served by concentrating on bilateral rather than multilateral economic relations with the third world and by allowing U.S. private interests rather than the U.S. government to assist these countries.

High U.S. officials have said more than once that they don't believe in silencing regimes hostile to the U.S. In fact, one U.S. official privately told newsmen last week that "the Reagan administration will determine whether to aid a country or not according to the way it votes at the U.N."

Most experts recognize, however, that private enterprises are not likely to invest in poor countries such as Bangladesh, Mali, Somalia, and others. "What this administration is really saying is that it intends to use naked power to further its interests in the third world; that sounds very much like Russia," said one Western diplomat.

The sudden U.S. turn on the North-South dialogue not only surprised countries such as Venezuela, Mexico, Brazil, India, Nigeria, Pakistan, and Egypt, but also U.S. allies.

Although West Germany, France, Japan, and Canada are not prepared to turn the existing international economic system upside down and hand their national wealth over to the poor, they do want to meet some of the needs of the LDCs and to pursue a productive dialogue with them.

"We do not despise the third world and we know that we need it just as it needs us. We shall now try to reason with the Reagan administration and persuade it to participate in global negotiations after all. But if we fail then, even though we don't like it, we would have to find ways to pursue the North-South dialogue without the U.S., perhaps through major regional agreements," says one Western treasury official.

"What is at stake in the North-South dialogue is not just economics. It is politics in the broadest sense, it is geostrategic stability," says West Germany's von Wechmar, who vows to pursue his efforts toward a dialogue in the face of a U.S. snub.●

THE REAGAN PROPOSAL: TO PROTECT SOCIAL SECURITY OR BALANCE THE BUDGET?

HON. WILLIAM R. COTTER

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. COTTER. Mr. Speaker, the public outcry against the Reagan social security proposal stems from the perception by Americans that the draconian proposal was aimed primarily at creating a budget surplus and secondarily at saving the social security system.

It is well known that the social security retirement fund will experience cash flow problems by the fall of 1982. We must act to resolve this problem, but the Reagan proposal to save $46 billion in the next 5 years was clearly an overreaction to the budgetary pressures. Most of these savings come as a result of immediate and drastic reductions for early retirees, survivors, disabled workers, and their families.

The firestorm of public protest over these cuts constituted an intuitive understanding that they went far beyond what is necessary to resolve the problems facing the social security system. Even people who are not aware of the problems facing the system—and there are serious problems—do not condone an immediate and massive reduction to social security benefits. Under the Reagan approach, an early retiree next year would suffer a reduction of $156 a month because of a new formula.

The most disturbing aspect of the Reagan proposal is its apparent treatment of social security as some nonessential program rather than one into which individual workers had contributed throughout their working careers. The Reagan proposal is perceived as a violation of his commitment to the concept of a social safety net which he articulated while ordering his Federal priorities.

The overwhelming public condemnation of Reagan's social security proposal indicates that any changes to the program must be made with a sufficient lead size and these adjustments must be minimized by spreading the impact on more than one group of social security recipients. To do otherwise would be unfair and wrong.

I am glad that President Reagan has announced his intention to seek a bipartisan alternative to these discredited recommedations. It is clear that the social security system must be strengthened and restructured, but any changes must be done with sensi-

tivity to current and future recipients and taxpayers.

Significant benefit changes, for example, should be made on a prospective basis so people have an opportunity to adjust gradually. As a member of the Social Security Subcommittee, I will work with the Reagan administration to find an equitable resolution to this most important issue facing the 97th Congress.●

VOICE OF DEMOCRACY SCHOLARSHIP ESSAY WINNER

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. AKAKA. Mr. Speaker, I would like to take this opportunity to share with my colleagues the fine essay composed by my constituent, Mr. Thomas Lether. This essay was selected as the winning entry from the State of Hawaii in the voice of democracy scholarship program sponsored annually by the Veterans of Foreign Wars (VFW).

Mr. Lether is presently a senior at Baldwin High School in Kahului, Maui, and is president of his student government. Following in the footsteps of his older brother, he hopes to eventually become an attorney. Mr. Lether intends to start realizing this career goal by attending the University of Puget Sound.

Mr. Lether's essay completely epitomizes the theme of this year's competition, "My Commitment to My Country." His essay was selected as the winning State entry in a scholarship program which currrently has more than one-quarter million participants. Student participation in this competition has tripled during the past 19 years of VFW sponsorship. I would like to thank the members of the VFW for their efforts in establishing this outstanding program and also congratulate Mr. Lether on his fine entry in the essay competition.

The essay follows:

The American Nation, founded over two hundred years ago but still maintaining a sense of its beginnings, becoming the world's foremost power but still striving for greater heights. This country was founded by people looking for a better life, from the pioneers crossing the great plains to the "Huddled Masses" crowding Ellis Island. All of these patriots were leaders in their own way. Now as we are facing a third century, the United States once again cries out for leaders who are willing to commit themselves to the American cause. I shall always try to answer that call.

I consider myself to be an American, with the same and even more rights than my Forefathers. But along with the privileges come the duties and responsibilities of my citizenship. The problem is, how can a person support his country? This problem is especially fathomless to the many young people, such as myself, who are not yet able to exercise their voting rights. But I've found out that there are ways for me to participate in a democracy. The best way is for me to learn all I can about this country and the way it operates. I have always enjoyed civics and history classes. I'm presently Student Body President, a member of the District Student Council, and a member of many school action groups. Many times I have had to work closely with the State Legislature. I represented my school district as a state lobbyist when I was fifteen. In addition to giving me a sense of responsibility, I have learned much about our democratic system of government. I never really appreciated our country's Constitution until I tried to write one for my own Student Government. Now I can fully appreciate and understand the scope of what this fantastic document has to say. After learning this basic framework it is possible and probable, that I will go on to be not only interested, but also active in the workings of my country.

President John Fitzgerald Kennedy once said, "Ask not what America will do for you, but what we can do for the freedom of man." But why should I or anyone have to do something for this country? As Americans we feel free to do as we please. But as true loyal, Americans it is our duty to inspire the great American dream that so many patriots have suffered, sacrificed, and died for. Being able to inspire others is a big part of my commitment to democracy. To me democracy is a personal issue that must be achieved by each of us before it can be accomplished as a nation. Therefore, it is up to me to search for that elusive thing that is called the democratic spirit. I must lead others to do the same. My commitment to this country cannot be a part time one. It must be constant and undying. Every hour of school work, every extra student government activity leads to this goal. I feel that Americans must learn to commit themselves to the United States of America because we all need to be bound together in a new feeling of nationalism. This view of solidarity must be displayed to a world full of critics and possible aggressors. The world will continue to look to the United States for support and direction. If my actions can help bring Americans together, then I will be satisfied with my commitment to this country.

The question is, whether or not my actions will have any effect on the future of this country and her people. I feel that the future generations that call themselves Americans will need all the help they can get. If the legacy of democracy can be passed down through me, then I have served my country. I've always believed that the attitudes expressed by a person will manifest themselves in his children. If this is true then there is an unlimited treasure to be found in the future generations of Americans. I know that it is up to me to make the first move to uncover this wealth. This uncovering of the American dream is another part of my commitment. As for myself I don't look for praise, but for the knowledge that I've done my best for my country and that someone else might be willing to commit himself to democracy because of my actions or examples.

Two hundred years ago Dr. Benjamin Rush stated that, "The American war is over, but this is far from the case with the American Revolution. On the contrary, only the first act of a great drama is at a close." This country faces a future filled with many problems. Is the next decade to be the epilogue of this great drama? I don't believe so. I will always try to commit my all to the United States of America. By seeing the best that this country has to offer, and then by showing this to others, I hope to spread the cause of democracy. I wish to lead others along a path of patriotism. I feel as long as there is the spark of nationalism and patriotism, as long as people are willing to commit themselves to their country, this country can only be seeing the dawn of a great day to come.●

GENERAL FOODS OPERATION OPPORTUNITY SUMMER JOBS PROGRAM

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. OTTINGER. Mr. Speaker, in June, the General Foods Corp., will begin the 14th summer of Operation Opportunity in White Plains, N.Y. Through this innovative program, the company provides both summer employment and educational opportunity for disadvantaged youths. Operation Opportunity is an outstanding example of the private sector addressing public needs. I salute General Foods for conducting this program, and for conducting it so well.

Under Operation Opportunity, General Foods employs economically disadvantaged students from Westchester County schools at its headquarters. The students have completed at least 1 year of high school and have been nominated by their school counselors. They are given meaningful jobs such as bookkeeper, typist, laboratory assistant, or clerk.

General Foods pays them something more than the minimum wage—this summer $3.65 per hour for first-year participants and $3.75 for second- and third-year participants. But, the program is much more than a jobs program. For the company matches every dollar earned by the students in an escrow fund to support their education beyond high school.

Eighty students will participate in Operation Opportunity this year. This will bring to 471 the number who have participated since the program was begun in 1968. About 85 percent are minority members. I am delighted to report that more than 95 percent of those who have completed their participation have used escrow funds to continue their education.

Their further studies have been in various fields including medicine, business and education. One participant went on to become one of the first female graduates of the U.S. Military Academy at West Point.

Operation Opportunity has helped young Americans to raise their personal goals and to pursue these goals. Their achievements provide not only individual success stories but also sig-

nificant contributions to their communities. Thus, benefits will long accrue from this continuing act of good corporate citizenship by General Foods and I applaud them for it.●

HONORING CLEVELAND'S POLKA MUSIC MEN AND CECELIA DOLGAN AND THE SLOVENIAN NIGHT SHOW

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. ECKART. Mr. Speaker, decades ago, Cleveland was the polka capital of the world. Today, millions of people still enjoy listening and dancing to polka music.

On June 8, Polka Week begins at Joey Miskulin's Lounge in Cleveland, honoring seven polka band greats. I have long been a fan of these men and their music. With thanks for the enjoyment they bring me, I would like to make their achievements known to my colleagues.

Frank Yankovic is America's Polka King since 1948. Credited with starting the polka movement in America after World War II, Frank has 2 million-selling records, the "Just Because Polka" and the "Blue Skirt Waltz."

Ohio's Polka King, Eddie "the Hambone" Habat, played his first professional polka at the age of 15 at the original Yankovic Cafe. He has made over 150 records for Decca Records.

Johnny Vadnal is Cleveland's Polka King. He has recorded more than 300 records for the RCA Victor label, including the famous "Juke Box Polka" and the "Yes Dear Waltz."

America's first daily polka disc jockey is Kenny Bass. Kenny has been broadcasting for 33 years and was named "Midwest Polka Champ" in 1952. He's made over 200 records.

Lou Trebar is America's Slovenian Waltz King. He and the late Jonny Pecon, America's Polka Prince, made over 300 records with the Pecon-Trebar Orchestras and won the Arthur Godfrey Talent Scout Show.

Joe Troli has been Frank Yankovic's writer and arranger for 45 years and has also written and arranged polka and waltz hits for other top recording bands from Cleveland.

I invite everyone who enjoys good music and good people to come celebrate Polka Week in Cleveland.

Mr. Speaker, this year marks the 10th anniversary of the Slovenian Night Show radio program. Every week, the Slovenian community of Cleveland can hear about the history and geography of Slovenia and songs around a Slovenian theme.

The host of the Slovenian Night Show is Cecilia "Cilka" Dolgan. She has sung grand opera at the Cleveland Institute of Music and with the Cleveland Symphony at Severance Hall.

Her recordings span a broad spectrum of classic folk songs, Slovenian pop hits, modern arrangements of traditional music, and old-fashioned presentations of Slovenian songs. She is director of the Circle 2 SNPJ Slovenian Junior Chorus and she prepares a cultural program twice annually.

Whether in her concerts, many benefit performances, directing, church work, or radio program, Cecelia Dolgan has used her talents to enrich the Slovenian and Cleveland communities.●

FORT HAMILTON CELEBRATES THE 156TH ANNIVERSARY OF ITS ESTABLISHMENT

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. ZEFERETTI. Mr. Speaker, on June 12, 1981, Fort Hamilton will celebrate the 156th anniversary of its establishment in Brooklyn. In its 156 years, Fort Hamilton has become vitally important to the economy of New York City, as well as to the defense of the Nation.

The site now known as Fort Hamilton was first seen by Giovanni de Verrazano in 1524, but the actual cornerstone for the fort was not laid until June 11, 1825. In 1652, the Nyac Indians gave the Dutch West India Company title to land which included what is now Fort Hamilton. Before the year was over, however, the company transferred its patent to Cornelius Van Werckhoven, who in 1657 turned the land over to Jacques Cortelyou. Cortelyou proceeded to lay out the town of New Utrecht. A blockhouse was built to protect this new community against Indians, smugglers, and pirates. With this move, the present post began to take shape.

Today, Fort Hamilton is the only U.S. Army installation in the Metropolitan New York City area. The primary mission of this command is to provide service and support to some 5,000 full-time active duty personnel who are stationed throughout the greater metropolitan area. The command also supports Army ROTC units, an Armed Forces examination and entrance station, the Long Island District Recruiting Command, and other Armed Forces activities.

Fort Hamilton will remain a keystone of Brooklyn's economy. I am very pleased that I, along with help from other members of New York's congressional delegation, was able to maintain the facility's operations, despite the Department of Defense's plan to close the post. As an integral part of our community, the fort has contributed to all aspects of society.

Mr. Speaker, Fort Hamilton is truly a remarkable military installation. It is my hope that the post will celebrate many more anniversaries of its establishment.●

WHY LIFT GRAIN EMBARGO?

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. MURPHY. Mr. Speaker, it is becoming increasingly evident that the illusion of what the Reagan administration says must be tempered by the reality of what it does, and no where is this truer than in the area of foreign policy. Recently, the Reagan administration resumed the sale of grain to the Soviet Union, that had been discontinued because of the Russian invasion of helpless Afghanistan. The Reagan administration said that sales were being resumed because it was unfair to ask the American farmers to exclusively bear the burden of American foreign policy, but instead of spreading the burden by including sales of high technology and computers, the President eliminated all burdens. Although many American farmers did not like to have the potential market for their grain reduced, they nonetheless have stoically accepted the necessity of their role in the best interests of the United States.

Why then, did the Reagan administration decide to resume Soviet grain sales? It was not because the grain embargo was ineffective. Prior to the resumption of sales, Secretary of State Haig had publicly admitted that the refusal of the United States to sell Russia grain was creating severe hardship in the Soviet Union. Last year's Soviet grain crop fell well below their projections, and they have been forced to cut twigs from trees to feed their cattle and hogs, and have reduced the size of their herds. Russia needs American grain now more than it did when the embargo was first enacted. The grain embargo is a more effective tool of American policy now than when it was first instituted.

Why then was the grain embargo lifted? It certainly was not that Russia is less belligerent and aggressive. Russian troops are still in Afghanistan, and as a matter of fact, it now appears that they intend to build permanent bases there. Russia has created a form of vassal war states who act as surrogates around the globe subverting legitimate governments in the Third World by encouraging and bankrolling terrorist movements. Cuba, Libya, and Vietnam are the most significant destabilizing forces in the world today, Many of the Cuban, Libyan, and Vietnamese troops engaged in warfare

today are eating American grain on the battlefields of the Third World.

The reason that President Reagan allowed resumption of grain sales to the Soviet Union, then, must be viewed in light of the political considerations. During the last Presidential campaign, Candidate Reagan promised to remove the Soviet grain embargo, and President Reagan is carrying through on a campaign pledge. Our national interest cannot be and must not be subverted by political considerations. When sacrifices are made, they must be meaningful; they must be consistent.

About a month ago, the Reagan administration made a decision to terminate further economic aid to the Sandinista government in Nicaragua because Nicaragua was becoming a conduit for arms to terrorists trying to subvert and overthrow the duly elected Government of El Salvador. Included in that aid was $7 million of American grain. Two weeks ago, it was reported that the American cutoff of aid to Nicaragua was being replaced by millions of dollars of foreign aid from Mexico, Libya, and the Soviet Union. Included in that aid package was $4 million worth of American grain from the Soviet Union. Resumption of grain sales to the Soviet Union is subverting American foreign policy interests.

By severely limiting access to food stamps by lowering the income levels for families of four and providing a reduced threshold of need, thereby removing thousands of Americans from eligibility, the Reagan administration has taken an antagonistic policy to the further expansion of food stamps to the American people. Once again, however, it is necessary to examine the illusion of words from the reality of deeds. Grain sales to the Soviet Union are made at prices far below the farmer's cost of production, and are, in effect, subsidized sales. The Reagan administration is not really against free food. They are just restricting food subsidies for Americans, so that a massive food stamp program in the form of subsidized grain can be established for the Soviet Union.

We must send out the message loud and clear to all the world. The United States wants to live in peace with all nations, but let no nation perceive that desire for peace as weakness. When Russia, or any nation, willfully violates reasonable standards of civilized behavior, we must show that the actions of the United States will be swift and firm. We must show that barbarous behavior will not be tolerated, and that this country still has the courage of convictions and spirit of resolve to do what must be done without concern for political considerations, without concern for the short-range effects on any one industry, but only with the goal of what is good for America. Let us draw the line here.

Actions by governments in a civilized world that were abhorrent yesterday must not be made to be agreeable today; actions that are unacceptable today must not be made acceptable tomorrow. It is with the greatest sense of urgency that I introduce a House concurrent resolution urging the President to reinstate export restrictions on agricultural commodities to the Soviet Union, and a bill that would amend the Export Administration Act of 1979, that would effectively and legislatively attain the same goals.●

CELEBRATING AMERICA'S ORIGINS

HON. WILLIAM J. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. WILLIAM J. COYNE. Mr. Speaker, it is too easy to forget one of the miracles of America—the happy mixture of people from all over the world, working and living together with mutual respect. One of the exciting ways we remind ourselves of this miracle in my district is with our annual Pittsburgh Folk Festival.

This year, on May 21-24, we celebrated the 25th anniversary of this event in our civic arena under the sponsorship of my alma mater, Robert Morris College. It featured dances, songs, crafts, costumes, and a wonderful variety of foods from the following countries or regions of the world: Africa, Bulgaria, Carpatho-Russia, China, Croatia, England, Germany, Greece, Hispania, Hungary, India, Ireland, Israel, Italy, Latvia, Lebanon, Lithuania, Philippines, Poland, Scandinavia, Scotland, Serbia, Slovakia, Slovenia, and Ukraine.

To honor the leaders and thousands of volunteers who made this festival such a happy and successful demonstration of America's rich cultural heritage, and to inspire other communities to keep the memory of our origins alive, I wish to share with my colleagues the history of the Pittsburgh Folk Festival as described in the silver anniversary program:

PITTSBURGH FOLK FESTIVAL HISTORY, 1956-81

The Pittsburgh Folk Festival story may have been told and retold as one reads the histories of the various paricipating nationalities. Many of the original groups of that first Festival in 1956 have been a part of the ongoing program but only seven have taken part in all twenty-five years of activity. Thus, we are honoring these groups for sustaining their steadfast commitment to the Festival. They are: Bulgaria, Croatia, Greece, Lebanon, Lithuania, Scotland and Ukraine.

The story of the Pittsburgh Folk Festival had its beginning in 1955 when Rev. John Schlicht, C.S.Sp., Chairman of the History Department at Duquesne University, visited the Festival of Nations in St. Paul, Minnesota. He was impressed with the concept and felt that this type of presentation was a natural one for Pittsburgh, a city that has always prided itself in being a conglomerate of nationalities. Father Schlicht contacted Richard Crum who was then choreographer for the Tamburitzans and who also had served as a member of the staff of the St. Paul Festival years ago. Dick was to become a constant partner of Father Schlicht as they visited the many clubs, churches and nationality halls in and about the county. Plans were formulated, commitments were made and the time and place for the 1956 Pittsburgh Folk Festival was established; time—June 9 and 10, place—Syria Mosque, groups involved—eighteen. The attendance was substantial for the Mosque. It was obvious that the idea was going to take off. Success was assured. Many of those who served in the various Chairmanship positions are gone now, but they left behind an invaluable legacy of culture and heritage—The Pittsburgh Folk Festival.

In the formative years of the Festival the present directing staff, Director Charles R. Cubelic and Program Director Nicholas Jordanoff were a part of the Tamburitzans; Cubelic was Assistant Director and Jordanoff was a student performer. They both served in various capacities with the Festival—musician, dancer, assistant and general helper. They really served their apprenticeship well, having learned from the masters.

The years have passed quickly. Innovation and change have become key words for the Festival, from two days in the Syria Mosque, an audience of 7,000 to 8,000, the Festival has grown to a four-day extravaganza in the Civic Arena and an audience of 60,000 to 70,000 people.

Symbolic of the Festival was the adoption of the pipe-smoking little man, who has become the logo for the Pittsburgh Folk Festival. Created in 1964, he has remained with the Festival through all these years. His dress really epitomizes the meaning of the event because he is made up of many nationalities. He truly repesents our theme, "Unity in Diversity."

The continuing success of the Festival can be attributed to its flexibility, its integrity, its authenticity and its resistance to commercialism. Over the years the nationalities have been able to meet the need for change and have thus contributed to the overall stength. We have changed theaters; we have changed program format; and we have been able to expand to all areas of the Civic Arena.

Each of the nationality groups, with the guidance and support of the Directors and their staff, strives to maintain a high level of artistic integrity and ethnic authenticity. Preparation for the Festival has become a year-round activity—research, rehearsals, cooking, baking, crafts, costume-making and the acquisition of folk art for display. All of these activities provide powerful motivation to the groups in maintaining their ethnic identities and keeping alive their songs, dances, recipes and customs. Perhaps that has been the greatest gift of the Festival: the survival and continuing vitality of the nationality groups. Without the impetus of the Festival, how many of them would have "melted away"?

We look forward to the next twenty-five years of Pittsburgh Folk Festivals—to the hard work and the joy—to the camaraderie and the friendships—and the sense of wonder which makes each program as exciting as the first. May we all continue to come together to share and display the many

colorful facets of our multi-cultural community.●

KENDALL REFINERY'S 100TH ANNIVERSARY

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. CLINGER. Mr. Speaker, I would like to take this opportunity to acknowledge that during July of this year, Kendall Refining Co. of Bradford, Pa., will celebrate its 100th consecutive year of productive existence. As Representative of the 23d District of Pennsylvania, I take great pleasure in extending my personal congratulations before this, the 97th Congress.

This fine company, founded just 22 years after the drilling of the first domestic oil well, has consitently offered high quality petroleum products and innovative technology to the U.S. market. Throughout periods of prosperity and depression, Kendall Refining has remained a vibrant and productive enterprise. This fact, in and of itself, is sufficient reason for congratulations, but more can be said for this outstanding corporation.

Kendall Refinery had remained in the town of its birth, Bradford, Pa., at a time when many industries were moving to large industrial centers. By remaining in the Bradford area, Kendall has provided hundreds of badly needed jobs, either directly or indirectly. This type of community service puts Kendall Refinery and its operators in a class with the great companies of our Nation, and I am proud to honor them today.●

CUTTING THROUGH THE TAX CUT THICKET

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, the subject of taxes is complex and not easily understood by the public. It is the duty of the media and those of us in government to communicate the facts and probable effects concerning the administration's tax cut proposal. A good example of effective communication is seen in the following editorial by Herbert W. Stupp.

The editorial indicates that there are historical precedents for the success of tax cuts in stimulating the economy during periods of high tax rates. In light of these precedents, the Kemp-Roth plan, rather than drying up revenues for the Federal Government, should result in increased revenues at all levels.

I would like to bring to the attention of my colleagues a recent editorial on this issue that was broadcast on New York's WOR-TV.

[The editorial is reprinted below:]

TAX CUTS FIRST

It used to be that legislators were rarely willing to cut spending, but often eager to cut taxes. Congress has passed most of President Reagan's rollbacks in projected spending. But oddly, his income tax plan is meeting opposition. That plan, known as Reagan-Kemp-Roth, calls for cutting personal income tax rates across the board by 30 percent over three years.

First, you should know that you are facing massive tax increases approved by the last administration and Congress. A family earning $15,000 in 1980 will have at least a 56-percent increase in taxes by 1984, unless something is done. The President's plan would simply reduce the increase in store for us.

Some fear that tax rate cuts will dry up revenue for the federal government and force more budget cuts. But history proves that if tax rates are too high, cuts can result in actual revenue gains. The Kennedy tax cut of 1964 did that, as did the cuts in the 1920's. New Yorkers should know this best of all. The Carey and Koch inspired tax cuts have resulted in more, not less, revenue for the city and state. This happens when tax rate cuts encourage people to invest, save and work more, creating gains in real income. So strangely enough, lower taxes could mean more money for needed programs, instead of further budget trimming.

The President's three-year tax rate cuts will give needed incentives to millions of Americans. And that could get our economy rolling again.●

A REAGAN BLUNDER

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. PAUL. Mr. Speaker, it has become commonplace knowledge that the Wall Street Journal has the best editorial page in America. On Wednesday, June 3, we can see again why this is so.

I would like to call the Journal's eloquent statement on the World Bank, and why we should not expand its funding, to my colleagues' attention.

More money for the World Bank and its affiliates violates the principles of the Reagan platform. The Senate and the House Banking Committee have already approved these big spending and loan proposals, at a time when average Americans cannot get a home mortgage. The House should block this inflationary foreign aid, as the Journal recommends.

The article follows:

A REAGAN BLUNDER

President Reagan has put up a good fight on the budget these past few months. The main action has centered on defense and domestic programs, and Mr. Reagan, as we see it, has hewed admirably to principle in the face of political pressure. So we can only conclude that it was the distraction of the main fight that caused Mr. Reagan to blunder so badly on the question of what to do about the World Bank.

Mr. Reagan blundered when he allowed his administration to be maneuvered into backing a big increase in World Bank funding. Backers of the legislation call it a measure to permit the U.S. to "continue its active role" in the World Bank and other so-called multi-lateral lending agencies. But that's misleading. The U.S. will continue its active role whether or not new funding passes. What the current bill would do is ram through an enormous expansion of these agencies that was negotiated by President Carter.

We bring this up now because the question is at a critical stage in Congress and because a tremendous amount of money is involved. The expansion that will be voted on in the coming week or so would cost the U.S. $4.67 billion in cash over three years, most of it for the World Bank's soft-loan affiliate. There is another $8.1 billion in pledges to bail out the bank if its other loans go bad, through purchases of its callable capital.

The irony is that the real stalwarts of this administration have been on the right side of this issue from the beginning. The transition team delivered a fine report, recommending that the administration not proceed with the expansion of the World Bank in 1982 and withdraw the Carter administration's request for $3.24 billion in contributions to the sixth replenishment of the International Development Association, as the Bank's soft-loan affiliate is called.

These recommendations were echoed by Mr. Reagan's budget cutters at OMB, who proposed renegotiating the contributions at half the Carter levels. This sent the State Department and World Bank lobby into a panic. OMB had to compromise. And before long, the Deputy Treasury Secretary, Mr. McNamara, was up on Capitol Hill mouthing phrases about "complex international negotiations," about "the leadership role of the United States" and about the importance of being "able to deliver on such international agreements." In other words, the U.S. should lead not by addressing the merits of the issue but by bowing to the sentiments of the international crowd.

The result is that these authorizations have squeaked through some committees and could come up for a vote in the full Congress soon. They would open the floodgates for massive lending for exactly the sort of programs in other countries—nationalized railroads, co-operative lending, government subsidies to mass transit, government meddling in oil and gas production—that the administration is fighting so valiantly to unravel at home.

Wrongheaded lending programs are the real problem with the World Bank, and the administration understands the point. It has initiated a major study to open the whole question of whether these multinational institutions have been serving not only U.S. interests but the interests of Third World borrowers. It seems silly for the administration to rush in with the billions now up for a vote—without waiting for the results of its own study of whether the investment is wise.

So as Congress pursues the reconciliations required by the Gramm-Latta resolution, it would do everyone a favor to look at the World Bank and affiliated agencies. The House Banking Committee will have the opportunity when it tries to meet the directive to cut $13 billion from a section of the budget that includes both World Bank

funds and money for housing subsidies here at home.

There will be those who argue that we have a commitment here to other shareholders in the bank, such as West Germany and Japan. It was, however, made crystal clear to other shareholders that any new U.S. subscriptions could be only tentative without congressional authorization and appropriation. The administration has no more obligations to these programs than to SALT II or Law-of-the-Sea. It does have a commitment to the American voters to fight against precisely this sort of spending.●

BATTLE MONUMENT GRADUATES 14 YOUNG MEN AND WOMEN

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. LONG of Maryland. Mr. Speaker, it will be my privilege this Friday, June 5, to address the graduating class of Battle Monument School in Dundalk, Md.

The 14 young men and women who are being graduated on Friday have worked especially hard for their graduation certificates, for each has waged a personal battle to conquer his limits, expand his horizons, and become a productive member of our society.

These young people have benefited from the revisions in Federal and State policy toward educating our young people who have specific handicaps. Their fellow students, who range in age from 3 months to 20 years, will benefit from the examples these 14 have set as they prove that ability, not disability is what counts.

I also congratulate the parents; families and teachers of these graduates. Their love, support and patience will be rewarded on Friday as each student steps forward to receive his or her certificate.

I know my colleagues join me in congratulating David Wayne Bland, Brandon David Bowman, Clarence Wendell Cox, Jr., Lisa Jenkins, Joyce Dean Koneyak, William Mack Krouse, Jr., Michele Gail Michael, Lisa Jo Moore, Thomas Ray Perry, Rita Lynn Piniecki, Donna Marie Schaaf, Cynthia Colleen Sheppard, Martha Squires, and Russell Timothy Vales.

Our best wishes go to each of these young people for a productive and prosperous future.●

ISSUES RAISED BY SUBJECT OF SEX EDUCATION

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. SHUMWAY. Mr. Speaker, Fairfax County, Va., where I live while I am here in Washington, has just adopted a new program of sex education. Since my children are in the Fairfax County schools, and since I have had some experience with sex education programs in California, I would like to address some of the issues raised by this touchy subject.

There is an old story about the way to change lead into gold. What you do is wrap the lead up in a piece of paper, unwrap it, and their is your gold. Except that, while you are doing it, you must not think of the word "rhinoceros." Obviously, you cannot do it. The subject of sex education is a little bit like that. What you want to accomplish through sex education cannot be accomplished, because the process itself affects the student in a way that produces results opposite to what is desired.

Why do we want to teach sex education? So that children will know how to have babies when they grow up? Of course not. People have been having babies for thousands of years without sex education, and there is no evidence at all that they are better at it now than they were before we had sex education.

So that teenagers will stop having sex? That may well be the pious hope of some parents who accede to suggestions that we have sex education in the schools. But again, the evidence is all against the proposition. Everything I have seen on the subject shows a positive correlation between sex education and increased sexual activity among teenagers. Now I am not naive enough to conclude automatically that it is sex education that is causing the increased teenage sexual activity. But the correlations are so strong, and there are so few exceptions to the trend, in fact none that I know of, that a person would have to be very gullible to promote sex education as a solution to teenage promiscuity.

Well then, how about sex education so that when our teenagers do have sex they will not get pregnant, or will not get venereal disease? It is certain that a large number of the proponents of sex education do make exactly that argument. "The kids are doing it anyway," they tell us, "so we might as well help them keep from getting hurt by it."

This line of argument is particularly attractive to school administrators and other government officials who are prohibited by legal activists and by Federal judges from saying a word about the morality of premarital sexual activity.

This line of argument suffers from two defects. It is vulnerable again on the evidence: Sex education correlates very well with increased pregnancy and with incidences of venereal disease. In other words, there is no evidence whatever that sex education keeps kids from becoming pregnant, or keeps them from contracting venereal diseases, with often tragic consequences. It is true that in some cases birth rates decline, but only as abortion rates climb. Rates of teenage pregnancy invariably rise with increases in sex education.

This line of argument also has the dubious distinction of promoting, by implication, the acceptability of teenage sexual activity. There is simply no way, Mr. Speaker, that sexual activity by teenagers can be dealt with calmly and matter of factly by parents and/or schoolteachers, without conveying to the teenager the idea that such activity is expected, and in some measure condoned. Parents who claim that their teenagers do not engage in sex are called naive by school counselors, and the teenagers themselves are often regarded by teachers as backward, repressed, and appropriate targets for consciousness raising.

If one attends school board meetings on this subject, or reads the literature on sex education, one hears the following argument in support of increased sex education: "We need to give our children all the relevant facts, so that they can make decisions responsibly and rationally."

Now this appeal to reason is very hard to combat. Everyone is in favor of reason and responsibility. But what is happening here is the extraction of a code of activity from any kind of moral or ethical matrix. What we do is teach children the various ethical systems, and then tell them to make their own decisions.

Specifically, we have to teach them that, while many people, probably including their own parents, think that premarital sex is morally wrong, there are others who do not agree. These others argue that so long as sex is set in a loving, caring context, there is nothing wrong with it, so long as "no one gets hurt." The way to see that no one gets hurt, of course, is to use various prophylactic methods against conception or venereal disease. Under those circumstances, one may indulge in sex provided one is "ready for it," or "able to handle it now."

Theoretically, of course, we should teach them that there are still others who argue that sex is natural and desirable at any age, and that if they are not indulging in it as teenagers there is something wrong with them. These others also teach that sex takes many forms, including homosexuality, incest, pederasty, masturbation, sadism, and masochism, in addition to monogamous, marital heterosexuality, and that there is no "rational" basis for choosing among these various forms of sexual expression. As a practical matter, this information is routinely taught in the sex education classes across America.

Now as desirable as information is, I would argue that what we are looking for in this area is not rational decisions, but right decisions. If the promoters of sex education want to argue about whether premarital sex for teenagers is right or not, I am perfectly willing to undertake that argument. But that question is never, or rarely, presented. Sex ed promoters know that the vast majority of parents agree on that point, and that they regard premarital sex as wrong. My guess is that a great many sex ed proponents agree with them.

Where they go wrong is in thinking that rational decisions will be right ones. Unfortunately, in the real world, as distinguished from Plato's "Republic," things do not always work out that way. For one thing, the rationality of the average person is open to some question, let alone the rationality of what John Greenway once called the sexually manic teenager. Worse, we have already outlined some of the competing moral systems dealing with this area of human activity, all of them presumably based on some kind of rationality. The fact is that people disagree about what is rational and desirable.

If what we are interested in is right choices—right in the estimates of the average parent whose children are candidates for sex education—we should pay less attention to reason and more to emotion. In short, we need to do a better job of indoctrinating our youth about the moral implications of sexual activity. If all we do is give them the facts so that they can make responsible decisions, what we actually do is teach them that if they do their homework, they will be able to justify, to their school counselor at least, if not to their parents, any course of activity they want to pursue. "But Mom, I love him, and we were taught in school that sex is a legitimate way of demonstrating that we care!"

The kind of introduction I am talking about can most easily be done using God, of course, the Judeao-Christian deity. If the concept of God as the source of morally right action is not used, some other form of outside measuring stick will have to be used, such as natural law or right reason. It may be theoretically possible to base an ethical system on atheism, or man-based philosophy, but no such system has ever been successful in gaining the kind of wide acceptance that is needed to sustain a social system.

The schools, of course, are barred by current interpretations of the Constitution from offering that kind of moral context for sex education. That is exactly why they ought to flee from sex education as from the plague. They cannot possibly satisfy the wishes of the parents without the moral context. Nor will the results be what is desired. There is every reason to think that the result will be an increase in sexual activity, with its attendant horrors of abortion, teenage motherhood, and venereal disease. Both theory and practice bear out this prediction.

Discussion of sex as just another bodily function, divorced from the taboos society has erected around it, simply provides kids with useful justifications for indulging their urges. Their justifications will be sophisticated, based on personal responsibility and their own internalized values. But that kind of personal responsibility is what children are learning, and what adults have. We seriously confuse the issue by pretending that children are adults in this context. The result will be a loss of support for a very basic institution of our society, the public schools. The public schools are already under attack, as the growth of the private academies and the pressure for tuition tax credits indicates. I contend, Mr. Speaker, that we should draw back and reconsider, as a nation, this policy of sex education divorced, as it apparently must be, from moral indoctrination. Unless we do, we court disaster. I will have more to say on this subject at a later time.●

WASHINGTONVILLE NEIGHBORHOOD CELEBRATION

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. OTTINGER. Mr. Speaker, it is with great admiration that I bring to the attention of my colleagues the outstanding work of the Washingtonville neighborhood program—a local organization of individuals working together to revitalize the aging and deteriorated Washingtonville neighborhood in the Village of Mamaroneck, N.Y. It is because of their hard work and dedication that the neighorhood has undertaken a marvelous transformation over the past several years.

Washingtonville, with its population of 2,000 mostly Italian, black, and Spanish residents, was the most physically neglected neighborhood in the village of Mamaroneck. Five years ago, village officials invited leaders of the neighborhood to sit down and discuss their problems and concerns. Out of that spring meeting, the Washingtonville neighborhood program was founded.

The Washingtonville neighborhood program is comprised of a dynamic group of individuals representing triethnic churches, schools, fraternal, civic, social service, social organizations, and a volunteer firehouse. Over the past 5 years, these groups, working together with a caring local government, have literally turned around the Washingtonville neighborhood, both physically and spiritually. The Washingtonville neighborhood program has effectively mobilized support outside of the community and has worked to secure over $1 million in Federal, State, and local funds for a number of neighborhood programs, including new miniparks, homeowner low interest loans and grants, street paving, new sidewalks and lights, public works projects, a neighborhood preservation company, and a fuel co-op. In addition to these very critical physical accomplishments, the Washingtonville neighborhood program is also responsible for the special spiritual transformation which has occurred in the neighborhood. Washingtonville residents now have a sense of pride and dignity in their neighborhood.

The Washingtonville neighborhood program has been recognized throughout Westchester County as an example of successful neighborhood revitalization. The Westchester Municipal Planning Federation has also recognized the accomplishments of the group and has presented it with the Citizen Participation Award.

Every summer, the neighborhood sponsors a Washingtonville Fiesta to raise money for neighborhood improvements. This year, the neighborhood and the village will, for the first time, host the Streets Arts Festival. The festival will be held on Sunday afternoon, June 7. A highlight of the neighborhood celebration will be the unveiling of a mural created by Washingtonville residents.

I urge my colleagues to join me in congratulating and thanking those persons who have worked hard to save the Washingtonville neighborhood and all other people across this country who have cared enough to preserve and keep together a very valuable American asset—our Nation's neighborhoods.●

URBAN JOBS AND ENTERPRISE ZONE ACT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. GARCIA. Mr. Speaker, it is with pride that JACK KEMP and I are reintroducing today the Urban Jobs and Enterprise Zone Act.

The focus of this bill is threefold: First, it provides incentives for job creation at a time when so many of our inner-city residents need jobs. Second, it provides incentives for low-income rental housing at a time when so many of our inner-city residents demand adequate shelter. And third, it provides incentives for commercial revitalization at a time when so many of our

inner-cities themselves are facing devastation.

Neither JACK KEMP nor I intend this bill to be viewed as a replacement for existing jobs, housing, or urban development programs. Let me repeat that crucial point: our bill is not a replacement for existing programs. Instead, it is a pragmatic, bipartisan approach to a difficult subject which has been aided by the extraordinary input of the community groups who, we believe, are intended to be the chief beneficiaries of our novel approach.

INTRODUCTORY REMARKS BY CONGRESSMAN ROBERT GARCIA

I am pleased to announce that Congressman Jack Kemp and I are reintroducing the Urban Jobs and Enterprise Zone Act.

I have worked most closely with Jack and Senators Chafee and Boschwitz in the redrafting of this bill.

Since our last version was introduced in Congress last June, we have benefitted enormously from the substantial contributions of literally several thousand community groups, inner city residents, local activists, representatives of minority groups, mayors and city councilpersons, small businessmen and women, and organized labor groups. Some were Republican, many of these people were Democrats, and all were committed at the street level to making our cities better places to work and grow. This bill, in extraordinarily large measure, reflects their concerns much better than our earlier bill did, and for their efforts I am deeply and personally grateful.

One thing which Jack and I have absolutely refused to change, however, is the purpose of our bill. It is still designed to create jobs and strengthen neighborhoods. It is still designed to strengthen neighborhood economies. Above all, it is still designed to strengthen the community ties which connect neighbor to neighbor.

As with the previous version of our bill—despite many false rumors to the contrary—the Enterprise Zone bill does not create a subminimum wage, eliminate the OSHA or other vitally needed government bodies, nor in any way reduce the presence in the inner cities of health or safety programs. I have devoted my entire legislative life in Albany and Washington to putting those laws on the books and I would never participate in their dismantling.

Nor do Jack and I view our effort as a replacement for any current housing, job training, or commercial revitalization program now undertaken by the government. Instead, our bill is designed to use the vitality of the Federal Tax Code as an incentive for localities to assist in the creative revitalization of poor urban neighborhoods—and to do so in ways that will benefit the very people who now live in those neighborhoods.

What is a community? Based upon my experiences growing up in the South Bronx portion of New York City, an area I now represent in the Congress, it seems to me that a community consists of at least three things: jobs for the people who live there, housing for those who wish to call the community their home, and businesses for shopping and work. That is how I remember the South Bronx of my youth, where my Aunt worked at one local factory, spent her money at another local store, and lived no more than a few blocks from either. Not only was this arrangement convenient, not only did this arrangement—repeated thousands upon thousands of times for the other South Bronx residents—create a real community, but this arrangement assured the constant recycling of our dollars in our neighborhoods.

It was with this kind of experience in mind that Jack and I wrote our bill.

And it is because liberals and conservatives, Democrats and Republicans have always agreed upon these fundamental notions that Jack and I were able to work together so well to create a bill which has attracted strong bipartisan support—one which is far more pragmatic than ideological.

STATEMENT OF CONGRESSMAN ROBERT GARCIA

We are reintroducing today the Urban Jobs and Enterprise Zone Act. I have worked most closely with Congressman Jack Kemp in the redrafting of our bill. Since our last version was introduced in Congress last June, we have benefitted enormously from the substantial contributions of community groups, local activists, mayors and city councilpersons, small businessmen and women, and labor groups. This bill, in large measure, reflects their concerns much more precisely than our earlier version and for their efforts I am grateful.

As with our last version—despite the many rumors to the contrary—the enterprise zones bill does not create a subminimum wage, eliminate OSHA or other vitally needed regulatory bodies, or in any way reduce the presence within the poor areas our bill is designed to assist of existing health or safety governmental mechanisms. Nor do Jack and I view this effort as a replacement for any current housing, job creation and training, or commerical revitalization program.

Instead, our bill is designed to use the vitality of the federal tax code in order to provide incentives for the recreation of neighborhoods in areas where once they flourished but now are troubled.

What is a community? Based upon my experiences growing up in the South Bronx portion of New York City, an area which I now represent in the Congress, it seems to me that a community—a flourishing community—consists of three things: jobs for the people who live there, housing for those who wish to call the community "home", and businesses for shopping and work. Based upon this fundamental notion—one which liberals and conservatives alike have always agreed upon—Jack and I have provided numerous tax incentives for job creation, lower income rental housing, and commercial revitalization. These incentives are detailed in the accompanying sheet which provides the highlights of our bill. Nevertheless, more so than with our last version, the new "total community" approach we have adopted is one which, we believe, really does hit right on the mark the very real concerns of America's poorest city residents. Reflecting the incredibly good assistance of several national civil rights groups, our version which we are introducing today has been endorsed by the Congressional Black Caucus, among other urban-oriented groups. I thank them for their endorsement, just as I thank them for their help in coming up with a new, better bill.

Yet, I do not intend for this bill to stand alone. There are, of course, other federal programs designed to provide jobs, housing, and economic revitalization within poor inner city neighborhoods. President Reagan wants to cut many of these programs out of the federal budget. Therefore, while I today reintroduce the enterprise zones bill, I also today repeat my position of working actively to fight the Reagan budget cuts. The enterprise zone approach cannot work by itself—its success requires that it be used in conjunction with the very programs the President wants to eliminate. As the coauthor of the enterprise zone proposal, I cannot in good conscience let President Reagan cut these other vital urban programs.●

ORGAN TRANSPLANT TAX INCENTIVE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, I have today introduced legislation to provide income and estate tax deductions for decedents who donate organs for use as transplants. This bill will encourage individuals to voluntarily provide in their wills for donation of their organs for transplanting into patients whose own organs have failed. Medical science has made enormous progress in applying transplantation techniques to manage diseases and disfunctions that only a few years ago would have been fatal. Availability of organs for transportation, however, is lagging behind the need. A study by the American Society of Transplant Surgeons indicates that mortality rates for renal transplantation (replacing a kidney) have dropped precipitously in 1978 and 1979, to approximately 5 percent. Nearly 55,000 individuals in America continue to require some form of dialysis (expensive procedure performed every few days to clean blood). As many as 30,000 of these dialysis patients could resume a relatively normal lifestyle with a transplantation operation.

PROVISIONS OF BILL

In simple terms, this bill would provide a tax incentive for cornea or vascularized organ donations. Vascularized organs include the heart, liver, pancreas, lungs, and kidneys. State laws require full testamentary consent before an organ can be removed for transplantation. When an individual makes provision for this humane donation, he will receive both a $25,000 deduction on his last income tax return and a $25,000 exclusion from estate taxes.

The $25,000 deduction from income taxes would also benefit any individual whose dependent donates an organ. Thus a minor without significant income would reduce the tax liability of his family with a posthumous donation which benefits both his loved ones and the loved ones of the recipient of the life-preserving organ.

COST SAVINGS

The Federal Government extensively funds dialysis procedures. The cost of organ transplantation should be compared with the federally financed alternative.

Based on figures accumulated by the end stage renal disease program of the Federal Government, the initial cost of a renal transplant is approximately $20,000 and each year afterwards averages $1,000. Assuming only 60 percent of the kidney transplants function (actually 65 percent survive) and the remaining 40 percent return to hemodialysis, the total expense of transplanting 100 patients is approximately $12 million. This includes transplant costs with followup costs of dialyzing 40 graft failure patients for 9 years.

Hemodialysis now costs about $28,000 per year per patient. This is figured by computing $150 per dialysis three times a week plus the initial operations. Ten years of hemodialysis on 100 patients, therefore, costs $28 million.

An additional 10 years of life for 100 patients costs less than half under transplantation than under hemodialysis. Moreover this does not consider at all a recent study in the New England Journal of Medicine that indicates only one-third of hemodialysis patients are successfully rehabilitated. The remaining two-thirds often require financial support from government social programs.

Of course, no one wants to criticize hemodialysis. It has saved countless lives and will continue to save thousands every year. No one would be likely to argue, however, that the 4,000 to 5,000 patients who yearly receive a transplant are not better off for these medical advances.

Clearly transplantation of kidneys could save as much as $160,000 per patient. Since kidney transplantation represents 80 to 90 percent of all transplant surgery (approximately 75 hearts are transplanted yearly; eye corneas are also transplanted), these figures give a convincing picture of the savings potential of a bill encouraging donation of organs.

REVENUE ESTIMATE

At most the American Society of Transplant Surgeons estimate that 8,000 to 10,000 organs would be transplanted yearly if ample replacement organs were available. Assuming the best possible results (that 10,000 would benefit from transplantation) and further assuming that the donors were all in a 50-percent tax bracket and had enough income to take advantage of the full deduction, the income tax deduction would reduce tax collections by $125 million. Although this is clearly a high estimate due to our generous assumptions, it still compares very favorably against the tremendous cost savings generated by transplantation. By way of comparison, renal dialysis cost the Federal Government $1 billion annually in 1980, and this figure is expected to rise to $3 billion per year by 1983.

HUMAN FACTORS

These we cannot hope to quantify. Place yourself, however, in the position of a parent whose only child has suffered a complete renal failure. Would you choose to have your child dependent on a machine to clean his blood every 3 days for the rest of this life? Or would you choose to have your child returned to near normalcy, able to run, jump and play however near or far away from home without worrying about the next treatment date, the prospect of contracting hepatitis, or the psychological trauma of dependence on a machine for life itself? These questions are slanted to make a point: transplantation would be our nearly universal choice in the case of one of our loved ones. In that instance, we would do well to provide a tax incentive for donation of the gift of a normal life to the recipient of an organ.●

JERRY HICKS—COURAGEOUS AMERICAN

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. RODINO. Mr. Speaker, I want to honor a courageous young American who died recently while serving his country as an officer in the U.S. Air Force. Jerry Hicks, Air Force captain, was the son of a dear friend of mine, Mrs. Maria Applegate of West Long Branch, N.J.

During my wife Ann's long illness, Marie Applegate was her nurse, and she became close to my family. She often spoke with a mother's pride about her son Jerry, the Air Force captain who received top honors in everything he endeavored to do. But, ironically, it was not until Jerry's tragic death that I began to realize how special a person he had been. The extent of the loss to his family, his friends and his country became quickly apparent as I learned more about this young man who seemed much older than his 28 years.

As a captain in the Air Force's Aerospace Rescue and Recovery Service, Jerry Hicks was a committed soldier and extraordinary pilot. To say that he was admired and respected by his friends and colleagues seems almost an understatement. His commanding officer has said Jerry was "unequaled as a rescue pilot and professional Air Force officer." Jerry received top honors in all his courses and he used his powerful intellect to help others strive for excellence. He was a devout Christian and dedicated husband. In short, he was an example to all who knew him.

Mr. Speaker, Marie Applegate shared many emotional moments with my family during her caring for Ann. I share with her now the sorrow of her loss.●

HISTORY'S LESSON

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. TRAXLER. Mr. Speaker, the eminent historian, Arthur Schlesinger, Jr., in an article in yesterday's Wall Street Journal, offered some insight and forewarnings about the direction neoconservatism may be taking us. Mr. Schlesinger points out that the free enterprise system has survived because our society has developed a sense of social responsibility and has implemented policies responsive to the needs of those less fortunate. He presents us with a lesson in history that should not be ignored or cast aside lightly. I call upon my colleagues to give some thoughtful attention to the words of Mr. Schlesinger.

[From the Wall Street Journal, June 2, 1981]

NEOCONSERVATISM AND THE CLASS STRUGGLE

(By Arthur Schlesinger, Jr.)

Is class warfare what we really want in America? One would have supposed that this is the last thing our already tense society, streaked as it is with anger and violence, needs. Yet this is the direction in which the "neo-conservatism" of the Reagan administration is taking us.

Conservatism, like liberalism, is a house with many mansions. The older tradition of Anglo-American conservatism goes back to Edmund Burke. This tradition, the ethical afterglow of feudalism, was inspired by a belief in the organic character of society. Power was held to imply responsibility, and all classes were to be brought together in harmonious union by a sense of reciprocal obligation. Political leaders in this tradition saw society, not as a bundle of cold and commercial relationships, but as a living moral unity. 19th Century Tories, like Shaftesbury and Disraeli, had no hesitation about calling in the state to redress the social balance on behalf of the poor and thereby to strengthen the ties of community.

In essence, this was the ethos of the landed aristocracy. The rising business classes in the 9th Century had a different view. They sought to strike off the old bonds of prescription and hierarchy and to set the individual free. Their creed was laissez-faire—every one for himself and the devil take the hindmost—and they fiercely opposed intervention by the state to protect those who fell behind. Their goal was to replace the old society of status with the new society of contract. Their interest was not in social cohesion but in pecuniary opportunity, though they appended the self-serving argument that the pursuit of private interest was the best way to promote the general welfare.

THE ROOT OF ALL EVIL

The United States never had a feudal system and thus does not have feudal sentiments. Some contemporary American conservatives—Russell Kirk and George Will, for example—are of the Burkean school. Mr. Will admonished his fellow conservatives the other day that they can carry their vendetta against government too far. But our contemporary neo-conservatives are mostly not conservatives in the older sense. Rather they are 19th Century Manchester liberals sworn to two basic propositions: that government is the root of all evil; and that, once we get government off our backs, our problems will solve themselves.

They add to these general thoughts a specific economic strategy—the old trickle-down theory, or, as it has been rebaptized recently, supply-side economics. According to this creed, the business of tax policy is to allocate more money to the rich in the expectation that they will use it to produce jobs and income for the rest of us. The consistent supply-sider opposes across-the-board tax reduction. The whole point is to redistribute income to the rich on the theory that only the rich can do the saving and investing essential for economic growth. At the same time, the role of government must be systematically diminished. The result is the Reagan policy of cutting taxes for the rich and social programs for the poor.

So the administration proposes to take from our cities a quarter of their federal aid, to take a million or more persons off food stamps, to reduce federal support for education, for dependent children, for mass transit, for subsidized housing, for Medicaid, for nutrition, for the arts, to slash federal programs for jobs, job training and welfare, to retreat from civil rights enforcement, to end legal services for the poor and black lung benefits for coal miners.

Such policies may have some higher justification. But it is idle to suppose that they will not bring suffering to those living on the margin of subsistence in our land. There may be an argument for purification through suffering. There is something distasteful, however, when rich people call for purification through poor people's suffering.

Of course, the rich assure the poor that economic insecurity is the great stimulus to accomplishment. Yet the proposition that economic security saps initiative and self-reliance is one the rich apply freely to others, rarely to themselves. If they really believed their guff about the bracing effect of economic insecurity, they would favor a 100 percent inheritance tax so that their own children would not be denied this great moral benefit.

The massacre of public programs is of course a socially discriminatory policy. For, as J.K. Galbraith has so eloquently pointed out, public services are essential to the poor, not to the rich. The rich send their children to private schools; the poor have no alternative but public education. Occupational safety and health regulations protect the poor, not the rich. The rich buy books and pictures; the poor need public libraries and museums. The rich have estates; the poor go to public playgrounds, swimming pools and parks. The rich have doctors on Park Avenue; the rest of us look at mounting medical bills and yearn for national health insurance.

The neo-conservatism of laissez-faire invites political and social risks that the older Burkean conservatism avoided. By placing pecuniary opportunity above social cohesion, it invites the risk of intensifying the divisions within our society. Neo-conservatism is based on a long-odds gamble—that the release of productive energy allegedly to be wrought by tax reduction will increase benefits for all, and do so before the withdrawal of public concern causes the poor and powerless to lose faith in the justice of the social order.

I do not make this elementary point out of sentimental concern for the less fortunate; nor out of the theory that moves David Stockman to such excited indignation that (in his words) "almost every service that someone might need in life ought to be provided, financed by the government as a matter of the basic rights." I would suggest rather the explosive possibilities when an economic establishment pursues a class war against the poor.

For, as Mr. Galbraith and others have pointed out, capitalism has not triumphed over the prophecies of Karl Marx by loyalty to the gospel of devil-take-the-hind-most. Capitalism has survived because of a continuing and remarkably successful effort to humanize the industrial order, to cushion the operations of the economic system, to combine pecuniary opportunity with social cohesion. It has survived because of a long campaign, mounted by liberals, to reduce the suffering—and thereby the resentment and the rebelliousness—of those to whom the accidents of birth deny an equal chance.

What Marx failed to foresee was precisely the ability of modern democratic society to develop a sense of social responsibility, a working sense of community. Those who would now have us abandon social responsibility in the name of unbridled individualism are doing Marx's work for him—and, it may well be, more effectively than a squalid generation of Communist parties has been able to do. Social responsibility is indispensable to the preservation of a free political order. This is not, I repeat, the talk of a sentimental liberalism. It is the injunction of a wise conservatism—as I imagine Edmund Burke would agree.

THE DAY OF RECKONING

President Reagan is following a dangerous course. To some degree, ironically, the liberal reforms of the welfare state he so volubly deplores will postpone the day of reckoning. But, despite Social Security and unemployment compensation, ordinary Americans will begin to wonder about a society in which (according to the economic unit of U.S. News & World Report) executive salaries in 350 of the Nation's largest corporations rose nearly 10 percent in 1980, in which 15 corporate leaders award themselves more than a million dollars a year (and often double or triple that through stock options or stock appreciation rights) and in which the median compensation for board chairmen—$445,158—is 30 times that of the average factory worker—all this in a day when the deliberate policy of government is to enrich the already rich and to deprive the poor of essential services.

American conservatives in their desire to establish a native tradition often invoke the name of the 19th Century writer and philosopher Orestes A. Brownson. They might well recall Brownson's own words a century ago in that robustly conservative work "The American Republic": "The men of wealth, the business men, manufacturers and merchants, bankers and brokers, are the men who exert the worst influence on government in every country. . . . They act on the beautiful maxim, 'Let the government take care of the rich, and the rich will take care of the poor,' instead of the far safer maxim, 'Let government take care of the weak, the strong can take care of themselves.' "●

A MEMORIAL IN THE HEALING SPIRIT

HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. BOLLING. Mr. Speaker, I found Philip Geyelin's op ed piece in the June 1, 1981, Washington Post interesting and want to share it with my colleagues.

A MEMORIAL IN THE HEALING SPIRIT

(By Philip Geyelin)

An arbitrary and capricious government says this isn't Memorial Day weekend. But tradition says it ought to be, and that's reason enough for a brief report on a little noted and lightly attended memorial service that took place in Constitution Gardens close by the Lincoln Memorial a week ago.

It added something of consequence to the conventional wisdom about what is loosely called the mood of America, in general, and about public attitudes toward war and peace (the so-called Vietnam Syndrome), in particular.

The setting was a two-acre patch of lush lawn and tall shade trees set aside by a unanimous vote of both houses of Congress as the site of a Vietnam war memorial. A starkly eloquent, V-shaped stretch of black marble, half-sunk in the earth and bearing the names of each of the 57,661 Vietnam War dead and the approximately 2,500 still missing, has already been chosen as the winning design.

Apart from the deed of federal parkland, this is a strictly private enterprise. Construction of the memorial will be paid for by public contributions to a Vietnam Veterans Memorial Fund. A nation-wide fund-raising effort is still well short of its $5 million to $7 million goal.

But there is a message in the $1.4 million already raised and in the astonishing progress made on a project that was launched almost single-handedly. It began when Jan Scruggs, an enlisted man in the Army who saw combat in an infantry unit that suffered heavy casualties, walked unannounced into the office of Sen. Charles Mathias (R-Md.) two years ago.

Scruggs had thought long and hard about some way to memorialize the Vietnam war dead. Mathias' response was very nearly instantaneous. Within days he had lined up Sens. George McGovern and Barry Goldwater as co-sponsors of the necessary legislation. By the end, all 100 Senate members had not only voted for it, but co-sponsored it as well.

That, in itself, told you something about evolving American attitudes toward this country's least popular, most controversial war. The simple ceremony on the Mall a week ago told more. The managers of the memorial fund were holding their second annual commemorative services. Measured by the number of those who passed up the beach or the Indianapolis 500 or their own backyards on the sun-baked day to be on hand, it was not a particularly impressive event.

There were symbols: a half-dozen gold-star mothers in crisp white uniforms; a couple of bearded veterans in camouflage combat fatigues. But only the bandstand was solidly packed—with the scarlet full-dress uniforms of the U.S. Marine Band. Not many more than 50 of the 500 or so chairs set up in front of the podium were filled.

But the turnout was no measure of the simple, understated force of the event. There was something in the spirit of those on hand—and in their words—that said a lot for the recuperative powers and enduring sensibility of a nation that only a decade ago was caught up in a raging, embittering debate over its first lost war. The point is that the spirit was so low-key.

Who would have expected 10 years ago, for example, that a principal speaker at a gathering of Vietnam veterans would be Ellsworth Bunker, the former ambassador to (among other countries) South Vietnam.

Lean and erect in his late 80s, and economical with words as a Vermont man should be, Bunker is the very model of a model Establishmentarian. And Vietnam veterans, of course, are supposed to be unregenerately turned off by the Establishment.

But there was Bunker, unwavering in his support for the war's aims, while sensitive to its anguishing complexity—"a war new to the American experience . . . conventional and guerrilla . . . political and psychological . . . limited by restraints we imposed upon ourselves. . . . We went in not for greed but to help resist aggression and we brought our adversary to favorable terms."

There was no argument—only remembrance and talk of reconciliation. "This is a place where we will always be able to express love," said one veteran, an organizer of the affair. "They were young when we were young and each one of their names matters." At the end, family and friends filed slowly by a microphone to speak, very simply, a name.

You could make too much of it; there is plenty of anger left, and bitterness against the government. But what was said and not said at the National Vietnam Veterans Memorial Day Service on the Mall speaks well of how, on balance, this country feels about itself and its place in the world a decade after the national trauma of Vietnam.●

THE GORSHKOV SOLUTION

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. MICHEL. Mr. Speaker, I would guess that the name Sergei G. Gorshkov is not known to most Americans. But in one sense he is one of the most important people in the world insofar as American security—or should I say insecurity?—is concerned. This year Gorshkov marked his 25th anniversary as head of the naval forces of the Soviet Union. During his tenure as head of the fleet, the Soviet Union has become the greatest naval power in the world.

That is right, Mr. Speaker—I said "the greatest" not "the second greatest." We in the United States are so used to thinking of ourselves as rulers of the seas that we forget that "we have lost our maritime superiority." Those last words are not mine but those of Secretary of the Navy, John F. Lehman, Jr.

Admiral Gorshkov has accomplished a feat that is practically without parallel in naval history. He has taken a fleet that for all practical purposes was third-rate, small and inefficient and has built it into the greatest navy in the world.

That is the kind of determination we are facing, Mr. Speaker. Last year, Secretary of Defense Harold Brown told us we are now vulnerable to a first-strike attack on our land-based missiles. Now we learn that we are definitely No. 2 in naval superiority.

Is it too late to recover? It is up to us to answer that question—and as quickly as possible.

At this time I wish to insert in the RECORD, "United States, Soviets Now Sail as Equals" from the Los Angeles Times, May 31, 1981.

UNITED STATES, SOVIETS NOW SAIL AS EQUALS—AMERICAN MASTERY OF SEA LOST AFTER RUSSIAN BUILDUP

(By Robert C. Toth)

WASHINGTON.—"Sooner or later," Adm. Sergei G. Gorshkov predicted in 1976 as he directed an unprecedented buildup in the Soviet navy, "the United States will have to understand that it no longer has mastery of the sea."

The moment that Gorshkov predicted has arrived. "We have lost our maritime superiority," Secretary of the Navy John F. Lehman Jr. said last week as he discussed the emergence of the Soviet navy as a "blue water" force capable of operating throughout the world and far from its home bases.

Virtually all defense specialists now would agree. Much as the Soviet Union's strategic missile strength has grown to equal the U.S. nuclear arsenal, a recent Navy intelligence estimate concluded that the Soviet navy has expanded "to challenge the United States in all aspects of maritime power, qualitatively and quantitatively."

BEAR HAS WEBBED FEET

"The Russian bear has grown webbed feet," the report said. In less than two decades, the Soviet navy has been transformed from a force capable of little more than coastal defense into an armada so formidable that it already has forced the United States to share control of some oceans.

The latest count shows the Soviet fleet with 372 submarines and 275 surface warships, compared to the American fleet of 119 submarines and 335 surface warships. Many Soviet subs are old diesel vessels, and U.S. total tonnage exceeds the Soviet total. Yet all told, the Soviets have 647 major ships of war, compared to 454 for the United States.

And the momentum continues.

Lehman disclosed that the Soviets have begun building their first great nuclear-powered aircraft carrier, the class of warships that has most symbolized U.S. dominance of distant seas since World War II.

OMINOUS PARALLEL NOTED

Naval historians see an ominous parallel between the Soviet navy's challenge to the United States now and Germany's naval challenge to Great Britain before World War I. Germany "forced Britain to surrender influence in large regions of the world," Oxford Prof. Hedley Bull wrote recently, and that was the beginning of the end of its empire.

Despite Soviet construction of new surface warships whose bristling armaments recall the "pocket" battleships of World War II, some analysts argue that the buildup is a defensive reaction to what the Kremlin perceives as American naval threats.

Other authorities, such as former U.S. Navy chief Elmo Zumwalt, say the buildup is designed to support Soviet expansionist policy, up to and including intervention in overseas "wars of liberation."

Gorshkov, who this year marked his 25th anniversary as head of the Soviet navy, seems clearly willing to have his ships used as an instrument of power politics. The expanded Soviet navy has been "a great aid to Soviet diplomacy" in Third World regions, he wrote in 1978.

"In many cases, naval demonstrations have made it possible to achieve political goals without resorting to an armed struggle, merely by exerting pressure through one's own potential power and by threatening to initiate military hostilities," Gorshkov said.

Two weeks ago, as the Lebanese crisis heated up, the Soviets moved nine ships into the Mediterranean in just six days, bringing their total fleet in that area to 39. In 1958, when U.S. Marines landed in Lebanon, the Soviets did not put nine ships all told into that sea.

The 1962 Cuban missile crisis demonstrated even more strikingly Moscow's lack of warships with a long reach, according to Vice Adm. Sylvester R. Foley, deputy chief of naval operations for plans, policy and operations. "The U.S. naval blockade, I feel, made the Soviets recognize the value of naval power to support national aims far from home," Foley said in an interview.

Soviet surface warships began deep-water deployments in 1963. By 1967, during the Six-Day War, Soviet ships were anchored in Port Said and Alexandria, in Egypt, to deter Israeli attack. Soviet ships supported Cubans in Angola in 1975, and later in Ethiopia, if only by their offshore presence. They did the same in 1978 during the Sino-Vietnam clash.

Naval scholars such as Michael McGwire of the Brookings Institution date the Soviet naval expansion to 1961, however, and argue that it was "largely a response to the rapid buildup" of U.S. strategic and conventional forces ordered by President John F. Kennedy.

Soviet warships and submarines, designed to attack U.S. carriers—whose nuclear bombers are capable of hitting Moscow—and nuclear missile submarines, were "forward deployed" into deep water, first into the eastern Mediterranean and the Norwegian seas, then into the North Atlantic and Arabian Sea, as the range of U.S. missiles grew, in this view.

A DIFFERENT STRATEGY

While Soviet surface ships now boldly cruise all the world's oceans, its missile submarines follow a different strategy. Ever since the first long-range missile Soviet submarines began appearing in the early 1970s, they have been deployed in sanctuaries close to home: the Barents and Norwegian seas and the Sea of Okhotz in the Pacific. Unlike U.S. nuclear subs, they do not patrol far out at sea.

Fearful of U.S. anti-submarine weapons, the Soviets established these underwater bastions along their coasts from which to

protect their underwater nuclear missiles. In contrast, the United States "hides" its missile submarines in huge ocean expanses.

And, even though these Soviet sanctuaries are in international waters, the United States avoids antisubmarine operations there lest the Soviets fear Washington is preparing a preemptive strike, according to an Arms Control Assn. report by Joel Wit of the Library of Congress. MccGwire and others also have maintained that the Soviets developed ocean-going warships to protect its sea lanes through the Atlantic and Indian Oceans, between European Russia and the Soviet Pacific coast. They argue that the Chinese threat to the Trans-Siberian railroads require the alternate sea route.

But to Navy Secretary Lehman and Adm. Foley, the Soviets do not have the same critical dependence on the sea as the United States and Moscow's blue-water navy cannot be justified as a defensive force.

"They are out to oppose our lines of communication that bring us raw materials and are vital to resupply Europe if necessary," Foley said.

Although the Soviet navy has only about 275 surface warships, Russia's commercial and fishing fleets are ready auxiliary vessels. "If one of their civilian tankers is passing nearby, the Soviet navy can call on it to service its ships," Foley said. "That gives them tremendous flexibility."

Moreover, the Soviet naval mission has been to keep the United States from exercising free rein in certain ocean regions, not to control those regions themselves. This requires fewer ships than the "sea control" mission.

Lehman, with White House support, wants to increase the U.S. Navy by one-third, to about 600 ships, including 15 carrier-centered battle groups (up from the present 12) to comprise a three-ocean fleet (instead of the present two-ocean capability).

NO SIGNS OF SLACKENING

Soviet shipbuilding shows no signs of slackening, however. Last year the Soviets launched three new classes of submarines, for example, totaling 14 vessels, nine of them nuclear. By comparison, the United States launched two (nuclear) submarines all told in 1980.

The Soviets launched the first gigantic Typhoon ballistic missile submarine which, at more than 25,000-ton displacement, is by far the world's largest submersible. Three more Typhoons are already under construction.

The Soviets have four so-called "aviation cruisers" with helicopters and jet aircraft aboard. Two more are under construction. In addition, they have begun manufacturing components and preparing shipyards for their first nuclear-powered carrier, which is expected to displace up to 75,000 tons and carry high-performance, fixed-wing jets.

By 1990, the Soviets will have the ships necessary to form at least five carrier-centered battle groups, and authorities such as J. S. Breemer, writing in the Naval War College Review, argue that the goals and mission of the Soviet fleet thereafter will shift from "sea denial" to become "the more traditional goal of a great naval power: maritime supremacy."

Kaiser Wilhelm's Germany did not seek so much, It wanted only to limit Britain's freedom of maneuver, not to rule the waves in Britannia's place, according to Prof. Bull.

The parallels between that competition and the current Soviet challenge to the United States are striking, Bull wrote. Both challengers were dominant land powers, without long naval traditions, with geography limiting access of open sea but with dedicated naval leaders (Alfred von Tirpitz and Gorshkov). However, there are also important differences. For example, Kaiser Wilhelm's Germany was a dynamic industrial power while the Soviet Union is "in a position of decisive economic and technological inferiority" to the United States, Bull said.

The U.S. Navy is not as sanguine about a technological edge. The Soviets "have made technological advances which in some cases are superior to our own," Rear Adm. Sumner Shapiro, chief of naval intelligence, told Congress recently. "We can no longer depend on superior American technology to offset Soviet numbers."

Among the most striking Soviet advances are:

—Five Alpha class titanium-hulled, nuclear-powered attack submarines, which are the fastest (perhaps 45 knots), deepest diving (up to 4,000 feet) in the world; construction techniques (used on these vessels) may be applied to missile submarines.

—The "pocket battleship" Kirov, with a sistership under construction, is the Soviet's first nuclear-powered warship, "twice the size of any surface combatant, other than an aircraft carrier, to be built since World War II," Shapiro said. It is equipped with new generations of surface-to-air missiles, long-range anti-ship cruise missiles, and anti-sub missiles as well as various guns and helicopters.

Even before these technological developments are felt, the Soviets have already "forced the United States to share control of the sea," Bull said.

"The distribution of naval power is better described today in terms of equilibrium rather than in terms of preponderance of a single state," Bull wrote. This balance "is an exceptional, not a normal situation in ocean affairs, and its implications for world politics are not yet fully apparent."●

TRIBUTE TO A RETIRING SUPERINTENDENT OF SCHOOLS IN WHITE PLAINS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. OTTINGER. Mr. Speaker, I would like to take this opportunity to pay tribute to Dr. Arthur P. Antin, who is retiring this June from the White Plains, N.Y., public school system after completing 25 years of service there. For the last 12 of these years, Dr. Antin has served as the superintendent of schools.

Long active in White Plains civic affairs, Dr. Antin is a member of the Greater White Plains Council of Community Services and is a trustee of Pace University and of the White Plains Public Library.

Professionally, Dr. Antin is a past president of the New York State Association of School Business Officials, of the Lower Hudson Council of Chief School Administrators, and of the Southern Westchester Council of Chief School Administrators.

Over the last 25 years, Dr. Antin has served well all the students who have attended the White Plains school system. He has always been a great help to me whenever I have needed his advice or assistance. I am glad to know that he will be close by in his new capacity as dean for students at the College White Plains campus of Pace University.

I would like now to wish him all the happiness that he has earned and so richly deserves. I am sure White Plains students will miss his expert guidance.●

AIPAC DIRECTOR ADDRESSES SUBCOMMITTEE ON AMERICA'S MIDEAST POLICY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. KEMP. Mr. Speaker, last month, the Subcommittee on Foreign Operations, on which I serve, had the opportunity to hear from Mr. Tom Dine, newly installed executive director of the American Israeli Public Affairs Committee. Following in the fine tradition that AIPAC has set over the years for public service, Tom's testimony was an erudite and enlightening analysis of American foreign policy concerns and strategic interests in the Middle East. In view of the difficult, multifaceted questions facing the United States both in our relations with the countries of that region and our need to address the growing threat posed by the Soviet Union, I insert Tom Dine's perceptive remarks in the RECORD:

THE UNITED STATES IN THE MIDDLE EAST: A FORCEFUL OR FEARFUL FOREIGN POLICY?

I am delighted to be participating, full-time, in my first AIPAC Policy Conference. I am even more delighted to report to you that we have a full house. Washington Hilton rooms are filled to the brim as are the two hotels across the street, and there is standing room only for the two luncheons and our large dinner tonight.

We have one objective over the next 48 hours—and that one objective must be carried out through the summer months, and into the fall: to persuade and convince Members of Congress to oppose, in no uncertain terms, the Saudi arms package and to oppose the sale publicly—for the record.

For these two days, we are here to learn and to do. Then we must return to our communities to educate and energize our relatives, our neighbors, our associates, our friends—Jew and non-Jew—that the arms package the Administration is proposing to sell Saudi Arabia is not in the best interest of the United States. And it certainly is not in Israel's interest.

In the midst of new realities, the first seven months of my AIPAC stewardship—I report to you—have been anything but calm.

1. November 4, 1980, witnessed a major change in political power that may prove to

be a political realignment of a mag... unseen since 1932. It needs to be clearly recognized that Israel has had—and will continue to receive—bipartisan support. But it is not easy when old friends like Church, Javits, Stone, and Brademas are no longer in Congress.

2. The quickness by Defense Secretary Caspar Weinberger and Joint Chief of Staff David Jones in pushing the Saudi arms package has kept AIPAC in high gear since February. We are in an all-out campaign to stop the sale. I want this assembly of the most politically active and astute of America's Jews to know that AIPAC will go all-out as long as we have to, to show Howard Baker he does not have the votes in the Senate, and for him to recommend to the President not to send the package to Capitol Hill.

3. In the leanest of all fiscal years that I have witnessed in my 16 years in Washington, AIPAC has been covering every base possible to preserve and maintain the Administration's request to Congress of $2.2 billion of military and economic assistance for Israel—and we are succeeding. At the same time, I am pleased to report that the House and Senate Appropriations Committees decided not to rescind the $12.5 million the Administration wished to cut from the Soviet Jewry resettlement program. Again, your lobby has been actively at work.

4. Then there is the missile crisis in Lebanon that could easily and quickly evolve into open warfare between Syria and Israel, if not the United States and U.S.S.R. as well.

5. And finally, this policy conference itself has required an enormous amount of preparation.

These events recall to mind a quote from Othello: "Oh, now forever/Farewell the tranquil mind."

Four months into the Administration, many of the unproductive detours of the Carter Administration's foreign policy appear to be behind us. Continuing attempts, glaring acts of insecurity, to exorcise the weighty ghost of Henry Kissinger, for instance, have been set aside for expressions of national confidence.

This doesn't mean, however, that we are beyond the era of clumsiness. This Administration, like the last two, appears to be of several minds. One day the public hears from Haig, another day it is Weinberger, sometimes it is Meese, and at various times when the President has spoken as he did recently at the moving and meaningful Holocaust Commission ceremony in the East Room, the White House press office has seen fit to go out and correct his statement. Structural as well as substantive contradictions threaten to prevent the resurgence of American idealism and power abroad.

In the 1980s, U.S. foreign policy must guard against twin perils: a mismanagement of our contest with the Soviet Union and a mismanagement of the international economy. The Middle East provides ample opportunities for false steps in both of these areas due to Arab-Israeli tensions, oil and petrodollars, and nuclear proliferation.

How has the Reagan Administration responded to these dangers and what is to be done?

So far, there have been several forceful efforts to our foreign policy.

Recognizing and confronting Cuban and PLO actions throughout Central America, but particularly in El Salvador, Honduras, and Guatemala have been, in my judgment, long overdue. The United States can never ...ow away the use of ... diplomacy. As Thomas Hobbes ... increase the perception of one's po... have to use it effectively once in a ...

Defense spending is rapidly grow... so is the arsenal of our major adver... are not in a static situation but a ... in terms of what the Soviet milita... and the state of the technological ...

At NATO, the Administration has ... to shore up the alliance's policy of 3 per... real growth in annual defense budgets and last week the allied governments agreed unanually to show qualitative improvements in areas of added funding.

Regarding Poland, the Administration has been tough and has actively pursued our European friends to also join in our warnings to the Soviets of grave consequences if Poland is invaded.

The U.N. and other international fora are different and less hostile places from our point of view. Ambassador Kirkpatrick openly counters Third World and Arab hostility toward Israel—and toward the United States.

We could not ask for a better President or Secretary of State or National Security Adviser when it comes to putting international terrorism in its proper place.

The bilateral relationship between Israel and the United States is positive and progressing well. For the first time since the Yom Kippur war, Israeli officials are not put on the defensive in dealings with their U.S. counterparts. The $2.2 billion aid request is generous when seen in the context of this city's fiscal environment. The Israeli Aircraft Industry has been given the green light to compete in selling Kfirs to Ecuador and other Latin governments, and the U.S. Armed Services are to procure from Israeli manufacturers $200 million worth of military goods for starters. And when an American Secretary of State, on Israeli soil, in Jerusalem, publicly called Israel a "trusted ally," all of us felt goosebumps.

There have been several bargaining efforts which strengthen America's hand abroad.

The Japanese auto imports agreement is an important step in defusing the protectionist drive in this country and to cool off the export buildup from Japan. Also, in terms we can understand, it was a clear demonstration that Washington can ask for a quid pro quo from an ally and a friend—and receive it.

In Lebanon, Phil Habib was appropriately trying to defuse the threat of hostilities caused by Syria's missile installation in the Bekaa Valley and Israel's insistence that they be removed. There should be no rewards to either the Soviets or Syrians for violating the status quo. But, clearly, the "sword of Damocles" hangs over the Levant.

This is a good record. It demonstrates strength. But we have witnessed several fearful efforts in our foreign policy that undermine the forceful approach.

Lifting the Soviet grain embargo was the wrong signal at the wrong time for the wrong reasons. The Secretary of Agriculture cheered the triumph of "market forces," but agri-business discounted the injurious diplomatic impact of this decision, as well as what the embargo had done to Soviet society. A few days after the embargo was jettisoned, Kevin Klose of the Washington Post reported from Moscow that the Soviets had been "hard hit" by the grain ban.

Soviet domestic scarcity is affecting its foreign policy. Meat and produce shortages have forced the Soviets to cut back on food aid to Poland where shortfalls in food had sparked demonstrations. But the Administration, at a time when Moscow was vulnerable, both domestically and in its relations with its next door ally, lifted the embargo and forfeited a potentially powerful economic club that could have been used to keep the Soviets in line with regard to Poland, human rights, Soviet Jewry, etc.

The awkward approach to Pakistan has serious implications. The Pakistani government wants to build an Islamic bomb; the United States, in the past, has tried to dissuade the Pakistans from this. To enhance our anti-Soviet alignment we now want to provide $500 million worth of military aid to Islamabad and after the fact think about the advent of nuclear weaponry in South Asia and the Middle East. We may inadvertently spur a regional nuclear arms race.

Let's now move into another striking area where the Administration is at cross-purposes with itself—arming Saudi Arabia with America's most advanced, lethal weapons system from our conventional arsenal.

The package now consists of four categories of items: 1,100 advanced Sidewinder air-to-air missiles; 62 pairs of external fuel tanks that conform to the fuselage of the F-15 and that, ironically, are now built in Israel; 7 KC-135 aerial tankers; 5 AWACS (Airborne Warning and Command System) aircraft.

Why is this arms package not in our best interest?

1. It is dangerous to the United States to transfer sophisticated defense technologies to arm an inherently unstable government. The recent example of Iran should be enough to restrain such an arms sale. The Khomeini regime inherited the finest U.S. naval aircraft, the F-14, and its sophisticated missile system, the Phoenix, plus the U.S. Navy's advanced ship-to-ship missile system, the Harpoon. It is presumed by most military analysts that the vital technical data associated with these highly advanced weapons systems ended up in the U.S.S.R.

The overthrow of the Shah of Iran by an anti-Western, leftist opposition could happen to the Saudi royal family, an unrepresentative ruling elite as were the Pahlavis. The security of the AWACS in the hands of the Saudis, is of great concern; the potential for an AWACS to be flown, for instance, to South Yemen and then on to Moscow is not considered farfetched. Twelve U.S. Air Force F-15 pilots last month publicly expressed their objection to the sale of the advanced Sidewinder missiles "because it compromises the classified AIM 9L construction." "Why," they asked, "give our technological edge away?"

How advanced is AWACS?

It is both a surveillance and an air command post. The AWACS crew can track aerial targets within a 600-mile circle from an altitude of 30,000-35,000 feet. The AWACS can also "look down" with its radar and distinguish from the ground clutter such small aerial targets as jet fighters or cruise missiles at low altitude.

On March 10, 1975, before the House Appropriations Subcommittee on Appropriations, then Air Force Chief of Staff Gen. David Jones, and now our Joint Chief, in responding to a question about "revolutionary" advances in weapons, said "the system that I think is the greatest breakthrough in command and control in my entire military career is the AWACS." In a memorandum prepared for the Subcommittee afterwards, the Air Force stated AWACS will be "the

central nervous system for our entire force structure."

The AWACS has a range of 250-350 miles. If it were to loiter over the Empire State Building, it could simultaneously observe flights in and out of Logan, Philadelphia, Washington National, Baltimore, even Richmond and Pittsburgh airports, and also the sea lanes.

2. Selling F-15 enhancement items such as the Sidewinder missiles and the conformal fuel tanks would violate explicit assurances provided by the Congress on May 9, 1978 when Defense Secretary Harold Brown wrote Senate Foreign Relations Committee Chairman John Sparkman regarding limitations on the offensive capabilities of the Saudi F-15s. Making such sales now calls into question the value of any Executive branch agreement with the legislative branch concerning arms transfers.

3. An unbridled arms race involving the most advanced weaponry that now exists in the American and European arsenals is unfolding. The level of technological sophistication in the regional military balance will be raised to an even higher level, creating less, rather than more stability. This is no way to achieve peace.

4. The sale is a threat to Israel's security. To quote that 1975 Air Force memorandum again, "AWACS surveillance would deter attacks that depend on surprise for success." Both the U.S. and the Israeli Air Forces rely on preemptive strikes. If the Saudis now possessed AWACS, it could over Saudi territory monitor Israel's Air Force with regard to the missile crisis in Lebanon. On July 4, 1976, in a peacetime situation, a Saudi AWACS over Saudi territory could have picked up the Israeli C-130s flying down the Red Sea over to Kenya and on to Entebbe and alerted Idi Amin.

5. Where is the Saudi quid pro quo? America is held hostage by Saudi oil. This is the fearful part of foreign policy. This is the weak America; this is a continuation of Carterism.

This Administration apparently is not totally fearful of oil. Just last week, for example, Libyan diplomats were deported from this country. Yet we are dependent upon Libyan crude oil. U.S. officials agree that a tangled maze of energy policies and crisis plans exist following the deportation, leaving our country even more vulnerable than in 1973-1974, to economic shocks of an oil cutoff.

As concerned Americans, we must oppose the Saudi arms package. Our country must change both its attitude and its policy toward the 4,000 princes that make up the House of Saud.

Our objectives:

Stop the sale of the arms package—preferably without a vote in Congress:

Treat Israel favorably, including an acceptable and satisfactory defense arrangement from the Administration;

Obtain from the Saudis quid pro quos in the form of dropping their open hostility to Camp David and Sadat, stopping its funding of the PLO to the tune of $1 million a day; stabilizing oil prices rather than continuing the steep rise as has occurred from the $12 per barrel in 1978 to the $32 per barrel today, stopping the calls for jihad against Israel and the cleansing Jersusalem of Jews, and allowing the U.S. Air and ground bases on Saudi soil itself so the Soviets can, in fact, realize our resolve.

Including the prospective enhancements, the Saudi F-15s could not effectively defend against air attacks from the Soviet Union. U.S. military support would be necessary to repel successfully such attacks. The Saudis may even have serious difficulties defending against sustained air attacks from major regional powers like Iran, without U.S. assistance.

We want an active and powerful America, a forceful foreign policy, one that is wise and judicious, selective and humane, tough and forward marching, one that demonstrates in Teddy Roosevelt's phrase, velvet on iron.

We must speak up and reject contradictory and self-defeating tendencies such as kneeling to desert rulers, salaaming to black gold, putting greed ahead of principle, carrying out a fearful foreign policy. Otherwise, in our contest with the Soviet Union, our deterrence, our strength, our purpose will not be respected.

We, in the Jewish community, can bring matters to a head. We can protest and petition the Legislative branch to say "no" to Saudi blackmail and American acquiescence. We must do all this—before it is too late.

We must start now.

President Kennedy often used the following story at the conclusion of speeches, including a talk at the AFL-CIO convention a week before he was murdered:

Marshall Lyuaty, the great French marshal, went out to his gardener and asked him to plant a tree. The gardener said, "Why plant it? It won't flower for a hundred years." "In that case," the marshal said, "plant it this afternoon."

AIPAC has been planting trees on Capitol Hill at a rapid rate. Today and tomorrow you must join us in that effort and, upon your return home, plant them there as well. This political action is in the interest both of a secure Israel—and a strong America.●

INTERPARLIAMENTARY UNION

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. PICKLE. Mr. Speaker, the Interparliamentary Union meeting held this year in Manila was attended by some 80 nations. The Philippine Government proved to be an unusual host, and I think made every delegate from every nation feel pleased that they were in Manila. The Philippine International Convention Center was one of the largest and most commodious meeting halls I have ever seen, and it is bound to have been the envy of all nations. The Philippine Islands are developing and building. They have a beautiful mix of people with thousands of "jeepneys" cruising the boulevards. Major buildings and edifices are appearing, which shows that the city of Manila is growing in both an aesthetic and industrial manner. There is some opposition to President Marcos, but I found that by and large people felt that he was developing the country. The people seem to be busy, alert and progressive.

I was privileged to be a member of the International Security and Disarmament Subcommittee and I found it to be extremely interesting because of the confrontations with the Russian delegation.

At the start of the Subcommittee meetings some of the nations wished to condemn Russia again for its blatant invasion of Afghanistan. But this was softened to include our agreement criticizing "brutal invasion and aggression of one country over another". I insisted, however, that this phrase be related to the Afghanistan invasion and finally got what I thought was an understanding by the committee to refer to the resolution of criticism against Russia passed at the IPU conference in Berlin last year—1980. When we came to the point of the adoption of the resolution, the phrase "as passed at the Berlin IPU meeting" had been dropped, and I thought it should be specifically included. The Russians objected because they wanted no reference to the criticism levied against them last year in East Berlin. We put the question to a vote, however, and the Russians lost. This was a small victory, but I think it pointed out again that all of the nations objected to the invasion of their country by any other nation—Russia included.

In my Committee I also had proposed that we make a positive statement inviting and encouraging both North and South Korea to sit down at the bargaining table to see if there could be any way to resolve their difficulties. These two countries pose the most imminent threat to peace in the Pacific or Far East theater and I think it would be well that we encourage the people to at least talk and look at possible ways for unification. As we all know, a tremendous amount of firepower is located in that general area, and it could spark a conflagration at any moment. Here again, the Russians objected, and I think they objected primarily because they must have figured the United States was "up to some mischief." When my motion on the Korea matter was not gaining approval, the Russians wanted to request the removal of all forces in the Indian Ocean, and I felt this was particularly aimed at Diego Garcia. Because the Committee had refused to specify an area like Korea, they felt similarly they should not specify an area like the Indian Ocean. Therefore, this statement of policy was omitted and I suppose Russia and the United States maintained a draw at that point.

Throughout the discussions the United States did not retract from its position on the SALT II Treaty. We agreed to continue to study and to explore means for the limitation of strategic armament, but we clearly asked for equity and understanding on the part of all nations.

Altogether, I thought the conference was a beneficial one. The United States did not come in for any overt

criticism and I think we made new friends at the conference. This is the primary advantage of these Interparliamentary Union trips: If the United States was not there attending the meetings and the conferences it is very likely that we would receive a lot of negative criticism by the other nations of the world. When we can join into prolonged and even heated discussions we are still showing our good intent and that we are indeed a participating democracy. We met every morning and every afternoon for a week in strong debate. Yet I am convinced that this kind of exchange of information and feeling is the best way to maintain better relations in this world. Sometimes I think we do more good at the IPU meetings than we do at the United Nations. It should be remembered that the United Nations are representatives appointed by their governments, whereas the people meeting at the Interparliamentary Union meetings are elected delegates from parliamentary bodies, and I believe we come as near to maintaining peace as does the United Nations. The IPU could be more effective if given specific powers of commitment. I would hope that our governments and the world press would come to the next meeting in Havana, Cuba, and in Nigeria the following year to see for themselves and to report more extensively to the people the good that is achieved through these kinds of exchanges.●

TRIBUTE TO THOMAS J. HURNEY

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. FAUNTROY. Mr. Speaker, it is said that the greatest gift a person can give another is of himself. That is what has made Thomas J. Hurney one of the most significant philanthropists in our Nation's Capital and perhaps anywhere in the country, for he has given his time, his name, his money, and his intellect for the good of others.

Tom Hurney's sincere efforts to extend a helping hand to those who cannot make it by themselves is why he is being honored Wednesday night by the Shaw Community Center Food Committee.

The Shaw Community Center Food Committee is observing its 15th anniversary this year; its only function and enterprise is to distribute Thanksgiving Day turkey baskets to families living in the inner-city who otherwise would not be able to participate in this annual American tradition.

It is because of men and women like Tom Hurney that the Shaw Community Center Food Project has, on the average, been able to provide baskets for over 300 families each year since 1966.

The food project expects to increase its generosity this year because of the work of Thomas J. Hurney. He has already told friends who plan to pay tribute to him or his community service that they should not give gifts to him, but should instead give to the Shaw food project.

In the Holy Scriptures, the Apostle Paul writes:

Though I have all faith, so that I could remove mountains, and have not charity, I am nothing.

Tom Hurney is everything because he has boundless charity for his neighbor. I am proud to join the Mayor of the District of Columbia and the City Council of the District of Columbia in saluting a fellow native Washingtonian, Thomas J. Hurney, for his dedicated devotion to charity.

In conclusion, I will share with my colleagues a copy of the proclamation issued by Mayor Barry and the resolution resolved to by the City Council of the District of Columbia on behalf of Thomas J. Hurney.

THOMAS J. HURNEY DAY, JUNE 3, 1981

A PROCLAMATION

Whereas, on Wednesday, the Shaw Community Center Food Committee will roast Thomas J. Hurney, in recognition of his many varied contributions to our community; and

Whereas, Shaw Community Center is a community Base Program for children and youth; and

Whereas, all proceeds from the "Hurney Roast" will go toward the Shaw Community Center's annual Thankgiving Day food project; and

Whereas, the life of Thomas J. Hurney not only inspires the youth of our nation but also exemplifies the hope, promise and fulfillment of the American dream: Now, therefore, I, the Mayor of the District of Columbia,

Do hereby proclaim Wednesday, June 3, 1981, as "Thomas J. Hurney Day" in Washington, D.C., and call upon all of our residents to join with me in honoring Thomas J. Hurney in grateful acknowledgment of the exceptionally outstanding contributions which he makes to his fellow citizens.

A RESOLUTION TO HONOR THOMAS J. HURNEY AND DECLARE JUNE 3, 1981, AS THOMAS J. HURNEY DAY IN THE DISTRICT OF COLUMBIA

Whereas, Thomas J. Hurney is a fourth generation Washingtonian and has long been associated with community services in the District of Columbia as a member and past-president of the Washington Touchdown Club;

Whereas, Thomas J. Hurney is well known not only by those who participate in and frequent the many events organized by the Washington Touchdown Club, but also by the Washington community as a whole for his commitment to our city, amply shown by his work with the Shaw Community Center, the Boys Club of Greater Washington, among many other civic and fraternal organizations in the District of Columbia; and

Whereas, because of this demonstrated commitment to our community, the Shaw Community Center Food Committee is "roasting" Thomas J. Hurney on Wednesday, June 3, 1981: Now, therefore, be it

Resolved by the Council of the District of Columbia, That this resolution may be cited as the "Thomas J. Hurney Day Resolution of 1981".

SEC. 2. The Council of the District of Columbia wishes to express its appreciation to Thomas J. Hurney for his unselfish commitment to our community and declares Wednesday, June 3, 1981, as Thomas J. Hurney Day in the District of Columbia.

SEC. 3. This resolution shall take effect immediately.●

TRIBUTE TO FORMER AMBASSADOR RICHARD GARDNER

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mrs. FERRARO. Mr. Speaker, on Friday, the President announced his intention to name a new Ambassador to Italy to replace Richard Gardner, a dedicated public servant appointed by President Carter. I would like to take this opportunity to express my appreciation and, I am sure that of my colleagues, to Mr. Gardner for a job done superbly, often under difficult circumstances.

Richard Gardner performed his job in an outstanding manner and was responsible for great strides being made during the last 4 years to improve the relationship between the Italian and American peoples. A recent article from La Sicilia, Sicily's largest newspaper, attests to the high esteem in which Mr. Gardner is held and I would like to share excerpts from this article with my colleagues:

TRIBUTE TO FORMER AMBASSADOR RICHARD GARDNER

By that strange, unwritten law, seemingly anachronistic and absurd in a time of high specialization in all sectors of modern life, U.S. Ambassadors are still considered as "personal" representatives of their President, and therefore follow his destiny, good or bad.

Richard Gardner is therefore leaving, to make room for a man of Reagan, the new President. Personal merits do not count, nor is the amount and quality of the work done determinant: he must go because another is entitled to that place, maybe a friend, maybe a campaign assistant. Nothing amazing and nothing shocking in this: it is known to be a rule of the game, which was always observed.

But the "Gardner case" is a special case. Because this educated, balanced man, very active in his official mission but at the same time discreet and prudent in official contacts, is a man who had a deep influence in the diplomatic relations between Italy and the United States. He landed in Rome, perhaps the "hottest" capital of the Western world, in a tempestuous moment, and his path was immediately laden with difficulties, since his interlocutor was a government torn by sectarianism in a general political situation marked on one hand by the

strongest communist party in the free world, and on the other by the strongest neofascist party in the Western world. These four years were tempestuous for the whole world, troubled by an escalating economic crisis without precedent in the last half century; four years in which the ghost of war often grazed us (Afghanistan, the Horn of Africa, Israeli-Arab relations, Poland, the Iranian revolution), and in which Italy suffered the bloody experience of terrorism, the trauma of Moro's assassination, the shame of the Lockheed affair and of a hundred other scandals, the wounds of an apocalyptic earthquake. Yet, in these four years Gardner held his post with composure and sang-froid, and with very great diplomatic ability.

A professor of international law at New York's Columbia University, already experienced in international relations thanks to an intense and extended cooperation with Presidents Kennedy and Johnson, he immediately tackled in Rome the main difficulty encountered by all his predecessors: the relationship with the communists. And he solved the problem in a clear and at the same time tactful manner: the United States—he said—would never support or encourage an Italian Government open to communists, but it would not exercise any form of interference and political pressure in Italian internal affairs. A different attitude which was generally appreciated, particularly as compared with the position of previous Ambassadors who had acted as spokesmen, if not protagonists, of different attitudes and "blockades". The "ideological block" which had surrounded the American Embassy for decades crumbled rapidly, and artists, scientists, leftist journalists and even PCI political leaders obtained visas for travelling to the United States without difficulty: L'UNITA', the official PCI newspaper, was able to open a correspondent's office in Washington, and Giorgio Napolitano Berlinguer's heir apparent, was able to give lectures in American universities.

At the same time, Gardner opened Villa Taverna to intellectuals, journalists, democratic politicians, and wove his portion of the large tapestry through which—after half a century of uncertainty—a socialist party would appear which, overcoming at long last its subordinate position with respect to the PCI, could accept Italy's full participation in the Western world, and would support stabler governments and economic, social and administrative structures adequate to meet the needs of a modern industrial democracy.

That he succeeded in his work appears to be confirmed by facts, notably the coming to power of a young and quite different socialist leadership which represents the independence and the role of the PSI, based on clearly Western, reformist, positions, and offers a renewed possibility of cooperation with the DC and a factual convergence with the great European social democracies.

Gardner's action, furthermore, was not restricted to his relations with the Palace and surrounding areas. Gardner also became popular by travelling all over Italy; during his mandate he visited all Italian regions at least twice, he gave an impressive series of lectures—over one hundred and fifty, it is estimated—in universities, Chambers of Commerce, and the most qualified circles; he took part in cultural and popular events; he was among the first—with tangible evidence of his participation—to visit the earthquake area in Irpinia.

He also had the time and inclination to read Mazzini's writings and to convince his

CLARK PORTEOUS RETIRES FROM MEMPHIS PRESS-SCIMITAR

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. FORD of Tennessee. Mr. Speaker, on May 29, Clark Porteous, a reporter for the Memphis Press-Scimitar for 47 years, retired.

Mr. Porteous, one of the Midsouth's most distinguished newspapermen, was born on July 10, 1911, in New Orleans and raised in Laurel, Miss. On June 9, 1934, 1 day after graduation from Southwestern at Memphis, he joined the Press-Scimitar and quickly established himself as an aggressive, thorough, and impartial reporter.

In his long and brilliant career with the Press-Scimitar, the Clark Porteous byline has appeared over thousands of stories ranging from local civic club meetings to breaking national news events. As a Nieman fellow to Harvard University in 1946–47, he published a nationally recognized novel about lynching in Mississippi. As an investigative reporter he exposed a job sales scandal in Mississippi and the neglect of a babysitter in the death of a 6-month-old Memphis child.

As a reader's reporter, he has won thousands of friends for the Press-Scimitar with his tireless coverage of local news. He is the most widely recognized reporter in the Midsouth, counting among his many friends and admirers the most powerful of politicians and the most anonymous of readers.

Clark Porteous has served the public in the highest tradition of his profession. His retirement is a great loss, but through his career he has left an example of excellence for all reporters to follow.

I commend the following article on Mr. Porteous' fine career to my colleagues:

[From Memphis Press-Scimitar]

CLARK PORTEOUS RETIRING AFTER 47 YEARS AS NEWSMAN

(By David Rapp)

Clark Porteous, whose Press-Scimitar byline has been a byword in the Mid-South for close to half a century, is retiring.

His departure from the newsroom Friday will end a career that spans 47 years and thousands upon thousands of news and human interest stories—from politics and parades, fires and festivals, to lynchings and assassinations.

Through it all, he earned a reputation among his readers, his news sources and his colleagues alike as an aggressive and thorough, but fair and impartial reporter.

The late Edward J. Meeman, the first of three editors Porteous served under, once wrote: "Clark Porteous is objective. He gets the facts, and lets the facts speak for themselves. He [illegible]. He does not color the [illegible] actual color of the facts, be those facts bright or drab."

Milton R. Britten, the present editor of The Press-Scimitar, said:

"He's just a great information getter. No matter what it is, if you need information, one way or another Clark can always get it. He was and is widely known in Memphis and the Mid-South. He's also widely trusted by news sources, even when writing about things they'd just as soon not see in the paper.

"Clark was always The Press-Scimitar's star reporter and he still is. He was an example to every person who came to work for the paper. He's just in love with being a newspaper reporter and he has done an exceptional job."

THE EARLY YEARS

Thomas Clark Plaisance Porteous, a high school track star and debater in Laurel, Miss., came to Southwestern at Memphis with a track scholarship and soon joined the college newspaper, later becoming its editor. He was graduated June 7, 1934, and one day later joined The Press-Scimitar as a reporter.

It didn't take long for him to prove he had a nose for news and an ear for the colorful quote.

After a Memphis man shot his 20-year-old son, young Porteous managed to get an interview with the father in his jail cell.

"I didn't know exactly what to ask a man who had shot his son, so I told him the good news that his son would live." Porteous recalled years later. "But he swore an ugly oath."

When Porteous asked the man if he wasn't glad that his son was going to recover, the father replied, "Hell, no, what do you think I shot him for?"

Clark's account of the unusual interview appeared across the top of Page 1 in The Press-Scimitar.

Two years later, in 1936, an American Airlines plane, the Southerner, crashed on a Sunday evening between Memphis and Little Rock. Porteous was sent with a photographer to find the plane, if possible.

Near Goodwin, Ark., some parked vehicles led them to a man who thought he had seen a ball of fire plummet into the swamps. Anxious to continue the search, Porteous borrowed a flashlight and led a posse through the swamps.

"We began to find pieces of aluminum in the broken trees," he remembered later. "Finally I stumbled over something, and it was the body of a man, at least the torso as the part below the waist was missing."

The cause of the crash is still a mystery, but Porteous' account in the next day's Press-Scimitar scooped the nation's press.

WIDE RANGING

In the following years Porteous pursued other stores with equal persistence. Whether it was covering the Maid of Cotton tours, digging up political stories or running down a new City Hall angle from E. H. "Boss" Crump, Porteous was usually on the scene first.

In 1946 he took a year's leave of absence when he won a Nieman Fellowship to Harvard University along with 12 other journalists from across the nation.

His tenure at Harvard resulted in a novel, South Wind Blowing, based on a 1937 lynching he witnessed in M[illegible]ppi. The book took an unus[illegible] with each of 19 character[illegible] lynching of a black m[illegible]

"Th[illegible] and received a review in the New York Star. "It is much more than good reporting, it is a high artistic achievement," read the St. Louis Post-Dispatch.

The real story of the lynching also reveals Porteous' resourceful ability.

Told that a posse had captured a black man wanted for killing a white man in Slayden, Miss., Porteous went to Slayden where he found several men in a store discussing what to do with the black man. He noticed them leaving through a back door one by one, then followed them to the schoolyard.

"They brought the man out, stood him on the front of a Model A Ford, put a noose around his neck and tied the rope to the limb of a tree," Porteous wrote later. "Behind this you could see the little desks in the school through an open window. We were running towards the scene when they drove the truck out from under the man, left him dangling."

Porteous and photographer Mervin Rosenbush pretended to be commercial photographers and began snapping pictures and taking orders for prints from the men standing next to the body, backs to the camera. Some became suspicious and the pair lit out for Memphis "in Rosy's souped up Ford," and though they were chased for a while, they got away.

DIG, DIG, AND DIG

The late Robert Johnson, long-time columnist for The Press-Scimitar, wrote a 1955 column describing Porteous in terms familiar to most of his colleagues and sources:

"Through the years, Press-Scimitar readers have come to know Mr. Porteous as one who had a way all his own of getting at the bottom of things. (His) stubborn and resourceful tactics have won the high respect of his colleagues, made him known as an expert in dig-dig-and-dig uncovering of facts.

"He has handled many of the biggest news happenings, from major crime to big labor news, politics and features. But one thing which makes Clark a top newspaperman is that, even if it's just a small item, they're all 'big stories' to him."

Some of the big stories he covered were the 1961 admission of James Meredith as the first black to enter Ole Miss at Oxford, where he dodged bullets and "had to go into the YMCA now and then to try to wash the tear gas out of my eyes"; the January 1956 Emmett Till trial, when Porteous served as the main liaison between blacks and whites; and the 1977 death of Elvis Presley, when he wrote the Page 1 obituary of the famed entertainer.

But he also was known as the "people's reporter" and for his constant efforts to get a "new angle" on every assignment.

He gave first-person accounts of everything from riding a jet plane in the early 1960s to a tour of Memphis topless clubs in 1975.

Some examples:

A "bombsight view of Memphis," when he took a ride in a B–17 in October 1943. "I sat in the top gun turret, with its two .50-caliber machine guns . . . I had a big time, whirling about as if on a miniature merry-go-round, looking through the turret's plastic top into the clouds for 'enemy' fighters I knew weren't there."

The perils of growing a beard in August 1939, when beautiful girls stopped him on the street to stroke his jowls, and politicians stopped their speeches to point him out.

About marching (and playing trumpet) with the Treadwell High School Band in the

1956 Cotton Carnival Parade; and, in 1961, covering the parade as King Midas, dressed in a gold lame robe, gold crown and bushy gray beard. "The final touch was my own long Church Warden pipe, wrapped in gold foil."

The many years of covering City Hall during the reign of "Mister Crump." He described the "countless hours, waiting outside of closed-door meetings, waiting for Mister Crump—not some elected official—to come out and talk to the press." He also remembered the impromptu parades of Crump and his entourage marching down Main, bowing and shaking hands: "Everybody knew Mister Crump and he knew everybody."

He brought Crump's wrath down on him when he reported an anecdote told by Gordon Browning during Browning's successful 1948 comeback campaign for governor. The anecdote involved a supposed voter-hunting expedition by Crump and one of his allies, Will Gerber, into a cemetery. "Gerber was on his knees scraping moss off an old tombstone, and saying finally he couldn't read the name, to put down any name, and Crump said, 'No, Willie, we've got to have an honest election.'"

"Good memories and bad," Porteous would write later about the Crump era. "How different it is with truly elected officials, all speaking for themselves, making their own mistakes. Democracy, its wonderful."

Of the "joys" of smoking. He had started puffing a pipe as a Southwestern student, later owned nearly 300 pipes, and never went anywhere without one. "Someone should speak up for the evil of smoking," he wrote in 1964. "I guess this tobacco-stained wretch should qualify."

Of quitting smoking cold turkey. He put away his trademark in 1979 after a car accident fractured one of his ribs. "I had thought it would be difficult to quit. But I had not smoked in a couple of weeks, and I was surviving. I began to think, no more burned clothes, my teeth wouldn't be so badly stained next time I went for my semiannual dental checkup and cleaning, I would not annoy others, I would save on my mounting weekly tobacco bill. And it would be bound to help my health."

He gave away all but a token few of his pipes.

"Best thing, I don't cough any more," he wrote. "But I do feel a subtle sort of longing when I see someone else enjoying a pipe of tobacco."

SUMMING UP

Porteous, who speaks in a characteristically matter-of-fact way about his retirement, is keeping his options—like his contacts—on an open line. His plans include spending more time with his wife, former Press-Scimitar reporter Elizabeth Colling, their six children and five grandchildren.

"I've done what I wanted to do. I've enjoyed every minute of it," he said. "The Press-Scimitar has been a great place to work, and I've worked for three fine editors—Ed Meeman, Charles Schneider and Milt Britten. When Meeman hired me in 1934, he said he'd give me a trial at $10 a week. No one has ever said that I'm not still on trial.

"I'd like to keep on but the calendar just caught up with me," he added. "There will always have to be reporters . . . someone has to go out and cover the City Hall meetings.

"That's why I'm glad I've been a newspaperman."●

END RUN TO GUATEMALA

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. OTTINGER. Mr. Speaker, I rise to protest the administration's eagerness to provide military assistance to one of the world's worst human rights offenders: Guatemala.

The regime of President Romero Lusas Garcia has engaged in the most brutal violations of human rights. Since he came to power in July 1978, over 5,000 Guatemalans have been killed, and hundreds have disappeared. The country has some 3.5 million Indians, and several of their villages have been entirely wiped out by government gunmen.

Once again the administration, by supporting an intolerably repressive regime, will be helping the Communist cause rather than hurting it. Despite the viciousness of this regime, President Reagan is considering a resumption of arms aid to Guatemala. I am extremely distressed by reports that the administration is tempted to use contingency funds for $2.5 million in nonlethal equipment for Guatemala, in order to bypass congressional review of this aid. As the New York Times said in a recent edictiorial:

If the Administration actually attempts such an end run around the budget process, Congress may have to remind it that the United States, too, has constitutional institutions.

I am including that New York Times editorial in today's RECORD and I commend it to the attention of my colleagues:

END RUN TO GUATEMALA

Retired General Vernon Walters, an old hand at military diplomacy, is known for his polished skills as a linguist. But he chose peculiar words last week to explain why the Reagan Administration is considering a resumption of arms aid to Guatemala. During a visit there as Secretary of State Haig's special emissary, General Walters said, deadpan, that Guatemala's Government is defending "peace and liberty" and "constitutional institutions."

Peace and liberty are indeed imperiled in Guatemala. One threat comes from some 2,000 leftist guerrillas who have been receiving encouragement and possibly arms from Cuba. General Walters noted that peril. But he shrugged off another threat: state terrorism condoned by President Romeo Lucas Garcia. In a decade, as many as 25,000 Guatemalans have been killed, mostly by state security forces; the recent toll includes 76 officials of the opposition Christian Democratic party, scores of trade unionists and at least 6 Catholic priests.

This brutality has brought Guatemala's government a grim reputation as the hemisphere's worst human-rights offender. Particularly hard hit have been the country's 3.5 million Indians, some of whose villages have been totally wiped out, mainly by Government gunmen.

The United States has an obvious security interest in true peace and liberty throughout Central America, and particularly in a nation whose jungles border on Mexico. But that interest is not served by an uncritical partnership with a regime openly at war with its own people. Guatemala wants America's political backing even more than its weapons. The predominantly military regime has found most of the weapons it wants elsewhere—ever since in 1977 it rejected American military aid rather than comply with Congress's human rights standards.

Those standards remain the law, and all aid still has to pass Congressional scrutiny. In its eagerness to renew contacts with the Guatemalan military, the Administration is tempted to dip into contingency funds for $2.5 million in "non-lethal" equipment, thus bypassing Congressional review. If the Administration actually attempts such an end run around the budget process, Congress may have to remind it that the United States, too, has constitutional institutions.●

MAURICE SONNENBERG: KEEN PERSPECTIVE ON U.S. EXPORTS AND FOREIGN TRADE

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. COELHO. Mr. Speaker, at a time when the United States faces a staggering trade deficit and desperately needs a forthright and cohesive national export policy, the insight of Maurice Sonnenberg is worthy of my colleagues' consideration.

Mr. Sonnenberg is an experienced investment banker whose clients include major banking institutions throughout the country, industrial development authorities for a number of States, and several important business corporations. It was his ingenuity which contributed to Volkswagen's decision to locate a plant in Pennsylvania, and he advanced many highly credible ideas as a member of the President's Export Council.

Considered a scholar in the field of international trade, Mr. Sonnenberg has written widely on this subject and is well respected for his views on Eximbank programs and other approaches to the promotion of world commerce. Some of his proposals have centered on tax reform to discourage export disincentives and Justice Department policy on trade practices with antitrust implications. Taking a broad look at our economy, Mr. Sonnenberg has articulated sound judgments on policies which govern trade sanctions, such as the recently lifted grain embargo imposed against the Soviet Union.

Recently, Mr. Sonnenberg published two articles in the journal, Yankee Trader, which I would like to place in the CONGRESSIONAL RECORD. His perspective, I believe, forms the basis of a trade platform which should guide our Nation's commitment to bringing our

ratio of imports to exports into balance, while helping to strengthen the posture of the United States as a viable trading nation in the world community.

Thank you, Mr. Speaker.

[From the Yankee Trader, April/May 1981]

TRADE: A LIMITED WEAPON

(By Maurice Sonnenberg)

In the last week of 1979, the Russians invaded Afghanistan as Soviet troops and tanks crossed the southern border to bolster a puppet government. It was the first time since the end of World War II that the Soviets had used military force, outside of Eastern Europe, and it followed by less than two months the seizure of the American embassy and the taking of hostages in Iran. The response of the Administration to these disruptions in the world political system was economic. Among other things, President Carter ordered an embargo against the shipment of grain to the Soviet Union. He froze Iranian assets in U.S. banks. He also proposed a boycott of the summer Olympic games to be held in Moscow. He asked U.S. allies to follow suit. Few did, however. In fact, to give one example, Argentina picked up the slack of the U.S. grain embargo and concluded an agreement to ship wheat to the Soviets. Only a handful of nations stayed away from the summer Olympics, and most telling, in Afghanistan the Soviet troops continued to slaughter Afghan rebels in defense of unstated policies in South Asia. There, at least, the American gambit failed.

A dominant shibboleth of all administrations since the end of World War II has been that trade is an effective weapon in the conduct of foreign policy. Most recently this belief was expressed by President Reagan's agricultural secretary who proposed at the time of his nomination to use food as a weapon in the conduct of foreign policy. This suggestion is not unprecedented. Past Presidents have always employed blockages, embargoes, boycotts and other types of restrictive trade policies to advance their foreign policies. The problem with such an approach, as President Carter discovered with the Russians in Afghanistan, is that in only selected instances does trade serve as an effective weapon in foreign affairs. While a case can be made that the freezing of Iranian assets may have helped toward the release of the hostages, that example, if indeed true, is an exception to the rule in recent years that embargoes, sanctions, and boycotts have achieved nothing other than diverting American business to other nations, usually our loyal allies.

In addition to Argentina during the Soviet grain embargo, Brazil, Canada and some nations in Europe provided, either under new agreements or through old contracts, a substantial portion of Russia's needs for wheat. This does not take into account the American grain diverted to the Soviet Union by third countries acting as intermediaries in the transaction. As well, the Europeans were only too keen to fill the gap left when the United States declared export controls on the shipment of non-strategic machinery and equipment to the Soviet Union.

Despite a record of failure, it is easy to see why the mythology persists about the coercive powers of economic policy. For starters, the trade weapon is often a convenient substitute for military force. Better to deny the Soviets grain then to send American troops to Afghanistan. Likewise, such sanctions give the appearance of hurting our enemies—or sometimes our allies—where they are most vulnerable. The assumption behind the military embargo of Turkey was how can they survive without U.S. Aid? Only when the United States was the sole economic giant—this was in the years following World War II—were we able to effectively use economic policies to advance our goals in foreign policy.

EFFECTS OF THE MARSHALL PLAN

The Marshall Plan, the common expression for the European Recovery Program, philosophically as well as economically checked Communist expansion into Western Europe. It offered our allies $11 billion of economic assistance, and the donor, in this case the United States, had obvious economic and politic control over the aid recipients. Nations receiving this aid were subject to suspensions or terminations that could be activated when their conduct went against the American national interest.

The strength of economic policies as an aspect of foreign policy can be measured in Greece. In 1950, a civil war ended there, in part because President Truman convinced Congress to extend aid to the Greek government. He argued that such aid would not only halt Communist expansion, but put the country on a sound economic basis. By the end of 1951, over $600 million had been sent to Greece, much of it for the purchase of agricultural commodities, industrial goods and technology. The crises ended, and for more than two decades, our relations with Greece were stable. Likewise, our aid to Turkey at the same time stabilized relations in that part of the Mediterranean until conflict occurred between these traditional foes and the United States became caught in the crossfire.

What has changed since the era of the Marshall Plan, and reduced the effectiveness of economic policies in U.S. foreign relations, is the emergence of strong competitors to the United States. Western Europe and Japan, then mostly in rubble, are now economic giants. The Soviet Union and the Eastern bloc countries are obviously stronger than they were a decade ago. Thus, the trade weapon is curtailed because many other nations are willing to fill the breach whenever the United States decides to cut off a certain product to a certain nation. Where once the U.S. might have been the only supplier—say of heavy machinery and technology—there are now many.

The following is a list, by no means complete, of examples where international and U.S. trade embargoes have proved ineffective:

Rhodesia: This country was the subject of an embargo for almost ten years. Nevertheless, despite the sanctions, for years it managed to conduct world trade, including with its black neighbors, as well as fight a guerrilla war. But it was the warfare that eventually forced capitulation to its adversaries, not the embargo.

Turkey: The only effect of the embargo of U.S. military supplies after Turkey invaded Cyprus was to antagonize a NATO ally. The embargo not only weakened western defenses and brought no solution to the question of Cyprus; it also, somewhat incredibly, coincided with a deterioration of relations between the United States and Greece, which, in theory anyway, was supposed to be pleased with the cutoff of weapons to Turkey. It was, but other problems grew worse.

Equador: The refusal of the U.S. government to allow the sale to Equador of Israeli Kfir jets, which are driven by Pratt and Whitney engines and therefore subject to American control abroad, has no effect on the military build-up in South America. Equador cancelled the order with Israel; Pratt and Whitney lost further business; and the French happily supplied Equador with the jets it needed.

Cuba: After twenty years of trade embargo policies against Cuba, there is little indication of political liberalization on the island ninety miles from the U.S. shore. Just the opposite, in fact. Cuba has been more intransigent than ever. Its troops are spread across Africa and, if one believes the dispatches from the State Department, it is also championing revolutionary movements in Nicaragua and El Salvador. The Russians, as well as countries from Europe and Latin America—not to mention Japan and Canada—have filled the trade gap left by the American embargo.

Nuclear Proliferation: The Catch-22 of world politics. Sweden, West Germany, France and Canada are all eager to sell nuclear power plants and fuel in places such as Pakistan, where the United States prohibits its companies from doing business. Ironically, in denying billions of dollars in contracts to U.S. business, the United States is relinquishing its only hope in regulating proliferation throughout the world. Experts claim that our competitors, in their rush for profits, offer equipment more easily convertible to nuclear weaponry.

It is difficult, at this point, to judge the extent to which the Reagan administration will employ economic sanctions to advance its policies. But the previous administration was hardly reluctant to swing the economic bludgeon—to cut off trade; to deny aid—in order to foster its policies concerning human rights. The U.S. does have a maximum moral interest in promoting adherence to the principles of human rights. Nevertheless, in a time when our leverage is sharply reduced because few nations are absolutely dependent on American goods, the soundness of any embargo, even one with human rights as its justification, is dubious as long as our allies will continue to fulfill the trade we are denying. To give an example: The Export-Import Bank decision not to issue a letter of interest for the sale of U.S. turbines (worth $276 Million) to Argentina simply resulted in the Government export banks of Japan and Great Britain offering to provide the financing for the same type of equipment from their respective countries. In another case, the failure of the U.S. government to approve an export license for Boeing-Vertol for the sale of helicopters to Argentina brought a response and order from the ubiquitous French.

Commercial loss, for a worthy cause, can sometimes be justified. Extreme cases, such as Nazi Germany, recall the age-old argument about doing business with tyrants. But few cases today are black and white. The world is shaded grey in many sections of the Middle East, Africa, Asia and Latin America. Outside of the Americas and Western Europe, the number of democratic governments can be counted on one hand. The rest are a combination of totalitarianism on the left and right. And however satisfying to the national conscience it would be to pretend that these nations and their tyrannical leaders did not exist, the problem is that many do. Simply to end economic relations does not make the problem go away. Sometimes it makes it worse. But the converse is also true. By extending economic relations to unsavory countries, at least ones which

do not pose a direct military threat to the security of the West, the United States has a chance, however remote, of retaining some influence in those nations' affairs. I note the example of Yugoslavia in the early 1950s.

In the 1950s, Marshal Tito broke with Stalin. At the time the United States sent military assistance to Yugoslavia including jet fighters. Needless to say, a number of members of Congress were outraged by this support for a Communist nation. Nevertheless, Yugoslavia remains the most independent country in Eastern Europe, a bridge between East and West. Likewise, in the current example of Nicaragua under the Sandinistas, if the United States cuts off all aid and trade agreements, it is possible Nicaragua could be driven into the economic arms of our protagonists. By maintaining trade with that country, we at least have a chance to continue commerce and more normal relations.

In conclusion, it is to be repeated that in the world today coercive techniques, such as embargoes, denial of export licenses, boycotts, and credit freezes are of little value. They do not isolate the offending nation; they only isolate the United States and provide windfalls for our competitors. Only against a weak and dependent nation, one controlled through a history of trade dependence, are embargoes and sanctions effective. When a powerful nation is a critical supplier of raw materials or industrial goods, or when a powerful nation is the prime market for one or two products, or raw materials, it can exact terms. But larger, more mobile nations can either find outlets for their products or suppliers for their needs, and the sanctions, therefore, fail.

Finally, in authoritarian societies, such as the Soviet Union, economic displacement because of sanctions leads only to belt tightening and reordering of priorities in the economic sector. And it should be pointed out that nothing appears to affect the military side of the Soviet economy as that priority never changes.

It is obvious that rather than cutting off our trade and losing whatever role we have, it perhaps is better to foster foreign trade and thereby maintain our diminishing influence. We can maintain some leverage upon intractible adversaries by understanding the delicate and realistic balance of world politics and should avoid indiscriminate and impractical use of our trade policy as a political weapon.

[From the Yankee Trader, February/March 1981]

Export Issues Debated on Presidential Council

(By Maurice Sonnenberg)

The need for a strong, cohesive national export policy has never been more obvious, and it is manifested in an extraordinary new found interest by the governmental and commercial sector of our society. While everyone agrees something must be done about our position in world markets, however, not everyone is in agreement on just what steps are most needed.

From my experience serving on the President's Export Council, I believe that body or one similar to it can be a primary instrument in achieving effective results on trade policy. The Council is designed to allow input of ideas from different economic sectors of society with the main purpose in mind of recommending programs and policies that will result in greater exports. It is bi-partisan in make-up, with members serving at the will of the President. The forty-one members of the Council include the heads of seven executive branch agencies involved with foreign trade, six leading members of Congress and representatives from industry, labor, agriculture and business.

The President's Export Council was originally established in 1973, but it was essentially dormant for years in much the same way that many of our pressing trade problems were not given necessary priority. Its inactivity ended in May 1979 when the urgent need for answers to some of these problems led to the reconstitution of the Council as a full-time working body. Since its reactivation the Council has delved into a broad range of issues confronting exporters and has left its indelible mark on U.S. trade policy. President Carter has seen fit to extend the Charter of the Council due to expire on December 31, 1980, until December 1982. This will allow the necessary continuity of its work as well as providing President Reagan time to decide how and if he will make use of the Council.

In December the President's Export Council submitted to the President its Final Recommendations for the period of its initial charter. As these have already been well publicized, I will not enumerate them all here. I believe it might be of more interest to my fellow SOS America members to hear of some of the views the Council shared and a few of the recommendations. Many of the issues the Council wrestled with in its deliberations will no doubt continue to command attention even after the Council's recommendations are acted upon.

The President's Export Council has come out in favor of a number of programs designed to increase incentives to export, such as the trading company legislation, foreign tax credit revision, adequate lending authority to the Commodity Credit Corporation and a stronger DISC (Domestic International Sales Corp.) system. Of major priority in these incentive programs is the Council's concern with export financing. There is a great disparity between what the governments of the other major trading nations provide their exporters in the way of financing and our programs. The U.S. Export-Import Bank is a great disadvantage in this regard as it has not been given a position of relative prominence vis-a-vis its foreign counterparts. Three steps must be taken: First, Eximbank since it is a self-sustaining institution, should be treated as a separate line item in the annual budget and its authorization should be removed from the annual Foreign Assistance Act. Next its annual loan authorizations must be substantially increased, and lastly, something must be done to bring the interest rates in line with what our competitors offer. It is also felt that Overseas Private Investment Corporation (OPIC) should be an independent agency with greater emphasis on a role as an export financing body. It should be permitted to engage in financing of projects in middle-income, not just low, LDC's (lesser developed countries). OPIC's role in providing risk insurance coverage should be greatly expanded.

Another problem that worries many of us is the Justice Department's proclivity toward frightening potential exporting corporations with possible anti-trust actions on their overseas activities. Senator Javits, one of the Senators on the Council, has introduced a bill (S. 1010) that essentially creates a Presidentially appointed commission to study the international application of anti-trust laws and submit its recommendation within one year. The administration (i.e. Department of Justice) opposes the bill. A similar problem issue is the Foreign Corrupt Practices Act, which is in great need of clarification. the enforcement agencies, SEC and Department of Justice which have overlapping jurisdiction of such laws, must establish clear guidelines for purposes of enforcement and prosecution. Our exporters must not be placed in the position of either risking a technical violation of U.S. law or abandoning sales in certain countries altogether, which is now the situation confronting many companies.

The use of export controls has been a source of great concern because of the tendency to invoke them even when no overriding domestic needs or national security imperatives are in evidence. The Council has felt that unilaterally imposed trade controls, intended to influence the internal affairs of other nations or merely register our displeasure over a foreign policy matter, are many times unwarranted and unrealistic.

Various types of export controls are often dictated without a proper balance being determined between the economic and political needs of this country internationally. I feel our human rights policies were not enforced consistently, bringing about little change but costing us in trade. Another example is the environmental regulations which have required Eximbank in an extra-territorial manner to certify that projects in other countries meet our national standards. Export credits have been unreasonably withheld from nations generally allied with us only because they differ with us on a few issues.

In other cases the Council has taken note of major foreign policy events and accordingly recommended action when it appeared foreign policy considerations had to be given paramount importance. In July 1979 the Council took a position of recommending Most Favored Nation (MFN) status and extensive credits be extended to the People's Republic of China and the Soviet Union. By September of 1979 as relations with the PRC were improving, a lively debate in the Council led to a major revision of the Council's attitude, The concessions now read "MFN status and credits were to be accorded both to the Soviet Union and China as soon as practicable for each." By February 1980, after the invasion of Afghanistan, China alone received MFN status.

In the area of export disincentive, I personally feel there is no reform more urgent that corrections of the tax laws regarding American citizens working abroad. The President's Export Council has very strongly supported legislation designed to relieve the tax burden placed on such individuals in the belief that our tax policy is seriously misguided. During the first half of this century the U.S. was the world's great exporting nation, and income earned by Americans abroad was virtually exempt from domestic taxes.

In the early 1950's major revisions were made in the tax system. Foreign residency requirements were altered and a $20,000 limit was placed on the amount of foreign income to be excluded from taxation. This exclusion was aimed primarily at motion picture personalities sheltering large amounts of money overseas, and initially there was not a great deal of effect on most Americans working overseas. As inflation and the declining strength of the dollar began to be felt, Congress, instead of raising

the exemption level, lowered it to $15,000! To make matters worse, the manner in which the exclusion was computed was changed so that in practical effect it became a $3,000 exemption. The Foreign Earned Income Act of 1978 provided no relief for the average businessman, and IRS rulings made "keep-whole" cost-of-living allowances to overseas employees taxable as income. This had the ludicrous result of certain instances where American nationals had to pay income tax higher than their real income!

As a result of the high cost of maintaining U.S. citizens, American companies have often been forced to hire other nationalities to work overseas. The effect of this on American exports is hard to estimate, but we believe it is severe. When a third party national takes the place of a U.S. citizen in a certain country, it is only natural to expect he will tend to order equipment and services from his own homeland rather than U.S. companies. In addition to any loss of goods, services and material orders, there is also the consequential loss of shipping to American flag carriers. The Government Accounting Office in one report said that current U.S. tax policies mean a reduction of five percent in total U.S. exports, which translated into a loss of perhaps $7 billion in overseas sales and 280,000 jobs in this country.

All of the major industrial nations except the U.S. recognize that the presence of their citizens in overseas markets is necessary for a successful foreign trade; none of them tax salary or living allowances of their nationals working abroad. Prudently designed exclusions on income earned are not tax loopholes for the rich—they mean thousands of additional jobs right here at home. This is a message the President's Export Council has delivered to both Congress and the Carter Administration, and a change in attitude does seem to have been effected. Legislation is in Congress now which would at least help, and I am hopeful that The Reagan Administration will see fit to push on this particular issue.

One final area in which the President's Export Council has made a number of suggestions is that of reorganization within the government to more effectively deliberate and administer trade policy. Some progress has been made over the past few years, but the opinion on the Council is definitely leaning toward even more centralization of trade functions, perhaps in a unified Cabinet-level Department of International Trade. Different governmental functions pertaining to trade are spread through a variety of agencies, many of which do not see export promotion in particular as a goal. I believe personally that some sort of "Trade Czar" is needed, whether the actual position be Secretary of International Trade, Special Trade Representative or something else.

Ultimately the government's contributions to our national export effort rests of course with the President, and no amount of legislation or reorganization is as important as the Chief Executive's determination to improve our stature in the international marketplace and alleviate a continuing national attitude of indifference towards export. I have no doubt that the new administration will bring greater impetus toward achieving our national export goals, and I believe that the President's Export Council, in whatever form he chooses to employ it, can and should play a part.●

PLAN FOR RESCUING U.S. AUTO INDUSTRY

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. ASPIN. Mr. Speaker, a number of recent developments in the auto industry have concerned me.

I fear the administration plan for rescuing the U.S. auto industry may help the Japanese more than Detroit.

The administration is proposing to lower a number of standards so the auto industry can make cars more cheaply, but those same standards will apply to imports as well, so the Japanese will be able to make cars more cheaply, too. And the bigger savings may well go to the Japanese.

The Reagan administration's auto rescue package is a collection of 34 changes in the regulations dealing with air pollution and vehicle safety. The administration claims the changes will save car and truck manufacturers $1.4 billion. This will result in a savings of around $150 for each car or truck sold in the United States—no matter where it is made.

In announcing its proposal, the administration said this regulatory reform package, coupled with the President's other tax and budget proposals, would put the autoworkers now on indefinite layoff back to work and raise domestic car production from the current low of 9 million units to 11 million units.

What the administration has not said is that most of these regulatory changes have been requested by the foreign automakers who sell in this country.

Here are a few of the major regulatory changes proposed by the Reagan administration that were previously requested by the Automobile Importers of America, an association of 16 leading Japanese and European auto firms:

Elimination of the 1984 high-altitude auto emission standards. This standard would require that all passenger cars meet the 1984 emission standards, no matter at what altitude the car is being driven. This provision is hard to meet because hydrocarbon and carbon monoxide emissions increase at higher altitudes due to the thinner air. Even cars driven at sea level all the time would have to meet the high-altitude standards. The Japanese Government, in many ways, has tougher air pollution standards than the United States, but it does not have one for high altitudes. To meet this standard, Japanese automakers would have to provide special equipment for cars targeted for the U.S. market. The Reagan proposals saves them that expense and helps the Japanese firms.

Modify the current bumper crashworthiness standards. Front bumpers must now be able to withstand a 5-mile-per-hour impact. The Reagan proposal is to consider reducing it to 2.5 miles per hour or eliminating it altogether. Foreign car manufacturers have asked for a similar change. Japanese and other foreign makers would have to design their cars specifically for the U.S. market to accept these heavy duty bumpers. The bumpers would increase the weight of small cars by a greater percentage than on larger cars and thus degrade the Japanese advantage in fuel economy. Elimination of the bumper standard can be defended in terms of fuel economy. Elimination of the bumper standard can be defended in terms of fuel economy, but not in terms of aiding the U.S. auto industry as the administration has done.

Delay and review those provisions that require passive restraints for cars beginning in 1982. The current provisions would require larger cars to have airbags or automatic seat belts in the 1982 model year and all cars to have these systems by 1984. While it is not known exactly what the administration will do with these regulations, it is known that it is harder to put airbags and other passive restraint equipment on small cars because of the smaller amount of space available inside. Small car manufacturers, especially foreign manufacturers, have been seeking changes in the requirement for years. If the administration does away with this provision, the biggest benefits will go to the makers of the smallest cars. Here again, the Japanese do not require cars sold in Japan to be equipped with airbags or automatic seat belts. A change in this provision will save the Japanese substantial development and production costs.

There is certainly merit in dropping a number of the 34 regulations, since some contribute little to public health or safety while costing a great deal. But there is no merit to the administration's claim that elimination gives U.S. industry a competitive edge.

The administration's highly touted plan for rescuing Detroit might better be billed as a boost for Japan, Inc. The administration brags that the reforms would shave $150 off the price of an average American car, which is now $7,530. But the changes would shave somewhat more off the price of an already cheaper Japanese car, thus widening the Japanese advantage.

The U.S. auto industry has a lot of catching up to do. If we are serious about helping the industry, then I think we need to adopt three policies:

First, limit the number of Japanese cars coming into the United States to 1.6 million a year.

Second, provide some real tax relief for the auto industry, such as chang-

ing depreciation schedules and the tax treatment for special tools.

Third, provide economic relief and job training for the more than 200,000 auto workers who are out of work.

The administration needs to begin to bite the bullet on some of the hard decisions. It is easy to issue regulatory reforms. It is much harder to devise policies that will really get at the economic and social needs of this industry.

The new auto import agreement with Japan has a loophole big enough to drive 150,000 or more vehicles through.

It looks to me like the administration got taken to the cleaners by some wily Japanese negotiators.

As you know, a number of us have sought to limit the number of Japanese auto imports while the U.S. auto industry retools. The administration agreed to approach the Japanese and try to work out a voluntary agreement. The administration came back with a sheaf of papers and a lot of public relations about what a great win it scored over the Japanese. The administration scores an A for public relations, but an F for public policy.

The problem is that the administration accepted the Japanese statistics on how many cars they have sold to the United States. This is a bit of a numbers game, so let me set the numbers in front of you so you can see just how the administration got taken to the cleaners:

The United States recorded imports of Japanese cars last year totaling 1.99 million.

The U.S. Senate has been working on legislation that would restrict Japanese imports to 1.60 million over the next 12 months.

Special Trade Negotiator William Brock got the Japanese to agree to cut their sales, which they place at 1.84 million last year, to 1.68 million. Brock said that figure was close enough to the numbers being discussed in the Senate to eliminate any need for the legislation.

It appears that Mr. Brock has missed the significance of the numbers. The Japanese figures show them selling 150,000 fewer vehicles to the United States because the Japanese do not count as car exports to the United States either their sales to Puerto Rico or their sales of station wagons, which they put in a separate category called car-derived vans.

Brock didn't get the Japanese to agree to 1.68 million cars the way we count, but more like 1.83 million. What's more, they are free to make a big push on station wagons. And, if they want, they can sell 1 million cars to agents in Puerto Rico who can ship them to the mainland.

What's more, those of us who have been working on this issue have been seeking a 3-year limitation because that's how long it will take the U.S. auto industry to readjust. Brock's agreement is billed as a 3-year pact. But if you look at the fine print, you find the numbers I just cited apply only to the first year. In the second year, the Japanese quota would rise in line with any increase in U.S. domestic sales. And the third-year limits are to be worked out later on—which means there really is not any third-year agreement!

In sum, there are enough loopholes here to allow lots more than 2 million cars a year into the United States. The agreement is more loophole than substance. We need legislation to limit imports now more than ever.

The popular allegation that American autoworkers are overpaid and have given the competitive advantage to Japanese automakers is malarkey.

American autoworkers do make more money than their Japanese counterparts. But the difference in wages is not very important in the difference in prices. If we raised the pay of Japanese workers to put them on a par with Americans, Japanese cars would still cost $1,500 less to make than American cars of similar size.

What's more, in the last 5 years, while Japanese car sales have soared from about 8 percent of the U.S. market to more than 20 percent, Japanese wages have been rising much faster than American wages. From 1975 to 1980, the pay of American autoworkers went up 56 percent. In that same time span, Japanese auto wages rose 101 percent.

One problem with comparing Japanese and American labor costs is that, in Japan, fringe benefits count for much more than in the United States. The Japanese have a national health system, for example, so health care costs are not reflected directly in wages. And there is company housing for workers, so lower pay obscures the fact that the free housing boosts real income.

Japanese carmakers have about a $1,900-per-car cost advantage as vehicles emerge from the assembly line. The advantage is comprised of four parts:

From better management: $960. For example, the Japanese manage to prevent defects while American auto firms have until now managed to detect defects. The Japanese system saves the time and manpower needed to correct defects. Another example is "quality circles," small teams of workers and management who are looking constantly for ways to make production more efficient. As a result of their innovations, production line downtime in Japan is 20 percent versus 40 percent in the United States. AMC in Kenosha has been moving toward this concept.

From more modern technology: $100. The Japanese use more robots and computerized machinery. But the advantage here is not as great as is often perceived.

From labor costs: $420. If we include all wages and fringe benefits, Japanese workers now get about $12 an hour versus $19 an hour for American autoworkers.

From warranty savings: $100. The better quality control on Japanese cars means they face fewer repairs under warranty and can pare down the selling price of their car accordingly.

In assorted other savings: $320. For example, component manufacturers are scattered all over the United States so assembly plants must keep large inventories on hand. In Japan, the subcontractors are generally next door, holding down inventories and the staff needed to manage them.

These five advantages add up to $1,900. When the $400 cost of trans-Pacific shipping and import duties are deducted, the Japanese are left with an advantage of about $1,500 per car. The shipping cost disadvantage simply cancels out the labor cost advantage.

What this all shows is that efforts to lay the blame for the problems of the auto industry on the backs of the autoworkers are unfair canards.

The Pentagon plans to buy 20,000 European-made trucks. I could not believe the Pentagon could be so idiotic.

Forty-five other Congressmen have joined me in writing President Reagan to denounce this decision. The Pentagon's plan would cost the American taxpayer $300 million. It would deny that money to an American industry that needs the business badly.

The Pentagon called its plan "a shining example of cooperation with our European allies." As I wrote the President, "Those who are being asked to 'cooperate' are American workers, of whom one out of six depends upon the auto industry for their jobs."

I am awaiting a reply from the White House. I hope the administration will open its eyes to reality and tell the Pentagon to remember it is the United States it is supposed to be serving.

I have discovered to my surprise that one of the administration proposals to bail out the auto industry would shave only $1.50 off the cost of a car and discourage sales overseas everywhere but Brunei, Burma, and South Yemen.

The Reagan administration would lift the requirement that the speedometers on American-made cars show the speed in both miles per hour and kilometers per hour and the odometers be tamperproof.

This change will shave from $1 to $1.50 off the cost of each car, according to the Reagan administration.

This is bound to promote sales dramatically.

Chrysler will survive.

American Motors will thrive.

The U.S. auto firms will dominate the world. Of course, almost all countries now use kilometers so we could not sell cars there. We would be shut out of Canada since they have switched to metric, but, so what! Canada is only our biggest export market. After all, think what this will do for our sales in the three foreign countries that still use miles—Brunei, Burma, and South Yemen.

Why, if Detroit could ever find those countries on the map, we would really wipe out the competition from Toyota and Volkswagen, not to mention rickshaws and ox carts.

There are 200,000 auto workers on indefinite layoff from an industry that last year lost a record $4.2 billion—and the administration is going to defend the battlements of English measure and save the car buyer a buck and a half!

Seriously, there is an explanation for this proposal. It is ideology. The administration has simply used a vacuum cleaner approach to regulations in its zeal to show its disgust for regulations. But regulations are not the source of the industry's problems. Does the White House not understand that the regulations apply to Japanese-made cars and German-made cars just as much as to American-made cars?

REVIEW OF THE ADMINISTRATION'S ECONOMIC PROGRAM

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. EDWARDS of California. Mr. Speaker, Charles T. Manatt, the chairman of our Democratic Party, delivered his first major review of the administration's economic program in California at the Commonwealth Club on May 22, 1981. Chairman Manatt raises the questions of concern to us all about the real problems posed by the Reagan economic program for our country and its citizens. I commend his observations to my colleagues.

REMARKS OF CHAIRMAN CHARLES T. MANATT, DEMOCRATIC NATIONAL COMMITTEE

ADDRESS TO COMMONWEALTH CLUB

Californians: This is my first speech as Chairman here in California, and I feel a little like the prodigal son come home. I cannot think of a more distinguished group for my maiden address than the Commonwealth Club, and I am honored to join you today.

The number one subject throughout the nation today is the health of our economy and the President's program for economic recovery, and that is what I want to talk to you about today.

The Reagan Administration has embarked on one of the most far-reaching economic programs in our history. It will touch the lives of every citizen, from the investment banker on Nob Hill considering a billion dollar joint venture to the welfare mother in the south Bronx figuring her weekly budget for her children's school lunches. Its success or failure will shape our nation for good or ill for years to come.

One fact remains clear at the outset. The President has scored a major political victory in the opening rounds. He has used the bully pulpit masterfully, delivering his message to the American people simply and attractively.

I don't think I am giving away any trade secrets when I confess to you that we Democrats take very seriously, indeed, the skills of this President as a national communicator.

We Democrats can meet that challenge. I remain confident that the world's oldest continuing political party—the Democratic Party—will also regain its status as the governing party in America. And we Democrats are busy rebuilding, retooling, and revitalizing to achieve that goal.

What concerns me more about the Reagan program, not as a partisan, but as a citizen—not as Chairman of the DNC, but as a lawyer, businessman, parent, and taxpayer is this basic question. After the political dust has settled: after we've tallied up the winners and losers among the politicians in our midst, what will the Reagan program mean for our economy and to the people of our nation?

To put it simply: will the Reagan program work? And what kind of future will we face if it does not?

By nature I am an optimist. And I continue to be impressed by the inherent strength of our economy. But as you know well, our economic problems are very serious; they run deep; and they have been eroding our economic health for many years.

A decade of inflation has turned upside down all the traditional assumptions about savings, thrift, and progress on which America was built and on which our continued social health depends.

Interest rates at record highs are bankrupting small businesses; distorting investment and planning in every boardroom; and turning the dream of home ownership in America for millions of families into an unreachable luxury.

Productivity declined again last year, pricing us out of world markets and fueling inflation at home. Americans watch with amazement today as the nations the United States left in rubble at the end of World War II, Japan and Germany—and a host of others—outcompete and out-trade us in markets around the world.

Unemployment among adults seems stuck at a level nearly twice what we once defined as a full employment economy. That figure is running five or six times as high for many of our minority youth.

Finally, one cannot calculate, but one can speculate about the price these economic woes have exacted on our spirit as a people. No econometric model can measure the cost of broken dreams. Nor can we gauge precisely how year after year persistent inflation—like acid on an etching block—eats away at the confidence and native optimism of our people, turning us all more inward, more anguished, and more fearful, of what the future may bring.

This much we do know. If the leadership of our nation is unable to reverse this inflationary spiral and rekindle economic growth, all our hopes for the future may be shattered and the American dream turn to ashes in our mouths.

What worries me about the Administration program—and what is troubling financial markets across this land—is the fear that the Reagan program cannot work: indeed that is a sure-fire formula for making our economic problems worse.

The cornerstone of the Reagan economic program is the three-year $233 billion Kemp-Roth bill—the largest permanent income tax cut in our history. All the Administration's hopes for economic recovery rest on the claim that under Kemp-Roth savings and investment will increase so dramatically—that a major expansion in our economy will generate all the needed revenues to balance the budget by 1984.

Incredibly enough, as the widely respected financial analyst Henry Kaufman of Salomon Brothers has pointed out: there is no evidence that this ever happened before in American history and no basis in fact to support this claim. Indeed, when Kemp-Roth was first proposed, even former President Nixon's Chairman of the Council of Economic Advisors Herbert Stein could not swallow that claim. Instead he wrote that even using the most favorable assumptions about the response of workers and savers to lower tax rates, it would take 30 years to generate the lost revenues the Administration claims will be returned in three.

The fact is that the United States has one of the lowest records of savings and investment of any industrialized nation. That is at the heart of our productivity—and thus our inflation—problem. Even when the economy was booming and inflation was low, during the 1960's, Americans only saved about 6.5 percent of their incomes; today that figure has fallen to just 5.2 percent.

Nations like Japan, in contrast, save 25 percent of their incomes and the West Germans more than 13 percent. A serious supply-side economic program would target major new incentives to increase the level of savings and investment in the United States and thus provide the capital we need to increase productivity.

That is precisely the approach taken by the Democrats in Congress. Chairman Dan Rostenkowski of House Ways and Means, proposes to double the savings Americans can invest tax free in IRA pension and retirement accounts. Senator Lloyd Bentsen would increase the amount of interest and dividend income exempt from taxation and exclude from taxes altogether investments by Americans in accounts used for home mortgage lending purposes.

The Administration Kemp-Roth tax cut proposal, on the other hand, provides no new incentives at all to stimulate new savings and investment. It relies totally on blind faith.

What then, you may wonder, will so transform the investment climate and psychology of the nation under Kemp-Roth; what will change profoundly in three years the savings habits built up by Americans over many decades? Neither President Reagan, David Stockman, nor the Secretary of the Treasury can tell us. Yet, incredibly enough under their program the future of our economy hinges on this one essential point.

The sole basis for their blind optimism appears to be the curious economic theories of Dr. Arthur Laffer. Yet we are told that, if we question this approach, we are hopelessly out of date.

With all due respect to our fellow Californian, Dr. Laffer, I don't want the future of my family, my bank, or my country charted on the back of a cocktail napkin.

When Kemp-Roth was introduced three years ago, Business Week Magazine—which is not, exactly a house organ of the Democratic Party—said this in a lead editorial:

"Kemp-Roth would touch off an inflationary explosion that could wreck the country and impoverish everyone on a fixed income."

Nothing in the proposal has changed to make that assessment less true. Indeed, the inflationary dangers are probably greater today. For, the Reagan Administration plans to couple Kemp-Roth with the largest build-up in defense spending in our nation's history and the potential inflationary impacts of both are multiplied.

This year, the Pentagon will spend about $163 billion. By 1984, under the Reagan program, that figure will rise to a minimum of $256 billion, and Congressional estimates are higher still.

President Reagan has never gone before the American people to add these figures up, but this is what they show.

This Administration proposes to offset a $233 billion tax cut and a $181 billion increase in defense spending over the next three years with $138 billion in non-defense cuts and not affect inflation. How? The White House says hypothetical new revenues generated by their hypothetical economic boom will hypothetically make up the difference and balance the budget by 1984.

My friends, if you believe that I have some costume jewelry I would like to sell you at bargain prices after I end my speech.

In fact, every major economic forecasting firm, along with the Congressional Budget Office says that the promised boom won't materialize. The Nobel Prize Winning economist Wassily Leontief, now at N.Y.U. says flatly: "I guarantee it will not happen." And he warns of "higher inflation soaring interest rates, increasing taxes, and more unemployment" as a result of the Reagan plan.

I submit to you that those are not the conditions the American people thought they were voting for in the general election last year.

All of you recall that it was the massive, unfunded defense build-up during Vietnam that helped first ignite the inflationary fires that we are struggling to put out today. This Administration proposes to increase defense spending three times the size of the Vietnam build-up and at the same time enact the largest permanent tax cut in American history.

Is it any wonder that alarm bells are going off in financial markets across the United States?

Whether, or not, the Administration's Pentagon budget is the level needed to guarantee our national security is not the issue I am raising here.

The question is: how will this Administration keep those increases in military spending coupled with Kemp-Roth, from fueling the inflation rate? The Administration does not say.

When you add up all the questions about the Reagan economic program—questions that the Administration cannot answer or will not ask, only one conclusion is possible. The Reagan program represents a giant roll of the dice with the economy of the United States.

Maybe you had different experiences. But when I went into that polling booth last November I did not see a referendum authorizing legalized gambling by the President with the lives and savings of the people of the United States.

It is an open secret in Washington that the basic economic assumptions that underlie the entire Reagan program were arrived at through a series of jockeying and maneuvers among the President's advisers that resembled the haggling of rug merchants at a bazaar more than a serious economic analysis. Under the pressure of a deadline, the numbers were produced that no Administration official can justify.

When you look hard at all the Reagan Administration's fundamental assumptions about economic growth, inflation, interest rates, and savings—the bedrock upon which their entire economic program is built—they disappear like numbers written in the sand after the tides wash.

Already, after just four months, the Administration has had to revise its estimate of the 1981 budget deficit upwards by $5 billion because of the recent spurt in interest rates—a widely predicted increase in interest rates, I would note, that apparently caught only the Administration by surprise.

I do not want to compete with Jeane Dixon, but I predict that this Administration will be estimating—and re-estimating—its economic predictions so often over the next four years, that the economic forecasts of the Reagan Administration will soon rank right up there in credibility with their iron-clad promise not to cut Social Security retirement benefits.

It is no accident that the Wall Street Journal began its lead article this month with the headline "Wall Street is greeting President's program with jitters and turmoil" and spoke of "chaos" in the financial community.

As you well know, the leaders of our financial community, do not make their decision based on ringing slogans or on a roll of the dice. They count dollars, not votes; and their decisions affect the futures of tens of millions of Americans who have entrusted them—with a fiduciary responsibility—to invest billions of dollars of their savings in pension funds and insurance plans.

America hard-nosed money managers have taken a hard-nosed look at the Reagan program and this is what they see—more inflation, high interest rates, and massive budget deficits.

I share those fears. Much as I wish the President's economic assumptions could somehow come true I'm afraid that the Administration program contains the seeds of disaster for our country. And I take no comfort in that prospect, whatever short-term political advantage it might bring. This issue is too large for narrow partisanship.

The American people simply cannot affort four years of double digit inflation, double-digit interest rates, high unemployment, and massive deficits—particularly at a time when the programs created to trim the edges of pain and hold families intact during economic hardship have been cut to the bone and even to the marrow.

Already, Secretary of the Treasury Regan is predicting a recession and continued high interest rates. That is not what the American people thought they were voting for in November 1980. But high interest rates are the inevitable result of an economic policy like the President's that puts the entire burden of fighting inflation on monetary policy.

The American people need a growing economy that offers the promise of work for all those who are able. Instead, they have gotten a program that guarantees—as a University of Chicago study has shown—to drive hundreds of thousands of the working poor back onto welfare and unemployment rolls because it takes away their financial incentives to work. Even Senator Dole acknowledges that the Reagan program will send additional Americans onto food stamps and welfare rolls. What will be the cost? Again the Administration is not prepared to say.

It is good politics and dramatic theatre to come before the Congress and declare "The time to act is now". But I would respectfully suggest that when it comes to determining the economic future of the American people, the time to act is when you have considered the consequences of your actions.

Before the Administration stampedes the nation into an ill-considered and dangerous tax cut plan, I challenge them to tell the American people what happens to them—to their lives and savings if—as every respected economist predicts—no massive boom in savings and investment materializes, and an inflationary explosion occurs? And what is the Administration's fall-back plan?

We Democrats do not claim to have all the answers to our economic ills or that all answers lie on one side of the political aisle only. But this I do know. The American people deserve better than an economic program that is based—not on any reasonable chance of success, but on glib slogans and skillful political marketing.

Before this program is enacted, the American people deserve answers to other questions that have been raised.

Just this month, 15 of the nation's Governors, predicted that the Administration's program will put "extraordinary pressure on state and local budgets and on property, sales and other local taxes." How much will their property, sales and state income taxes rise under the Reagan program? The Administration has no answer.

On the fundamental issue of energy, which is so inextricably bound up with our nation's economic health, the people are asking, what policies—beyond dismantling the Energy Department—does the Administration offer to make us less vulnerable to another oil shock.

For despite the progress in recent years in reducing imports, our continued dependence on uncertain supplies of foreign oil is like an underwater mine, lying just below the surface, waiting to explode all our hopes for economic recovery. The Administration trumpets the call for its program and sails along blindly seemingly unmindful of this fundamental threat.

The President seems to have developed a positive antipathy for conservation as a national policy. "Cold in the winter; hot in the summer," is the way he described it recently. The Director of OMB is systematically dismantling all of the incentives for development of alternative energy supplies built up over four years by two different Congresses.

What we see in Washington on the issue of energy is not governing, but an abdication of governing, and it is typical of the Reagan Administration. This Administration seems to focus on every problem through a separate telescope as if they were totally unrelated—as if the inflationary dangers of Kemp-Roth are not multiplied by increased spending for defense; as if restrictive monetary policy won't drive up interest rates; and as if our economic health is unrelated to our dependence on foreign energy. Yet if there is one lesson we Americans have learned in recent years, it is how inextricably connected all these issues are.

It is not a policy to wait for each new headline about tension in the Persian Gulf and hope that a new war or revolution or act of terrorism does not cut off our oil supply, sending another inflationary shock wave through our economy, crippling any chance for economic growth. If this Administration has serious problems with the energy program enacted by the previous Administration, it owes it to the American people to offer an alternative—and that is much more than decontrol, a wing and a prayer.

Before the nation starts head-long down the slippery slope of Reagan economics, we need a serious discussion of alternative policies.

A serious program for economic recovery would enlist the cooperation of business and labor, and consider other incentives, as Democrats have called for, to hold the wage-price spiral down. The Reagan program calls for no such efforts. A serious economic recovery program would be fiscally responsible. But the Reagan program, unlike the Democratic budget alternative, calls for massive budget deficits.

A serious program for economic recovery would increase incentives for new savings and investment, as Democratic proposals do. But the Reagan tax program offers none. A serious program for long term economic recovery would support new research and development to boost productivity, as Senator Bill Bradley's legislation does. But the Administration is cutting support for R. & D. And a serious program for economic recovery would reduce American dependence on costly foreign oil, but the Reagan Administration looks the other way.

Finally, I would suggest there is one other question the Administration should answer about its economic program—and that is its human cost.

We Democrats believe strongly that America must increase dramatically its investment in new and improved plant and equipment to speed our economic recovery, and, as I have said, our tax policies are aimed towards that goal. But we Democrats also believe that to build a prosperous nation, we must invest in our people too—in the minds and learning of our children; in the health and well-being of our citizens; in the prospects of our citizens to work. The Administration's program will leave Americans less educated; less healthy; and less trained for gainful work—and that is no formula for economic recovery.

There are still hundreds of thousands of young people in our country, many minority youth, who have never held a productive job in their lives. They learn in our streets, not in our schools. And they learn about crime, drugs, alcohol, not mathematics, medicine or law.

Proposals for a sub-minimum wage are a cruel joke next to the problems these kids face. Some could not fill out a job application if they had one, or follow a bus route to get to work; many can barely read or write at all. Can the Administration tell us what price this nation will pay for years to come in welfare, crime and broken families, if we abandon another generation of these young people to a life without work and without skills?

The hard fact is that no economic recovery can be successful that leaves part of America behind. And surely there is no better investment in our future than offering disadvantaged young people the chance for productive lives.

For our part, we Democrats will continue to set before the nation, not only our questions about Administration policy, but our constructive alternatives.

In not too many months I believe the nation will look back, and recognize, that our economy would have been stronger and our society more healthy had we passed the Democratic budget alternative.

When the American people take a hard look, they will also see that the Reagan tax plan offers tax cuts only for the very wealthy—and a net tax increase for Americans earning $30,000 or less, because of built-in increases in the Social Security tax. On the other hand, the Democratic tax package offers real tax relief—and the greatest share goes to low and middle-income Americans earning up to $50,000 a year—Americans who pay 50 percent of all income taxes today and badly need the tax relief. Democrats will continue to fight for an energy program that safeguards our economy and national security. And we will defend these values of opportunity and compassion to which America has a permanent commitment.

Despite my concerns about Administration policy, I remain optimistic about America's future.

Our nation, like this state, was built by a people possessed of that special American pioneer spirit—a people of great determination and courage, but also great faith; a people committed to working hard but also to finding the humor in life; a people with a deep sense of community and responsibility for their neighbors but also a deep sense of independence and individual dignity. They were a people who loved this country and were never afraid to follow the lure of the dream of a better life.

That spirit remains strong and alive in our generation of Americans, as well. So long as it does—and so long as there remains a Democratic Party to take on the Republicans—I will remain an optimist about America.

Thank you very much.

ON THE ROLE OF MARTIN LUTHER KING, JR.

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 3, 1981

● Mr. CONYERS. Mr. Speaker, among Martin Luther King's extraordinary leadership qualities was his ability to bridge the divisions that existed among civil rights organizations in his day, and to create a powerful consensus among black and white Americans for social change. An understanding of Dr. King's leadership role in the civil rights movement is essential to overcome the political drift and quietude of the present day.

In this light, I want to share with my colleagues a major piece of analysis on Dr. King's politics written by Dr. August Meier, a professor of history at Kent State University. Entitled "On the Role of Martin Luther King," it appeared first in the journal, New Politics (winter, 1965) and was later reprinted in an outstanding collection, the "Making of Black America," published in 1969 by Atheneum Press. Excerpts from the article follow:

ON THE ROLE OF MARTIN LUTHER KING

(By August Meier)

The phenomenon that is Martin Luther King consists of a number of striking paradoxes. The Nobel Prize winner is accepted by the outside world as the leader of the nonviolent direct action movement, but he is criticized by many activists within the movement. He is criticized for what appears, at times, as indecisiveness, and more often denounced for a tendency to accept compromise. Yet, in the eyes of most Americans, both black and white, he remains the symbol of militant direct action. so potent is this symbol of King as direct actionist, that a new myth is arising about his historic role. The real credit for developing and projecting the techniques and philosophy of nonviolent direct action in the civil rights arena must be given to the Congress of Racial Equality which was founded in 1942, more than a dozen years before the Montgomery bus boycott projected King into international fame. And the idea of mass action by Negroes themselves to secure redress of their grievances must, in large part, be ascribed to the vision of A. Philip Randolph, architect of the March on Washington Movement during World War II. Yet, as we were told in Montgomery on March 25, 1965, King and his followers now assert, apparently without serious contradiction, that a new type of civil rights strategy was born at Montgomery in 1955 under King's auspices.

In a movement in which respect is accorded in direct proportion to the number of times one has been arrested, King appears to keep the number of times he goes to jail to a minimum. In a movement in which successful leaders are those who share in the hardships of their followers, in the risks they take, in the beatings they receive, in the length of time they spend in jail, King tends to leave prison for other important engagements, rather than remaining there and suffering with his followers. In a movement in which leadership ordinarily devolves upon persons who mix democratically with their followers, King remains isolated and aloof. In a movement which prides itself on militancy and "no compromise" with racial discrimination or with the white "power structure," King maintains close relationships with, and appears to be influenced by, Democratic presidents and their emissaries, seems amenable to compromises considered by some half a loaf or less, and often appears willing to postpone or avoid a direct confrontation in the streets.

King's career has been characterized by failures that, in the larger sense, must be accounted triumphs. The buses in Montgomery were desegregated only after lengthy judicial proceedings conducted by the NAACP Legal Defense Fund secured a favorable decision from the U.S. Supreme Court. Nevertheless, the events in Montgomery were a triumph for direct action, and gave this tactic a popularity unknown when identified solely with CORE. King's subsequent major campaigns—in Albany, Georgia; in Danville, Virginia; in Birmingham, Alabama; and in St. Augustine, Florida—ended as failures or with only token accomplishments in those cities. But each of them, chiefly because of his presence, dramatically focused national and international attention on the plight of the Southern Negro, thereby facilitating overall progress. In Birmingham, in particular, demonstrations which fell short of their local goals were directly responsible for a major Federal Civil Rights Act. Essentially, this pattern

of local failure and national victory was recently enacted in Selma, Alabama.

King is ideologically committed to disobeying unjust laws and court orders, in the Gandhian tradition, but generally he follows a policy of not disobeying Federal Court orders. In his recent Montgomery speech, he expressed a crude, neo-Marxist interpretation of history romanticizing the Populist movement as a genuine union of black and white common people, ascribing race prejudice to capitalists playing white workers against black. Yet, in practice, he is amenable to compromise with the white bourgeois political and economic Establishment. More important, King enunciates a superficial and eclectic philosophy and by virtue of it he has profoundly awakened the moral conscience of America.

In short, King can be described as a "Conservative Militant."

In this combination of militancy with conservatism and caution, of righteousness with respectability, lies the secret of King's enormous success.

Certain important civil rights leaders have dismissed King's position as the product of publicity generated by the mass communications media. But this can be said of the success of the civil rights nonviolent action movement generally. Without publicity it is hard to conceive that much progress would have been made. In fact, contrary to the official nonviolent direct action philosophy, demonstrations have secured their results not by changing the hearts of the oppressors through a display of nonviolent love, but through the national and international pressures generated by the publicity arising from mass arrests and incidents of violence. And no one has employed this strategy of securing publicity through mass arrests and precipitating violence from white hoodlums and law enforcement officers more than King himself. King abhors violence; as at Selma, for example, he constantly retreats from situations that might result in the deaths of his followers. But he is precisely most successful when, contrary to his deepest wishes, his demonstrations precipitate violence from Southern whites against Negro and white demonstrators. We need only cite Birmingham and Selma to illustrate this point.

Publicity alone does not explain the durability of King's image, or why he remains for the rank and file of whites and blacks alike, the symbol of the direct action movement, the nearest thing to a charismatic leader that the civil rights movement has ever had. At the heart of King's continuing influence and popularity are two facts. First, better than anyone else, he articulates the aspirations of Negroes who respond to the cadence of his addresses, his religious phraseology and manner of speaking, and the vision of his dream for them and for America. King has intuitively adopted the style of the old fashioned Negro Baptist preacher and transformed it into a new art form; he has, indeed, restored oratory to its place among the arts. Second, he communicates Negro aspirations to white America more effectively than anyone else. His religious terminology and manipulation of the Christian symbols of love and non-resistance are partly responsible for his appeal among whites.

* * * If his success with Negroes is largely due to the style of his utterance, his success with whites is a much more complicated matter. For one thing, he unerringly knows how to exploit to maximum effectiveness their growing feeling of guilt. King, of course, is not unique in attaining fame and popularity among whites through playing upon their guilt feelings. * * * With intuitive, but extraordinary skill, he not only castigates whites for their sins but, in contrast to angry young writers like Baldwin, he explicitly states his belief in their salvation. Not only will direct action bring fulfillment of the "American Dream" to Negroes but the Negroes' use of direct action will help whites to live up to their Christian and democratic values; it will purify, cleanse and heal the sickness in white society. Whites will benefit as well as Negroes. He has faith that the white man will redeem himself. Negroes must not hate whites, but love them. In this manner, King first arouses the guilt feelings of whites, and then relieves them—though always leaving the lingering feeling in his white listeners that they should support his nonviolent crusade. Like a Greek tragedy, King's performance provides an extraordinary catharsis for the white listener. * * *

It is not surprising, therefore, to find that King is the recipient of contributions from organizations and individuals who fail to eradicate evidence of prejudice in their own backyards. For example, certain liberal trade union leaders who are philosophically committed to full racial equality, who feel the need to identify their organizations with the cause of militant civil rights, although they are unable to defeat racist elements in their unions, contribute hundreds of thousands of dollars to King's Southern Christian Leadership Conference (SCLC). One might attribute this phenomenon to the fact the SCLC works in the South rather than the North, but this is true also for SNCC which does not benefit similarly from union treasuries. And the fact is that ever since the college students started their sitins in 1960, it is SNCC which has been the real spearhead of direct action in most of the South, and has performed the lion's share of work in local communities, while SCLC has received most of the publicity and most of the money. However, while King provides a verbal catharsis for whites, leaving them feeling purified and comfortable, SNCC's uncompromising militancy makes whites feel less comfortable and less beneficent.

King's very tendencies toward compromise and caution, his willingness to negotiate and bargain with White House emissaries, his hesitancy to risk the precipitation of mass violence upon demonstrators, further endear him to whites. He appears to them a "responsible" and "moderate" man. To militant activists, King's failure to march past the State Police on that famous Tuesday morning outside Selma indicated either a lack of courage, or a desire to advance himself by currying Presidential favor. But King's shrinking from a possible bloodbath, his accession to the entreaties of the political establishment, his acceptance of face-saving compromise in this, as in other instances, are fundamental to the particular role he is playing, and essential for achieving and sustaining his image as a leader of heroic moral stature in the eyes of white men. His caution and compromise keep open the channels of communication between the activists and the majority of the white community. In brief: King makes the nonviolent direct action movement respectable.

Of course, many, if not most, activists reject the notion that the movement should be made respectable. Yet, American history shows that for any reform movement to succeed, it must attain respectability. It must attract moderates, even conservatives, to its ranks. The March on Washington made direct action respectable; Selma made it fashionable. More than any other force, it is Martin Luther King who impressed the civil rights revolution on the American conscience and is attracting that great middle body of American public opinion to its support.

* * * There is another side to the picture: King would be neither respected nor respectable if there were not more militant activists on his left, engaged in more radical forms of direct action. Without CORE and, especially, SNCC, King would appear "radical" and "irresponsible" rather than "moderate" and "respectable."

King occupies a position of strategic importance as the "vital center" within the civil rights movement. Though he has lieutenants who are far more militant and "radical" than he is, SCLC acts, in effect, as the most cautious, deliberate and "conservative" of the direct action groups because of King's leadership. This permits King and the SCLC to function—almost certainly unintentionally—not only as an organ of communication with the Establishment and majority white public opinion, but as something of a bridge between the activist and more traditionalist or "conservative" civil rights groups, as well. For example, it appears unlikely that the Urban League and NAACP, which supplied most of the funds, would have participated in the 1963 March on Washington if King had not done so. Because King agreed to go along with SNCC and CORE, the NAACP found it mandatory to join if it was to maintain its image as a protest organization. King's identification with the March was also essential for securing the support of large numbers of white clergymen and their moderate followers. The March was the brainchild of the civil rights movement's ablest strategist and tactician, Bayard Rustin, and the call was issued by A. Philip Randolph. But it would have been a minor episode in the history of the civil rights movement without King's support.

Yet curiously enough, despite his charisma and international reputation, King thus far has been more a symbol than a power in the civil rights movement. Indeed his strength in the movement has derived less from an organizational base than from his symbolic role.

* * * It is, of course, no easier today than it has been in the past few years to predict the course of the Negro protest movement, and it is always possible that the current state of affairs may change quite abruptly. It is conceivable that the ambitious program that SCLC is now projecting—both in Southern voter registration and in Northern urban direct action programs—may give it a position of commanding importance in civil rights. As a result of the recent demonstrations in Selma and Montgomery, King's prestige is now higher than ever. At the same time, the nature of CORE and NAACP direct action activities at the moment has created a programmatic vacuum which SCLC leaders may be able to exploit. Given this convergence of circumstances, SCLC leaders may be able to establish an organizational base upon which to build a power commensurate with the symbolic position of their president.

It is indeed fortunate that King has not obtained a predominance of power in the movement commensurate with his prestige. For today, as in the past, a diversity of approaches is necessary. Needed in the move-

ment are those who view the struggle chiefly as a conflict situation, in which the power of demonstrations, the power of Negroes, will force recognition of the race's humanity and citizenship rights, and the achievement of equality. Equally needed are those who see the movement's strategy to be chiefly one of capitalizing on the basic consensus of values in American society by awakening the conscience of the white man to the contradiction between his professions and the facts of discrimination. And just as necessary to the movement as both of these are those who operate skillfully, recognizing and yet exploiting the deeply held American belief that compromise among competing interest groups is the best modus operandi in public life.

King is unique in that he maintains a delicate balance among all three of these basic strategy assumptions. The traditional approaches of the Urban League (conciliation of the white businessmen) and of the NAACP (most preeminently appeals to the courts and appeals to the sense of fair play in the American public), basically attempted to exploit the consensus in American values. It would of course be a gross oversimplification to say that the Urban League and NAACP strategies are based simply on attempting to capitalize on the consensus of values, while SNCC and CORE act simply as if the situation were purely a conflict situation. Implicit in the actions of all civil rights organizations are both sets of assumptions—even where people are not conscious of the theoretical assumptions under which, in effect, they operate. The NAACP especially encompasses a broad spectrum of strategies and types of activities, ranging from time-tested court procedures to militant direct action. Sophisticated CORE activists know very well when a judicious compromise is necessary or valuable. But I hold that King is in the middle, acting in effect as if he were basing his strategy upon all three assumptions described above. He maintains a delicate balance between a purely moral appeal and a militant display of power. He talks of the power of the bodies of Negro demonstrators in the streets, but unlike CORE and SNCC activists, he accepts compromises at times that consist of token improvements, and calls them impressive victories. More than any of the other groups, King and SCLC can, up to this point at least, be described as exploiting all three tactical assumptions to an approximately equal degree. King's continued success, I suspect, will depend to a considerable degree upon the difficult feat of maintaining his position at the "vital center" of the civil rights movement.

Viewed from another angle King's failure to achieve a position of power on a level with his prestige is fortunate because rivalries between personalities and organizations remain an essential ingredient of the dynamics of the movement and a precondition for its success as each current tries to outdo the others in effectiveness and in maintaining a good public image. Without this competitive stimulus, the civil rights revolution would slow down.

I have already noted that one of King's functions is to serve as a bridge between the militant and conservative wings of the movement. In addition, by gathering support for SCLC, he generates wider support for CORE and SNCC, as well. The most striking example is the recent series of demonstrations in Selma where SNCC had been operating for nearly two years with only moderate amounts of publicity before King chose that city as his own target. As usual, it was King's presence that focused world attention on Selma. In the course of subsequent events, the rift between King and SNCC assumed the proportions of a serious conflict. Yet people who otherwise would have been hesitant to support SNCC's efforts, even people who had become disillusioned with certain aspects of SNCC's policies during the Mississippi Summer Project of 1964, were drawn to demonstrate in Selma and Montgomery. Moreover, although King received the major share of credit for the demonstrations, it seems likely that in the controversy between King and SNCC, the latter emerged with more power and influence in the civil rights movement than ever before. It is now possible that the Administration will, in the future, regard SNCC as more of a force to be reckoned with than it has heretofore.

Major dailies like the New York Times and the Washington Post, basically sympathetic to civil rights and racial equality, though more gradualist than the activist organizations, have congratulated the nation upon its good fortune in having a "responsible and moderate" leader like King at the head of the nonviolent action movement (though they overestimate his power and underestimate the symbolic nature of his role). It would be more appropriate to congratulate the civil rights movement for its good fortune in having as its symbolic leader a man like King. The fact that he has more prestige than power; the fact that he not only criticizes whites but explicitly believes in their redemption; his ability to arouse creative tension combined with his inclination to shrink from carrying demonstrations to the point where major bloodshed might result; the intellectual simplicity of his philosophy; his tendency to compromise and exert caution, even his seeming indecisiveness on some occasions; the sparing use he makes of going to or staying in jail himself; his friendship with the man in the White House—all are essential to the role he plays, and invaluable for the success of the movement. It is well, of course, that not all civil rights leaders are cut of the same cloth—that King is unique among them. Like Randolph, who functions very differently, King is really an institution. His most important function, I believe, is that of effectively communicating Negro aspirations to white people, or making nonviolent direct action respectable in the eyes of the white majority. In addition, he functions within the movement by occupying a vital center position between its "conservative" and "radical" wings, by symbolizing direct action and attracting people to participate in it without dominating either the civil rights movement or its activist wing. Viewed in this context, traits that many activists criticize in King actually function not as sources of weakness, but as the foundations of his strength.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, June 4, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JUNE 5

9:00 a.m.
Finance
Estate and Gift Taxation Subcommittee
To resume hearings on S. 404, S. 395, S. 858, S. 574, S. 23, S. 557, and S. 995, proposals to revise the estate and gift tax laws and minimize the burden on small and moderate-size estates.
2221 Dirksen Building

10:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Fine Arts Commission, the National Gallery of Art, and the Bureau of Mines.
1114 Dirksen Building

Environment and Public Works
To continue oversight hearings on the implementation of the Clean Air Act.

Clohan, Jr., of West Virginia, to be Under Secretary of Education; Robert M. Worthington, of Utah, to be Assistant Secretary for Vocational and Adult Education, Department of Education; Winifred A. Pizzano, of Virginia, to be Deputy Director of the ACTION Agency; and Lawrence F. Davenport, of California, to be an Associate Director of the ACTION Agency.

4232 Dirksen Building

JUNE 12

9:00 a.m.
*Office of Technology Assessment
The Board, to hold a business meeting on pending business matters.

EF-100, Capitol

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee and Energy and Agricultural Taxation Subcommittee
To hold joint hearings on the taxation of commodity straddle transactions, and on S. 626, proposed Commodity Straddles Tax Act.

2221 Dirksen Building

10:00 a.m.
Environment and Public Works
Water Resources Subcommittee
To hold hearings on proposals to provide for the development of ports and harbors and inland waterways in the United States, including S. 809, S. 68, S. 202, S. 576, S. 828, and S. 1094.

4200 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.

6226 Dirksen Building

JUNE 15

9:00 a.m.
Appropriations
*Defense Subcommittee
To resume closed hearings on proposed budget estimates for fiscal year 1982 for the defense establishment, receiving testimony on defense intelligence programs.

S-406, Capitol

Labor and Human Resources
*Employment and Productivity Subcommittee
To continue hearings on employment and training programs in the United States, focusing on objectives of employment and training policy and the relationship between Federal, State and local governments in the funding, design and administration of employment and training programs.

4232 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To resume hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.

235 Russell Building

10:00 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
To resume oversight hearings on the implementation of the municipal wastewater treatment construction grants program of the Clean Water Act, and to hold hearings on S. 975, revising and extending for one year certain provisions of the Federal Water Pollution Control Act, and on other related proposals.
4200 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
5110 Dirksen Building

JUNE 16

9:00 a.m.
Governmental Affairs
Civil Services, Post Office, and General Services Subcommittee
To hold hearings on S. 1224, strengthening the congressional franking law and clarifying its privilege.
Room to be announced

9:30 a.m.
Banking, Housing, and Urban Affairs
International Finance and Monetary Policy, and Securities Subcommittees
To resume joint hearings on S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977.
5302 Dirksen Building

Commerce, Science, and Transportation
To continue hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.

JUNE 10

9:30 a.m.
Labor and Human Resources
*Labor Subcommittee
To continue oversight hearings on the implementation of the Longshoremen and Harbor Workers Compensation Act.
4232 Dirksen Building

SENATE—*Thursday, June 4, 1981*

(Legislative day of Monday, June 1, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Reverend Robert W. Thurston, D.D., minister, First Baptist Church, New London, N.H., offered the following prayer:

Eternal God, we thank You for the faith which sustains us, the hope which inspires us, and the light by which we daily walk.

Help us to correct our mistakes. Cause us to look within ourselves and to see there all that we condemn in others.

Give to every nation that which we seek for our own Nation—concern for the needs of everyone, sensitivity to moral issues, deliverance from cynicism and despair, strength to be free and to carry the burden of freedom, and readiness to accept responsibility, rather than to evade its consequence.

Let us go through today's work with faithfulness, strong to do justly, to love mercy, and to walk humbly with You. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I thank the Chair.

I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE SENATE AGENDA

Mr. BAKER. Mr. President, in the informal calendar of legislative activity that we construct in the leadership office, today had been set aside for continuation of final disposition of S. 1197, the housing bill. I offer appropriate commendation and appreciation to the distinguished Senator from Indiana (Mr. LUGAR) who managed the bill, and the Senator from Wisconsin (Mr. PROXMIRE), because we finished that bill yesterday, which must be a record for a housing bill, by the way. I point out as well that some Members who had very controversial amendments that might have been offered to the bill did not offer those amendments. No doubt they will be dealt with later on other bills or as free-standing matters. In any event, on yesterday, we were able to complete a major piece of legislation in a very short period of time; perhaps even in record time.

CONFERENCE REPORT ON SUPPLEMENTAL APPROPRIATIONS

That leaves us, Mr. President, with not much to do on the Legislative Calendar. I hope that the other body will act on the supplemental appropriations bill conference report this morning. My estimation, which, of course, is unofficial, is that the House of Representatives may act or take final action on the conference report and the items in disagreement at 1 o'clock today. If they do that and we receive that conference report here, it is, of course, the intention of the leadership on this side, I hope with the concurrence of the leadership on the Democratic side, to take up that conference report as soon as possible and to proceed to its consideration and completion today.

I remind all of my colleagues who may be listening to this statement that the deadline for completion of action on the conference report is midnight tomorrow night, June 5, because the continuing resolution expires at that time and this simply must be in place. I hope that, later today, when we receive the conference report, and I would not presume to ask for the agreement at this time, but later today, when we receive the report and see the condition that it is in from the other body, we might be able to obtain a time agreement for its consideration.

Mr. President, I inquire of the majority leader if he might consider that or be willing to inquire on his side about those prospects.

Mr. ROBERT C. BYRD. Mr. President, I shall be delighted to inquire about the prospects on this side of the aisle for a time agreement. As far as I personally am concerned, I would be agreeable to such. I shall be getting back in touch with the distinguished majority leader once I have done that.

Mr. BAKER. I thank the minority leader.

Mr. President, let me say now, in advance, that if we can finish action on the conference report today, I hope we might do so by about 5 p.m. But I am prepared to ask the Senate to remain in session beyond that time and to stay late today, since Thursday is the day announced for late sessions if necessary, in order to try to avoid a session of the Senate tomorrow. If we cannot finish action today on the conference report, as I said a moment ago, it will be necessary to be in tomorrow to do so and, heaven forbid, on Saturday if necessary, because this matter is of such extraordinary importance.

FOOD STAMP BILL

Mr. President, I had hoped to have the food stamp bill available for action in the Senate beginning on Monday. It is my understanding now that there is a printed report to accompany that bill and that the 3-day rule will not have matured until Tuesday of next week. Notwithstanding that, it is my intention that we shall find something to do on the Calendar of General Orders or the Executive Calendar on Monday. We will be in session on Monday. I hope that, as well, the minority leader might be able to consider shaving 1 day off the 3-day rule so we could take up the food stamp bill on Monday.

I observe around the room that certain of the staff of the distinguished minority leader have a serious and somber look on their faces, so that may not be possible. But I make that request in any event. I hope the minority leader might consider, with compassion and concern, the possibility of shaving 1 day off the 3-day rule so we can go to the food stamp bill on Monday.

If he does that, of course, it will give us a good full day on Monday to debate that issue. If not, we shall have to proceed with that bill on Tuesday. But I make that request of the minority leader, that we might consider a 1-day reduction in the 3-day rule.

I observe not only do the minority leader's staff have a somber look on their faces, but also the minority leader has a smile on his face. I leave that to him to interpret.

Mr. ROBERT C. BYRD. Echoes from the past.

Mr. BAKER. "Echoes from the past." I am afraid that has a sinister and foreboding import.

In any event, it will be my intention to move to the food stamp bill as soon as possible, on Monday if possible; if not, on Tuesday of next week.

NOMINATION OF CHARLES Z. WICK

Mr. President, there are a number of other things we can deal with. I hope that, today, we might be able to deal with some of the nominations and items on the Executive Calendar. I especially would like to proceed to the nomination of Charles Z. Wick, of California, to be Director of the International Communication Agency. Mr. Wick has, I believe, certain assignments that he would like to undertake for the President that cannot be undertaken until the Senate grants its consent to this nomination.

May I inquire, as well, of the minority leader if there is some possibility that, during today, we may proceed to the consideration of that item and other items on the Executive Calendar?

Mr. ROBERT C. BYRD. There certain-

ly is a possibility of proceeding with other items on the Executive Calendar. There may be a possibility of proceeding with the nomination of Mr. Wick. I am not in a position at this time to state.

Mr. BAKER. I thank the minority leader. I know the minority leader has expressed concern on a number of issues in writing about Mr. Wick. Mr. Wick has now replied to those. I shall consult with the minority leader later today on that and other items on the Executive Calendar.

Mr. President, I have no further need for the rest of my time under the standing order, if any time remains. I yield to the minority leader if he has any need for it.

Mr. ROBERT C. BYRD. Mr. President, I should be happy to have control of it.

Mr. BAKER. Mr. President, I yield the remainder of my time to the distinguished minority leader.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

ATTEMPTED PRESIDENTIAL ASSASSINATIONS

Mr. ROBERT C. BYRD. Mr. President, Ronald Reagan was the eighth sitting President to be the victim of an assassination attempt. Four American Presidents have been killed by assassins' bullets—Abraham Lincoln, James Garfield, William McKinley, and John F. Kennedy. Three others escaped serious injury—Andrew Jackson, Harry Truman, and Gerald Ford. This macabre history is especially disturbing in light of the alarming frequency of attempts on the lives of Presidential candidates, prominent political figures, and other well-known Americans. Any act of violence is to be condemned, but the attempted assassination of the President of the United States is a particularly heinous crime which deserves the most severe punishment.

Today I am introducing legislation to mandate life imprisonment for any individual who attempts to kill the President, the President-elect, the Vice President, or the official next in the order of succession. Under current law, actual assassination of the President or any of the other named persons is a capital offense, punishable by death if a constitutionally viable death penalty statute is enacted by the Congress. However, attempted assassination, a crime as onerous in intent as the act itself, carries only a sentence of any term of years to life. Thus, life imprisonment is now a mere possibility—rather than a mandatory sentence—for those who attempt to take the President's life.

Following the assassination of Robert Kennedy, I introduced legislation to make assassination of a Member of Congress or a Member of Congress-elect a capital offense. That bill became law. Assassination of an elected representative is more than the murder of one individual. It has the potential to disrupt our governmental system and to destroy the people's electoral mandate.

In no instance is this danger more serious than with the President of the United States. Even the wounding of the President, requiring surgery and temporary incapacitation, carries the potential for grave national security consequences. The possible disruption of our domestic political order must not be taken lightly. The individual motivations of the assassin should come second to the heinous nature of the act and the effect which is intended, if not accomplished.

In the aftermath of the most recent assassination attempt, procedures to insure the safety of the President have been reassessed. New steps are being taken to limit the President's exposure to potentially dangerous situations. But President Reagan, like most men who have occupied our Nation's highest office, has refused strict limits on his mobility and freedom. In a democratic society it is crucial for the President to mingle with the public—to engage in spontaneous face-to-face encounters with the people he was elected to serve. While the risks can be lessened, they can never be eliminated. But those contemptible individuals who would contemplate harming the President must know that the punishment for such a crime will be swift, certain, and severe. Perhaps this threat will discourage some who would seek to harm this Nation and its President.

Mr. President, I send to the desk a bill and ask for its appropriate referral.

The PRESIDING OFFICER (Mr. HUMPHREY). The bill will be received and appropriately referred.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1324

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 1751 of title 18, United States Code, is amended—

(1) by striking out "kill or"; and

(2) by adding at the end thereof the following: Whoever attempts to kill any individual designated in subsection (a) of this section shall be punished by imprisonment for life.".

AFGHANISTAN—DARE WE FORGET?

Mr. ROBERT C. BYRD. Mr. President, in November 1955, as a member of a House Foreign Affairs Committee delegation which toured the Middle East and Far East, I wrote a newsletter to my constituents expressing serious concerns over the growing Soviet influence in Afghanistan.

I should like to quote from portions of that newsletter which relate the concerns I had during our visit to Afghanistan 26 years ago.

Afghanistan is a remote and very backward country and much of the territory borders upon Russia. Ours is the first Congressional Committee ever to visit this isolated and barren land, and the committee is deeply concerned as a result of its findings. All signs at the moment point to a growing Soviet influence, and there is fear that the country will soon slip behind the Iron Curtain.

The Soviets are constructing badly needed roads for the people of Afghanistan, and Bulganin will pay an official visit to Kabul within the next few days. Afghanistan's neutralist policy is showing signs of wear and, although the Afghans themselves, as a whole, seem to be very anti-Russian in their thinking, the present ruling family is leaning dangerously toward the USSR.

Relations with Pakistan are strained and King Zahir Shah seems to be unwittingly playing into the hands of the Communists by continuing to demand that certain territory in what is now Pakistan be set aside for the Pushtun tribes. . . .

A crisis of considerable significance is taking shape in Afghanistan as a result of the foregoing circumstances. The National Assembly will meet within the next day or so, at which time the government will seek support of its policies. Should it be assured by the tribal chieftains of such support, we may expect to see Afghanistan press the demand against Pakistan for a separate Pushtun state and the Afghanis will likely be aided and abetted by the Russians who will supply arms.

We may then see Afghanistan, a country through whose mountain passes have streamed invading armies from the time of Alexander the Great, become a satellite of Russia and a highway over which Red armies will someday threaten Pakistan and the waterways and oil fields of the Middle East.

In June 1973, the parliamentary constitutional monarchy in Afghanistan was overthrown in a military coup led by the deposed monarch's brother, Lt. Gen. Daud Khan. In 1974, President Daud declared that his government would support the independence movements in Pakistan's two border provinces of Baluchistan and the northwest frontier. For the first time in 26 years, regular troops from Pakistan and Afghanistan faced each other across the Durand line.

During President Daud's rule, from 1973 until April 1978, the Soviet presence in Afghanistan grew substantially, as the Soviet Union poured in aid and military advisers in an effort to exert greater political control on this nonaligned country. However, Afghanistan, which is 99 percent Moslem, proved nearly impossible for the Soviets to bring into their orbit as a satellite. As a result, President Daud was overthrown in April 1978. Diplomats familiar with the situation felt the immediate provocation for the coup was the Government crackdown on Afghan Communists. Three days later, the Soviet Union recognized the new Government, headed by Nur Taraki,

chairman of the Marxist, pro-Moscow Khalq-Parcham party.

The Soviets had high hopes that they could exert significantly more influence with a Marxist in power. But diplomats predicted that Taraki would hesitate to create an orthodox Communist state in so devoutly a Moslem country. In October of that year, the Soviet presence tripled.

However, the resistance to having a Marxist president of, and a growing Soviet presence in, Afghanistan began to manifest itself early in 1979. In January, the West received the first reports of anti-Government guerrillas, fighting in the name of Islam, threatening a provincial capital in eastern Afghanistan.

On February 14, 1979, U.S. Ambassador Adolph Dubs was killed in a shoot-out between police and Moslem gunmen, who had kidnaped him in an attempt to win the freedom of three Shiite clergymen held by the government. It was reported, from reliable sources, that Soviet advisers were involved with the Afghan police when the shooting occurred.

In March of 1979, the Moslem rebellion was spreading and increasing in intensity. There was a major uprising in Herat (west of Kabul) in which diplomats reported at least a dozen Soviet advisers being slain.

On April 13, 1979, the New York Times reported that U.S. intelligence officials were estimating that as many as 100 of the estimated 3,000 Soviet military advisers in Afghanistan may have died in the spreading rebellion against the Kabul government. The Times also reported that in addition to serving as advisers, Soviet personnel were said to be playing a growing role in the fighting, including piloting helicopters and fighter planes and directing artillery fire.

On August 13, 1979, four Afghan rebel groups issued a communique announcing they were united into a single organization whose aim was to overthrow the government of President Taraki. On September 16, it was announced that Taraki had resigned and Premier Hafizullah Amin had taken over as President. It was determined later that Taraki had been killed in a shoot-out in the Presidential Palace on September 14.

In December 1979, the Soviet Union moved three army divisions to its border with Afghanistan. On December 26, the Soviets began an around-the-clock airlift of troops into Afghanistan and the invasion was underway. On December 27, Amin was replaced by Deputy Premier Babrak Karmal and a day later, Karmal announced that the Soviet Union had agreed to a new program of urgent, political, moral, and economic assistance, including military aid.

Mr. President, I hark back to my newsletter of 26 years ago. In many ways, what we found on our trip to that country was prophetic for both the Soviet Union and the West. The Soviets, through political intrigue, manipulation, coups, and even assassinations could never force the Afghan people to submit to being their satellite. The anti-Russian feelings we found among the Afghan people in 1955 grew with each stage of increased Soviet presence in that country. It burst into widespread rebellion when the decidedly pro-Moscow government of Nur Taraki was installed in a Soviet-backed coup in April of 1978. We have seen a succession of governments over the years, toppled because of their inability to impose an alien ideology and government on a people who are fiercely independent and whose deep-seated Moslem beliefs do not allow them to accept Marxism.

The West can take little comfort in the dilemma in which the Soviets find themselves in Afghanistan. Soviet tanks roll over those very roads the Russians were constructing in 1955. And today, Afghanistan, a country through whose mountain passes have streamed invading armies from the time of Alexander the Great, has, in fact, become an occupied satellite of the Soviet Union and a highway over which Red armies can threaten Pakistan and the waterways and oil fields of the Middle East. What the Soviets could not accomplish politically, they are now attempting to accomplish militarily. That is why we must continue to ask: Afghanistan—dare we forget?

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not longer than 30 minutes in which Senators may speak therein not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is now ordered.

Mr. BAKER. Mr. President, I have a number of requests to make and then I shall renew my request of the minority leader in respect to the Executive Calendar.

ORDER FOR THE RECOGNITION OF SENATOR NUNN ON TUESDAY

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate convenes on Tuesday next, on June 9, after the recognition of the two leaders under the standing order the Senator from Georgia (Mr. NUNN) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEQUENTIAL REFERRAL OF S. 854

Mr. BAKER. Mr. President, I believe this request has been cleared with the distinguished minority leader.

I ask unanimous consent that S. 854, the Foreign Missions Act of 1982, that was sequentially referred Tuesday, now be sequentially referred as follows:

That when the Committee on Foreign Relations report S. 854, it be referred to the Committee on Government Affairs for a period of 45 calendar days, excluding weekends, holidays, and those days in which the Senate is not in session, and that the printed report of the Foreign Relations Committee be delivered to the Committee on Government Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, I have cleared on my side of the aisle certain bills on the Calendar of General Orders and certain items on the Executive Calendar. I will identify them, if I may, for the minority leader.

We are cleared here to proceed with the consideration of Calendar Order No. 112, S. 468, to advance to third reading. We propose at that time to call up Calendar Order No. 157, H.R. 1100, and to strike all after the enacting clause and insert in lieu thereof Calendar Order No. 112, S. 468, previously advanced to third reading and to adopt Calendar Order No. 157 and to indefinitely postpone Calendar Order No. 112.

I am prepared to do that at this time if it is cleared on the minority side.

Mr. ROBERT C. BYRD. Mr. President, there will be no objection at this time.

Mr. BAKER. I thank the minority leader.

FORMER PRISONERS OF WAR BENEFITS ACT OF 1981

Mr. BAKER. Mr. President, I now ask that the Chair lay before the Senate Calendar Order No. 112, S. 468, and advance that bill to third reading.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 468) to amend title 38, United States Code, to expand the eligibility of former prisoners of war for certain health care benefits provided by the Veterans' Administration, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Veterans' Affairs with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "Former Prisoners of War Benefits Act of 1981".

SEC. 2. (a) Chapter 3 of title 38, United States Code, is amended by adding after section 220 the following new section:

"§ 221. Advisory Committee on Former Prisoners of War

"(a)(1) The Administrator shall establish an advisory committee to be known as the Advisory Committee on Former Prisoners of War (hereafter referred to in this section as the 'Committee').

"(2) The members of the Committee shall be appointed by the Administrator from the general public, shall serve for terms to be determined by the Administrator, not to exceed three years, and shall include—

"(A) appropriate representatives of veterans who were held as prisoners of war;

"(B) individuals who are recognized authorities in fields pertinent to disabilities prevalent among former prisoners of war, in-

cluding authorities in epidemiology, mental health, nutrition, geriatrics, and internal medicine; and

"(C) appropriate representatives of disabled veterans.

"(3) The Committee shall also include as ex officio members the Chief Medical Director and the Chief Benefits Director, or their designees.

"(b) The Administrator shall, on a regular basis, consult with and seek the advice of the Committee with respect to the administration of benefits under this title to veterans who were held as prisoners of war, and the compensation, health care, and rehabilitation needs of such veterans.

"(c) Not later than July 1, 1982, and not later than July 1 of each even-numbered year thereafter, the Committee shall submit to the Administrator a report on the programs and activities of the Veterans' Administration that pertain to veterans who were held as prisoners of war, and shall include in each such report an assessment of the compensation, health care, and rehabilitation needs of such veterans, a review of the programs and activities of the Veterans' Administration designed to meet such needs, and such recommendations, including recommendations for administrative and legislative actions, as the Committee determines appropriate. The Administrator shall submit such report to the Congress forthwith with any comments the Administrator determines appropriate. The Committee may also submit to the Administrator such other reports and recommendations as the Committee determines appropriate. The Administrator shall submit with each annual report submitted to the Congress pursuant to section 214 of this title a summary of all reports and recommendations of the Committee submitted to the Administrator since the previous annual report of the Administrator was submitted to the Congress pursuant to such section.".

(b) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 220 the following new item:

"221. Advisory Committee on Former Prisoners of War.".

SEC 3. (a) Section 101 of title 38, United States Code, is amended by adding at the end the following new paragraph:

"(32) The term 'prisoner of war' means a veteran who, while serving in the active military, naval or air service was forcibly detained or interned in line of duty by an enemy governments or its agents, or a hostile force—

"(A) during a period of war; or

"(B) during any period other than a period of war in which such veteran was held under circumstances which the Administrator finds comparable to the circumstances under which persons have generally been forcibly detained or interned during periods of war.".

(b) Section 612(b)(7) is amended by striking out "of World War I, World War II, the Korean conflict, or the Vietnam era.".

SEC. 4. Section 312 of title 38, United States Code, is amended by—

(1) striking out subsection (b) in its entirety;

(2) redesignating subsection (c) as subsection (b); and

(3) amending subsection (b) as redesignated in clause (2) of this section to read as follows:

"(b) For the purposes of this title and subject to the provisions of section 313 of this title—

"(1) in the case of any veteran who was held as a prisoner of war for not less than thirty days, the disease of—

"(A) avitaminosis,

"(B) beriberi (including beriberi heart disease),

"(C) chronic dysentery,

"(D) helminthiasis,

"(E) malnutrition (including optic atrophy associated with malnutrition),

"(F) pellagra, or

"(G) any other nutritional deficiency, and

"(2) in the case of any veteran who, while so serving, was held as a prisoner of war for any period of time, the disease of psychosis which becomes manifest as a disability to a degree of 10 per centum or more after such service, shall be considered to have been incurred in or aggravated by such service, notwithstanding that there is no record of such disease during the period of service.".

SEC. 5. Section 610(a) of title 38, United States Code, is amended by—

(1) striking out "and" at the end of clause (3);

(2) redesignating clause (4) as clause (5); and

(3) inserting after clause (3) the following new clause:

"(4) any veteran who was held as a prisoner of war; and".

SEC. 6. Section 612(1) of title 38, United States Code, is amended by—

(1) redesignating clause (4) as clause (5); and

(2) inserting after clause (3) the following new clause:

"(4) To any veteran described in section 610(a)(4) of this title.".

SEC. 7. (a) In order to assist in the further development of statutory and administrative policies regarding the needs of veterans who are former prisoners of war by addressing certain issues not resolved on basis of the study submitted pursuant to section 305 of Public Law 95-479, the Administrator of Veterans' Affairs (hereafter referred to in this section as "Administrator") shall conduct a further study of the health of former prisoners of war. In carrying out such study the Administrator shall examine—

(1) the types, combinations, severity, and frequency of occurrences of physical and mental disabilities (including but not limited to psychoneuroses, arthritis, respiratory and gastrointestinal disorders, and frozen feet residuals) particularly prevalent among such veterans;

(2) a representative sample of the cases of such veterans whose claims for disability compensation under chapter 11 of title 38, United States Code, have been denied; and

(3) any other factors considered relevant to the issues whether (A) additional presumptions should be established to assist such veterans in obtaining determinations that their disabilities are the result of their experiences as prisoners of war, and (B) the eligibility of any such veterans for health-care services from the Veterans' Administration should be expanded.

(b) Not later than December 31, 1982, the Administrator shall prepare and transmit to the Congress a report on the results of the study required by this section. Such report shall include such recommendations for administrative and legislative action as the Administrator considers may be necessary to meet the needs of veterans who are former prisoners of war for disability compensation and health-care services.

(c) In preparing the design of and conducting the study required by this section and in preparing the report required by this section, the Administrator shall consult with the Advisory Committee on Former Prisoners of War established pursuant to section 221 of title 38, United States Code (as added by section 2 of this Act).

SEC. 8. (a) Notwithstanding any provision of law—

(1) any veteran who was held as a prisoner of war (as defined in paragraph (32) of section 101 of title 38, United States Code, as added by section 3(a) of this Act) may, not later than December 31, 1982, file a claim for disability compensation under chapter 11 of title 38, United States Code, based upon a mental disorder with respect to which a previous such claim was disallowed prior to January 1, 1981; and

(2) any claim filed pursuant to clause (1) of this subsection shall for all purposes under such title be considered an original claim.

(b) The Administrator shall, to the maximum extent feasible and in order to carry out the requirements of subchapter IV of chapter 3 of such title seek out and provide information to veterans affected by the provisions of subsection (a) regarding the opportunity to file a claim for disability compensation pursuant to such subsection.

SEC. 9. (a) Except as provided in subsection (b), the amendments made by this Act shall be effective on the date of enactment.

(b) The amendments made by section 4 of this Act shall become effective October 1, 1981.

Mr. CRANSTON. Mr. President, I am pleased to join with the distinguished chairman of the Veterans' Affairs Committee (Mr. SIMPSON) in urging my colleagues to approve S. 468, the proposed "Former Prisoners of War Benefits Act of 1981," as reported by the committee on May 15. This unanimously approved committee measure is designed to improve Veterans' Administration benefits and services for veterans who are former POW's.

The measure is based, in part, on the findings, conclusions, and recommendations for legislative actions made by the VA in its report, entitled "Study of Former Prisoners of War," which was submitted to the Congress on June 2, 1980, pursuant to section 305 of Public Law 95-479, the Veterans' Disability Compensation and Survivors Benefits Act of 1978, and on testimony the committee received at its April 22 hearing on ex-POW legislation. A number of provisions in the measure as reported have been derived from a measure I, joined by Senators MATSUNAGA and DECONCINI, introduced on March 10—S. 670, the proposed "Ex-Prisoners of War Benefits Improvements Act of 1981."

BACKGROUND

As chairman of the Senate Veterans' Affairs Committee in the last two Congresses and now as ranking minority member, I am well acquainted with the deep concerns that many have—and which I share fully—for these veterans who made such special sacrifices and endured extreme hardships as prisoners of war. Their strength, courage, and love of freedom helped to preserve our country, and we truly owe them a debt that can never be fully repaid. The pending measure, however, represents a grateful Nation's recognition of some of the special needs and concerns of this group of veterans.

Mr. President, this measure—the first to be unanimously reported by the com-

mittee this year—will, I believe, be of great significance for many of our Nation's ex-POW's. The committee has devoted an extraordinary amount of time and effort to addressing the complex issues involved in trying to deal fairly and adequately with the problems of former POW's ever since the VA study was submitted last June pursuant to the study provision, which I authored, in Public Law 95-479.

I hope my colleagues will agree that we have been successful in developing an effective measure that melds the provisions of the proposals that were pending before the committee—including my measure, S. 670; the measure introduced by my distinguished colleague from South Carolina (Mr. THURMOND), S. 468; and the measures introduced by Senators ABDNOR and KASTEN, S. 251 and S. 1164, respectively. The spirit of cooperation and flexibility that was displayed during consideration of this legislation by all members of the committee has contributed to making this a truly bipartisan initiative which reflects the committee's continuing commitment to efforts that would meet the needs of ex-POW's.

Mr. President, I would like to take this opportunity to comment very briefly on a number of the provisions of the committee bill that I believe are particularly important.

ADVISORY COMMITTEES ON FORMER PRISONERS OF WAR

Section 2 of the committee bill would require the Administrator of the VA to establish an Advisory Committee on Former Prisoners of War. The membership of the Advisory Committee would include appropriate representatives of former POW's, individuals who are recognized authorities in fields pertinent to disabilities prevalent among former POW's, and appropriate representatives of disabled veterans generally. The VA Administrator would be required to consult with and seek the advice of the committee on a regular basis. In addition, the committee would be required to submit a biannual report to the Administrator—the first report due no later than July 1, 1982—who would in turn be required to submit the report to the Congress.

The provisions of section 2 are generally derived from the provisions of my proposal for the establishment of an advisory committee. In this regard, I am pleased that the members of the Veterans' Affairs Committee shared my belief that it is important that the Advisory Committee's biannual report to the Administrator be required by law to be submitted to the Congress. I believe this will serve to enhance the status of the Advisory Committee within the VA and will give the Congress, on a continuing basis, a means of assessing the need for any further actions to address the needs of former POW's. Also, a role for involvement of disabled veterans in the work of the committee was agreed to, as I had proposed.

IMPROVEMENTS RELATED TO VA SERVICE-CONNECTED COMPENSATION

Section 4 of the pending measure would make a number of modifications in existing law which relate to presumptions of the service-connected nature of certain diseases and disabilities of former POW's. The basic purpose of these improvements is to relieve to a certain extent the burden on a former POW to submit evidence to the Administrator that certain disabilities are service connected.

First, the committee bill would reduce from 6 months to 30 days the minimum internment period required for the automatic application of presumptions related to diseases and disabilities resulting from dietary deficiencies, including chronic dysentery, and would eliminate completely a length-of-internment requirement for the automatic application of the presumption of service connection in cases of psychosis.

I had proposed in S. 670 that no minimum internment requirement be imposed for the presumptions related to dietary-deficiency-related diseases or to psychosis; Senator THURMOND's bill proposed that the minimum internment requirement for both types of disabilities be reduced to 60 days. Thus, I was pleased that the committee was able to reach the compromise that is reflected in the committee bill, and I would like to take this opportunity, Mr. President, to express my particular appreciation to my friend from South Carolina (Mr. THURMOND) for his cooperation in this area.

Second, the committee bill would—as would all of the proposals that were considered—eliminate the requirement that in order to be presumed to be service-connected a psychosis must become manifest within 2 years after the veteran's release from active duty. This provision is based on a recommendation for legislative change made by the VA in its June 1980 study.

Third, the bill would, as would the provisions of S. 670, eliminate the unduly complicated two-step procedure in current law for the application of the presumptions of service connection. Step one of this current procedure provides that a veteran who was held as a POW for more than 6 months is presumed to have suffered from conditions of dietary deficiencies, forced labor, and inhumane treatment in violation of the Geneva Conventions; step two provides further that the presumptions of service-connection for certain diseases apply to a veteran who has suffered from such conditions.

Instead, as I have noted, this bill would provide directly for the application of a presumption of service connection of certain dietary-deficiency-related disabilities of any veteran who was held as a POW for 30 days or more and for the application of such a presumption for the psychosis of a veteran who was held as a POW for any length of time.

Mr. President, I would also note that the bill provides a definition of "prisoner of war" for purposes of title 38, United States Code, which includes service persons who are held captive either during a period of war or during any other period in which he or she was held under circumstances comparable to those under which persons have been held captive during periods of war.

IMPROVEMENTS RELATED TO HEALTH CARE

In the health-care area, the committee bill provides that ex-POW's would be given the same eligibility for nonservice-connected care from the VA as veterans who have no service-connected disabilities and are unable to defray the costs of care. That eligibility is for hospital and nursing home care, prehospital and post-hospital outpatient care and outpatient care that would obviate a need for hospitalization. In addition, the measure would place ex-POW's in a new fourth priority category for outpatient care ahead of all veterans who have no service-connected disabilities.

In this connection, Mr. President, I want to point out that the provisions of the committee bill would provide the same eligibility and outpatient priority to former POW's as my amendment No. 59 to S. 921, the proposed "Veterans' Programs Extension and Improvements Act of 1981," would provide to Vietnam veterans for disabilities that can be linked by some credible evidence to exposure to agent orange or certain other toxic substances used militarily in Vietnam and to veterans who participated in nuclear weapon tests for disabilities that can be so linked to exposures to test radiation. I anticipate that that bill and that amendment will be before the Senate later this month.

REQUIREMENT FOR ADDITIONAL STUDY AND PRESUMPTIONS RELATING TO NEUROSES

Mr. President, it should be noted that the provisions of S. 468 as reported do not include the provisions of my bill that would permit the Administrator of the VA to establish administrative presumptions of service connection with respect to other disabilities that are found to be reasonably attributable to the POW experience. Likewise, the measure does not include the provisions of S. 670 or S. 468 as introduced that would add neurosis to the list of disorders to which presumptions apply.

Instead, section 7 of the committee bill would require the Administrator to conduct a further study, addressing certain issues not resolved by the VA's 1980 study, of specific physical and mental disabilities prevalent among former POW's—including neuroses and other disabilities cited by ex-POW and veteran organizations such as residuals of frozen feet, chronic respiratory disorders, and gastro-intestinal diseases—and denials of claims from former POW's for disability compensation. The purpose of this study would be to help us determine whether additional presumptions should be established and eligibility for health-care benefits and services expanded. This report would be required to be conducted in consultation with the Advisory Committee that would be established by the committee bill and would be submitted to the Congress not later than December 31, 1982, with the Administrator's recommendations for appropriate administrative and legislative action.

Further, section 8 of the committee bill would permit a former POW whose claim for disability compensation based on a mental disorder has been denied prior to January 1, 1981, to file a new claim that would for all purposes be considered as an original claim. As an original

claim, such a claim would receive de novo consideration, and the award-effective-date provisions of section 3010 of title 38, United States Code, would apply. The Veterans' Administration would be required by the bill to seek out former POW's who could be benefited by this provision and provide them with information regarding it.

With respect to these provisions, Mr. President, I want to note that I shared the committee's view that, although very sympathetic to concerns in this area, we could not find sufficient justification—despite our very sympathetic approach to this problem—to add new statutory presumptions at this time. It is my expectation that the results of the followup study that would be required by the committee bill will provide the data that we need to give the fullest possible consideration to this important issue. I want to assure my colleagues in the Senate that there are no closed minds on this issue and that, as the ranking Democratic member of the committee, I will do my utmost to assure that this issue receives priority consideration when the study results are submitted.

CONCLUSION

In closing, I would like to express my thanks and congratulations to those who participated in the development of this legislation. As I previously noted, I am very grateful for the cooperation of Senator THURMOND and his staff representative John Pressly, whose contributions were invaluable.

In addition, the distinguished chairman of the committee (Mr. SIMPSON) deserves plaudits for his work on the measure, as does the committee staff member, Julie Susman, who devoted such extensive time and energy to this bill. Other committee staffers Laurie Altemose and Becky Hucks also deserve thanks for their assistance in preparing the committee report. The committee's ever-helpful printing clerk, Harold Carter, and his assistant, Jim MacRae, provided invaluable help to all. Finally, I would note the contributions of minority staff members—Babette Polzer, Ed Scott, and Jon Steinberg—and my appreciation for their efforts.

Mr. President, the measure pending before us is a good one. It has great significance to and will benefit those very courageous and valiant patriots whose sacrifices as POW's must never be forgotten and will never be fully repaid. I urge my colleagues to give their wholehearted approval to the proposed "Former Prisoners of War Benefits Act of 1981."

Mr. SIMPSON. Mr. President, I rise to urge the passage of S. 468, the proposed "Former Prisoners of War Benefits Act of 1981." This bill addresses one of the most compelling issues to come before this Congress. These most deserving veterans have suffered many forms of deprivation, torture, starvation, "death-marches" and other means of inhumane treatment. Over the years, these former POW's have reported that their claims for compensation have often been unfairly denied by the Veterans' Administration due to lack of solid medical evidence.

Because of the importance of this matter, the Senate Committee on Veterans' Affairs determined, after a June 17, 1980, hearing, that legislative action would be forthcoming early in the 97th Congress. This provided the committee with sufficient time to study the issue—including the VA's report mandated by Public Law 95-479 and submitted to Congress on June 2, 1980—in depth. The committee's first legislative hearing of the 97th Congress was held on April 22, 1981, to consider three bills which would have expanded VA benefits for former prisoners of war.

This commitment resulted in an intense effort to craft a bipartisan committee bill which would be appropriately responsive to the needs of former POW's. The committee bill, S. 468, is cosponsored by all members of the Senate Committee on Veterans' Affairs.

One of the most difficult issues for us to grapple with was the potential cost of such legislation. In this time of great budget restraint, it is especially important to be realistic and to enact legislation that is within the VA's cost ceilings. During the committee's budget hearings, the committee members voted to allow for up to the figure of $25 million for legislation to address compensation and health-care needs of former POW's. Original CBO estimates ranged as high as $70 million and a VA estimate reached over $100 million. As committee investigations proceeded a more thorough and responsible examination of existing services was undertaken, which resulted in the conclusion that much fewer individuals would be involved than originally anticipated.

CBO's estimate for the committee bill is $5.6 million. It appears that great strides have been made internally, using the newly established guidelines for post-traumatic stress disorder. This new diagnostic category is now used when rating—for purposes of disability compensation—former POW's who suffer from a specific neuropsychic disorder associated with the traumatic POW experience.

An important provision in section 7 of S. 468 would provide a 1-year study to examine further this very complex issue. The VA would be directed to study specific physical and mental disabilities, compensation claims of former POW's which have been denied by the VA and any other factors revelant to the issue of whether additional presumptions should be established to assist such veterans in equating their current disabilities to their experiences as prisoners of war. This additional targeted study is needed in order to address these issues which were not resolved by the results of the VA study submitted to Congress last spring.

Section 8 of S. 468 would allow any former POW whose claim for disability compensation based on any mental disorder was denied prior to January 1, 1981, to reopen the claim without presenting any new medical evidence. Former POW's would have until December 31, 1982, to again file a claim under the new VA guidelines for post-traumatic stress disorder.

The bill contains other important literalizations of benefits in the areas of disability compensation and health care services.

A majority of the 94,000 surviving former POW's are from the Korean conflict and World War II eras. As these veterans begin to experience some of the problems associated with aging which may be complicated by their experiences as prisoners of war, it seems especially appropriate to provide eligibility to them for VA inpatient and nursing home care as well as outpatient services to this very special category of veterans.

Mr. President, this bill would provide a real step forward for expanding benefits and services for our Nations' former POW's. The House passed its version of the bill June 2, and I strongly urge that we swiftly follow suit in order to be able to forward a final bill to the President in as prompt a manner as is possible.

Mr. President, at this time, I ask unanimous consent that excerpts of the committee's report on S. 468 be inserted in the RECORD to fully explain and clarify the details of the committee's bill.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

SUMMARY OF S. 468 AS REPORTED

BASIC PURPOSE

The basic purpose of S. 468 as reported (hereinafter referred to as "the Committee bill") is to improve benefits and services to be provided to veterans who are former POW's through the Veterans' Administration's compensation and health-care systems.

The Committee bill would accomplish this purpose by establishing an advisory committee of authorities in the types of disabilities prevalent among former POW's, liberalizing the presumptive provisions concerning compensation provided to veterans who are former POW's, providing VA health-care benefits and services to all former POW's, directing the VA to conduct a further study of the health of former prisoners of war to determine if additional presumptions of service connection should be established and if the health-care services for such veterans provided by the VA should be expanded, and authorize certain former POW's to reopen claims for compensation under certain circumstances, as if it were an original claim.

SUMMARY OF PROVISIONS

The Committee bill has one title, containing nine sections.

Section 1 of the bill provides that this Act may be cited as the "Former Prisoners of War Benefits Act of 1981".

POW advisory committee

Section 2 of the bill would provide for a Committee to be known as the Advisory Committee on Former Prisoners of War to be established by the Administrator of Veterans' Affairs. The Committee would consist of individuals who are recognized authorities in fields related to disabilities which occur often in former prisoners of war, representatives of former prisoners of war, and representatives of disabled veterans. There would also be two ex officio members—the Chief Medical Director and the Chief Benefits Director of the Veterans' Administration or their designees. The members, appointed by the Administrator, would serve terms of no more than 3 years, be eligible for reappointment, and would serve to advise the Administrator on matters concerning policy and procedure which would impact on the VA's benefits and services to

former POW's. The Administrator would, on a regular basis, be required to consult with and seek the advice of the Committee. The Committee would submit bi-annual reports to the Administrator, beginning not later than July 1, 1982, which would include an assessment of the compensation, health care, and rehabilitation needs of such veterans, a review of the programs and activities of the Veterans' Administration designed to meet such needs, and any recommendations for legislative and administrative actions as the Committee would determine to be appropriate. These reports would be submitted to Congress forthwith. Summaries of interim reports and recommendations would also be submitted to Congress annually.

Definition of prisoner of war

Section 3 of the bill would add a new paragraph to section 101 of title 38 to define "prisoner of war" generally for purposes of title 38, United States Code, as a veteran who, while serving in the active military, naval, or air service was forcibly detained or interned in the line of duty by an enemy government or its agents, or a hostile force either during a period of war or during a comparable period, as determined by the Administrator. There is also a technical amendment to conform section 612 of such to the change in section 101 of such title.

Nutritional presumptions

Section 4 of the bill would reduce the required period of internment as a prisoner of war from 6 months to 30 days for presumptions relating to certain disabilities and diseases, particularly those incurred as a result of malnutrition such as avitaminoses; beriberi (including beriberi heart disease); chronic dysentery; helminthiasis; malnutrition (including optic atrophy associated with malnutrition); pellagra; or any other nutritional deficiency.

Presumption for psychosis

Section 4 of the bill would provide service-connected benefits for psychosis which becomes manifest to a degree of 10 percent regardless of when the condition first becomes manifest and regardless of the length of the period of internment as a prisoner of war. This section would eliminate both the requirement of a 6-month period of internment for a presumption relating to psychosis and the requirement for the psychosis to manifest itself within 2 years of the date of separation to be presumed to be connected to the POW experience for the purpose of establishing a service-connected disability.

Section 4 would also strike language in section 312(b) of title 38, which when discussing prisoners of war refers to specific enemy governments. This change would expand eligibility to include those former POW's who were interned during World War I.

Eligibility for health-care benefits and service

Section 5 of the bill would expand section 610(a) of title 38 to provide eligibility for inpatient hospital and nursing home care for veteran who had been held as a prisoner of war, regardless of the length of internment.

Section 6 of the bill would expand section 612(1) of title 38 to provide outpatient care, on a priority basis, to former prisoners of war. Such former prisoners of war would be eligible for pre- or post-hospital care or to obviate the need for inpatient care on a priority basis after those veterans with a service-connected disability or those who are being examined for the existence or rating of a service-connected disability, and above all other non-service-connected veterans.

VA study

Section 7 of the bill would provide for a limited study of the health of former POW's to be conducted by the VA to determine whether additional presumptions should be established in the area of physical and mental disabilities in section 312 of title 38, that would relate to the POW experience, to examine the health services provided by this bill in order to determine if the VA is appropriately addressing the health-care needs of former prisoners of war, and the bases upon which a sample of cases of former POW's claims for disability compensation have been denied. The Advisory Committee established by this bill, would be consulted in the design preparation, conducting the study and the report preparation of this study which would be submitted to the Congress not later than December 31, 1982.

Claims for mental disorders which have been denied

Section 8 of the bill would allow a former prisoner of war, whose claim for disability compensation based on a mental disorder had been previously denied before January 1, 1981, to file a claim not later than December 31, 1982, which would, for all purposes, be considered a new claim.

Effective dates

Section 9 of this bill would provide that the effective date of this bill would be the date of enactment with the exception of section 4 which would take effect on October 1, 1981.

DISCUSSION

BACKGROUND

In 1978, the Committee held hearings to consider the claims of certain former prisoners of war (POW's) from World War II who were interned in the Pacific theater, of long-lasting and progessive physical and psychological damage attributable to the conditions of internment experienced by former POW's.

It appeared that, because of the inadequate state of medical knowledge of the effects of various hardships suffered during internment, including the long-term effect of dietary deficiencies and unsanitary conditions and because of the strong desire of former prisoners of war to return home as quickly as possible after World War II, these repatriation camps may have discharged veterans without thorough examinations and without close attention to their potential health problems. A major problem appeared to have been a lack of adequate records, necessary at a later date in order to establish service connection for ailments possibly related to internment. Also, conditions which may have seemed relatively minor at the time of repatriation may have become progressively debilitating. Thus, 30 years later, a former POW suffering from a debilitating disease that may well have resulted from his or her internment, may encounter extreme difficulty in proving service connection.

The hearing included data from a 1974 National Academy of Sciences Study entitled "Follow-up Studies of World War II and Korean War Prisoners," which indicated—

Higher rates of cardiovascular disease from prisoners of war interned in the Pacific theater during World War II than for non-POW's who served in that theater;

Strong statistical evidence of "K-Z syndrome", also known as "POW syndrome", which is marked by severe, permanent psychological scars and nonspecific physical problems and is attributed to organic brain disease, among POW's interned in the Pacific theater during World War II and during the Korean conflict.

Much higher incidence of tuberculosis and other infective and parasitic diseases among POW's interned in the Pacific theater during World War II and during the Korean conflict than among either non-POW's who served in those theaters or POW's interned in the European theater during World War II; and greatly increased death rates from nutritional disorders, nerve disorders, intestine and liver diseases, genitourinary diseases, and bone diseases among POW's interned in the Pacific theater during World War II.

Because of the complexity of the issues and the research and analysis required, the Committee directed the VA to conduct and submit to Congress by March 1, 1979, a study of the disability compensation and health-care benefits accorded former prisoners of war. The study, mandated by Public Law 95-479, directed the VA, in consultation with the Department of Defense, to review the procedures used in repatriating POW's and to evaluate the adequacy of those procedures, including the resultant effect on the medical records of POW's. The VA was also directed to include a study of the types and severity of disabilities particularly prevalent among POW's in specific theaters of operation. The VA was also directed to review and analyze current law, regulations, and procedures with regard to claims of former POW's for service-connected benefits and undertake a comparison of the treatment accorded former POW's under the veterans' benefits programs of other governments. Finally, the VA was required to include in the report appropriate administrative and legislative recommendations necessary to assure that former POW's are awarded compensation and health-care benefits for disabilities reasonably attributable to their internment.

Public Law 96-22, signed into law on June 13, 1979, provided for VA outpatient dental services to former POW's who were held captive for at least 6 months. This provision was the result of recommendations by medical and nutritional experts that nutritional and vitamin deficiencies such as beriberi, scurry, protein deficiency, and pellagra were common problems of prisoners of war and that these same nutritional deficiencies produce gum disease which have long-term effects on oral and dental health.

The VA's study of veterans who are former prisoners of war, which was mandated by Public Law 95-479, was submitted to Congress on June 2, 1980. The Committee held a hearing on June 17, 1980, to address the findings of the study and to receive testimony from concerned veterans and former POW groups. The VA's report contained three legislative recommendations—(1) remove the present 2-year limitation on the "presumptive period" for former POW's suffering from psychosis and thus establish a presumption that a former POW's phychosis is service connected whenever it becomes manifest; (2) provide eligibility to former POW's for VA hospital care and medical services for any disease or neuropsychiatric disability; and (3) provide for an annual POW/MIA Recognition Day.

Report recommendations to be carried out administratively

In addition to legislative recommendations, the VA's report made a number of recommendations to be implemented by VA administrative action, as follows:

First, the report recommended that the VA's forthcoming guideline on "post-traumatic stress neurosis" include an explicit reference to veterans who are former POW's as well as to other veterans who served in combat and that those guidelines be used specifically for the diagnosis and treatment of former POW's who are suffering from anxiety neurosis or similar neurotic disorders as well as for rating purposes. The Committee notes that, on March 17, 1980, the VA provided to the Committee a copy of an internal policy directive (Change 282 to Program Guide 21-1) concerning post-traumatic stress neurosis. Subsequently, on April 18, the VA published in the Federal Register (vol. 45, No. 77, page 26326) an amendment to the Schedule of Rating Disabilities to provide for the new diagnostic classification of such neurosis. The Committee understands

that the VA is implementing this recommendation and, in fact, has revised the text further to specifically mention former prisoners of war as being particularly vulnerable to suffering from post-traumatic stress neurosis.

Second, the report recommended that the VA adopt a standardized protocol for compensation and examinations for all former POW's that would be similar to the protocol developed by the Department of Defense for former Vietnam-era POW's, and that each VA medical center designate certain physicians who are knowledgeable about former POW's and their medical problems to conduct or supervise such examinations in order to assure adequate followup and to assist in ongoing research.

The Committee urges that the implementation of this recommendation be well documented in the study mandated by section 7 of the Committee bill.

Third, the report recommended that the Department of Defense continue followup treatment of and research concerning Vietnam-era former POW's who have been separated from service and that the VA furnish the Defense Department with the results of such followup and research and other statistical reports concerning former POW's. The Committee urges that, in addition to implementing this recommendation, the VA continue to consult with Defense Department personnel responsible for monitoring the followup of former POW's of the Vietnam era on the findings of the VA report and all other studies that relate to the difficulties experienced by former POW's.

Fourth, the report recommended that the VA establish an advisory committee, to include recognized authorities in the field of POW studies, to provide for a continuing assessment of the medical evidence concerning disabilities prevalent among former POW's and to advise the Administrator on policies and procedures concerning former POW's. The Committee is pleased to note that the VA is actively involved in the implementation of this recommendation and trusts that the provisions of the Committee bill concerning such a committee will be incorporated in the VA's efforts.

Fifth, the report recommended that the VA implement procedures for conducting thorough pathological examinations of former POW's using surgical, cytological, or autopsy methods, as appropriate, and provide such data as evidence in claims to assist in determining whether the veteran's death was service connected. The Committee notes that the VA has entered into an agreement with the Armed Forces Institute of Pathology to collect and register such pathological materials for research purposes and urges that the VA continue to implement this recommendation and utilize relevant information gained from such examinations in the study mandated by section 7 of the Committee bill.

POW indicators on VA records

Sixth, the report recommended that the VA review its manual and computerized records and forms to identify those which should be identified by POW indicators and assure that such indicators are added where necessary. The Committee expects the VA to advise the Committee on the extent to which this recommendation has been implemented and what specific results have been measured.

Seventh, the report recommended that the VA periodically, publicize the programs of benefits and services available to former POW's and provide a copy of the POW report as a reference document to each VA medical center and regional office. The Committee trusts that this recommendation will continue to be conscientiously carried out.

Eighth, the report recommended that the VA designate one or more central office coordinators to assist in the implementation of ongoing VA programs for former POW's, to serve as liaison with individual former POW's former POW groups, and the Defense Department's Office of POW/MIA Affairs, and to monitor the implementation of the report recommendations. The Committee notes that the VA has already designated a coordinator of POW issues and has urged that contact persons also be designated in each medical center and regional office for the effective coordination of all matters relating to former POW's.

IMPLEMENTATION

The Committee has monitored closely the implementation of the report's administrative recommendations and received a report on November 6, 1980, on the status of those recommendations. The Administrator's report follows:

VETERANS' ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR
OF VETERANS' AFFAIRS,
Washington, D.C., November 6, 1980.

Hon. ALAN CRANSTON,
Chairman, Committee on Veterans' Affairs,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The purpose of this letter is to provide you with a status report concerning the recommendations for administrative action presented in the report, "POW: Study of Former Prisoners of War," of May 1980, which described the study conducted in accordance with section 305 of Public Law 95-479. Comments on each of the study recommendations follow the underscored recommendations below.

Full implementation of the recommended administrative actions is one of my primary concerns. This status report to you reflects the first in a series of internal VA reports which I have directed to be accomplished each quarter until the recommendations for administrative action have been fully implemented. These internal reports not only provide information on the status of any given recommendation, but they also indicate to me the areas which may require special attention, support and follow-up during the subsequent period.

One other prefatory comment is in order before describing the administrative actions. Due to the complexity and breadth of the administrative actions which have an impact on the Department of Medicine and Surgery (DM&S), the selection process for a knowledgeable Coordinator for Former POW's and also a working POW coordinating Committee in DM&S is still underway, for resolution no later than November 30. The effect of this selection will be to centralize implementation and monitoring efforts on behalf of former POW's within one group of DM&S representatives. Currently, elements of that Department respond individually to inquiries and issues which relate directly to their areas of expertise and responsibility.

Recommendation: That the VA's forthcoming guidelines on "post-traumatic stress neurosis" include an explicit reference to former POW's as well as other combat veterans, and that these be used to diagnose, treat, and rate former POW's with anxiety neurosis or similar neurotic disorders as well as other combat veterans.

Specific reference to former prisoners of war was made by Department of Medicine and Surgery Circular 10-80-111 of June 5, subject Post-Traumatic Stress Neurosis (Disorder), which followed the Professional Services Letter, IL-11-80-15 of March 20, 1980, also addressing Post-Traumatic Stress Neurosis (Disorder). These guidelines provide clinical information necessary to consider post-traumatic stress disorders as a diagnostic finding and emphasize that special attention be given to all former prisoners of war when they are in patient status.

The classification of post-traumatic stress neurosis, and the specific mention of the prisoner of war experience, was also the subject of an article in the VAnguard (VA Central Office newsletter), October 1980 issue. The VAnguard is distributed to all VA field stations and Central Office elements. The wording of Program Guide 21-1 relating to claims adjudication will be revised to include a specific reference to "former prisoners of war" in addition to the current word "internment" within six months. Inclusion of the phrase "former prisoners of war" will be accomplished in conjunction with other required changes to the program guide. Emphasis on former prisoner of war claims and their priority has been included as a subject of regular communications with regional offices.

Recommendation: That the VA adopt a standardized protocol for disability compensation examinations for all former POW's similar to that developed by the military for the former Vietnam POW's, and that each VA Medical Center designate certain physicians knowledgeable about former POW's and their medical problems to conduct or supervise such examinations for purposes of followup treatment and research.

Establishment of the timetable for full implementation of this recommendation is among the first priorities of the DM&S Coordinator and Committee who will be designated no later than November 30. A standardized protocol for POW disability compensation examinations, patterned after the military version, will be adopted. The patient treatment folders of former prisoners of war are currently highlighted (marked) and specially called to the attention of examining and treatment staff. Through provision of specialized orientation and program direction. VA Medical Centers will assure that those physicians from the various clinical services who are most directly responsible for treatment of former POW's be knowledgeable about and attuned to the frequently unique needs of this group of veterans.

Recommendation: That followup medical treatment and research of former Vietnam POW's still on active duty be continued by DOD, and that followup treatment and research of former Vietnam POW's separated from the military be conducted at VA Medical Centers using military protocols, with the individual results of such examinations furnished to DOD and the statistical results published and disseminated by the VA.

Treatment and followup care of former POW's are currently being provided in VA Medical Centers. It was noted that there is no universal military protocol for former Vietnam prisoners of war that was used consistently and universally by the Army, Navy and Air Force. Clinical records for former POW's on active military duty who enter the VA Medical Centers for treatment are provided to the Department of Defense.

As the DM&S Coordinating Committee becomes functional, special efforts will be made to encourage expanded research activity. Representatives from the Department of Medicine and Surgery plan to meet with Department of Defense officials to better ascertain the nature of the research and followup of former Vietnam POW's. We also plan to explore the possibility of establishing a central control registry for former POW's being released from active duty. To this registry, the Department of Defense could send copies of examinations and treatment results for POW's developed during active duty. This would provide the VA with important clinical data that could be utilized immediately. Upon receipt, the VA could contact the veteran and offer an invitation to participate in treatment and/or research at an appropriate VA facility.

Recommendation: That the VA take such action as is necessary to establish the proposed advisory committee of authorities in the types of disabilities prevalent in former

POW's, use the expert opinions of the panel to asseses the medical evidence on former POW's and advise the Administrator and his staff on agency policies and procedures concerning former POW's.

This recommendation was an element of H.R. 7663, introduced in the House of Representatives in June. When it became apparent that legislative action on issues concerning former prisoners of war would not be taken until 1981, we continued to pursue the subject of the Advisory Committee on Former POW's on an administrative level. In a letter to the Committee Management Secretariat of the General Services Administration in September, I requested approval of the advisory committee, based on our earlier justifications plus the results of the study of former prisoners of war, the interest shown in the advisory committee during the Congressional hearings in June, and the continuing need for the advisory committee to provide opinions on policies and procedures relating to former POW's. On October 28, we received approval for the establishment of the Advisory Committee from the Committee Management Secretariat. In your letter of October 13, 1930, you requested our evaluation of adding the review of compensation issues and the requirement that the committee report through the Chief Benefits Director and the Director of the Compensation and Pension Service as well as through the Chief Medical Director and Assistant Chief Medical Director. Your proposed change is being thoroughly reviewed and I will respond in a separate letter as soon as our review has been completed.

Recommendation: That the VA implement procedures for conducting thorough pathological material examinations (surgical, cytologic, autopsy) of former POW's whenever possible, conduct special mortality studies when sufficient data is available, and provide such data as evidence in individual cases for determination of whether the death was the result of a service-connected disability.

The Armed Forces Institute of Pathology (AFIP) has agreed to participate in conducting pathological material examinations. VA Circular 1–80–11 of January 18, 1980 described this activity. The Circular directs that all pathological material from POW's will be examined and reported in the customary manner at each medical center, and a duplicate set of slides, blocks, and representative wet tissue will be forwarded to the AFIP. The Circular also notes that, "Such examinations should be as complete as possible with particular attention directed toward evidence of disability or injury related to evidence of stress, malnutrition, avitaminoses, and parasitic diseases. Whenever possible there should be examination of the brain, spinal cord, retina, optic nerves, peripheral nerves, sympathetic ganglia, skeletal muscle, digestive tracts, and skeletal system." The Department of Medicine and Surgery's Coordinating Committee, with the assistance of the Advisory Committee on Former POW's, will continue to explore means of facilitating coordination between involved VA and AFIP personnel in connection with this recommendation.

Recommendation: That the VA review its manual and computerized records and forms to identify those which should be identified with POW indicators, and then take the appropriate administrative actions to ensure that these records and forms are so identified.

The manual form used to apply for compensation or pension, VA Form 21–526 "Veteran's Application for Compensation or Pension," sets the stage for identification of those with status as former prisoners of war in the veterans benefits area. The application form includes items for completion which indicate whether the veteran had ever been a prisoner of war and, if so, the name of the country and dates of confinement. Similarly, VA Form 21–2507 "Request for Examination," prepared by regional offices requesting compensation examinations at VA medical facilities, contain a block designated "POW" for checking by the regional offices. These basic manual forms, the identification of claim folders with POW labels, discussed below, and the planned modification of the Beneficiary Identification and Records Locator System (BIRLS), also discussed below, provide for important identification of former prisoners of war who file claims for compensation and pension.

With regard to BIRLS, program modifications have been issued to establish POW indicators that will identify all known POW's in this computerized record. In addition, all POW's with 180 or more days of internment will be identified accordingly. Input will be made from the master POW file created in connection with the study of former POW's. These program modifications should be present in November 1980. A group of former POW's who will not have a BIRLS record or will not have the indicator in their BIRLS record upon initial installation of the program modifications require that approximately 13,000 "error messages" must be dealt with as a separate group. Thus, an additional six to eight months will be needed for this group to eliminate duplicates and create skeleton records for veterans with no BIRLS record, and identify the records via an indicator in BIRLS.

We are also considering a proposal that the BIRLS Subsystem expansion, targeted for 1984, include expending POW records to include all information in the current master POW file (dates of confinement and detaining power/country or theater of war).

With regard to the labeling of claims, folders once BIRLS has been updated with the initial indicator, a program will be run to generate a listing of corresponding claims folders by regional office. The program will be run twice, the first time near the end of CY 1980 for the majority of the POW records and the second time, about six to eight months later, to identify records among the group of 13,000 error messages. All the subject claims folders currently under regional office and Records Processing Center jurisdiction will be identifiable via a POW label, VA Form 10–5558. Files in Federal Archives and Records Centers will also be labeled if they are retrieved by the VA. There will not be a special effort to retrieve these inactive files just for labeling. Any new claims folder established for a former POW will be labeled when originally assembled.

In reference to medical records, DM&S Circular 10–80–7 of January 15, 1980 provided policy on labeling clinical records of former POW's. DM&S Circular 10–80–11 of January 18, 1980 established a POW registry with the Armed Forces Institute of Pathology and also described data on POW identification on VA Form 10–10, Application for Medical Benefits. The form permits recording of information concerning the wartime period held captive and, for World War II POW's, whether they were held captive in the European Theater or the Pacific Theater. The previous form provided for only designation as "POW." Circular 10–80–11 also discussed the microfiche listing of former POW's for field facilities, which was covered as well in DM&S Circular 10–79–272 of October 3, 1979, in relation to dental eligibility for former prisoners of war. VA Form 10–10R, Reapplication for Medical Benefits, is under revision at this time to include POW information. In lieu of changing numerous VA forms on which POW information should be included, we are evaluating a proposal for the addition of the information to the patient data card which, when used in preparing forms, will transpose the information to all forms.

Recommendation: That the VA designate certain individual(s) to be the VA Central Office coordinator(s) with the responsibility for assisting in the implementation of ongoing VA programs for former POW's; serving as liaison with individual former POW's, former POW groups, and the DOD Office of POW/MIA Affairs; and monitoring this study's recommendations.

Recommendation: That the VA periodically emphasize the special health care and compensation procedures applicable to former POW's through its agency information and education programs, and that a copy of this report be provided each VA Medical Center and Regional Office as a reference on former POW's.

Copies of the report, "POW: Study of Former Prisoners of War," were furnished to all VA Regional Offices and Medical Centers, and to Central Office elements, in June. In addition to emphasizing the special consideration and procedures for former POW's through such media as the October 1980 VAnguard article described above, and observance of the National POW/MIA Recognition Day in July of 1979 and 1980, periodic emphasis is provided through the continuing training programs within regional offices. Emphasis on former prisoner of war claims and their processing priority has been included as a subject of regular communications with regional offices. This includes reopened claims as well as other types of claims. This type of emphasis will be reinforced by label identification of the claims folders. Designations for Coordinators for Former POW's have been made at the agency level and within the Department of Veterans Benefits. The designation for the Department of Medicine and Surgery will be accomplished no later than November 30, 1980. The DM&S Coordinating Committee will also assure that periodic policy statements similar to DM&S Circular 10–73–33 of February 22, 1973, will be sent to field facilities to emphasize the need for attention to DM&S policies on POW's, as well as including this information as part of existing and future training programs for employees who relate to former POW's, such nursing personnel, physicians and administrative employees. The Department and Agency Coordinators will explore other informational and educational methods which can enhance our current efforts.

Thank you for expressing your continuing concern for former prisoners of war. I am very appreciative of the interest you and your staff have shown in our efforts on behalf of this special group of veterans.

Sincerely,

MAX CLELAND,
Administrator.

SECTION 2.—ADVISORY COMMITTEE ON FORMER PRISONERS OF WAR

Over the years representatives of former prisoners of war have relayed statistics to the Congress showing the higher incidence of physical and mental disorders suffered by former prisoners of war due to the extreme hardship they suffered during their internment. These veterans have conveyed information concerning problems encountered by former prisoners of war in their efforts to connect their disabilities to their POW experience for the purposes of receiving VA disability compensation. By including representatives of such veterans in the membership of a special advisory committee on former prisoners of war, the Committee believes that Congress would be acting appropriately in establishing through legislation, a formal interaction between former POW's, scientists, the Administrator, other authorities in the field, and the Congress, for the purpose of hearing and responding appropriately to the needs of this very deserving group of veterans.

As mentioned earlier in this report, the Veterans' Administration included in its re-

port on former prisoners of war submitted to Congress in June 1980, a recommendation, to be carried out administratively, to establish an advisory committee on former prisoners of war. The VA has informed the Committee that this recommendation is being carried out, recruitment is actively in progress, and the advisory committee should be in place by the summer.

All four bills considered by the Committee contained provisions which would establish such an advisory committee. The Committee believes that it is extremely important to take legislative action to insure that the advisory committee is established as an on-going committee with clear expectations and the responsibility of reporting to the Congress as well as to the Veterans' Administration. The Committee bill provides for a bi-annual report to be submitted to the Administrator which then would be transmitted to the Congress

By including the establishment of the advisory committee in the Committee bill, the Committee re-emphasizes its interest in such an advisory committee, and its desire to participate in the process of determining the configuration of the advisory committee, the formulation of its agenda and goals, and to receive its views on a regular basis.

The Committee wishes to point out that by including the provision that the members of the advisory committee shall serve for terms not to exceed 3 years, the Administrator is not precluded from reappointing any member whom he determines should serve for a longer period of time. However, the Committee has no position as to the advisability of reappointment and leaves the matter solely to the discretion of the Administrator.

The Committee notes that, the Administrator shall make every effort to locate eligible and interested former prisoners of war and include, wherever reasonably possible, representatives of veterans who were held as prisoners of war from different periods of war and theaters of operation; however, the Committee trusts that the Administrator will strive to achieve a balance of experiences and perspectives in the ex-POW membership, in order to represent fully the interests of all veterans who have been held as prisoners of war. Currently 94,000 former POW's are still alive. The following chart indicates the ages of former POW's who are known to the VA:

	Total POW's	World War II POW's			Korea	Vietnam era POW's		
		Total	Europe	Pacific		Total	Vietnam	Pueblo
Current age of POW's:								
Under 40	124	18	14	4	2	104	104	0
40 to 44	27	2	1	1	3	22	22	0
45 to 49	1,090	9	7	2	1,047	34	34	0
50 to 54	3,668	2,881	2,819	62	774	13	13	0
55 to 59	16,876	16,598	13,980	2,618	273	5	5	0
60 to 64	11,448	11,324	7,830	3,494	124	0	0	0
65 to 69	4,089	4,058	3,002	1,056	31	0	0	0
70 to 74	1,273	1,262	818	444	11	0	0	0
75 to 79	272	271	41	230	0	1	1	0
80 to 84	109	108	5	103	1	0	0	0
85 and over	59	59	3	56	0	0	0	0
Unknown	52,025	49,879	43,283	6,596	1,678	468	468	0
Total living POW's	91,060	86,469	71,803	14,666	3,944	647	647	0
Average age	59.7	60.3	59.6	62.7	51.5	39.8	39.8	0

The Committee's purpose in providing representatives of disabled veterans is to provide balance and perspective to the POW interest by including members knowledgeable of the issues concerning veterans' disabilities, but who have not been prisoners of war.

The Committee notes that there is not in the Committee bill, a requirement for the number of members on the advisory committee. Although there are provisions designed to outline the categories from which the Administrator shall select the members, the number of members and the balance established between recognized authorities in fields related to disabilities prevalent among former prisoners of war, representatives of former prisoners of war, and representatives of disabled veterans generally is left for the Administrator to determine. The Committee trusts that the Administrator will include in the membership individuals with some experience in legislative issues as well as substantive and experimental knowledge of the concerns within the jurisdiction of the advisory committee.

The Committee wishes to clarify that the purpose of the advisory committee is to review relevant scientific and empirical data in order to assess whether the compensation, health care and rehabilitation needs of former prisoners of war are currently being met by Veterans' Administration programs and services. In order to accomplish this goal, it is the Committee's view that a certain amount of review of VA programs is necessary so that in its regular meetings with the Administrator, the members can advise him of their findings in light of current VA benefits and services and their administration relevant to the health needs of former prisoners of war. The Committee does not mean to imply by directing the advisory committee to be well-informed on VA programs and to evaluate their findings with respect to the existence, relevance and delivery of current benefits and services, that this is to be the major function of the advisory committee. In fact, the VA has a department, the Office of Planning and Program Evaluation, which has the responsibility for carrying out internal VA program evaluation. Section 219 of title 38, includes a provision stating that the VA is responsible for its program evaluation. The advice received from this specially designed committee will be considered carefully by this Committee as it continues to examine the issues which have impact on the compensation and health-care needs of all former prisoners of war. Because of the Committee's overriding concern to provide the most appropriate level of benefits and services, the Committee bill contains provisions which mandate a further VA study and permit former POW's to file for compensation when a claim had been disallowed, under certain circumstances (to be covered in sections 7 and 8 of the discussion). The results of the aforementioned provisions will be addressed in future Committee hearings which will be held upon completion of the study. By that time the advisory committee will also have had ample opportunity to review the results of the proposed study, and transmit its recommendations for administrative and legislative actions to the Congress.

SECTION 3.—DEFINITION OF A PRISONER OF WAR

The Committee bill would simplify references to prisoners of war by establishing a general definition for the term in section 101 of title 38. This would have the effect of no longer excluding veterans who were interned during World War I from the POW provisions currently in title 38, as well as including POW's of future hostilities and giving the Administrator the discretion to determine if an internment in a period other than a period of war would be comparable for all purposes of title 38.

Under the provisions of the Committee bill, World War I veterans who were held as prisoners of war would be included in the new eligibility for inpatient health care for any disability and certain outpatient care on a priority basis, as described in sections 5 and 6 of this discussion, as well as the provisions in section 312 relating to presumptions of service connection.

The Committee believes that it is important to emphasize the point that there might be circumstances in which servicepersons could be interned under conditions comparable to those to which POW's have generally been subjected. For example, if the "Pueblo incident" had occurred today, those captives would not be eligible for certain special considerations afforded former POW's under section 312, relating to the presumptions, or section 612(b)(7), relating to certain outpatient dental care eligibility, because those provisions apply to POW's of only certain past, specified periods of war. The 83-man crew of the *Pueblo* became eligible for VA benefits and services based on their experiences as prisoners of war, because on January 23, 1968, when the U.S.S. *Pueblo* was taken captive by the North Koreans, our nation was engaged in one of the specified periods of war—the Vietnam era—even though the incident was unrelated to that conflict. The Committee bill would give the Administrator the authority to determine if such an incident occurring in a time other than a period of war would be comparable to a period of war for purposes of title 38.

SECTION 4.—PHYSICAL AND PSYCHOLOGICAL PRESUMPTIONS PSYCHONEUROSIS

One of the most difficult issues addressed by the Committee when making determinations of which provisions to include in the Committee bill, was the question of the appropriate legislative response to the concerns expressed to the Committee about a presumption for psychoneurosis under section 312 of title 38.

Several of the bills considered by the Committee added psychoneurosis as a presumptive disorder under section 312, of title 38. The VA, in its study, stated that anxiety neurosis is the most prevalent service-connected condition in the sample of former POW's it studied. The VA study concluded that, "A comparison of service-connected anxiety neurosis among former European Theater POW's . . . revealed that anxiety neurosis appears in a significantly greater amount among these former POW's than

among other service-connected wartime veterans." In fact, approximately 15 percent of all service-connected former POW's are service-connected for anxiety neurosis compared with approximately 4 percent of all other service-connected veterans. In spite of this evidence the VA, in neither its study nor its testimony before this Committee on April 22, 1981, recommended that any form of psychoneurosis be added to the presumptive disorders relative to the POW experience in section 312 of title 38.

There is no doubt that former prisoners of war seem to suffer from anxiety neurosis in greater numbers than other wartime veterans. The issue before the Committee is whether or not the VA is currently responding in an appropriate manner to claims for service-connection in such cases.

The VA has informed the Committee that it has adopted new guidelines of "post-traumatic stress neurosis" in which former POW's are specifically referenced. According to the VA, these guidelines have been adopted from the American Psychiatric Association's 1980 "Diagnostic Criteria—DSM III" and are now used by the rating boards and the Board of Veterans' Appeals as the clinical information used to classify post-traumatic stress disorders as a new diagnostic finding for the purpose of establishing a service-connected disability.

The Committee supports the VA's administrative action in recognizing the new clinical data on delayed psychiatric disorders which may result from the internment suffered by former prisoners of war, and updating its diagnostic guidelines to be responsive to the possible inclusions of new claims for disability compensation which would not have qualified under old VA guidelines. The effectiveness of this recent administrative action in meeting the concerns of former prisoners of war with respect to service-connecting their psychiatric disorders will become evident shortly, as more former POW's file claims under the new guidelines. The provisions of sections 7 (further VA study) and 8 (claims for mental disorders which have been denied) of the Committee bill, will provide further evidence of the extent to which these new guidelines are being implemented.

The VA claims that former prisoners of war are being notified of these new guidelines and are being urged to file under the category of "post-traumatic stress disorder," if they believe their delayed psychiatric disorder is a result of their POW experience. The Committee urges the VA to implement these new guidelines by promptly honoring any request for review under new administrative guidelines. The Committee also recommends that the VA make a timely review of those cases involving psychiatric disorders previously ruled nonservice-connected but which now may be identified as true delayed stress syndrome. The VA's new guidelines for post-traumatic stress disorders follow:

RATING PRACTICES AND PROCEDURES

DISABILITY

Mental disorders

1. *Psychoneurosis.* Drastic reductions in evaluations should not be made in ratings for psychoneurosis when a reduction to an intermediate rate is more in consonance with the degree of disability. Moreover, the general policy to be observed is gradual reduction in rates to afford the veteran all possible opportunities of adjustment.

2. *Latent Schizophrenia.* Several cases have been brought to our attention where regional office rating boards have accorded service connection for latent schizophrenia. To clear up any misconceptions, some explanation is provided.

Generally speaking, latent schizophrenia is not a proper disability for service connection. While the "Diagnostic and Statistical Manual of Mental Disorders," 1968 Edition, American Psychiatric Association, lists the diagnosis in the same section as psychoses, careful reading of the diagnostic requirements clearly reveals that an essential element to the diagnosis is a history entirely free of psychotic episodes. Following a psychotic reaction, the disability must be reclassified for proper diagnosis. Therefore, latent schizophrenia is not a true psychosis. Since it also does not qualify as a neurosis, there is no basis for service connection for such a condition.

Claims for service connection for latent schizophrenia should be handled similarly to claims for service connection for personality disorders. While the condition is not a disability within the meaning of applicable laws, superimposed psychotic reactions in service or within the presumptive period would be a proper basis for service connection.

3. *Post-Traumatic Stress [ ] disorder.* The type or disorder contemplated under this diagnostic classification is a psychiatric disorder having its onset as an incident of armed conflict or enemy action, [ ] following bombing [or] shipwreck, [the result of] internment [or having been a POW (prisoner of war)] under the inhumane or severely deprived conditions, or similar life threatening episodes. To justify the clinical diagnosis and to assure uniformity of its use, the following findings should appear in the clinical examination presented by the examiner:

a. A recognizable stressor that would be expected to evoke significant symptoms in almost all individuals; that is, a life threatening episode under circumstances mentioned above. It is important that this stress be described as to its nature and severity and also in time sequence; that is, whether it occurred while on active duty, before service or since discharge therefrom.

b. Reexperiencing the traumatic event either by a recurrent and intrusive recollection of the event, dream of the event, or suddenly acting or feeling as if the traumatic event were occurring because of an association with an environmental or ideational stimulus.

c. Numbing of response to or involvement with the external world beginning sometime after the traumatic event as shown by markedly diminished interest in one or more significant activities, feeling of affective responses.

d. At least two of the following symptoms that were not present prior to the traumatic event:

(1) Hyperalertness or exaggerated startle response.

(2) Initial, middle or terminal sleep disturbance.

(3) Guilt about surviving when others have not, or about behavior required to achieve survival.

(4) Memory impairment or trouble concentrating.

(5) Avoidance of activities that arouse recollection of the traumatic event.

(6) Intensification of symptoms by exposure to events that symbolize or resemble the traumatic event.

When an examination is received with the diagnosis of post-traumatic stress [ ] disorder which does not show the foregoing findings, it should be returned as inadequate for rating purposes setting forth the reasons why the examination is inadequate.

The post-traumatic stress [ ] disorder is divided into acute and chronic. Those episodes which are acute and transitory reactions subside without recurrence and present no residual disability. They may not, of course, be service connected. It is also to be noted that some of the above-mentioned symptoms may occur episodically, and in between episodes the patient will show symptomatology. On being questioned, however, the individual will disclose residuals such as nightmares, startle patterns, and problems with socialization.

Care should also be taken to assure that transient situational disturbances containing adjustment reaction of adult life which subside when the situational disturbance no longer exists or is withdrawn, and the reactions of those without neurosis who have "dropped out" and become alienated are not erected into a diagnosis of post-traumatic stress [ ] disorder.

When this disorder is initially manifested during service and recorded in service department clinical records, generally under such outdated terminology as "shell shock" or "combat fatigue" or words of similar import, there should be no hesitancy in granting service connection even though there may be a lapse of a considerable period of time between the psychic trauma and the chronic manifestations. When initial clinical manifestation occurs at a date remote from service termination, service connection should still be granted if the life threatening episode, described by the examiner, is consistent with the nature, character and circumstances of veterans' service as evidenced by his or her military records.

[The essential feature of the post-traumatic stress disorder is the development of characteristic symptoms following a traumatic psychological event that is generally outside the range of the usual human experience. A single experience or a group of experiences may affect an individual leading to a post-traumatic stress disorder. Such experiences include, but are not limited to, immediate life threatening experiences. In some circumstances, for example, grave registrations, liberation of concentration camps, or POW experiences, it is the cumulative effect of powerful, distressing experiences which are essential as a forerunner of post-traumatic stress disorder. In general, the traumatic experience should be a stress which is of such severity that it could reasonably be expected to produce the characteristic symptoms of distress in almost everyone.

It is not intended, however, that the post-traumatic stress disorder must have had its onset during combat. This is clearly set forth above by use of the phrase "or similar life threatening episodes" which also precludes the assumption that the examples cited were to be all inclusive. The use of the phrase "life threatening episodes" is used in a generic sense to describe those stressors set forth in section 309.81. Post-traumatic Stress Disorder, Chronic or Delayed, in Diagnostic and Statistical Manual of Mental Disorders (Third Edition), DSM–III, on page 236.

Those stressors mentioned in section 309.81 of DSM–III such as military combat, floods and earthquakes and accidents with serious injuries such as vehicular or airplane crashes, large fires and certain other disasters such as shipwreck, bombing, torture and death camps are life threatening in nature and would evoke significant distress in most persons who were involved. Since all the events cited by DSM–III are, in fact, life threatening, the criteria for post-traumatic stress disorder have not been modified by use of the phrase "life threatening episodes."

The existence of a recognizable stressor or accumulation of stressors that would evoke significant symptoms of distress in almost everyone must be identified. It is important that this stress be described as to its nature and severity. Also, the time sequence should be clearly identified; that is, whether it occurred while on active duty, before service, or since discharge therefrom. In identifying the stress and the time sequence, it is important that the relationship between them be described.

If, of course, any of the above stressors or

other life threatening episodes had their onset during active duty, service connection may be established upon reexperiencing the traumatic event as evidenced by at least two of the symptoms appearing in paragraph 3d above.]

The Committee's reluctance to include psychoneurosis as a new presumptive category in the Committee bill stems in part from the Committee's desire to give the VA a chance to implement its new guidelines which address this very issue. Another concern, expressed by psychiatrists and other mental health professionals, is that the term, psychoneurosis, is too broad and does not address directly the specific delayed psychiatric disorders experienced by former POW's. The American Psychiatric Association's (APA) DSM III (used by the VA as a diagnostic manual) does not even have a category labeled psychoneurosis. There is a category for anxiety disorders, which includes many subcategories not considered relevant to the POW experience, as well as anxiety neurosis, which contains as one of its four subcategories post-traumatic stress disorder.

The DSM III diagnostic criteria which refers to all anxiety disorders follows:

ANXIETY DISORDERS

PHOBIC DISORDERS (OR PHOBIC NEUROSES)

300.2x. Agoraphobia

Differential diagnosis.—Phobic avoidance of certain situations in schizophrenia, major depression, obsessive compulsive disorder, paranoid personality disorder.

Diagnostic criteria

A. The individual has marked fear of and thus avoids being alone or in public places from which escape might be difficult or help not available in case of sudden incapacitation, e.g., crowds, tunnels, bridges, public transportation.

B. There is increasing constriction of normal activities until the fears of avoidance behavior dominate the individual's life.

C. Not due to a major depressive episode, obsessive compulsive disorder, paranoid personality disorder, or schizophrenia.

300.21 Agoraphobia With Panic Attacks

A history of panic attacks whether or not currently present.

300.22 Agoraphobia Without Panic Attacks

No history of panic attacks.

300.23 Social Phobia

Differential diagnosis.—Avoidance of certain social situations that are normally a source of some distress, e.g. normal fear of public speaking, schizophrenia, major depression, obsessive compulsive disorder, paranoid and avoidant personality disorders, simple phobia.

Diagnostic criteria

A. A persistent irrational fear of, and compelling desire to avoid, a situation in which the individual is exposed to possible scrutiny by others and fears that he or she may act in a way that will be humiliating or embarrassing.

B. Significant distress because of the disturbance, and recognition by the individual that his or her fear is excessive or unreasonable.

C. Not due to another mental disorder, such as major depression or avoidant personality disorder.

300.29 Simple Phobia

Differential diagnosis.—Schizophrenia, obsessive compulsive disorder.

Diagnostic criteria

A. A persistent, irrational fear of, and compelling desire to avoid, an object or a situation other than being alone, or in public places away from home (agoraphobia), or of humiliation or embarrassment in certain social situations (social phobia). Phobic objects are often animals, and phobic situations frequently involve heights or closed spaces.

B. Significant distress from the disturbance and recognition by the individual that his or her fear is excessive or unreasonable.

C. Not due to another mental disorder, such as schizophrenia or obsessive compulsive disorder.

ANXIETY STATES (OR ANXIETY NEVROSES)

300.81 Panic Disorder

Differential diagnosis.—Physical disorders, such as hypoglycemia, pheochromocytomia, and hyperthyroidism; withdrawal from some substances, such as from barbituarates; substance intoxications, such as due to caffeine or amphetamine; schizophrenia; major depression; somatization disorder; generalized anxiety disorder; simple or social phobia.

Diagnostic criteria

A. At least three panic attacks within a three-week period in circumstances other than during marked physical exertion or in a life-threatening situation. The attacks are not precipitated only by exposure to a circumscribed phobic stimulus.

B. Panic attacks are manifested by discrete periods of apprehension or fear, and at least four of the following symptoms appear during each attack;

(1) dyspnea;
(2) palpitations;
(3) chest pain or discomfort;
(4) choking or smothering sensations;
(5) dizziness, vertigo, or unsteady feelings;
(6) feelings of unreality;
(7) paresthesias (tingling in hands and feet);
(8) hot and cold flashes;
(9) sweating;
(10) faintness;
(11) trembling or shaking; and
(12) fear of dying, going crazy, or doing something uncontrolled during an attack.

C. Not due to a physical disorder or another mental disorded, such as major depression, somatization disorder, or schizophrenia.

D. The disorder is not associated with agoraphobia (p. 131).

300.02 Generalized Anxiety Disorder

Differential diagnosis.—Physical disorders, such as hyperthyroidism; organic mental disorders, such as caffeine intoxication; adjustment disorder with anxious mood; schizophrenia; depressive disorders; hypochondriasis; obsessive compulsive disorder; panic disorder.

Diagnostic criteria

A. Generalized, persistent anxiety is manifested by symptoms from three of the following four categories:

(1) *motor tension:* shakiness, jitteriness, jumpiness, trembling, tension, muscle aches, fatigability, inability to relax, eyelid twitch, furrowed brow, strained face, fidgeting, restlessness, easy startle;

(2) *automatic hyperactivity:* sweating, heart pounding or racing, cold clammy hands, dry mouth, dizziness, light-headedness, paresthesias (tingling in hands or feet), upset stomach, hot or cold spells, frequent urination, diarrhea, discomfort in the pit of the stomach, lump in the throat, flushing, pallor, high resting pulse and respiration rate;

(3) *apprehensive expectation:* anxiety, worry, fear, rumination, and anticipation of misfortune to self or others; and

(4) *vigilance and scanning:* hyperattentiveness resulting in distractability, difficulty in concentrating, insomnia, feeling "on edge," irritability, impatience.

B. The anxious mood has been continuous for at least one month.

C. Not due to another mental disorder, such as a depressive disorder or schizophrenia.

D. At least 18 years of age.

3810.30 Obsessive Compulsive Disorder (or Obsessive Compulsive Neurosis)

Differential diagnosis.—Obsessive brooding, rumination, or preoccupation; schizophrenia; major depression; tourette's disorder; organic mental disorder.

Diagnostic criteria

A. Either obsessions or compulsions:

Obsessions: recurrent, persistent ideas, thoughts, images, or impulses that are egodystonic, i.e., they are not experienced as voluntarily produced, but rather as thoughts that invade consciousness and are experienced as senseless or repugnant. Attempts are made to ignore or suppress them.

Compulsions: repetitive and seemingly purposeful behaviors that are performed according to certain rules or in a stereotyped fashion. The behavior is not an end in itself, but is designed to produce or prevent some future event or situation. However, either the activity is not connected in a realistic way with what it is designed to produce or prevent, or may be clearly excessive. The act is performed with a sense of subjective compulsion coupled with a desire to resist the compulsion (at least initially). The individual generally recognizes the senselessness of the behavior (this may not be true for young children) and does not derive pleasure from carrying out the activity, although it provides a release of tension.

B. The obsessions or compulsions are a significant source of distress to the individual or interfere with social or role functioning.

C. Not due to another mental disorder, such as tourette's disorder, schizophrenia, major depression, or organic mental disorder.

Post-traumatic stress disorder

Differential diagnosis.—Adjustment disorder with anxious mood.

Diagnostic criteria

A. Existence of a recognizable stressor that would evoke significant symptoms of distress in almost anyone.

B. Reexperiencing of the trauma as evidenced by at least one of the following:

(1) recurrent and intrusive recollections of the event;
(2) recurrent dreams of the event; and
(3) sudden acting or feeling as if the traumatic event were reoccurring, because of, an association with an environmental or ideational stimulus.

C. Numbering of responsiveness to or reduced involvement with the external world, beginning some time after the trauma, as shown by at least one of the following:

(1) markedly diminished interest in one or more significant activities;
(2) feeling of detachment or estrangement from others; or
(3) constricted affect.

D. At least two of the following symptoms that were not present before the trauma:

(1) hyperalertness or exaggerated startle response;
(2) sleep disturbance;
(3) guilt about surviving when others have not, or about behavior required for survival;
(4) memory impairment or trouble concentrating;
(5) avoidance of activities that arouse recollection of the traumatic event; and
(6) intensification of symptoms by exposure to events that symbolize or resemble the traumatic event.

SUBTYPES

308.30 Post-traumatic Stress Disorder, Acute

A. Onset of symptoms within six months of the trauma.

B. Duration of symptoms of less than six months.

309.81 Post-traumatic Stress Disorder, Chroni or Delayed

Either of the following, or both:

(1) duration of symptoms of six months or more (chronic); or

(3) onset of symptoms at least six months after the trauma (delayed).

300.00 Atypical Anxiety Disorder

This category should be used when the individual appears to have an anxiety disorder that does not meet the criteria for any of the above specified conditions.

At this time, although sympathetic to concerns in this area, the Committee did not feel it has sufficient justification to add a new statutory provision, using language deemed by professionals in the field to be too broad to be an appropriate clinical diagnosis. The terminology is so new that there seems to be a lack of consensus in the field as to a term which appropriately defines the delayed psychiatric disorders associated with the POW experience. As mentioned above, the most recent VA guidelines classify this disorder as "post-traumatic stress", although as seen above in the DSM III it is only a subcategory to anxiety neurosis, which was targeted by the VA study as the most prevalent psychiatric disorder among former POW's.

The Committee points out that the study required by section 7 of the Committee bill would focus on the issue of presumptions of psychiatric disorders. These results will be an important consideration in evaluating the adequacy of existing presumptions for former prisoners of war.

Finally, the Committee notes that even within the former POW community there is a division of opinion as to the necessity and advisability of including a statutory presumption for service connection of some type of neurosis.

The Committee bill provides that the presumptions related to certain nutritional diseases would apply to former prisoners of war who were held for more than 30 days and the presumption of psychosis would apply to such former prisoners regardless of their length of internment. The reduction of the period of time a former POW must have been held for the purposes of the aforementioned presumptions was the Committee's response to the following concerns of medical authorities and former prisoners of war:

1. Although certain nutritional diseases do take time to become manifest, the current provision of law, which provides for a 6 months period of internment is too restrictive and may exclude from eligibility former POW's who suffer from the specified medical conditions. Some former POW's were interned for shorter times, and yet were subjected to extremely harsh dietary and nutritional conditions. S. 468, as originally introduced, provided for a 60 day period of internment. However, since it appears possible that, under certain circumstances, it is possible to contract certain nutritional diseases in a shorter period of time, the Committee decided to adopt 30 days as a minimum time a former prisoner of war must have been held to allow these existing presumptions to be applied as fairly as possible.

2. With respect to psychosis, the Committee bill would remove all references to the length of internment. This is because VA authorities and other witnesses at the Committee's hearing and during the Committee's examination of this issue, unanimously stated that often the harshest treatment received by a POW during internment, comes within the first stages of captivity. A new captive, often wounded, first realizes his or her absolute loss of control, and then may be subjected to extreme forms of mental and physical torture and abuse. In order to survive, a captive may summon up a sub-conscious survival mechanism which may involve strong denial of the situation at hand. Years later a psychotic disorder may surface as the veteran's need to deny becomes less important to his or her survival. There are other stressors which may impact similarly on the former POW's coping mechanisms and may trigger a psychotic disorder which was rooted in the horrifying experiences associated with being a prisoner of war.

The Committee bill would also eliminate the requirement that a psychosis become manifest to a 10-percent disabling degree within 2 years after separation from service in order for the presumption to apply.

Periods of war

The Committee bill would delete references to specific periods of war and would then include former POW's from World War I and all future periods of war for all purposes of this section. The Committee could find no logical reason to exclude the less than 800 veterans who were held as prisoners of war during World War I from legislation designed to benefit former POW's.

The Committee notes that the effect of its amendments to present section 312 would be to remove a "two-step presumption". Existing law first provides in subsection (b) of such section that a veteran who was held as a POW for more than 6 months is presumed to have suffered from conditions of dietary deficiencies, forced labor, and inhumane treatment. Existing law further provides in subsection (c) that the presumptions of the service-connected nature of certain diseases apply to a veteran who has suffered from such conditions. In removing this two-step presumption, the Committee stresses that its intent is not to tighten the applicability of the presumptions, but rather to relieve to a certain extent the burden on the former POW to submit evidence to the Administrator that certain disabilities are service connected.

SECTION 5.—INPATIENT HEALTH CARE

The Committee fully shares the view expressed below by the VA in its POW study legislative recommendations, that there should be a statutory amendment to expand the eligibility of former POW's for VA health care.

"All of the information and data analyzed in this study show that a significantly greater proportion of former POW's have service-connected disabilities than other veterans who served during the same periods. The former POW has also been shown to be more severely disabled than non-POW veterans. Despite this, two factors make the adjudication decisions extremely difficult; one is the frequent absence of medical information at the time of repatriation and the second is that medical science cannot, at this time, conclusively determine on an individual basis the origins of some disabilites particularly prevalent among former POW's."

The appropriate legislative response is clear. These 94,000 living former POW's (as of October 1, 1981—National Academy of Sciences Statistic) are often in need of health care, with disabilities which may be connected to their POW experiences. The overwhelming majority of surviving former POW's, over 93,000 were interned during World War II and the Korean conflict. These veterans are advancing in age such that health concerns, which may or may not have been aggravated by their POW experience, become increasingly important.

The Committee bill provides all former POW's without regard to their length of internment, with eligibility for inpatient hospital and nursing home care for any disability which would require such care.

Under current law, such eligibility is provided to veterans who have service connected disabilities, those who were medically discharged or retired, those who are over 65, those who are in receipt of pension, and those who are unable to defray the costs of care.

The Committee supports this additional eligibility due to the extremely trying circumstances during the internment of these former POW's, the fact that some of their health problems may be related to their POW experiences despite the fact that they are unable to establish service connection, and because of their higher incidence of disability with the resulting greater need for a variety of medical services.

SECTION 6.—OUTPATIENT HEALTH CARE

By virtue of providing former POW's with eligibility for VA inpatient care; they automatically become eligible for certain outpatient care—pre- and post-hospital care and care to obviate the need for hospital care. The Committee bill provides a new category for former POW's in the section 612(i) of title 38, relating to priorities for outpatient care. The new category would place former POW's ahead of all other non-service-connected veterans. The Committee disagrees with the VA's recommendation to give all former POW's the same priority for outpatient care as a service-connected veteran seeking care for a non-service-connected former POW receiving outpatient care before a 40-percent disabled service-connected veteran. The Committee considers that to be an inappropriate setting of priorities. The Committee notes that 44 percent of all former POW's are currently in receipt of compensation. Therefore, the provisions for VA health care in the Committee bill would cover the most basic health needs of the other 52,640 former POW's.

SECTION 7.—VA STUDY

The VA's study of former prisoners of war submitted pursuant to section 305 of Public Law 95-479, is a substantial document of the experiences of former POW's during captivity, repatriation and the years that followed. The health problems of such veterans were clearly enumerated as well as the problems they may experience trying to substantiate their claims for purposes of establishing a service connection for disabilities which they claim for purposes of establishing a service connection for disabilities which they claim are attributable to the conditions of capture and internment.

The VA asserts that recent administrative actions taken, including new administrative guidelines concerning psychiatric disorders and the agency efforts to "bend over backwards" in making all reasonable efforts to find service connection of former POWs, afford former POW's an appropriate opportunity to pursue compensation claims. The Committee supports this effort on the part of the VA. However, representatives of the American Defenders of Bataan and Corregidor have expressed concern that their members still have difficulty in obtaining service connection for what they claim to be internment-related disabilities due to a lack of medical records covering their internment. Data concerning such circumstances was not contained in the VA's study. To address this problem fully, as well as to obtain specific data on physical and psychiatric disabilities not found in the VA study, the Committee bill would require the Administrator to conduct a further study with specific, targeted goals, within a limited time frame. Such data may require some non-computerized compilation. However, this will enable the Committee to base any possible future legislative initiatives on better statistical conclusions and individual case information if appropriate. The Committee recommends that the study include a review of a representative sample of case denials from the Board of Veterans' Appeals over the past five years.

The Committee wishes to emphasize that it is important to examine existing presumptions for former POW's and study the actual claims process in order to determine if the current statutory authority is sufficient in the area of physical and mental disabilities and if the rating boards are being appropriately responsive to the claims for service connection of former POW's who do not have medical records from the period of internment.

Additionally, the study would focus on specific physical disabilities mentioned during the Committee's April hearing, by the Disabled American Veterans and the American Defenders of Bataan and Corregidor.

The specifics of the study require that the Administrator examine (1) the types, combinations and frequency of occurrences of physical and mental disabilities (including but not limited to psychoneurosis, arthritis, respiratory and gastrointestinal disorders, and frozen feet residuals) particularly prevalent among such veterans; (2) a representative sample of the cases of such veterans whose claims for disability compensation have been denied; and (3) any other factors considered relevant to the issues whether (A) additional presumptions should be established to assist such veterans in obtaining determinations that their disabilities are the result of their experiences as prisoners of war, and (B) the eligibility of any such veterans for health-care service from the Veterans' Administration could be expanded.

The Committee believes that this additional study is needed to address the specific issues described above, which were not resolved by the study mandated by section 305 of Public Law 95–479, in order to determine whether additional presumptions of service connection should be established for former POW's, and whether their eligibility for health-care benefits and services should be expanded.

The Committee would welcome interim progress reports, if any, at any time throughout the study.

SECTION 8.—CLAIMS FOR MENTAL DISORDERS WHICH HAVE BEEN DENIED

The Committee believes that in order for it to determine fairly if the VA is reviewing claims for mental disorders in accordance with its new guidelines there needs to be a time, during which all former POW's who have experienced a disallowable of a claim based on a mental disorder, may file a new claim. Therefore, the Committee bill would permit a former POW whose claim for disability compensation based on a mental disorder, was denied prior to January 1, 1981, to file a new claim before December 31, 1982. The time limit coincides with the date the VA is to submit its study to Congress. At that time, the Committee would have a record of the cases and the resulting decisions which have come before the VA concerning all mental disorders and the results of the study which will provide a strong documentation concerning the health-care or compensation needs of former POW's.

The VA is required by the Committee bill, to conduct a program of outreach in order to alert, to the maximum extent feasible within existing resources, former POW's of their right to file a new claim if they meet the requirements stated above. The Committee bases its direction to the Administrator, concerning outreach, on the provisions of section 240 of title 38.

The Committee encourages all interested and concerned veterans' service organizations and groups representing former POW's to join in this effort to inform all former POW's of the VA's new guidelines and the Committee's efforts to have the VA review certain claims which were previously denied.

The Committee gained information from the VA's presentation of its study, as well as further VA responses to questions which arose during the June 17, 1980, hearing, which led to the Committee's in-depth examination of the report, and a commitment to move ahead with appropriate legislation to improve benefits and services to former POW's early in the 97th Congress.

On April 22, 1981, the Committee held its first legislative hearing under the chairmanship of Senator Alan Simpson to consider S. 251, introduced by Senator James Abdnor; S. 468, introduced by Senator Strom Thurmond; and S. 670, introduced by Senator Alan Cranston. All three bills provide for improvement of benefits and services to veterans who are former prisoners of war. In its recommendations to the Senate Budget Committee for fiscal year 1982, the Committee recommended that the Congressional budget for fiscal year 1982 include $25 million for legislation to improve VA benefits and services to veterans who are former POW's.

On May 11, 1981, Senator Kasten also introduced a bill concerning former POW's, S. 1164, which was considered by the Committee as it carefully studied all the proposed bills and the testimony offered at the hearing. The Committee concluded that all of the proposals contained some worthwhile provisions and is reporting a bill which the Committee believes best meets the needs and addresses the concerns of our Nation's veterans who are former prisoners of war.

COST ESTIMATE

In compliance with paragraph 11(a) of rule XXVI of the Standing Rules of the Senate, the Committee, based on information supplied by the Congressional Budget Office, estimates that the costs resulting from the enactment of the Committee bill during the first 5 years following enactment would be $5.6 million in fiscal year 1982; $5.5 million in fiscal year 1983; $5.8 million in fiscal year 1984; $6.2 million in fiscal year 1985; and $6.5 million in fiscal year 1986. A detailed breakdown of the costs, as estimated by CBO, over the 5-year period follows:

CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE—MAY 14, 1981

1. Bill number: S. 648.

2. Bill title: the Former Prisoners of War Benefits Act of 1981.

3. Bill status: As ordered reported by the Senate Committee on Veterans' Affairs May 13, 1981.

4. Bill purpose: To expand the eligibility of former prisoners of war for certain health-care benefits provided by the Veterans' Administration, and for other purposes.

5. Cost estimate:

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Estimated authorization level	3.0	2.6	2.8	3.1	3.3
Required budget authority	2.8	2.9	3.0	3.1	3.2
Outlays	5.6	5.5	5.8	6.2	6.5

This bill would result in additional future federal liabilities through extensions of existing entitlements and would require subsequent appropriation action to provide the necessary budget authority. The figures shown as "Required Budget Authority" represent an estimate of the additional budget authority needed to cover the estimated obligations that would result from these entitlement extensions.

The cost of this bill would fall within budget function 700.

6. Basis for estimate:

Section 2:

This section would establish an Advisory Committee on Former Prisoners of War. The number, term of service and pay of committee members would be determined by the Administrator. It is not expected that the additional cost of establishing such a committee would be significant.

Sections 3 and 4:

This section would change from 6 months to 30 days the length of time a former POW must have been interned to establish a presumption of service connection for certain diseases and medical conditions. For compensable psychosis, the internment time limit would be dropped altogether and the presumption of service connected would be extended throughout the lifetime of the former prisoner of war, rather than applying only for 2 years from the date of separation from service.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Benefit cost (compensation):					
Required budget authority	2.8	2.9	3.0	3.1	3.2
Outlays	2.6	2.9	3.0	3.1	3.2
Administrative cost (general operating expenses):					
Estimated authorization level	.6	(1)	(1)	(1)	(1)
Outlays	.6	(1)	(1)	(1)	(1)

[1] Less than $500,000.

According to a VA study, there are currently approximately 95,000 living former POW's. Of this number, 18 percent were held less than 6 months. More than 34 percent of former POW's are currently receiving compensation benefits. There are no data on the number of former POW's whose applications for compensation benefits have been rejected on the grounds that service connection could not be established. Since VA is usually quite lenient in assuming service connection for disabilities of former POW's particularly with respect to psychological disabilities, it is expected that the number of new cases entitled by this provision would be small. This estimate assumes 600 new cases the first year after enactment and 20 additional cases in each of the following years. However, if the number of new cases resulting from enactment of this bill is considerably higher than assumed by this estimate, the cost would also be substantially higher. Conversely, a lower than estimated number of new cases would result in a lower cost. The new cases are assumed to receive benefits at the average benefit level for all compensation cases.

The estimate of administrative cost is based on a VA estimate.

Sections 5 and 6: These sections would grant entitlement to all former POW's for inpatient and ambulatory care in VA medical facilities.

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
	2.4	2.6	2.8	3.1	3.3
Estimated authorization level	2.4	2.6	2.8	3.1	3.3
Outlays					

This estimate assumes that only a small number of new applications for VA medical care would result from this provision. Currently, 34 percent of former POW's are receiving compensation benefits which entitle them to VA medical care under existing law. Many of the remainder have private health insurance and would continue to seek health care in the private sector despite their entitlement to VA care. This estimate, therefore, assumes only about 1,400 new requests for treatment a year.

Section 7: This section would direct the Administrator of Veterans' Affairs to conduct a study focusing on the types of disabilities most prevalent among former POW's and the reasons for denials of applications for compensation benefits by former POW's.

The cost of this study should not be significant.

7. Estimate comparison: None.
8. Previous CBO estimate: None.
9. Estimate prepared by: K. W. Shepherd.
10. Estimate approved by: James L. Blum, Assistant Director for Budget Analysis.

REGULATORY IMPACT STATEMENT

In compliance with paragraph 11(b) of rule XXVI of the Standing Rules of the Senate, the Committee on Veterans' Affairs has made an evaluation of the regulatory impact which would be incurred in carrying out the Committee bill. The results of that evaluation are described below.

The Committee bill has nine sections: 1—Title; 2—POW Advisory Committee; 3—Definition of "prisoner of war" and other technical changes; 4—Disability compensation—presumptions concerning nutritional deficiencies and psychosis; 5—Eligibility for inpatient health care; 6—Eligibility for outpatient health care on a priority basis; 7—Study on further health needs of veterans who were held as prisoners of war; 8—Provision to allow certain former prisoners of war to reopen claims for disability compensation under certain circumstances; and 9—Effective dates.

A. *Estimates of the numbers of individuals and businesses who would be regulated, and a determination of the groups and classes of such individuals and businesses:*

The enactment of the Committee bill would not result in the regulation of any individual or business.

B. *Determination of the economic impact of such regulations on individuals, consumers and businesses affected:*

Since, as previously indicated, there would be no such regulation, there would be no such impact.

C. *Determination of the impact on the personal privacy of the individual affected:*

The enactment of the Committee bill would not impact on the personal privacy of participants in the programs involved as presently constituted.

D. *Determination of the amount of additional paperwork that will result from regulations to be promulgated under the bill:*

No regulation that would result in any significant amount of additional paperwork is expected to be promulgated under the provisions of the Committee bill except in section 2, which would require the POW Advisory Committee to submit bi-annual reports to Congress and possibly interim reports or summaries; section 7, which would direct the Veterans' Administration to conduct a study of the health of former prisoners of war which would result in compiling and interpreting data which would be relevant to the report of the issues on which the Committee bill would request recommendations not later than December 31, 1982; and section 8, which would result in more claims filed for disability compensation which would need to be processed in the VA Regional Offices and at the Board of Veterans' Appeals.

SECTION-BY-SECTION ANALYSIS OF S. 468 AS REPORTED

Section 1:

Would provide that the Committee bill may be cited as the "Former Prisoners of War Benefits Act of 1981".

Section 2:

Would amend present chapter 3 of title 38, United States Code, relating to administrative and various other aspects of Veterans' Administration operations.

Subsection (a) of section 2 would add a new section 221, entitled "Advisory Committee on Former Prisoners of War". The new section would consist of 3 subsections as follows:

Subsection (a) of new section 221: Would require the Administrator to establish an advisory committee to be known as the "Advisory Committee on Former Prisoners of War", the membership of which would be appointed by the Administrator, serve for terms to be determined by the Administrator, and comprise appropriate representatives of veterans who were held as prisoners of war (as that term would be defined by the amendment poposed to be made by section 3(a) of the Committee bill), individuals who are recognized authorities in fields pertinent to disabilities prevalent among former prisoners of war, including authorities in epidemiology, mental health, nutrition, geriatrics, and internal medicine, and appropriate representatives of veterans who are disabled veterans, and the Chief Medical Director and the Chief Benefits Director, or their designees, would serve as ex officio members of the Committee.

Subsection (b) of new section 221: Would require the Administrator, on a regular basis, to consult with and seek the advice of the Committee with respect to the administration of benefits under title 38, United States Code, to veterans who are former prisoners of war and such veterans' compensation, health-care, and rehabilitation needs.

Subsection (c) of new section 221: Would require the Committee to submit a bi-annual report to the Administrator, who in turn would submit such report, along with any comments the Administrator deems appropriate, to the Congress. The first such report would be due no later than July 1, 1982, and subsequent reports would be due by July 1 of each even-number year thereafter. The reports would be required to include an assessment of the needs of former prisoners of war, a review of VA programs and activities designed to meet such needs, and recommendations for administrative and legislative actions. In addition, the Committee would be authorized to submit to the Administrator such additional reports and recommendations as it deems necessary. The Administrator would be required to include a summary of all such additional recommendations and reports in the next annual report submitted to the Congress pursuant to present section 214 of title 38, United States Code, relating to reports to Congress.

Subsection (b) of section 2 would amend the present table of sections of chapter 3 to reflect the changes proposed by this section of the Committee bill.

Section 2—Costs.—Enactment of the provision of section 107 is estimated to entail no cost.

Section 3:

Subsection (a) of section 3 would amend present section 101 of title 38, United States Code, relating to definitions, by adding a new paragraph to define the term "prisoner of war" for the purposes of title 38 as a veteran who, while serving in the active military, naval, or air service, was forcibly detained or interned in the line of duty by an enemy government, or its agents, or a hostile force during a period of war, or during any other period that the veteran was held under circumstances determined by the Administrator to be comparable to the circumstances under which personnel generally have been forcibly detained or held during periods of war.

Subsection (b) of section 3 would make conforming amendments in present section 612(b)(7) of title 38, United States Code, relating to eligibility for outpatient dental services and treatment, to reflect the changes proposed by subsection (a) of this section of the Committee bill.

Section 4:

Would amend present section 312 of title 38, United States Code, relating to presumptions relating to certain diseases and disabilities.

Clauses (1) and (2) of section 4 would strike out present subsection (b) of such section and redesignate present subsection (c) of such section as subsection (b). The effect of striking out present subsection (b) would be to delete the presumption that a veteran who was held as a prisoner of war during World War II, the Korean conflict, or the Vietnam era for not less than 6 months suffered from dietary deficiencies, forced labor, or inhumane treatment in violation of the terms of the Geneva Conventions of July 27, 1919, and August 12, 1949. Under current law, that presumption triggers certain further presumptions—discussed in the following analysis of the amendment proposed to be made by clause (3) of service connection regarding certain disabilities.

Clause (3) of subsection 4 would amend subsection (b) of such section, as proposed to be redesignated by clause (2) of this section of the Committee bill, to delete the requirement that, in order for the presumptions of service connection set forth in such subsection to apply, a former prisoner of war during World War II, the Korean conflict or the Vietnam era must have suffered from dietary deficiencies, forced labor, or inhumane treatment (in violation of the terms of the Geneva Conventions of July 27, 1919, and August 12, 1949). In addition, that subsection would be amended to provide that the presumptions related to certain nutritional diseases would apply to former prisoners of war who were held more than 30 days and the presumption of psychosis would apply to such former prisoners regardless of the length of internment. Further, that subsection would be amended to delete the requirement that, in order to presumed to be service-connected a psychosis must become manifest within 2 years from the date of separation from service. In addition, the reference to specific periods of war would be deleted and this subsection would be made applicable to all former prisoners of war (as that term would be defined by the amendment proposed to be made by section 3(a) of the Committee bill), and would be expanded to cover former prisoners of war from World War I and future hostilities.

Sections 3 and 4—Costs.—Enactment of the provisions of these sections are estimated to result in costs of $2.6 million in fiscal year 1982.

Section 5:

Would amend subsection (a) of present section 610 of title 38, United States Code, relating to eligibility for hospital, nursing home, and domiciliary care, to add a new clause (4) to such subsection (redesignating present clause (4) as clause (5)) to provide eligibility for VA hospital and nursing home care for veterans who are former prisoners of war without regard to the age of such former prisoners, the service-connected nature of such prisoners' disabilities, or the inability of such former prisoners to defray the expenses of hospital care. By virtue of present section 612(f), this amendment would also result in these veterans being provided with outpatient treatment eligibility for pre- and post-hospital care and care to obviate a need for hospitalization.

Section 6:

Would amend present section 612(1) of title 38, United States Code, relating to priorities for outpatient care as among other eligible veterans, by adding a new clause (4) to such section (redesignating present clause (4) as clause (5)) to place in a new fourth priority category veterans who are former prisoners of war.

Sections 5 and 6—Costs.—It is estimated that enactment of these provisions of this section would result in costs of $2.4 million in fiscal year 1982.

Section 7:

Subsection (a) of section 7 would require the Administrator to conduct a further study, addressing certain issues not resolved by the study submitted pursuant to section

305 of Public Law 95-479, of specific physical and mental disabilities prevalent among former prisoners of war and denials of claims for disability compensation under chapter 11 of title 38, United States Code, in order to determine whether additional presumptions for disability compensation should be established for them and whether their eligibility for health-care benefits and services should be expanded.

Subsection (b) of section 7 would require the Administrator to transmit to the Congress a report on the results of such study not later than December 31, 1982. Such report would be required to include recommendations for administrative and legislative action deemed necessary by the Administrator.

Subsection (c) of section 7 would require the Administrator, in preparing the design of and conducting such study, to consult with the advisory Committee proposed to be established by section 2 of the Committee bill.

Section 7—Cost.—It is estimated that enactment of the provisions of this section would result in no significant cost.

Section 8:

Subsection (a) of section 8 would permit a former prisoner of war whose claim for disability compensation based on a mental disorder has been denied prior to January 1, 1981, to file a new claim before December 31, 1982, and would specify that, for all purposes under title 38, United States Code, a claim filed under this authority would be considered as an original claim. The Committee notes its intention that, as an original claim, such a claim would receive de novo consideration and also notes that the award effective date provisions of section 3010 of title 38 would apply.

Subsection (b) of section 8 would direct the Administrator, to the maximum extent possible, to carry out the requirements of subchapter IV of chapter 3 of title 38, United States Code, relating to veterans' outreach services to seek out and provide information to veterans who could be affected by the provisions proposed by subsection (a) of this section of the Committee bill.

Section 8—Cost.—It is estimated that enactment of the provisions of this section would result in costs which are reflected in the estimate for sections 3 and 4.

Section 9:

Subsection (a) of section 9 would provide that, except as otherwise provided in subsection (b), the provisions of the Committee bill become effective on the date of enactment.

Subsection (b) of section 9 would provide that the provisions of section 4 of the Committee bill, relating to disability compensation benefits become effective October 1, 1981.

TABULATION OF VOTES CAST IN COMMITTEE

In compliance with paragraph 7 of rule XXVI of the Standing Rules of the Senate, the following is a tabulation of votes cast in person or proxy by Members of the Committee on Veterans' Affairs at a May 13, 1981, meeting to consider S. 468.

The Committee agreed to report S. 468, with an amendment in the nature of a substitute, favorably to the Senate by a 12-0 vote, as follows:

Yeas—12: Alan Simpson, Strom Thurmond, Robert Stafford, Bob Kasten, Jeremiah Denton, Frank Murkowski, Arlen Specter, Alan Cranston, Jennings Randolph, Spark Matsunaga, Dennis DeConcini, George Mitchell.

Nays—0.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 157, H.R. 1100.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 1100) to amend Title 38, United States Code, to expand eligibility of former prisoners of war for certain benefits and health-care services provided by the Veterans Administration, and for other purposes.

There being no objection, the Senate proceeded to the consideration of the bill.

Mr. BAKER. Mr. President, I move that all after the enacting clause be stricken in H.R. 1100 and that there be substituted in lieu thereof the text of S. 468, Calendar Order No. 112.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. BAKER. Mr. President, I move adoption of Calendar Order No. 157, as amended.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 1100), as amended, was passed.

The title was amended so as to read:

A bill to amend title 38, United States Code, to improve certain programs of Veterans' Administration benefits for veterans who are former prisoners of war, and for other purposes.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that Calendar Order No. 112, S. 468, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there are certain items on the Executive Calendar that I will draw to the attention of the minority leader. I am speaking particularly of the nominations of Kenneth A. Gilles to be Administrator of the Federal Grain Inspection Service, under the Department of Agriculture; Philip F. Johnson to be a Commissioner of the Commodity Futures Trading Commission and other designations under Commodity Futures Trading Commission; Mary Ann Weyforth Dawson to be a member of the Federal Communications Commission under the Federal Communications Commission; Charles M. Butler III to be a member of the Federal Energy Regulatory Commission and Georgiana H. Sheldon to be a member of the same commission, under the Department of Energy.

Also, all of the military nominations beginning on page 3 of the Executive Calendar and including page 6, excepting, however, the first four nominations under the Department of Defense.

I ask the minority leader if he is in position to state the clearance or absence of approval of those nominations.

Mr. ROBERT C. BYRD. Mr. President, the aforementioned nominations that have been brought to the attention of the Senate by the majority leader have been cleared on this side of the aisle and we are ready to proceed.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the nominations just identified and that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF ENERGY

The legislative clerk read the nominations of Charles M. Butler III, of Maryland, and Georgiana H. Sheldon, of Virginia, to be members of the Federal Energy Regulatory Commission.

NOMINATION OF GEORGIANA H. SHELDON

Mr. McCLURE. Mr. President, on June 3, the Committee on Energy and Natural Resources favorably reported the nomination of Georgiana H. Sheldon to be a member of the Federal Energy Regulatory Commission. The vote was 19 to 0. The committee's vote followed a nomination hearing held on May 21.

Mrs. Sheldon has been serving as Acting Chairman of the Commission since January 1 of this year. She has been a member of the Commission since 1977. Commissioner Sheldon is both the first and only woman to serve as a Commissioner of the Federal Power Commission and the Federal Energy Regulatory Commission.

Commissioner Sheldon previously served as Deputy Director of the Defense Civil Preparedness Agency, as an official of the Agency for International Development, and as both Vice Chairman and Acting Chairman of the U.S. Civil Service Commission.

The Federal Energy Regulatory Commission has a somewhat unique status as an independent regulatory agency. Under the Department of Energy Organization Act, it is placed within that Department, but it retains its regulatory independence. The FERC, when considered together with its predecessor agency, the Federal Power Commission, is one of the oldest of our Federal regulatory

commissions, and certainly one of the most important. The FERC has the responsibility for implementing the Natural Gas Act, the Natural Gas Policy Act of 1978, the Federal Power Act, and certain other statutory requirements. The Commission must deal with such issues as the impact on natural gas consumers of pipeline transportation rates, the environmental impacts of electric transmission lines and hydroelectric projects, the adequacy of natural gas supplies for the various sectors of the economy, the reliability of supplies of electric energy, and the financial health of our Nation's electric utility companies.

In her testimony before the committee, Commissioner Sheldon described the challenges confronting the Commission. She stated:

In my last three and one-half years at the agency, the Commission has played an essential role in the Federal Government's effort to manage the serious energy problems stemming from the 1973 oil crisis. This has been a difficult challenge at a time of energy shortages, rapidly rising prices, and skepticism about government's ability to be responsive to the public.

We still have many hard choices ahead of us: decisions to make on energy prices, rates of return for public utilities, natural gas policies, hydroelectric project permits and licenses. In all these areas we have the same goal: How may we bring available energy supplies and the energy requirements of American consumers and industry into an acceptable balance, at the most equitable cost to the country as a whole?

Attaining this goal will require both a willingness to examine the evidence, as it becomes available, on project costs, necessary rates of return, and the structure of energy markets. It will also demand the ability to translate Commission decisions into effective procedures for implementation. Just as there is seldom such a thing as a "perfectly" competitive market, there is infrequently a "perfectly" effective regulatory decision. Our decision must thus reflect a healthy skepticism toward simple policy solutions.

Mr. President, when Senator WARNER introduced Commissioner Sheldon to the committee on May 21, he extended to her very high praise for her performance as an FERC Commissioner. He told the committee:

As a member of the Nation's principal energy regulatory body, she has earned the respect of members of both Houses who exercise substantive and budgetary jurisdiction. Her expertise is highly respected among technical experts within the Commission, among state regulators, and in the ranks of leaders of the regulated industries.

I certainly concur with Senator WARNER'S remarks. Commissioner Sheldon, as Acting Chairman and member of the FERC, has a record of effective leadership and solid contributions to the deliberations of the Commission. On behalf of the Committee on Energy and Natural Resources, I am extremely pleased to recommend Senate approval of Commissioner Sheldon's nomination.

NOMINATION OF CHARLES M. BUTLER, III

Mr. President, on June 3 the Committee on Energy and Natural Resources, by a vote of 19 to 0, reported the nomination of Charles M. Butler III, to be a member of the Federal Energy Regulatory Commission. It is the President's intention to designate Mr. Butler to be Chairman of the Commission. Mr. Butler's nomination hearing was held on May 21. He has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement. I am prepared to recommend Mr. Butler's confirmation.

Mr. Butler is an experienced attorney who has practiced both energy law and general corporate law. He is an honors graduate of the University of Houston and the University of Texas School of Law. He was employed out of law school by the Houston, Tex., firm of Baker & Botts as an associate attorney. In 1974 he joined Senator JOHN TOWER as chief legislative assistant and legislative counsel. In 1975 he became associated with the Dallas, Tex., firm of Kendrick, Kendrick & Bradley. The following year he and his family moved to Detroit, Mich., where he served as senior attorney for American Natural Resources Co. In 1979 he moved to Washington, D.C., to rejoin Senator TOWER as administrative assistant.

In his testimony before the committee, Mr. Butler related his background and professional experience to the general responsibilities he will have as Chairman of the FERC. He stated:

My undergraduate studies in economics and political science provide a background for understanding the congressional purpose in creating the Commission. Law school has provided an appreciation for the obligations of the Commission to implement effectively the congressional mandates contained in various statutes entrusted to the Commission's stewardship. Legal experience in one of the preeminent national law firms provided a sense of discipline in undertaking and executing complex tasks. And experience with the holding company of a major gas pipeline and gas utility has provided insight into the workings of regulated companies.

As I have previously noted, during the past 2 years, Mr. Butler has served as administrative assistant and counsel to Senator JOHN TOWER. His congressional experience has made him acutely aware of the importance of working with the Congress in achieving equitable solutions to our Nation's energy problems. Mr. Butler emphasized that point in the following words when he appeared before the committee:

Last, but perhaps of most significance, the two years served as Senator Tower's Chief Legislative Assistant and this last two years as his Administrative Assistant have enabled me to reflect on and undertand the fundamental needs of the Members of Congress. I empathize with the needs of the Members to deal with the differing viewpoints of constituents which arise in the context of sensitive and complex problems—and we can all attest to the sensitivity and complexity of our national energy problems. Consequently, I would hope that the Members of both the House and the Senate will find the Commission responsive to their needs under my stewardship. I would expect to have a strong congressional relations staff available to meet the needs of members and their staffs, and I would certainly expect to be available to the the Members, myself, both formally and informally.

As Chairman of the FERC, Mr. Butler will have all the responsibilities of a member of the Commission. The importance of those responsibilities can be measured in part by the fact included in Mr. Butler's testimony before the committee:

More than half of the energy used in this country (Btu's of primary energy use) is regulated by the FERC. The Commission obviously has a critical role in setting and implementing national energy policy.

As Chairman of the FERC, Mr. Butler would also be responsible for the executive and administrative operations of the Commission, including the appointment of administrative law judges and other officials, and the general supervision of Commission personnel. These administrative responsibilities will be both demanding and challenging, but fully within Mr. Butler's capabilities.

Mr. President, on behalf of the Committee on Energy and Natural Resources I am pleased to recommend Senate approval of the Presidential nomination of Charles M. Butler III for the position of Chairman of FERC.

The PRESIDING OFFICER. The nominations are considered and confirmed.

DEPARTMENT OF AGRICULTURE

The legislative clerk read the nomination of Kenneth A. Gilles, of North Dakota, to be Administrator of the Federal Grain Inspection Service.

The nomination was confirmed.

COMMODITY FUTURES TRADING COMMISSION

The legislative clerk read the nomination of Philip F. Johnson, of Illinois, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1984, and to be Chairman of the Commodity Futures Trading Commission.

● Mr. HUDDLESTON. Mr. President, it is a pleasure for me to support the nomination of Philip Johnson to be Chairman and a member of the Commodity Future Trading Commission (CFTC).

Mr. Johnson is a distinguished lawyer with great expertise in the field of commodities regulation. I am confident that his knowledge and experience will be of great value to the Commission.

The Commodity Futures Trading Commission has the responsibility of administering the Commodity Exchange Act. That act is designed to insure fair practices and honest dealings on commodity exchanges and to provide a measure of control over those forms of speculative activity that often demoralize the markets to the injury of agricultural producers, consumers, and the exchanges themselves.

The importance of our futures markets to the Nation's farmers cannot be overemphasized. Almost one-half of the futures contracts traded on all exchanges are for agricultural commodities. The legislation establishing the Commission provides that, in nominating persons for appointments, the President shall seek to establish and maintain a balanced Commission. Therefore, it is imperative that a person with an exterise in agriculture be nominated. I was, therefore, happy to join Senator ZORINSKY and the other members of the Committee on Agriculture, Nutrition, and Forestry in urging the President to nominate at least one person who has expertise in agriculture.

Mr. President, there is one other matter concerning Mr. Johnson's appointment that should be mentioned. The legislation establishing the Commission provides that not more than three of the five members of the Commission may be members of the same political party. During the hearings on Mr. Johnson's nomination, he was questioned about his political affiliation. Mr. Johnson stated that, philosophically, he is a Republican.

In view of the fact that the President nominated Mr. Johnson to be Chairman of the Commission, it seems only logical to me that Mr. Johnson be considered a member of the Republican Party for purposes of the act.

In conclusion, Mr. President, as I previously stated, Mr. Johnson has my support, and I believe he will make a fine Chairman and Commissioner.●

The nomination was confirmed.

FEDERAL COMMUNICATIONS COMMISSION

The legislative clerk read the nomination of Mary Ann Weyforth Dawson, of the District of Columbia, to be a member of the Federal Communications Commission.

The nomination was confirmed.

The following nominations were also considered en bloc and confirmed en bloc:

U.S. AIR FORCE

Gen. Robert E. Huyser, to be lieutenant general on the retired list.

Lt. Gen. Hans H. Driessnack [redacted] FR, to be senior U.S. member of the Military Staff Committee of the United Nations.

Lt. Gen. Freddie L. Poston, to be lieutenant general.

Lt. Gen. Stanley M. Umstead, Jr., to be lieutenant general on the retired list.

U.S. ARMY

Maj. Gen. William James Livsey, Jr., to be lieutenant general.

Lt. Gen. Richard Luther West, to be lieutenant general on the retired list.

Maj. Gen. Ernest Dishman Peixotto, to be lieutenant general.

Lt. Gen. Charles Maurice Hall, to be lieutenant general on the retired list.

U.S. NAVY

Vice Adm. William N. Small, to be vice chief of naval operations and admiral.

Adm. Donald C. Davis, to be admiral on the retired list.

Rear Adm. Robert L. Walters, to be vice admiral.

U.S. MARINE CORPS

Maj. Gen. John K. Davis to be lieutenant general.

Maj. Gen. Harold A. Hatch, to be lieutenant general.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE AND NAVY

Air Force nominations beginning George W. Berger, to be major, and ending Joel I. Sherer, to be first lieutenant, which nominations were received by the Senate and appeared in the Congressional Record of May 20, 1981.

Navy nominations beginning Latimer T. Albert, to be captain, and ending Michael J. Thomas, to be lieutenant (j.g.), which nominations were received by the Senate and appeared in the Congressional Record of May 11, 1981.

Navy nominations beginning Kenneth J. Anderson, to be ensign, and ending Curtis L. Hitt, to be commander, which nominations were received by the Senate and appeared in the Congressional Record of May 11, 1981.

Navy nominations beginning Reinaldo G. Alvarez, to be captain, and ending Eva G. Stapleton, to be commander, which nominations were received by the Senate and appeared in the Congressional Record of May 19, 1981.

Mr. BAKER. Mr. President, I move to reconsider en bloc the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

MODIFICATION OF ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the order for morning business be modified as follows: I ask unanimous consent that time for the transaction of route morning business be extended until the hour of 12:30 p.m. today during which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE UNITED STATES SENATE

THE BIRTH OF POLITICAL PARTIES IN THE SENATE, 1791–1800

Mr. ROBERT C. BYRD. Mr. President, the United States Senate is a political institution. Political parties and political issues are the very substance of our daily existence. The center aisle beside me divides the members of the two parties, and behind me are the entrances to two cloakrooms, one for Republicans and one for Democrats. All this is quite natural and we accept it as the normal way of operating in the Senate. Historically, however, the founders of this government, the authors of our Constitution, and the first members of this body, did not anticipate or accept political parties and partisan divisions. Despite their resistance, such divisions grew, quickly and one might say inevitably, within the first decade of the government's existence. As we know, men of good faith simply do not think alike on all issues. One's economic, social, or geographical situation predisposes an individual to interpret events differently and to see different solutions to the same problems. Personal jealousies, rivalries, antagonisms, and ambitions also contributed to the division of society into political factions, based on ideological or even irrational differences. And so it was during the first decade of the history of the United States Senate.

This was a tumultuous decade, which saw the first senator expelled from this body, and the first to be denied a seat. At one point, war with Britain seemed inevitable. Then, war with the nation's closest ally, France, seemed certain. The ratification of the Jay Treaty gave the Senate the opportunity to exercise one of its most important constitutional powers, that of advice and consent, but in the process the debate nearly tore apart the young nation. The debate over the Jay Treaty, as with so many other explosive issues during the years from 1791 to 1800, revealed the birth of political parties as permanent institutions in the new republic. The Federalists and Anti-Federalists who had fought over the ratification of the new Constitution, now faced each other in the halls of Congress. This was the beginning of party politics in the United States.

When the Second Congress convened in Philadelphia's Congress Hall on Monday, October 24, 1791, many familiar faces from the First Congress were missing. Of the senators who had drawn the short term, several had not been reelected by their state legislatures. Among them was William Maclay, whose bluntness had offended Pennsylvania's legislators once too often. Another was Secretary of Treasury Alexander Hamilton's father-in-law, New York Senator Philip Schuyler, who had been replaced by the charismatic and ambitious young lawyer, Aaron Burr. In Massachusetts, Tristram Dalton was defeated by another rock-ribbed Federalist, George Cabot. New Jersey's Jonathan Elmer had accepted a judgeship and was replaced by Federalist John Rutherford. William S. Johnson of Connecticut had resigned over the summer to devote his full attention to the presidency of Columbia University, and Roger Sherman moved up from the House to replace him. A tremendous boost to the Anti-Federalist ranks was provided by the outspoken member from Virginia, James Monroe. Though he had lost his first bid for election to the First Congress, he had been elected in December 1790 to fill the last few months of the term of William Grayson, the first senator to die in office. Monroe arrived in Philadelphia in October 1791, fresh from his election for a full six-year term, and soon was consulting closely with Secretary of State Thomas Jefferson and House member James Madison to plan Anti-Federalist strategy.

The admission of Vermont as the fourteenth state of the Union had raised the number of senators from 26 to 28. Vermont's first two senators, Moses Robinson and Stephen Bradley, had both been soldiers in the Revolutionary War and active in Vermont's bid for statehood. Robinson, though not a lawyer, became the first chief justice of Vermont's supreme court and later governor. Bradley was one of the Green Mountain Boys who successfully wrenched the state away from the territorial claims of New York. Though defeated for reelection in 1794, Bradley returned to the Senate from 1801 to 1813, serving as president pro tempore in 1802 and 1803, and 1808. During his first term in the Senate, he introduced the bill which established a national flag of fifteen stripes and fifteen stars which flew over the land from 1795 until 1814.[1]

The Commonwealth of Kentucky, hav-

Footnotes at end of article.

ing been carved out of Virginia in 1792, provided the reason for the fifteen-star flag. Kentucky's first two senators were John Edwards and John Brown. Edwards had helped guide Kentucky on its tortuous course toward statehood. As a reward, he was unanimously elected to the Senate, but he rarely spoke and took little part in the deliberations in Philadelphia. Brown served under both Washington and Lafayette during the Revolution. During his twelve years in the Senate, serving as president pro tempore in 1803 and 1804, he actively represented his state's interests.[2]

Thirteen incumbents and four freshmen senators were present at the opening of the Second Congress, over which John Adams presided as vice president. Though he complained that "my country has in its wisdom contrived for me the most insignificant office that ever the invention of man contrived or his imagination conceived," he managed to cast twenty-nine tie-breaking votes during his eight years in office, more than any vice president since.[3] The closeness of those votes suggests a rise in factionalism that the framers of the Constitution had hoped would be subordinated to an overriding interest in the national welfare. But a division into two combative political groups was now clearly evident.

There was growing distrust between those sympathetic to agricultural interests, led by Jefferson, who feared a trend toward centralized, aristocratic government, and those of mercantile-financial sympathies, led by Hamilton, who feared an excess of democracy. Staunch Federalist Paine Wingate of New Hampshire had foreseen difficult days ahead for the Senate even during the First Congress. Drawing the battle lines between North and South, he prophesized: "The jarring interests and the different views and habits of the Northern and Southern members will be the source of many inconveniences and difficulties. Necessity rather than affection will I presume keep us together awhile longer."[4]

Factualism, so dreaded by Washington and the framers of the Constitution, stalked the halls in Philadelphia and could no longer be ignored. It threatened to divide the Congress, the Cabinet, and the nation. In the Second Congress, few issues would be unaffected by the growing division. For the moment, the Federalists maintained their control over both the House and the Senate but their hold was slipping.

The Anti-Federalists thought they saw their first opportunity to discredit the Federalists in connection with Indian battles on the frontier, which they charged were being conducted without congressional consent. The disastrous defeats of the federal forces at the hands of the Miamis, Shawnees, and Delawares presented the Anti-Federalists with the opportunity to order an inquiry which, they hoped would pin the blame squarely on Hamilton whose Treasury Department was responsible for army supply contracts. The Federalist majority, however, was able to squash the results of this first "fishing expedition."

Footnotes at end of article.

The Anti-Federalists fared better on the issue of apportionment, which was raised after the first census, dominated the first session of the Second Congress, and ended in the first presidential veto. After seven months of deadlock and acrimonious debate, the Federalist-controlled House and Senate agreed on a compromise bill. But Jefferson, Madison, and Attorney General Edmund Randolph convinced Washington that the measure was unconstitutional, so he vetoed it. Jefferson reported that when the veto message reached Congress, "a few of the hottest friends of the bill expressed passion," but they were unable to override the veto.[5]

At stake in these and the debates to follow, as each side saw it, was not just the issue at hand but the nation's future. The Federalist view was clearly stated in Hamilton's brilliant *Report on Manufactures*, submitted to Congress in December 1791. It outlined his plans for transforming the nation from an agricultural country into an industrialized, self-sufficient one. The *Report* served as a rallying point for Jefferson and his friends in Congress who found its proposals abhorrent.

With factionalism spreading, the first session of the Second Congress adjourned on May 8, 1792. The summer months saw the first clear signs of the storm that had been brewing ever since Hamilton had rammed through his whiskey tax. Protests arose in western Pennsylvania where farmers "reckoned their fluid wealth in Monongahela rye." Hamilton was quick to equate such resistance to the tax with treason against the national government. Opponents of the tax, led by young Albert Gallatin, saw it as misuse of federal power. For the time being, the result was an uneasy stalemate.

President Washington's first term was ending and he longed to retire to Mount Vernon, but the schism in his Cabinet loomed before him. Both sides begged him to remain at the helm. Secretary of State Jefferson also hoped to retire from the Cabinet, but he could not leave Treasury Secretary Hamilton unchecked. Jefferson's supporters, the Anti-Federalists, now called themselves Republicans or Democratic-Republicans, to demonstrate their differences from the aristocratic Federalists. While the Republicans supported Washington's reelection, they plotted to unseat Vice President Adams. They had just about decided to support New York Governor George Clinton for the vice presidency when the situation became confused by a new senator from New York, the ambitious thirty-six-year-old Aaron Burr.

Burr kept his political views a secret in those days and as a result was courted and suspected by both sides. Hamilton personally despised him: "As a public man he is one of the worst sort—a friend of nothing but as it suits his interest and ambition." Though born in New Jersey, grandson of the fiery theologian Jonathan Edwards and son of the first president of Princeton, Aaron Burr chose New York for his political base. His rise was spectacular. His methods, however, appalled more sober men. After one of his victories, a friend wrote that Burr's "twistings, combinations, and maneuvers to accomplish this object are incredible."[6]

When Burr entered the race for the vice presidency, leaders of the Republican party quietly gathered in Philadelphia to settle the matter. Since many, like James Monroe, doubted Burr's integrity, they were unwilling to entrust him with party leadership. Emerging from one of the first "smoke-filled rooms" in our political history, they nominated the older, more reliable Clinton as their candidate. Burr acquiesced gracefully in public, but complanied bitterly in private. He would be heard from again.

When the electoral ballots were tallied on February 13, 1793, Washington emerged with 132 of the possible 136 votes. Adams, with 77, beat Clinton's 50, Jefferson's 4, and Burr's 1. In the Senate, the Federalists retained their majority, 17 to 13. But they had lost control of the House. On key issues, some 58 of the 106 Representatives were likely to vote with the Republicans while 48 generally sided with the administration. Interest blocs would shift from issue to issue, but the stage was set for increasingly partisan battles in the Third Congress.

Shortly before the second session of the Second Congress ended on March 2, 1793, the Republicans had an early taste of victory. Largely at their insistence, Congress passed the Fugitive Slave Act, which required the free states to return any escaped slave who crossed their borders. Though the act would create great controversies in the nation a few decades later, it engendered almost no debate at this time, passing the Senate unanimously and the House with a lopsided vote of 48 to 7.[7]

The elections to the Third Congress, which convened on December 2, 1793, made little difference in party representation. In the House Theodore Sedgwick, put up for Speaker by the extreme Federalists, was beaten by the Republican-backed candidate, Frederick Muhlenberg of Pennsylvania. But all of the staunch Federalist leaders—Langdon of New Hampshire, Strong of Massachusetts, Ellsworth of Connecticut, King of New York, and Morris of Pennsylvania—were returned to the Senate. The Senate's Republicans were rudely reminded that they were still a minority when their most brilliant young newcomer, Pennsylvania Senator Albert Gallatin, who had replaced Maclay, was denied his seat by a strict party vote. The incident immediately focused national attention on the Senate, which had long been overshadowed by the more dramatic actions of the House.

Keenly aware of the Swiss-born, thirty-three-year-old Gallatin's radical Republican sentiments, the Federalist senators were not about to welcome him into their midst. Gallatin had barely taken his oath of office when Vice President Adams laid before the Senate a petition protesting his election on the grounds that he had not been a citizen for the constitutionally-required nine years. The petition was referred to a

committee composed of five Federalists. In the meantime, Gallatin was allowed to take his seat, where he proceeded to delight Republicans and irritate Federalists by plaguing Treasury Secretary Hamilton with requests for details and information. Not surprisingly, the Federalist-dominated committee reported against Gallatin and the matter was brought before the Senate as a whole.[8]

In those days the Senate chose to meet behind closed doors, while the House was open for all to attend and observe its debates. For years Senator James Monroe had been introducing bills to open the Senate's proceedings, but, to that point, he had been unsuccessful. Now, when he tried again in February 1794 to open the doors for the Gallatin debate, the Senate reversed itself and agreed to admit the public. Despite the lack of a gallery, members of the public crowded into the Senate Chamber for seven days to watch such Federalists as Rufus King spar with his fellow New York Senator Aaron Burr, speaking for the Republicans.

The Federalists were not merely fighting over the principle of citizenship. They needed every vote in the closely-divided Senate and they wanted to remove an able enemy of Hamilton. At the last minute, Benjamin Hawkins of North Carolina, who had often supported the Republicans and upon whom Gallatin's friends depended, left Philadelphia to avoid casting a vote. The decision now rested on Pennsylvania's other senator, Federalist Robert Morris, who had promised Gallatin he would remain neutral. Party loyalists finally swayed Morris, and, on February 28, he joined his fellow Federalists in unseating Gallatin by a vote of 14 to 12. The young gadfly was gone from the Senate, but not from the government. A year later he returned to Philadelphia as a member of the House, where he energetically led the Republican majority.[9]

For us, the debate over the seating of Albert Gallatin is most important for its opening of the Senate's doors to the public for the first time. As I noted in my earlier talk on the First Congress, the Senate had taken it for granted that its meetings would be closed, just as the debates of the Continental Congress and Congress of the Confederation were closed. Even though conducted behind closed doors, the Senate's proceedings were not entirely hidden from the public. The Constitution requires both Houses to keep and publish journals of their proceedings, including votes of members when requested by one-fifth of those present. These early journals have been an invaluable resource in reconstructing the Senate's history. In addition, the Senate directed its secretary in 1792 to furnish a public newspaper with a copy of the *Journal* at least once a week. Some senators, particularly the Virginians, also felt it was their duty to report about the Senate's activities to their state government and to the outside world, as I noted at some length in an earlier statement on members' circular letters.

Such highly edited glimpses into the Senate Chamber were hardly adequate to satisfy the public. Republican papers charged that the *Journal* was tampered with to suit the Federalist majority. Even if accurate, the *Journal* only occasionally showed yea and nay votes but never any of the debates, leaving the public to speculate as to a senator's motives. The closed doors of the Senate Chamber also fed the suspicions of those who regarded it as a place where clandestine cabals were hatched against the public interest. The closed-door policy, said the Senate's detractors, was part and parcel of an ominous movement, which included efforts to elevate the Senate over the House, to establish aristocracy in America. As one critic sarcastically noted: "The PEERS of America disdain to be seen by vulgar eyes: the music of their voices is harmony only for themselves, and must not vibrate in the ravished ears of an ungraceful and uncourtly multitude." [10]

Those who did not regard the Senate with suspicion often totally ignored it in favor of the House. The debates there could be read in the daily press. The widespread disregard for the Senate is clear in these lines from a newspaper in Carlisle, Pennsylvania:

> It matters little to the public who presides in the Senate: They do not choose to let the public know anything about the reasons of their political conduct; the public may therefore trouble themselves little about them, except it be to watch them with a jealously and try to get rid of them as soon as possible; it is but little good ever they did, and but little good they can do, but they may do much evil.[11]

Why, in view of its negative impact on the Senate's reputation, was the closed-door policy maintained? Opponents of public sessions argued that they would promote oratorical pyrotechnics for the benefit of the gallery and press and would interfere with the expeditious performance of public business. Sometimes the Senate's business was interrupted by the noise from the House gallery one floor below of clapping, striking of canes on the floor, and cries of "Bravo!" Answering the argument that open doors promoted a healthy national dissemination of debates, advocates of continued secrecy noted that press reports of House debates were notoriously inaccurate.

As historian Roy Swanstrom noted in his study of the Senate from 1789 to 1801, there was a close correlation between the closed-door policy and the Federalist belief that government ought to be clothed in a dignified aloofness, responsible to the people but not constantly under their close scrutiny. The issue, however, was not entirely party-inspired, as strong Federalists like Rufus King and Philip Schuyler consistently supported open sessions. The controversy surrounding Albert Gallatin's eligibility presented the opportunity to pry open the Senate's doors, if only temporarily. Gallatin's case placed the Senate in a delicate situation. A state's right to choose its own senator was being questioned. Furthermore, the American people were very sensitive to even the appearance of "star chamber" proceedings against the rights of any individual.[12] The Federalist majority could ill afford the extreme criticism sure to follow any unseating of Gallatin in secret. Thus, on February 11, 1794, they voted to open their doors—but only for Gallatin's hearing.[13]

The doors to the Senate quickly slammed shut after Gallatin's fate was decided. But the motion to shut the doors again was passed by its closest margin, 14 to 13. The affable Senator Stephen Bradley of Vermont saw that the fate of the policy lay in his hands. Though he had previously voted with the Federalists to keep the doors closed, he had no deep convictions about the matter and decided to vote to open them on the next vote. Realizing that Bradley's vote would give the "open-door" senators the victory, four other New England Federalists, Foster of Rhode Island, Langdon and Livermore of New Hampshire, even powerful Oliver Ellsworth of Connecticut, and Senator Vining of Delaware jumped on the bandwagon. On February 20, 1794, the vote to finally open the Senate's doors was 19 to 8.[14] The struggle had been a long and bitter one. After listening to the abuse heaped on some of his Federalist friends, Vice President Adams commented: "What the effect of this measure, which was at last carried by a great majority, will be, I know not: but it cannot produce greater evils than the contest about it, which was made an engine to render unpopular some of the ablest and most independent members.[15]

It would still be almost two years before the Senate galleries could be built and a permanent open-door policy put into effect. No hammers were heard in Congress Hall until the fall of 1795. The galleries were completed for the first session of the Fourth Congress, on December 7, 1795, and the public finally admitted. By then, the highly controversial Jay Treaty had already been debated in secret.

What was the reaction when the Senate's doors were thrown open? Not as great as we might suspect. No hordes rushed through to view the senators at work. The sight of two dozen urbane gentlemen courteously discussing the issues of the day could hardly compete with the boisterous eloquence downstairs in the House. Nevertheless, the decision to open the Senate's doors to the public was an important one. It did not bring the Senate into great public favor, but it removed an irritant that had long alienated the Senate from the public.

Years later, a witness to those early public meetings published a colorful account of the 1796 Senate, which I should like to quote at this point.

> Among the Thirty Senators of that day there was observed constantly during the debate the most delightful silence, the most beautiful order, gravity, and personal dignity of manner. They all appeared every morning full-powdered and dressed, as age or fancy might suggest, in the richest material. The very atmosphere of the place seemed to inspire wisdom, mildness, and condescension. Should any of them so far forget for a moment as to be the cause of a protracted whisper while another was addressing the Vice President, three gentle taps with his silver pencilcase upon the table by Mr. Adams immediately restored everything to repose and the most respectful attention, presenting in their courtesy a most striking contrast to the independent loquacity of the Representatives

Footnotes at end of article.

below stairs, some few of whom persisted in wearing, while in their seats and during the debate, their ample *cocked* hats, placed "fore and aft" upon their heads . . .[16]

With the Gallatin issue settled, the Senate turned its attention to other matters. Hitherto, Congress had concentrated almost entirely on domestic problems, but, with dramatic suddenness, foreign affairs took center stage during the Third Congress. During the nine-month recess that followed Washington's second inauguration, the French Revolution reached its bloody climax. The repercussions were worldwide. In America, the Revolution accentuated the issue of the division of powers between the President and Congress. It also widened the gap between the Republicans, who deplored the execution of the king but supported the French people, and the Federalists, who feared that French radicalism would spread to America.

When war broke out in Europe, the United States found itself in a delicate situation vis-a-vis the main belligerents; France, its close ally in the American fight for independence, and Britain, whose powerful navy controlled the seas and with whom America had a flourishing trade. President Washington was sufficiently alarmed to return to Philadelphia from Mount Vernon and summon his cabinet. Hamilton, boldly intruding into the area of foreign affairs, drew up a declaration of neutrality for Washington to issue. Secretary of State Jefferson, not a little annoyed by Hamilton's brazenness, claimed that only Congress could constitutionally make such a declaration. Washington decided to steer a middle course, issuing a statement which did not officially declare neutrality but proclaimed friendship to both warring powers. No one, not even Jefferson, thought Congress had to be called into session to approve the proclamation—setting a precedent for executive initiative in foreign relations which Washington and future presidents would increasingly assert.

Notwithstaning the president's declaration of neutrality, pro-French Democratic Clubs sprang up in many cities. At first, they hailed the arrogant French Minister, Citizen Genet, who blatantly fitted out French privateers in American ports and stirred up sentiment against Washington. Eventually, however, Genet's rudeness and meddling in American affairs embarrassed even Jefferson and the Republicans who acquiesced to Federalist demands for his recall.

By the time the Third Congress convened on December 2, 1793, Jefferson was tired of the political infighting and Washington's preference for Hamilton's opinions over his own, and he was determined to retire. On January 4, 1794, he finally resigned and rode off for Virginia, but before he left, he submitted to Congress his long-awaited report on American commerce. Basically, the report urged favoritism toward France and restrictive trade measures against Britain. His proposals were exactly the opposite of those of Hamilton who fumed that Jefferson "threw this FIREBRAND of discord into the midst of the representatives of the states . . . and instantly decamped to Monticello." [17]

Footnotes at end of article.

As Hamilton predicted, Jefferson's report did cause quite a stir in Congress. Republicans embraced it and Federalists denounced it. While the Federalists held onto a majority in both chambers, they worried that a new wave of extreme anti-British sentiment would wipe away their leadership. Though the Senate had as yet no standing committee on foreign affairs, five of the strongest Federalist senators—Ellsworth, King, Strong, Cabot, and Morris—served as an unofficial advisory body to the president on such matters. They urged Washington to send an envoy to England to negotiate a treaty to end the threat of war.[18]

Monroe, and Virginia's other Senator, John Taylor, led the Republicans in the Senate in objecting strenuously, but futilely to the proposal, particularly to the suggestion that the obviously pro-British Hamilton represent the United States in the bargaining. Hoping to mollify them, Washington selected Chief Justice John Jay for the mission but found that the Republicans distrusted Jay almost as much as they did Hamilton.

After three days of debate, on April 19, 1794, Jay was confirmed by the Senate as Envoy Extraordinary by a margin of 18 to 8, and soon sailed for England. [19] The Senate had not been consulted as to the instructions he carried with him. Attorney General Edmund Randolph believed this an abridgement of the Senate's rights, following the custom that a treaty negotiated by a nation's representative acting in compliance with his instructions must subsequently be ratified, but his advice was ignored in the cabinet. The Senate's Republicans could only wait for Jay's return and look forward to the battle sure to erupt over any agreement he reached.

The first session of the Third Congress adjourned on June 9, 1794. Over the summer recess, the storm long brewing over Hamilton's whiskey tax finally broke in western Pennsylvania. Farmers, urged on by the pro-Republican "Democratic Clubs," took their shotguns down from the wall and announced they would resist to the death the infringement of their right to brew and sell what they pleased. Washington and Hamilton agreed that such resistance to the national government was intolerable and the president ordered up thirteen thousand militia troops to march west to quell the Whiskey Rebellion.

The rebellion evaporated at their approach. Hamilton could round up only twenty suspects, and the two who were finally convicted were eventually pardoned by Washington. This "tempest in a teapot" outraged the Republicans who believed it was manufactured by Hamilton to demonstrate the need for a standing army and extend federal authority over the west. Jefferson sarcastically summed up the Republican position: "An insurrection was announced and proclaimed and armed against but could never be found." [20]

Washington felt compelled to defend his Pennsylvania actions in his fifth State of the Union address to the Congress on November 3, 1794. In the midst of a fairly even-tempered account, he shocked the Republicans by including a strong denunciation of the Democratic Clubs and other "self-created societies." The Senate, which had fallen into the subservient habit of replying to presidential messages by repeating their phraseology, balked this time. Burr of New York and Jackson of Georgia moved to expunge Washington's offensive diatribe from the Senate's response.[21]

Though the Federalists overrode Burr's and Jackson's objection, Washington's outburst could not be ignored. As Alvin Josephy has noted in his *History of the Congress of the United States*, it was no coincidence that the issue of the limit of federal power came to the forefront when it did. It reflected the Federalists' impatience with opposition and their belief in the right of the federal government to take whatever measures it deemed necessary to maintain security. It also confirmed what Republicans had long suspected—that the Federalists were no longer the revolutionaries they had been when they swore in the Declaration of Independence, to acknowledge the "Right of the People to alter or to abolish" the government if they deemed it oppressive. Now that they were in charge, they had adopted the view that the government had an unrestricted right to squelch any challenge to its continued existence. President Washington, until that time viewed as above criticism, had clearly damaged his carefully nurtured public image by descending from his lofty pinnacle into the partisan frey.[22]

The issue that would bring the opposing philosophies of Federalism and Republicanism to a head was the Jay Treaty. It aroused partisan passions to a more feverish pitch than any other issue of the closing years of the eighteenth century. As the second session of the Third Congress opened, John Jay was still in England. The nation grew uneasy as weeks passed with no word on his progress. Finally, in January 1795, news arrived that he had signed a treaty with the British on November 19. But it was not until March 7, four days after the end of the Third Congress, that the first copy of the treaty finally reached Philadelphia.

The terms of the Jay Treaty were complicated. In the long run, there was much in the treaty that would benefit the nation but even more to anger Republicans and disappoint some Federalists. Partisan newspapers led the attack with column upon column of vitriolic denunciation. Pamphleteers vied with one another in a contest of invective. Names of former heroes were dragged through the mire of public abuse. Copies of the treaty were publicly burned. Jay was hanged in effigy. Speakers were stoned.

President Washington waited just long enough for some friendly senators newly elected to the Congress to take their seats before calling the Senate into special session on June 8, 1795, and submitting the treaty for ratification. Washington had kept the terms of the treaty a strict secret. After receiving it, the Senate's Federalist majority defeated two proposals to reveal its terms to the public and debated the treaty behind closed doors. Hamilton was now a private citizen, having resigned from the cabinet in January, but he continued to guide the

Federalist senators. Burr, speaking for the Republicans, condemned the treaty and moved to reopen negotiations. After two weeks of bitter debate, the Federalists crushed all the Republican maneuvers to defeat the treaty and finally, on June 24, 1795, by exactly a two-thirds majority, approved the treaty.[23]

Five days later, Virginia Senator Stevens Mason, the thirty-five-year-old Republican lawyer who had filled MONROE's vacated seat, triggered a national explosion. He gave his copy of the still-secret treaty to the editor of the *Aurora*, a Republican newspaper, for publication. Though hints of the treaty's contents had been leaking out ever since it had arrived, the actual text of the treaty confirmed the Republicans' worst fears and touched off furious demonstrations.

The printing of the actual treaty unleashed a fury against it which, said Washington, was "like that against a mad dog." At first, the outrage against the treaty was directed to Jay, "the arch-traitor" who had negotiated the "humiliation," but the senators who had ratified it soon received their own share of the obloquy. One handbill claimed "The Senate have bargained away your blood-bought privileges for less than a mess of pottage." A mass rally in South Carolina resolved that Jacob Read, and the other nineteen who voted for ratification had rendered themselves unworthy of the public trust. There were rumors that the votes of some senators had been bought. According to gossip, Senator Gunn of Georgia had voted for the treaty in exchange for the ending of a congressional investigation into a Georgia land speculation scandal. Others claimed that Read had been bought off with fifteen hundred British Pounds.[24]

In some cases, attacks on senators did not stop with just words. At the end of July, an angry mob marched on the Philadelphia home of Pennsylvania Senator William Bingham, burned a copy of the treaty, pelted the house with stones, and broke several windows. In Kentucky, the legislature denounced Senator Humphrey Marshall and called for a constitutional amendment to enable states to recall their senators, but condemnation did not stop there. Marshall, an arrogant Federalist in a strongly Republican state, not only had the temerity to vote for the treaty but named his eldest son "John Jay." He was burned in effigy, vilified in print, and stoned in Frankfort. Only some very fast talking saved him from an ignominious ducking in a muddy river.[25]

Meanwhile, the "virtuous and patriotic ten", who had voted against the treaty, were widely toasted on the fourth of July for their refusal to sign this "death warrant of America's liberty." The name most loudly acclaimed when Republican glasses were raised high was that of Stevens Mason, the senator who had first revealed to the light of day what had transpired in the dark, secret recesses of the Senate Chamber.[26]

When Washington, after much hesitation and wavering, finally signed the treaty, he joined Jay and the Senate majority as the butt of public vilification. Critics charged that the president and the Senate wished to form an oligarchy bent not only on foisting a disastrous treaty upon the nation, but on subverting the liberties of the people and making themselves supreme. Washington was portrayed as "His Columbian Majesty," with the senators serving as his courtiers.

When the Fourth Congress convened, action on the treaty shifted from the Senate to the House. (At that time the House was attempting to maintain that it had a role in approving any treaty that required the appropriation of funds. This clearly blatant effort to usurp the Senate's treaty-making role came to nothing.)

Incidentally, we heard much of the same argument at the time the Panama Canal Treaties were debated in the Senate, and prior thereto.

The senators were undoubtedly glad to see the spotlight shift. Their endorsement of the Jay Treaty had not only subjected them as individuals to bitter reproach but brought the Senate as a whole to a new nadir of unpopularity.

The Fourth Congress opened on December 7, 1795, with a smaller Federalist majority in the Senate and, for the first time, a Republican majority in the House. The doors to the Senate Chamber swung open to admit the public to the new gallery. But few took advantage of the new opportunity, as the rousing House debates over possible impeachment of Washington, which took up the entire first session, provided far greater spectacle. Though Washington's forces rallied at the last minute to save him from public embarrassment, he had had enough of public life. During the summer recess in 1796, he prepared his moving farewell address to the nation. (Which we read every year in this chamber on the day honoring his birth.) In his address, Washington cautioned against permanent foreign alliance and internal divisiveness, but his warning about the latter came too late. Washington's retirement precipitated the first contested presidential election and exacerbated the country's political schism.

The Federalists nominated John Adams and Thomas Pinckney; the Republicans, Thomas Jefferson and Aaron Burr. The Federalists' slogan was "Peace and Prosperity"; the Republicans', "The Rights of Man." Jefferson, however, foreseeing particularly stormy weather ahead, was uneager for office at this time and did little to promote his candidacy. Adams' victory would have been a foregone conclusion had not Hamilton secretly tried to promote Pinckney from second to first place, thereby splitting the Federalist vote. As a result, Adams beat Jefferson by a narrow margin of three votes. Jefferson, archenemy of the Federalists, gained the second highest number of electoral votes, thus becoming vice president. For the next four years, Jefferson, totally on the outside by the Adams administration, confined himself to his single constitutional duty of presiding over the Senate. As I have noted in an earlier talk, after watching the Senate debates occasionally dissolve into chaos before him, Jefferson set about writing a manual on Senate rules. Privately, he gave counsel to the Republicans and bided his time.

The polarization of political life was also reflected in the social life in Philadelphia. As political feuding heated up, hosts and hostesses needed to be careful when drawing up their guest lists to avoid inviting men who might come to blows over the oysters. Despite the pressures which weighed upon the nation in the 1790s, social Philadelphia wore an air of gaiety quite out of keeping with its reputation for Quaker simplicity. Some likened the endless social whirl to "fiddling while Rome was burning." Others, like Abigail Adams, wife of the vice president, were more impressed. She wrote to her sister that the winter of 1792 was "one continued scene of parties, upon parties, balls and entertainments equal to any European city."[27]

Senators enjoyed a full share of this lavish life—too large a share, according to one New Jersey Senator who wrote his wife: "There is more gaiety here than I wish to partake of—I feel myself in fashion contrary to my own inclination."[28] Other Senators disagreed and did much to make the social whirl even more feverish. Pennsylvania Senators Robert Morris and William Bingham, two of the richest men in the nation, each owned splendid houses in Philadelphia where they entertained in style. Morris lent his four-story city home on High Street to George and Martha Washington. Maryland Senator John Eager Howard's father-in-law, Benjamin Chew, was the scion of one of Philadelphia's leading families and lent Howard his baronial townhouse and country estate for parties. Senator Pierce Butler, described by his enemies as a "Democrat but no democrat," entertained his fellow southern congressmen in the grand house he rented. The wiley Aaron Burr also lived and entertained in style.[29]

Eventually party lines became so sharply drawn that even such prominent men as Oliver Ellsworth and James Madison barely saw one another socially. When, as an old man, Madison was asked to recount personal anecdotes about Ellsworth, he replied, "as we happened to be thrown but little into the familiar situations which develop features of personal and social character, I can say nothing particular as to either."[30] Some did manage to cross the battle lines. Republican Senator James Monroe was known to dine in the home of the Federalist Senator William Bingham.

Since the Federalists' strength was concentrated in the North and the Republicans' in the South, social life took on a sectional as well as factional flavor. Again, there were crossovers. When Federalist John Langdon of New Hampshire first came to the Senate in 1789, he shared lodgings with three other New England Federalists. But Langdon gradually began to drift, both socially and politically, into the Republican camp and eventually joined a group of Southern Republicans who took their meals together in Philadelphia at Marache's on North Fourth Street. Langdon even became president of the "Marache's Club." Meetings were devoted to eating good

Footnotes at end of article.

food and plotting the downfall of the Federalists.[31]

One uninvited guest in Philadelphia who cared nothing for party lines was the yellow fever which struck with deadly force three times during the decade the Senate resided in Philadelphia. In 1973, President Washington considered special legislation to move the Congress elsewhere, but cooler weather ended the epidemic. During its next deadly visit in 1797, it was feared that afflicted visitors would fill the galleries and infect the Senate and House. In 1798, the entire east coast suffered the fever's scourge, which claimed seventy lives a day in Philadelphia.

President Adams managed to avoid the yellow fever as did most of the senators, but they suffered from the nation's patriotic fever, aroused by France's arrogance. Adams thought it best to call the new Fifth Congress into a special session on May 15, 1797. The Fifth Congress was almost evenly divided between Federalists and Democratic-Republicans. On most issues, however, the Federalists could muster a slim majority in the House and a broader one in the Senate. Many veterans of earlier battles were gone from the Senate Chamber. The New York legislature, again in control of the Federalists, ousted Burr, and returned Philip Schuyler. Two staunch Hamiltonians, Ellsworth of Connecticut, who had succeeded Jay as Chief Justice, and Strong of Massachusetts were also gone, but Massachusetts' new senator, Theodore Sedgwick, would help lead the Federalists.

Adams informed the special session that he was sending a three-man commission to Paris in an attempt to avoid hostilities. His appointments—Charles Cotesworth Pinckney, John Marshall, and Elbridge Gerry—were quickly confirmed by the Senate.[32] Adams also requested Congress to pass measures necessary for national defense in case negotiations failed. By July 10, when the special session ended, the Federalists in the House and Senate, appropriated funds for port and harbor fortifications, and three frigates. and increased the militia, with only feeble opposition from the Republicans.

In the Senate, the most important incident of that special session was the first expulsion of one of its members. Senator William Blount of Tennessee, a signer of the Constitution and a land speculator, had conspired to wrest New Orleans away from Spain with the help of the Creeks and Cherokees. and turn it over to the British. The evidence was conclusive, and Blount was expelled by a near unanimous vote of 25 to 1. the only "nay" coming from Senator Tazewell of Virginia.[33] The Blount case set many precedents. the most important of which was the Senate's objection to a House effort to impeach Blount. The Senate ruled that its members were not civil officers and thus not impeachable. Blount's expulsion did him no harm in Tennessee, where he was elected speaker of the state senate. A few months later, Blount had the satisfaction of seeing his protege, Andrew Jackson, seated in the Senate. In September 1797, the tall, young backwoods lawyer, who wore his long hair in a cue tied with an eelskin, was elected to fill the seat vacated by Tennessee Senator William Cocke.[34]

When the second session of the Fifth Congress assembled on November 13, 1797, there was no word from the three envoys in Paris. Adams renewed his requests for additional land and sea protection and both the Senate and House worked along on measures for the public defense until March, when the first dispatches from France arrived. The decoded dispatches told a sordid tale of bribery and insult by three French agents, who became known to the public as X, Y, and Z. Overnight, the nation turned from pacifism to militarism. Crowds took up the reply which Pinckney reputedly gave the French emissaries: "Millions for defense, but not one cent for tribute." Suddenly, in a complete reversal of the political situation of only a year past, to be a Federalist was now patriotic, to be a Republican, treasonous.

The Federalists, smarting under years of Republican invective, were fully prepared to ride the tidal wave of anti-French sentiment into a new era of power for their floundering party. In the changed situation, the Senate enjoyed a new and unfamiliar status of popular esteem. Having allegedly "sold the nation down the river" with the Jay Treaty, the Senate now emerged as the champion of national honor and interest. Its arch-Federalist members, notably Sedgwick and Goodhue of Massachusetts, Read of South Carolina, and Tracy of Connecticut, regarded the situation as a heaven-sent opportunity to strike at the French and their American sympathizers.

Besides pushing through a series of war measures, abrogating the treaty with France, raising an army and enlarging the navy, the Federalists in the Senate also passed four bills of great historical importance, designed to crush all domestic resistance to their policies, which became known collectively as the Alien and Sedition Acts. Senators Hillhouse of Connecticut and Lloyd of Maryland were the primary instigators behind these sweeping acts which passed the Senate with wide margins. Among their most repressive provisions, the Alien and Sedition Acts raised the term of residence necessary for citizenship from five to fourteen years, empowered the president to arrest and deport any alien considered dangerous to "the peace and safety of the United States," and authorized the imprisonment for up to two years of anyone, citizen or not, convicted of writing, publishing, or speaking anything "false, scandalous, and malicious" against the government. Though they either expired or were repealed within the next four years, these acts were the most intolerant ever passed by the Senate and represented the suspicion and division within the nation. By the end of the second session of the Fifth Congress, threats of imprisonment and the futility of protest had reduced the Republican voice in the Senate to a mere whisper.[35]

The third session of the Fifth Congress convened on December 3, 1798. To the surprise of many, war with France had not yet come, but there were wild rumors afloat of French-inspired slave insurrections. There were also visible signs of a split within the Federalist party, between the warhawks and the moderates. President Adams chose to side with the moderates. On February 18, 1799, he made his decision to negotiate rather than fight with France, and submitted to the Senate the nomination of moderate Federalist William Vans Murray to be minister to France.[36] The extreme Federalists were horrified. Overnight the party split apart. When a delegation of ardent Federalist senators called on Adams to tell him they would not vote to confirm Murray, Adams sent them fleeing by threatening to resign and turn the presidency over to Vice President Jefferson. In September 1800, Adams got what he wanted—a treaty with France ending the undeclared war and reestablishing friendly relations.

The Fifth Congress ended on March 3, 1799. During the summer, war fever abated, but not so greatly that the nation was ready to forsake the Federalist party it had recently embraced. Adams' handling of the crisis with France had turned many Federalists against him, but when the fall election returns were in, they showed that the Sixth Congress, which would convene in December and be the last to meet in Philadelphia, would still be controlled by the Federalists.

With the threat of war with France lifted, the nation assumed a more tranquil air, yet deep animosities still divided Republicans and Federalists. The two sides were temporarily brought together at the beginning of the session by the unexpected death of George Washington at Mount Vernon. Partisan bickering was stilled on December 26 when the House and Senate joined in memorial services to honor the first president. Immediately afterwards, the old battles resumed, made more intense by the upcoming fall elections, sure to be bitterly contested.

In June 1800, after the Congress had recessed, clerks packed up the Senate's belongings and prepared for the move with the rest of the government to the new Federal City on the Potomac. When the second session of the Sixth Congress convened on November 17, 1800, the senators and representatives found themselves crowded into the Capitol's north wing, the only part of the building that was completed. The tension in the air was almost tangible. The presidential election had been held earlier in the month, but there was as yet no clear winner. The decision lay in the hands of Congress. Would the Federalists maintain their hold on the presidency, which they had controlled for eleven years or would they have to deal with the Republican Thomas Jefferson in the White House?

These events were of great magnitude to this nation, and I shall speak of them in detail in my next address on the history of the Senate. Until then, I must leave you in suspense.

Mr. President, I ask unanimous con-

Footnotes at end of article.

sent to have printed in the RECORD notes to "The Birth of Political Parties, 1791–1800."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1:15 P.M.

Mr. BAKER. Mr. President, I am advised that the House of Representatives has now completed action on the conference report on the supplemental appropriations. I understand that a message from the House should arrive here shortly. In the meantime, since there is no other business to be transacted by the Senate, I ask unanimous consent that we stand in recess until 1:15 p.m. today.

There being no objection, the Senate, at 12:04 p.m., recessed until 1:15; whereupon, it reconvened when called to order by the Presiding Officer (Mr. GARN).

RESUMPTION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, is the Senate in morning business now?

The PRESIDING OFFICER. The period for morning business expired at 12:30 p.m.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that morning business be resumed until no later than 2 p.m. today; that Senators may speak therein; and that the period for morning business may be concluded at any time preceding 2 p.m. if the majority leader wishes to do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONFRONTING AMERICA'S HATEMONGERS

Mr. GRASSLEY. Mr. President, despite the horrifying images of a stricken President still fresh in American memories, many citizens of this land still assume that such acts of terror will long remain isolated incidents spawned by a few demented minds.

Yet within recent weeks, a bomb was recovered from a Nashville synagogue in one of an ongoing series of incidents which should elevate official and public consciousness of terrorist acts in this country. Jews in Nashville, or Lochearn, Maryland; blacks in Detroit, Alabama, or Mississippi; and Vietnamese immigrants in some of their adopted U.S. communities have, within recent months and years, abandoned any illusion that, in America, they are insulated from terrorism. As those who share a common horror, these groups have all been brutalized physically, psychologically, or both, during the current revival of the Ku Klux Klan.

Spreading like a cancer not only throughout America's Sun Belt, but into the West and New England as well, the Klan is undergoing an upsurge of alarming proportions. Since the mid-1970's, its membership has ballooned 100 percent to about 10,000, and has adopted increasingly sophisticated tactics for terrorism, as well as for marketing racial hatred.

In California, as in other States, the Klan has become one of the foremost paramilitary groups stockpiling weapons, and sponsors ideological and "self-defense" training camps for teenagers. The KKK has also infiltrated the armed services, forming cells and fomenting racial violence on bases and ships. Uniformed servicemen have served as security guards at Klan rallies in Texas and Louisiana, and all three branches of the service have disciplined servicemen for Klan-related activities.

Appealing to broader population segments, the Klan has exploited tensions caused by school busing and affirmative action to lure as many as 100,000 sympathizers its way, according to the Anti-Defamation League of B'nai B'rith, which monitors KKK activities. Although most Klan members never graduated from high school, such exceptions as Louisiana State University graduate David Duke, a former Grand Wizard, have mounted media campaigns with articulate appeals to the public at large.

Others have carried their crusade into the political spectrum. During the 1980 campaigns, the Nation was shocked when former State Klan Grand Dragon Tom Metzger won the primary election as Democratic candidate for California's 43d Congressional District. Appalled, Democratic officials endorsed Republican Congressman CLAIR BURGENER as the candidate worthy of grassroots Democratic support. Fortunately, BURGENER prevailed at the polls in November—after hiring body guards, at personal expense, to protect himself and his family from violence threatened by the Klan.

For too many Americans who are not black, Jewish, or other minorities, such developments may barely penetrate their consciousness, or too soon escape their attention. A voice from the past should warn that those who ignore the plight of current victims may themselves become targets of hatemongers if such terrorism is not confronted, and subdued, in early stages.

German theologian Martin Niemoeller, after surviving 8 years in Hitler's prisons, including the infamous Dachau death factory declared:

In Germany, they came first for the Communists, and I didn't speak up because I wasn't a Communist.

Then they came for the Jews, and I didn't speak up because I wasn't a Jew. Then they came for the Catholics, and I didn't speak up because I was a Protestant.

And then they came for me, and by that time, no one was left to speak up.

ERNEST LEFEVER ON THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, I have already once expressed my unhappiness with Mr. LeFever's recent remarks before the Senate Foreign Relations Committee regarding the Genocide Convention. This subject, however, is of such vital importance to me that I feel his comments deserve further scrutiny.

With respect to the treaty, Mr. LeFever stated:

> I am concerned about innocent people hurting in the real world, and I am not sure what positive impact these treaties will have.

I, too, am concerned about innocent people suffering in the real world. I am concerned about vicious acts of genocide perpetrated against citizens in Germany, South Africa, Uganda, and across the globe. I am concerned when State Department officials write to me explaining that our efforts to halt the genocide that occurred during the Nigerian civil war were impeded by our failure to ratify the Genocide Convention. I am concerned when our adversaries ignore our protests of human rights violations in other countries and claim that we are being hypocritical, citing as evidence our inability to ratify the Genocide Convention.

Mr. LeFever is right in one respect: Indeed the issue here is the real world—the world that demands a continuing commitment to human rights and will not accept the brushing aside of a treaty unanimously approved by the United Nations General Assembly and already ratified by 87 nations. In fact, the United States is the only free Western nation not to have ratified the Genocide Convention.

Mr. LeFever also stated that the Genocide Treaty raises certain "legal questions." I believe his argument is outdated, and the American Bar Association would be the first to agree with me.

The Bar had initially raised a number of objections to the convention in its testimony in 1950. Since that date, however, the Bar recognized that their arguments had not withstood the test of time, and when the Senate Foreign Relations Committee made their fourth favorable report of the Genocide Convention in 1976 they included favorable testimony expressing the Bar's reversal of their opinion on the treaty.

I wish to ask my colleagues in the Senate to echo President Truman's original endorsement of the Genocide Convention and give this treaty their full support.

SOPHISTICATION OF U.S. WEAPONS

Mr. THURMOND. Mr. President, it is my hope that the new civilian team in the Defense Department will give more attention to development of less sophisticated weapon systems.

We have been through a period of extensive and lengthy research and development programs which produced systems that do not work properly and are not easily maintained once they reach the troops. There is a definite need for less complex and more maintainable weapons systems.

This subject was touched upon in a recent article in the Boston Globe newspaper by Staff Writer Curtis Wilkie. While I do not agree with all of Mr. Wilkie's points, he has focused on a subject which deserves special attention by the new administration.

Mr. President, I ask unanimous consent that this article entitled "Critics Say U.S. Weapons Are Becoming Too Fancy" be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered printed in the RECORD, as follows:

CRITICS SAY U.S. WEAPONS ARE BECOMING TOO FANCY

(By Curtis Wilkie)

WASHINGTON.—Even as the Reagan Administration moves toward a record military budget, a growing number of critics—including some Defense Department analysts—are warning that too much is being spent to develop sophisticated weapons systems.

The critics contend that increased investment in high technology is driving up costs and creating delays in production, that the emphasis on refining the "art" of the systems has reduced the number of functional planes, ships and tanks that can be thrown into battle.

They also say that the defense establishment, with its cost-plus contracts, lures the nation's most talented engineers away from civilian enterprise, leaving the American market open for exploitation by overseas firms.

"Unless we change the way we do business, more money could actually make our problems worse," said Franklin C. Spinney, a civilian analyst for the Pentagon, in a staff paper prepared last December.

The document, entitled "Defense Facts of Life" concludes that "the across-the-board thrust toward ever-increasing technological complexity is just not working."

Spinney asserted that technology has gone beyond the ability of the average military man to handle the systems he has been given. "A superior military force is a synthesis of men and machines," Spinney wrote. "Unfortunately, as our hardware increases in complexity, this blend of man and machines becomes more difficult to understand or predict."

Meanwhile, Jacques S. Gansler, a former R.A.J.K., Pentagon official who is now in private business, has written a new book, "The Defense Industry," which expresses his concern over a market dominated by one buyer, the Defense Department, and a handful of large contractors.

"Weapons systems are becoming extremely complex," Gansler says, "and this has brought about high-technology, capital-intensive specialization among subcontractors and parts supplier. . . . In many important areas, the suppliers are in monopolistic positions and are therefore able to raise prices rapidly and dictate long delivery lines."

Since the power to produce the systems is concentrated in a few firms, there is little competition. Cost overruns and lengthy delays are endemic in such a market.

Critics cite several cases:

The C130 air transport, manufactured by Lockheed and equipped with new electronic devices, went up in price 75.9 percent in 1979 and 26 percent in 1980.

The XM1 tank, built by Chrysler, now costs about three times as much as the M60 tank it is replacing, and seven times as much as the Sherman tank used in World War II. As Gansler observes, "The XM1 performs much better than the M60—perhaps even three times as well—so on a one-for-one replacement basis, it is worth the money. But it still costs three times as much, so if the United States wants to keep the same number of tanks, it has to triple its procurement expenditures."

The Trident submarine, under contract to the Electric Boat division of the defense industry giant, General Dynamics, was to have been in service more than two years ago. But the first ship, the Ohio, is still under construction at Groton, Conn., delayed by upwards of 3,000 change orders as a result of the Navy's fascination with new devices that could be installed. Further delays were caused by the use of inferior steel by the company, setting off a protracted argument between the government and General Dynamics.

There is now an estimated 41-month wait for each F15 fighter plane produced by McDonnell Douglas. The aircraft is highly complex and, according to Spinney, maintenance is difficult. Each plane has 45 "line replacement units" (LRU) that indicate to the crew that a component is failing. "Each of these 45 LRUs can be diagnosed on one—and only one—of three computers," Spinney says, creating what he calls "a critical bottleneck to F15 operations."

Another McDonnell Douglas product, the F18 Navy strike fighter, has come under criticism. According to a congressional briefing paper, the F18 "was initially designed in 1975 as a $5-million, low-cost alternative to the F14 Tomcat, and its costs have now surpassed those of the F14 at $28 million per plane." The cost continues to increase at the same time that the plane has experienced stress problems flying at low levels.

The critics of the present system say that the Pentagon should consider buying the reliable weapons systems that have served the United States well, instead of rushing to spend so much on the development of new, fancier and more expensive models.

Sen. Gary Hart (D-Colo.) maintains that "in war, numbers count. Germany had the best fighter aircraft and tanks in World War II. But she had relatively few of them. American inferior but far more numerous, rolled over them."

The Reagan budget, Hart says, "with its emphasis on $3.5-billion aircraft carriers, $350-million submarines, $40-million fighter planes and $2.5-million tanks . . . makes it unlikely we will have the numbers we need."

And Rep. Lee Aspin (D-Wis.), a longtime critic of the way the Pentagon does business says that the nation has misplaced its priorities on high technology.

"The engineering talent that was devoted to television in this country after World War II is now devoted to developing precision-guided munitions, stand-off target acquisition systems and related weapons. The equivalent technicians in Japan, meanwhile, have been working for Sony on television and stereo equipment."

This is similar to the theory propounded by MIT economist Lester Thurow in a recent edition of the New York Review of Books:

". . . Suppose you own a civilian computer firm in Boston and many of your best people leave to work in Boston's higher-paying and more exciting aerospace firms. How do you compete with Japanese computer firms that will not be losing their most brilliant employees? The Japanese engineer might also like to work on missiles, but he does not have the opportunity to do so. The result is that you cannot compete: the Japanese computer industry could well drive the American computer industry out of business."

There are estimates that the defense and space industry already employs nearly 50 percent of the engineers involved in research

and development. Because the government is willing to pay on a cost-reimbursement basis for all military research and development, there is more money and less risk involved in defense contracts.

So the Pentagon continues to pursue what James Fallows, author of the forthcoming book "National Defense," calls the "magic weapon."

"The search for more exacting technical triumphs has taken on a life of its own," Fallows writes in this month's Atlantic Monthly. "The effect of this trend has been a lineage of weapons in which each generation of planes, tanks, missiles, ships, costs between two and 10 times more in constant dollars than the previous one. The trend, if unchanged, will make much of the debate about defense spending moot."

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—CONFERENCE REPORT ON SUPPLEMENTAL APPROPRIATIONS

Mr. BAKER. Mr. President, is there a message at the desk from the House on H.R. 3512, the conference report on the supplemental appropriations?

The PRESIDING OFFICER. The House conference report is at the desk.

Mr. BAKER. The conference report is here from the House.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I ask unanimous consent that the conference report be laid before the Senate and made the pending business at 2:30 p.m. this afternoon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that on the conference report on H.R. 3512 and all amendments in disagreement there be an overall time limitation of 2 hours, equally divided, and inclusive of all debate on the conference report, amendments in disagreement, and any amendments thereto, debatable motions, points of order, if submitted, and appeals, and that debate not be in order on any motion to reconsider, and, further, that the time provided for under this order shall be under the control of the distinguished chairman of the Appropriations Committee (Mr. HATFIELD) on the majority side and Mr. PROXMIRE on the minority side.

Mr. President, I have checked with the minority leader on this and we have cleared it through our respective cloakrooms. It is satisfactory.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I might say that it is not possible to proceed to the consideration of the conference report earlier than 2:30, because certain Senators who are involved will not be available until that time. I am prepared to transact any further business that the Senate may wish to address, to make a provision for additional time for the transaction of routine morning business, or to recess the Senate until that hour.

Mr. ROBERT C. BYRD. If the Senator will yield, the distinguished Senator from Ohio (Mr. METZENBAUM) wishes to address the Senate at about 2:15.

Mr. BAKER. I thank the distinguished minority leader.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, to extend not past the hour of 2:30, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

YAACOV AGAM

Mr. METZENBAUM. Mr. President, today is an important day in the life of our Nation and in our community. It is a day that has been proclaimed by the mayor of the city of Washington as Agam Day. It is acclaimed Agam Day in honor of one of the world's greatest living artists.

Yaacov Agam, whose art has been shown throughout the world, about whom France has recently dedicated a stamp, a man who has recently been described in the media as being President Reagan's favorite artist, is visiting in our country. It is indeed an honor to rise to pay my tribute to him.

I know of few artists in the world who have received the acclaim and the recognition that has Agam. He has worked in almost every medium. He has worked in the world of painting, sculpture, graphics, metal, and tapestries—I think my recollection serves me right—in something better than 16 different mediums.

Mr. President, there is not a major museum in this country or in the world that does not have an Agam in its collection. Likewise, there is not an individual who has viewed Mr. Agam's work without being touched by it.

Mr. Agam explains his work as such:

My intention is to create a work of art which would transcend the visible, which cannot be perceived except in stages, with the understanding that it is a partial recreation and not the perpetuation of the existing.

Mr. President, wherever Mr. Agam and his works of art go, so do the feelings of peace and brotherhood. Two years ago, in celebration of the historic Israel-Egyptian peace accord, he created a breathtaking statuette in which the Star of David and of Islam engage in an elegant form. Both Mr. Begin and Mr. Sadat now have that form, and one also sits in the White House.

Mr. President, while other artists seek to capture time, Mr. Agam seeks to transcend it. He says:

The most constant thing in life is change itself. Reality is in constant change, unexpected, and so is my art. Instead of stopping time, I try to express the beauty of change.

And so he does. When we view Mr. Agam's work, as we will have the fortune to do in our own city in the next day, one cannot sit or stand still to truly appreciate it. When viewed from different angles, his work takes on different perspectives, as life itself.

It is indeed an honor for Mr. Agam to be here in Washington with us today. I am pleased to note his presence in the gallery at this very moment. I consider Yaacov Agam much more even than an artist, because he has indicated his willingness to use his art ability to add to the educational processes of our Nation and the world. Mr. Agam believes that, because our children see before they talk, the visual—rather than the verbal—should be emphasized. His visual art programs are presently being utilized in other nations, and it is my understanding that Secretary of Education Bell may work with Mr. Agam in the near future to bring to our own Nation the concept of "visual education."

Mr. President, this man is a giant intellectually. He is a giant on a creative basis. He is a giant, certainly, in the art world. But he is many more things.

It is a privilege for us to have him in our community. It is a privilege to have the opportunity to view his art, to live with it.

Last evening, I was out of the city. On almost every occasion when I travel somewhere throughout the country, I find Yaacov Agam's art work proudly displayed. It is wonderful that he has achieved this recognition throughout the world at a relatively young age.

Mr. President, I believe Mr. Agam is a truly magnificent artist. He captures more than images: he captures the spirit of humanity.

I believe it is important to the entire art community that we in the U.S. Senate and in the Government pay tribute to and recognize the great artists of the world. I am happy today to pay my tribute—on behalf of all Members of the Senate, I am sure—to one of the truly great artists of the world. It is an important day for us. It is an important day for the community. It is an important day for our Nation.

The PRESIDING OFFICER. Is there further morning business?

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. EAST). Without objection, it is so ordered.

SUPPLEMENTAL APPROPRIATIONS AND RESCISSION ACT, 1981 CONFERENCE REPORT.

Mr. HATFIELD. Mr. President, I submit a report of the committee of confer-

ence on H.R. 3512 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3512) making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDIING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. HATFIELD. Mr. President, let me summarize briefly the major outlines of the bill the Senate is about to consider. In the view of many, this is one of the more complex appropriations bills we have ever considered. It combines supplemental appropriations with rescissions, deferrals, and a continuing resolution for four of our regular bills. It is the end product of weeks of diligent labor by the members of my Appropriations Committee.

We completed this conference agreement, considering 432 amendments, after a 10-hour meeting with the House of Representatives which reflected the diligent preparations of both the chairman and ranking minority member of each of the subcommittees.

I cannot pay too high a tribute to the extraordinary performance and outstanding record of achievement in a very difficult situation that was performed by all of the members of our committee. Senator PROXMIRE, our ranking minority member, with his strong hand and steady leadership was fundamental to the preparation of this bill. Each subcommittee chairman and each ranking Democratic minority member all have performed in a really outstanding manner.

That same high level of competence, of course, was evident in the performance of the staff, and it would be remiss of me to fail to pay special tribute to the staff and the hours that they labored way into the night. As a consequence we were able to complete an earlier full committee markup in one long but fruitful day. The cooperation and dedication of all committee members made this possible.

I believe I should also say, Mr. President, this is especially heartening in view of the many new members and subcommittee chairmen we have.

For program supplementals, this conference agreement provides $14.977 billion. For pay supplementals, the measure provides $5.965 billion. In rescissions, the conference agreement cuts $14.294 billion from the fiscal year 1981 budget. The total net new budget authority recommended in this conference agreement is $6.648 billion.

To give you an idea of the magnitude of the work achieved by the committee, Mr. President, let us review the history of rescissions under the Budget Act. Over the life of the act, from 1975 to 1980, Congress has rescinded just under $5.8 billion. Yet, in this one year alone, we are now recommending $14.3 billion in rescissions. We all know these represent reductions in appropriations bills approved just months ago, so you may be sure that finding and approving these cuts was a very painful process.

Mr. President, the rescissions I have mentioned represent real sacrifices across the board in our domestic economy, and let me underscore the domestic economy. But I believe in something Lloyd Douglas said years ago, and I wish to quote from that great writer. He said:

You think that sacrifice gives people a certain nobility of spirit, and that is true. But if sacrifice is such a good thing, it ought to be passed around a little, so that other members of one's family may benefit by it, too.

In my opinion, Mr. President, the Department of Defense could benefit by this same sound advice. Yet this bill begins a defense buildup, guided at this point by little in the way of overall strategy or blueprint, and this poses enormous dangers for our economic future.

The inflation which plagues the Nation grew out of defense expenditures for Vietnam. Yet there is only dim appreciation of this connection as we begin expenditures of even a larger magnitude. Some $150 billion was put in quicksand in that immoral, unconstitutional war. In addition, the reindustrialization of other industries—so desperately needed right now—is likely to be strangled as capital is diverted to new weaponry. Overseas, we can expect our competitors to concentrate on attractive consumer products as we focus on defense hardware, so we can watch our exports weaken even further.

Finally, many experts question whether defense industries can gear up fast enough to absorb these new expenditures. The result: More delays and added costs for defense programs. Those added costs represent even greater sums diverted from domestic programs.

Mr. President, I mention these problems in the context of this conference report not because this bill is the cause of the problem, but simply because this bill is the beginning of the process. As we move into our consideration of the fiscal year 1982 bills, I believe there are serious questions each of us must consider. We know we have a chance to turn our economy around now. I fear we are losing that chance by accepting a huge defense buildup without critical thought.

In the hope of stirring more critical thinking, let me say just a few more words about some of the dangers I raised a moment ago. We should remember that the buildup being proposed now is three times the size of the defense increases during the Vietnam war. There are ample grounds for the charge that these huge increases will push up the deficit and fuel inflation. In his State of the Union speech, President Reagan rightfully decried the mounting deficit which is approaching $1 trillion. He illustrated how large this sum is by saying that it constituted a stack of thousand-dollar bills 67 miles high. We should be aware that a similar stack of bills equal to the Reagan defense expenditures would reach 100 miles high.

Members of the Defense Establishment also recognize the problem. Former Secretary of Defense James Schlesinger noted recently that—

There is a danger that in our enthusiasm to increase procurement rapidly we will simply bid up prices and wages in selected areas of our industry without substantially increasing the flow of products.

Some say that domestic cuts are going to pay for these military increases and solve the inflation problem. Simply put, that is not so. The $1.46 trillion contemplated for defense over the next several years will not be balanced by domestic cuts of the same magnitude.

Mr. President, I also mentioned that I have serious concerns about the ability of our Nation to reach the dual goals of massive defense expenditures and necessary reindustrialization. Here I believe a comparison with the Japanese is enlightening.

The Japanese are putting tremendous capital resources behind their industry. In 1968, Toyota spent $16,600 on equipment and machinery per employee compared to General Motors $11,900. By 1978, Toyota doubled that amount to $40,800 while the ratio at GM stayed the same. Similarly, Japan presently spends 21 percent of GNP on industrial investments. The U.S. percentage is 10 percent. This helps to explain why Japan's productivity growth rate is three times ours. It also highlights the enormous capital expenditures that will be required in only one industry in the next decades to make American industry competition again.

I might add another factor here, and that is this year, 1981, we have 800,000 American-made automobiles that have been produced in the United States but with foreign-made engines. By 1983 that figure will jump to 1 million American-made automobiles produced in this country, but with foreign engines; and by 1983 coupling that figure with the imports of foreign-made automobiles will mean that over 50 percent of the automobiles sold in America by 1983 will be with foreign-made engines. That is directly related to their more energy-efficient production, their more energy-efficient focus and goal, and research and development moneys.

Reindustrialization of U.S. industry will require hundreds of billions in new capital for the Nation's industries, tax incentives for energy conservation, and increasing depreciation deductions. Former Secretary of Transportation Goldschmidt estimated that over $2 trillion will have to be spent to bring the Nation's vast, complex transportation network—the backbone of our industrial structure—up to par. Tens of billions more will be required to save heavy industrial bases in the Northeast and Midwest. These examples represent only a fraction of the task before us

All these programs will require the largest infusion of capital in industrial history of the world. But large Federal spending on defense means increased

Government borrowing from these same capital sources. It concentrates spending away from nondefense industry and results in upward pressure on interest rates and inflation.

I mentioned a third problem in connection with defense spending—our balance of trade deficit. Since 1975, that deficit has increased by more than $125 billion. For 1981, the deficit will be another $25 to $30 billion.

That negative balance of trade will be aggravated even more by the tremendous increases in defense proposed for the years ahead. This Nation has a large number of skilled engineers, but their number is finite. If we greatly accelerate our priorities in defense to the point where our engineers are overwhelmingly involved in new weaponry, then few engineers will be concentrating on improved, more efficient, consumer goods.

At the same time, we can expect those nations protected by our defense umbrella, such as Germany, France, and Japan, to focus their engineering talent on more attractive consumer products. In fact, that is precisely what they are doing in building their export base now. The result will be even larger inroads in high technology products from other nations.

Finally, there is the serious question about whether U.S. industry can deliver the kind of defense weaponry contemplated in this proposed buildup. Delays obviously mean cost overruns. This, in turn, means that the chances to eliminate the Federal deficit may be lost despite our best efforts on the domestic front.

Mr. President, the most recent issue of Newsweek puts the problem into clear perspective:

> On the eve of one of the biggest defense buildups in peacetime history, there is serious doubt that the nation's defense industry can deliver the goods on time and within budget. After years of dampened military spending, the U.S. defense industry has dwindled substantially. More than 2,000 aerospace subcontractors left the field between 1968 and 1976, for example, and 240 forging foundries have closed. There are scattered shortages of men and material and many firms have cut capacity. The lead time for aluminum aircraft forgings, 20 weeks in 1976, hs stretched to 120 weeks. An F–16 fighter that took 120 weeks to build in 1977 now takes 180 weeks. Delays mean higher price tags; and if the huge cost overruns in the Trident program are any example, the Pentagon's shopping list could easily bust even a swelled defense budget—and with it the Reagan administration's hopes of eliminating the Federal deficit.

Mr. President, while we are on the topic of inflation and overruns, I would like to share some recent figures provided to me by the Congressional Budget Office. Summarized on the CBO chart are units price cost growths for a wide range of Army, Navy, and Air Force weapons systems over the course of a single year.

The chart compares the costs of fiscal year 1982, as they were projected in 1980 against those same projections in March of this year. Also included is the percent increase in unit costs and the added growth in expense.

I would note here that both the Carter projection and the Reagan projection included inflation. The difference in those inflation figures is insignificant over the 5-year spend-out period of the program. That fact makes the figures on this table even more astounding. I ask unanimous consent to have printed in the RECORD the CBO table.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

UNIT PRICES OF WEAPONS SYSTEMS

BUDGET AUTHORITY

[In millions of dollars]

Weapons System	Fiscal year 1982 projected January 1980		Fiscal year 1982 budget March 1981		Percent change		Dollar impact on Reagan budget 1982

Total dollar impact							47

Mr. HATFIELD. Mr. President, this is simple evidence of the problem we will face in the future as we try to control this defense binge. I know the White House promises it can do so, but information contained in this table tells me the task is an enormously difficult one, if possible at all.

These figures also reveal the stark contrasts between what we are adding in defense and what we are cutting in domestic programs. Let us take the Army's patriot missile. It has increased in cost by 53 percent in 1 year. That $285 million in cost growth equals the cuts proposed by the administration in the women, infants, and children (WIC) program. If those cuts are approved, some 700,000 fewer pregnant women and young children cannot participate in this nutrition program. That is 1 year's cost overrun on only one of the branches of the military's weapons system.

Cost growth in the M–1 tank total $757 million in a single year. This single overrun equals the amount cut in our energy conservation efforts. It is obvious that energy conservation is critical to our economic well-being, as well as to the military security of America. The cost of the energy to run our economy in 1981 is over $400 billion. For every $5.50 increase in the price of a barrel of oil, inflation rises 2 percent, 400,000 jobs are lost and our GNP is lowered by 1.4 percent.

In yet another example, the $607 million cost increase in the F–18 fighter—that is 1 year—nearly equals the cuts proposed in the AFDC and child support enforcement program. If that 43-percent increase in 1 year could have been avoided, some 400,000 poor families, 93 percent of whom are women and children, could have been spared the total elimination of their welfare benefits.

Overall, there seem to be good reasons to doubt that the administration can avoid the bottlenecks and cost overruns which have plagued previous defense buildups. This problem is only magnified by the current state of our defense industries.

Defense experts are warning us about the problem in advance. And I stand here today and give due notice to this Congress that these facts are unassailable. If we want to dig ourselves out of a deeper pit then we will proceed on the course that we have started. Otherwise, we must reform and we must constrict ourselves.

Former Navy Under Secretary R.

James Woolsey has estimated that procurement costs could rise by as much as 15 percent a year during the buildup ahead, simply due to shrunken state of defense industries.

Almost $12 billion of this supplemental bill is aimed at defense spending. A significant portion of this amount is geared to increasing pay and benefits for the All-Volunteer Force. This is a sensible portion of the bill, since we all know too well that readiness is critically dependent upon the enlistment and retention of committed, high-quality military personnel.

But let us be honest about the implications—the cost in human terms—of this voracious appetite. We have performed budgetary surgery without the benefit of anesthesia on the handicapped, the old, the hungry, and the poor. In the face of these actions, I wish I could be hopeful that we will waste not a single dollar in our efforts to deter Soviet aggression. It is obvious that many are paying to make these defense expenditures possible. Yet no less a military commander than General Eisenhower implored us to remember that each dollar recklessly considered for arms means one less dollar for a hungry child.

Mr. President, it mystifies and saddens me that we in Congress, seemingly without consciousness of our responsibility for these actions, are ready to appropriate billions of dollars for a defense policy which has not yet been formulated; for a long-term strategy which has not yet been developed. We continue to throw these precious dollars at a problem, without a plan of how we are to solve it. And in the meantime, we quickly and somewhat casually deprive hundreds of thousands of poor Americans of their own security—for proper food, for proper housing, for a proper education. We in Congress must take responsibility for that action, as well. I fear we are not facing up to that responsibility.

I want to say that there has been waste and abuse in the nondefense programs and there should be no toleration for waste and abuse in any program. But that includes the military dollar. With the examples of the cost overruns, I grow weary of listening to the rhetoric of those who can only point out the abuse in food stamps and the abuse in welfare but blindly turn around and vote increased costs for military and expenditures for military yet debating the same kind of efficiency and the same kind of stewardship on the taxpayer's dollar. I will not define that kind of action, but I think it is reprehensible that we so piously and so self-righteously talk about cutting out waste in one part of the budget and we are so willingly able and actually exercise a tolerance of such waste in other parts of the budget.

In the areas that teach us more about living, we want to cut; but in the areas of the budget that teach us more about how to kill, we are anxious to add to those billions.

I do not believe that the complaints that I am raising today will change the portions of the bill I find so objectionable. But I am here today to serve notice that I will continue to call for very careful and critical debate on defense increases we will consider in the future. After all, we are talking about not only those domestic programs which are being cut to make room for defense, but the welfare of our entire productive industrial economy.

We must not lose the opportunity we have to revitalize our industrial base, to improve our export capacity and to reduce inflation. Given our present state of mind on defense, I fear we may well lose that opportunity and find ourselves deeper in the pit than we are now.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I am delighted to be able to support the conference committee's recommendations with regard to H.R. 3512, the Supplemental Appropriations and Rescissions Act of 1981.

The legislation as it came out of conference rescinded approximately $14.3 billion in currently enacted budget authority and provided new budget authority of about $20.9 billion. Thus, the net budget authority recommended by the conferees, including offsetting rescissions, is a relatively modest $6.6 billion, a mere $700 million above the cost of the pay supplementals alone.

Even more important, if the recommendations of the conferees are approved, the bill will be $2.3 billion in budget authority and $250 million in outlays below the ceilings contained in the third budget resolution for fiscal year 1981. In other words, we are meeting the goals enunciated by the Congress when it passed the third resolution a short time ago.

Mr. President, as the ranking minority member of the Labor–HHS–Education subcommittee, I am pleased with that subcommittee's agreement with the House on its portion of the bill. When we went into conference, we were $760 million in budget authority below the House amounts. The conferees agreed to reduce the House bill by $456 million and to increase the Senate bill by $306 million. The Senate was able to retain about 60 percent of the reductions that it recommended below the House bill. I had fully expected a split of 50 percent or less. Thus I believe it is a tribute to the negotiating ability of the Senate conferees and the subcommittee chairman that we were able to retain 60 percent of our position.

Mr. President, I want to pay a tribute to the senior Senator from Oregon, Senator HATFIELD, who has done a truly amazing job of pushing this remarkably complex piece of legislation through the Congress. This was his maiden voyage as chairman of our committee and he was able to avoid major controversies, thus gaining final action in less than 4 days.

As a matter of fact, I remember the markup session took 1 day, but 1 full, long day. And I heard more people comment on his competence and his fairness and the remarkable job he did in chairing that meeting than any chairman I have seen in many, many years.

I cannot think of a sterner test of a chairman's capability than to manage a bill with 432 amendments—that is what we had in it—and Senator HATFIELD passed the test with flying colors.

So, Mr. President, I am delighted to support the conference report.

Mr. President, I am happy to yield to my good friend from New Jersey.

Mr. BRADLEY. I thank the distinguished Senator from Wisconsin.

Mr. President, I would like to ask the distinguished Senator from Oregon if he would confirm for me my understanding about a portion of this rescission bill. As I understand it, the moneys for school desegregation have been cut by 70 percent. The remaining 30 percent of the money, it is my understanding, will go to so-called category I schools, those schools most recently desegregated. Is that correct?

Mr. HATFIELD. The Senator is correct.

Mr. BRADLEY. And the intent was to make sure that the category I schools have access to these moneys?

Mr. HATFIELD. That is correct.

One of the resources targeted in those specific communities that are in the category I classification is where the priority of that expenditure will be made.

Mr. BRADLEY. I thank the Senator.

Mr. PROXMIRE. If the Senator will yield further, I wanted to tell the Senator from New Jersey that in one of the discussions that occurred in the markup session it was indicated that in many cases this money, presumably money for helping in areas with segregation problems, is not going there for that purpose. So it would be logical for providing it to school districts that have this problem, the problem the Senator from New Jersey is emphasizing on the Senate floor.

Mr. BRADLEY. The Senator is referring to category I schools?

Mr. PROXMIRE. That is correct.

Mr. BRADLEY. I thank the Senator and I thank the distinguished chairman.

Mr. HATFIELD. I thank the distinguished Senator from Wisconsin (Mr. PROXMIRE) for his remarks.

Mr. President, I yield to the Senator from Iowa (Mr. GRASSLEY).

Mr. GRASSLEY. Mr. President, today we will vote on the House-Senate conference agreement on the supplemental appropriations and rescission bill for fiscal year 1981. In the past 2 months, this Congress has worked long and hard to enact the mandate of fiscal discipline that was given to us by the American people last fall. We have passed two budget resolutions and reconciliation instructions for our committees, which have been designed to accommodate President Reagan's plan for economic recovery. We have taken strong steps to restrain the rate of growth of Federal spending in order to balance the budget by fiscal year 1984.

The supplemental appropriations and rescission bill for 1981, however, is our first true test of fiscal discipline. It is in this bill that we will make the first specific spending reductions that are necessary to maintain the budget targets of $718 billion in budget authority and $661 billion in outlays for this year. This bill will actually rescind $14.3 billion from specific program appropriations for fiscal year 1981, which brings the net increase

of the Supplemental to $5.7 billion. This amount is within the spending targets set by Congress for this year, and even provides a small cushion of $2.3 billion.

Some of my colleagues on the other side of the aisle have been less than enthusiastic about the congressional actions that have been necessary to enact fiscal discipline. One has even been widely quoted to the effect that he does not care if we do bust the budget. Well, I care if we bust the budget. The President cares, my fellow Republicans in both Houses care, and the people of this country care. This is why I am pleased to vote in favor of this bill. It is a piece of legislation that will enable us to take the first steps down the road of fiscal discipline that we have charted for ourselves in the budget resolutions. We have done a commendable job so far, and I urge that we continue until we once again have a strong and stable economy.

NOAA EMPLOYMENT LEVELS

Mr. HATFIELD. Mr. President, I will move that the Senate concur in the amendment of the House to Senate amendment No. 17. The Senate amendment provided that none of the funds available to the National Oceanic and Atmospheric Administration may be used to either reduce employment below 12,580 full-time permanent positions or be used to plan for such a reduction. The House has adopted a further amendment which provides the Secretary of Commerce with additional flexibility. This amendment provides that the Secretary need not comply with this limitation if he determines that the orderly and efficient operations of the Department of Commerce requires that he not comply and if he submits a report explaining his reasons.

We will move to concur in the House amendment, however, and the subcommittee chairman, Senator WEICKER, agrees that it should be clear that the conditions for noncompliance by the Secretary are not unlimited. He must first find that the orderly and efficient operation of the entire Department of Commerce requires that he not comply. This signifies that noncompliance cannot be an alternative or even a preferred option, but, rather an unavoidable determination after other options have been explored and considered. Furthermore, the Secretary must act to notify the Appropriations Committees whenever he determines that it is necessary to plan for such a reduction and whenever he determines it is necessary to act to reduce employment below the prescribed level.

Additionally, Mr. President, I would point out that Senate amendment No. 377 to which the House has agreed, provides the agency with $500,000 over the funds requested by the Department and the administration. These additional funds are provided to support the personnel level contemplated in the Senate amendments and the programs and activities which these personnel support and carry out. It was our intent—and it remains so—that administrative actions which would significantly impact, reduce, or eliminate congressionally approved or mandated programs not occur without appropriate prior notification to the Congress. Therefore, since funds are provided to support specific activities, the Department may find it necessary to submit a reprograming request, as provided by Senate Report 96-949, or such other required notice.

Mr. CRANSTON. Mr. President, the House-Senate conference on the 1981 supplemental appropriations and rescission bill provided that no funds be used to reduce personnel at the National Oceanic and Atmospheric Administration to less than 12,580. However, it is my understanding that this morning the House in considering the conference report on H.R. 3512 added language permitting the Secretary of Commerce to reduce NOAA personnel below this level if he determines that this is required for the orderly and effective operations of the agency and so notifies the Congress.

Mr. President, I am greatly concerned about this House language and its impact on the fruit frost forecast program. Maintenance of adequate personnel at NOAA is essential to assure continuation of this very important program at the current level. For 60 years, the fruit frost forecast program has provided critcal information about minimum temperatures during the spring frost season in California, Texas, and Florida. It has proved to be a vital tool to growers of the many frost-sensitive crops in planning for frost and protecting the crops when necessary, thus keeping down the cost to consumers and assuring that full, healthy crops come to market.

Mr. President, I want to make it clear that this is a significant program and that I along with many others in the Congress wish to see it continued.

● Mr. GARN. Mr. President, I will not take my colleagues' time to review the action taken by the conference committee on chapter 6 of the fiscal year 1981 supplemental and rescission package. The details of the agreements are adequately explained in the statement of the managers.

Mr. President, I would like to take a moment to highlight the outstanding contribution of the distinguished Senator from Oregon (Mr. HATFIELD), the chairman of the Appropriations Committee. Senator HATFIELD'S leadership and statesmanship were clearly evident throughout the consideration of this bill. His skilled and impartial shepherding of this complex bill is a credit to the Senate and the Congress as a whole.

I would be remiss if I did not compliment the gentleman from Massachusetts (Congressman BOLAND), for his understanding and cooperation during the consideration of the HUD-Independent Agencies Chapter of this bill. This is the first opportunity I have had to work with Congressman BOLAND in my new capacity as chairman of the HUD-Independent Agencies Subcommittee. I expect to benefit from his broad knowledge of the programs under the jurisdiction of my subcommittee.

Mr. President, I would just like to point out several typographical errors that appear on page 54 of the joint explanatory statement. The proper level for the solar electric propulsion system should read $3,000,000 and $2,000,000 for technology utilization.

● Mr. BURDICK. Mr. President, before we vote on the 1981 supplemental appropriations conference report, which I intend to support, I would like to ask a question of the chairman of the HUD Appropriations Subcommittee which relates to Indian housing.

I was disappointed in the conference committee's decision to agree with the House and provide only 2,400 Indian housing units in fiscal year 1981. As my colleagues are aware, the Senate had recommended 4,000 units, and the President had proposed 5,000 units.

The housing situation on most Indian reservations is desperate. In fact, a report from the General Accounting Office states that 60 percent of Indians are now living in substandard housing—which is five times the Nation's average for non-Indians.

I did note with interest and some encouragement, however, that language was included in the report which says:

> The Conferees stress that the reduction in the 1981 Indian housing program in no way reflects a retreat from a commitment to provide adequate levels of subsidized Indian housing.

Could either the chairman of the committee, Mr. HATFIELD, or the chairman of the HUD Subcommittee, Mr. GARN, please elaborate on this statement in the context of the fiscal year 1982 budget?●

● Mr. GARN. The language that appears on page 51 of the statement of the managers was included to make it clear that our actions in fiscal year 1981 do not, in any way, reflect on what we will do in the fiscal year 1982 bill. Be assured that I am concerned about the state of Indian housing in the United States and the need for a continuing commitment to provide adequate and decent Indian housing.●

● Mr. JOHNSTON. Mr. President, in the supplemental appropriations and rescission bill of 1981, the conferees agreed not to rescind $271 million in loan guarantee authority for alcohol fuels. As a member of the Appropriations Committee, I intended that this sum be leveraged by a ratio of 3 to 1 as provided in Public Law 96-514. I believe other members of the committee had the same intent. This was expressly the intent of the House Appropriations Committee and was spelled out in its report. However, the Senate Appropriations Committee report and the conference report did not specifically address this matter. Is it the understanding of the distinguished subcommittee chairman that it is the intention of the conferees to have the Department of Energy guarantee loans for alcohol fuels in the amount of three times the $271 million that is provided for a reserve in the conference agreement?

Mr. McCLURE. Yes, that is my understanding.

Mr. HUDDLESTON. I commend the distinguished Senator from Louisiana for clarifying this important point. It was, of course, the Senator's amendment to the Interior appropriations bill last year which provided leveraging for

the loan guarantees. It had broad bipartisan support then and, as a member of the Appropriations Committee, it was certainly my understanding that this leveraging would continue. I appreciate the assurances of the distinguished chairman of the subcommittee that this was his understanding as well.●

(At the request of Mr. STEVENS, the following statement was ordered to be printed in the RECORD.)

● Mr. LAXALT. Mr. President, the details on the military construction chapter of the supplemental are included in the CONGRESSIONAL RECORD and the conference report, and it should be noted that the Senate position on items in disagreement was strongly supported by our conferees.

Mr. President, I would like to thank our distinguished chairman, Senator HATFIELD, for a job well done on this supplemental. It is certainly important to note that through Senator HATFIELD's leadership we are able to recommend a bill which is under the budget request and under both the House and Senate bills while still meeting the urgent needs of the various agencies and departments.

I would also like to thank my counterpart on the House Appropriations Committee, the gentleman from Georgia (Mr. GINN) for his cooperation in reaching the agreements on the military construction chapter.

Mr. President, I urge my colleagues to support this conference agreement.●

● Mr. DOMENICI. The Senate version of H.R. 3512, the fiscal year 1981 supplemental appropriations bill, provided funding for the administration's request for $36,183,000 for the Army low-altitude defense system (LOADS) ballistic missile defense program. This additional funding was requested by the administration in order to protect the option to deploy to LOADS to defend U.S. land-based ICBMs, however they may be based.

The LOAD preprototype demonstration program is designed to provide the United States with a rapidly deployable option to defend our ICBM capability. Because of current funding constraints the LOAD program is proceeding at a nonoptimum pace.

Mr. President, last year Congress directed the DOD to protect the option to deploy a LOADS capability by fiscal year 1986. Funding was specifically added to protect this option—although not in the full amount required. The Reagan administration's supplemental request for LOADS was clearly consistent with the congressional mandate of last year.

For fiscal year 1982 the Senate passed the authorization request of $126.8 million for the BMD advanced technology program and $301.7 million for BMD system technology. Additionally, the Senate has authorized $31.2 million to enhance research and development of infrared optical sensor technology which is essential to developing the overlay BMD exoatmospheric-kill concept.

The program schedule reflected in this fiscal year 1982 BMD funding was based upon the administration's expectation that funding would be available to maintain the desired fiscal year 1981 program activity level. Failure to provide the $36,183,000 supplemental request would inherently delay the LOADS program seriously.

The House did not fund the President's LOADS supplemental request. The House report stated that the request was not appropriated because of the uncertainty surrounding the MX basing mode. The House report stated that LOADS is a potential defense for the MX and that MX uncertainty is grounds for also delaying the LOADS program—especially in view of the $57 million already provided for LOADS in the regular fiscal year 1981 appropriation.

This rationale appears to be based upon a serious misconception. While it is true that LOADS could, in one version, be deployed specifically to complement a mobile-based MX, the system that is being designed, certainly at this stage, is a generic ballistic missile defense capability which could be deployed to complement a silo-based ICBM equally well.

Thus, while there is clearly uncertainty as to how the United States will base the MX ICBM, this uncertainty cannot be reasonably used as an excuse to deny LOADS funding. Indeed, it can be argued that the increasingly dim prospects for mobile basing the MX would make it more imperative than ever that the United States maintain an enhanced program of development for programs such as LOADS and the overlay ballistic missile defense concept.

Mr. President, I am of the opinion that ballistic missile defense is a strategic force option to which the United States will inevitably be required to develop—irregardless of what type of strategic offensive forces are deployed in the next decade. It is no secret that some Members of Congress would prefer BMD to the currently proposed MPS mobile-basing concept as a means of protecting U.S. land-based ICBM's from a Soviet strategic attack. But, be that as it may, all Members of Congress should support the continued U.S. program of R. & D. on ballistic missile defense capabilities.

Mr. President, I am dismayed that the Senate conferees did not maintain the Senate's position on the LOADS program in the supplemental conference result. I had been under the impression that the Senate conferees were firm in their support for LOADS despite the House's inexplicable refusal to favorably regard this program. I had sent a communication to the conferees urging them to insist upon the LOADS supplemental funding in order to preserve the U.S. option to pursue a BMD capability.

Mr. President, I would like to close by noting that over $459 million was authorized in the Senate-passed fiscal year 1982 defense authorization bill for various ballistic missile defense capabilities. Without the supplemental funding, which the conference did not provide, the LOADS program could be delayed up to 2 years—a serious delay in view of our current strategic situation.

I hope the distinguished chairman of the Appropriations Committee and the distinguished chairman of the Defense Appropriations Subcommittee will strongly support the currently authorized funding and be prepared to consider any requested funding for ballistic missile defense in the future favorably.●

LABOR-HHS-EDUCATION CHAPTER OF 1981 RESCISSION/SUPPLEMENTAL BILL

● Mr. SCHMITT. Mr. President, I am pleased to report to the Senate on the conference result for chapter VIII of H.R. 3512, the supplemental appropriations and rescission bill of 1981. This chapter deals with appropriations for the Departments of Labor, Health and Human Services, Education, and related agencies.

As my colleagues may recognize, the Labor-HHS-Education Subcommittee faced the extremely difficult task of balancing two conflicting goals.

One was the urgent necessity to bring the growth of the Federal budget under control so as to help reduce inflation—the cruelest budget cutter there is. Our other goal was to make funding cuts without undermining programs that are vitally important to the less advantaged in our society. I believe we have been able to achieve our goals and feel the Senate can be satisfied with the conference result.

Overall the conferees reduced spending for programs in our section of the bill by $2,262,407,000, with rescissions totaling $1,891,369,000 and reductions in supplemental requests totaling $371,038,000. This is only $306.5 million less than the decreases proposed by the Senate, but is $456.3 million more than the program reductions recommended by the House.

Thus, the Senate has held some 60 percent of its cuts above the House coming out of conference. Looked at another way, the Senate conferees achieved 78 percent of the reductions that came to the Labor-HHS-Subcommittee from the administration and kept 88 percent of the reductions the subcommittee recommended to the Senate.

In many cases, the Senate made a smaller or made no rescission in programs it considers essential to the Nation. One particular area was health where the Federal Government makes a vital contribution.

Thus, for the National Institutes of Health, the conferees agreed to rescind $42.8 million, or some $83 million less than requested by the administration. The proposed rescission still would reserve the policy of stabilizing new and competing research grants at the 5,000 level. We also make available 10,000 research training slots and restore all funds for institutional allowances and indirect costs associated with training.

In addition, the conferees made no cut in the program dealing with environmental hazards, we reduced our decrease for alcohol and drug abuse formula grants from $80 million to $48 million, and we made no rescission in the primary care areas of family medicine residencies and general internal medicine and pediatrics. The conferees also agreed to no rescissions for advanced nurse training, nurse practitioner and nurse traineeships. and limited the reduction in health planning to $18 million from the $24 million requested by the administration.

For Public Health Service hospitals and clinics, the conferees provided what we believe will be sufficient funds for the phaseout of these facilities and direct that "no hospital should be closed prior to October 1, 1981."

In education, the Senate did not feel it could go along with the proposal to reduce almost all elementary and secondary education programs by 25 percent, so close to the coming school year. Instead, we tried to look at each program on its merits and then make our decision. As a result we made smaller rescissions—or no rescission at all—in such programs as title I grants for the disadvantaged, preschool incentive grants for the handicapped, magnet schools and special programs and projects under emergency school aid, school library grants, and so forth. I am glad to say the conferees generally agreed with this approach.

For the National Institute of Handicapped Research, which is in the Department of Education, the committee restored $1,750,000 of the requested $7,000,000 rescission, to allow a limited number of new initiatives. Serious attention should be given to addressing the needs of Native Americans with neurosensory disabilities under the Institute's research and training center authority.

For certain education, labor, and other programs, the Senate recommended, and the conferees have agreed to, larger rescissions than those requested by the President. This was true for certain CETA programs, emergency school aid basic grants, and programs in the ACTION Agency. These were areas where the Senate agreed with our committee that programs were not well targeted and effective, and it therefore made larger rescissions than requested.

We also took action to reduce administrative costs, including consultant costs, as well as many pay and program supplementals. For example, the Senate decreased the supplemental request for the Pell grant program by $270 million by reducing each student's grant $100. In conference, the cut in the supplemental was trimmed to $216 million by reducing individual grants $80 each. We believe that students should be able to absorb this small reduction. Meantime, the overall supplemental cut of $216 million will have a major impact on reducing Federal spending.

Mr. President, while I regret that certain reductions were necessary, I am pleased with the outcome of this conference, the first with Republican leadership of the Labor-HHS-Education Subcommittee. I believe we have done a good job of protecting effective programs which help the needy, while reducing the growth of Federal spending. It is my hope that this action marks the beginning of a process that will help to redefine and redirect Federal priorities and spending in the human services area.●

● Mr. LEVIN. Mr. President, I want to take this opportunity to mention how pleased I am that the conferees have decided to retain $8 million in line item funds for Detroit's "downtown people mover" project.

Termination of the project would have had a negative impact upon efforts which are being made to revitalize the city of Detroit. Private investors have based their development plans for Detroit's riverfront area upon the future construction of the downtown people mover which has been designed to provide mobility in the central business district. The funding level which the conferees have agreed to will allow for preliminary engineering work and, more importantly, will keep the momentum on this mass transit project going.

This conference report before us also affects two other programs of great interest to the State of Michigan, Mr. President. Both programs are part of chapter III, Department of Defense—Military, and also make significant contributions to strengthening our overall national security.

Unfortunately, I must express my disappointment about the conferees' decision to deny $44 million in supplemental funding for "administrative use vehicles" the Army was seeking to continue modernizing its aging fleet of automobiles, vans, light trucks and other nontactical vehicles.

I believe such funding should have been approved to improve both our Army's readiness and our national economy by permitting the Army to reduce its diversion of tactical combat vehicles to accomplish necessary administrative functions and by increasing sales in the pivotal automobile industry.

I would hope that increased funding for administrative use vehicles would be provided in the regular fiscal 1982 Defense Appropriations Act.

However, the Senate debate on these vehicles in the supplemental served a useful purpose to sensitize the Senate that, in these trying economic times, any military administrative use vehicles obtained in the future should be purchased from American automakers to the maximum extent permitted by past international agreements.

With the help of the distinguished chairman of the Defense Appropriations Committee, we established an important principle in this area, and we will continue to press for such "Buy American" provisions in the fiscal year 1982 Defense Appropriations Act.

Lastly, Mr. President, I take great satisfaction in noting that the supplemental conference report contains $8 million in additional fiscal year 1981 funding to accelerate Defense Department research and development on a survivable, emergency action message capable communication system for our strategic ballistic missile submarines.

As a member of the Committee on Armed Services, I have taken a great interest in this system—known as the blue-green laser or strategic laser communications system. It has major potential to improve the strategic and tactical communications of our missile and attack submarines, especially during the trans- and post-attack periods of a nuclear war. The system, if properly accelerated, could enhance our submarine communications capabilities well before the year 2000.

In recognition of the blue-green laser's potential contributions to our national security within the near future, and at my suggestion, our own committee accelerated the program by virtually doubling its funding authorization to $28.7 million in fiscal year 1981 and $40.2 million in fiscal year 1982.

The $8 million in supplemental funding in this conference report will fully fund the R. & D. required in fiscal year 1981 under the authorization and maintain the blue-green laser's accelerated program.●

● Mr. DOMENICI. Mr. President, I am pleased to support this supplemental appropriations bill conference agreement. It is within our revised fiscal year 1981 budget ceilings and contains budget reductions of $14.7 billion. Chairman HATFIELD and the Senate Appropriations conferees should be commended for this result.

The net effect of this conference agreement and additional requirements for entitlement programs not yet funded leaves us only $2.3 billion in budget authority and $300 million in outlays short of our fiscal year 1981 budget ceilings. This allows very little room to accommodate a probable later funding requirement for the airport and airway development or unanticipated spending increases due to higher interest rates or faster program outlays. Our budget ceilings for fiscal year 1981 are now very tight.

Rescissions in this bill, together with the cut in the loan limitation for the Export-Import Bank, will result in savings of $14.7 billion in budget authority and $1.4 billion in outlays this fiscal year. I am disappointed that these rescissions do not follow all of the President's proposed budget reduction policies, but they offer us the first opportunity to enact cuts in spending. Up until now, we have voted into place budget targets assuming spending reductions and instructions mandating spending cuts. Today, we take the initial step to actually reduce current appropriations. In the next few weeks, we will hopefully be enacting our reconciliation package making further changes in law to reduce spending, not only in this fiscal year but in future years as well.

I urge my colleagues to support this conference agreement. It offers us the first opportunity to begin to put into place the budget plan we approved in the fiscal year 1982 first budget resolution.●

Mr. DECONCINI. Mr. President, would the distinguished manager yield for a brief colloquy with respect to amendment No. 238?

Mr. HATFIELD. I would be happy to yield.

Mr. DECONCINI. As the distinguished chairman will recall, I, along with several of my colleagues on the Senate side, sought to persuade the conference committee to reduce the rescission for grants to school districts from the $74.4 million proposed as part of the compromise package on equal educational opportunities. Although we were unsuccessful in that effort, the distinguished chairman of the Labor, HHS, and Education Subcommittee indicated that the funds remaining in this account should be di-

rected primarily to cover the current requirements of category I school districts. Indeed, it was our understanding from the discussion that that was how the principals had arrived at the $74.4 million rescission. Does the distinguished chairman of the Appropriations Committee recall the debate on this item and does he agree that the conferees intended to make sure that the needs of category I school districts would be met?

Mr. HATFIELD. Let me say to the Senator that his recollection of the debate on this amendment accords with my own. It was clearly the intention of the managers that the category I school districts should continue to receive emergency school assistance funding at the current level insofar as feasible.

Mr. DECONCINI. I thank the Senator for his cooperation and help.

Mr. ROBERT C. BYRD. Mr. President, the conference report on H.R. 3512, the supplemental appropriations and rescission bill for fiscal year 1981, represents the final stage in a process which began almost 6 months ago—a process which seeks to put forward President Reagan's program for economic recovery. While this bill only applies to the remainder of fiscal year 1981—with only 4 months left—the impact of some of its provisions will affect numerous Federal programs for years to come.

I want to commend the distinguished chairman of the Appropriations Committee (Mr. HATFIELD) for the fine job he has done in pulling all the pieces of this bill together. The appropriations process is not an easy one to grasp—with all its complexities and numerous and varied ways of providing funds for Federal programs. However, as the new chairman of the Appropriations Committee has clearly demonstrated, he has a thorough understanding of and firm grasp on the process. Senator PROXMIRE, the acting ranking minority member on the committee, continues to bring to the committee's deliberations his expert knowledge of and experience with the workings of the Federal Government. The other members of the Appropriations Committee—both the veterans and the newcomers—are to be commended, as well, for their close and complete attention to this bill.

I am going to vote for this conference report because, as I have said before, it includes supplementals for some very important programs. It contains some worthwhile rescissions which I believe are necessary in our efforts to reduce Federal expenditures and bring the Federal budget under control.

However, this bill contains some provisions about which I have reservations. There are rescissions in certain energy research and development programs, in economic development programs, in health and education programs, and in veterans' programs which concern me. I am concerned about their impact on my own State of West Virginia, and I am concerned about their impact on the Nation.

The PRESIDING OFFICER (Mr. ANDREWS). Who yields time?

Mr. HATFIELD. Mr. President, I yield back any remaining time.

Mr. PROXMIRE. Mr. President, I yield back my remaining time.

Mr. HATFIELD. Mr. President, I move adoption of the conference report on H.R. 3512.

The PRESIDING OFFICER. The question is on the adoption of the conference report.

The conference report was agreed to.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk proceeded to read the amendments in disagreement.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the amendments in disagreement be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments in disagreement are as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

CHILD NUTRITION PROGRAMS

For an additional amount for "Child nutrition programs", $109,875,000: *Provided*, That this appropriation shall be available only to the extent an official supplemental request is transmitted to the Congress.

FOOD STAMP PROGRAM

For an additional amount for the "Food stamp program", $1,740,724,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation, but pending the enactment into law of such legislation, funds received from the sale of surplus agricultural commodities shall be available to the extent and in the manner provided in this paragraph: *Provided further*, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: *Provided further*, That of the amounts provided herein, $536,124,000 shall be available upon certification by the Secretary of Agriculture that the Department of Agriculture is using all regulatory and administrative methods available under law to curtail fraud, waste, error, and abuse in the program: *Provided further*, That this appropriation shall be available only to the extent an official amended supplemental request is transmitted to the Congress: *Provided further*, That the funds provided herein shall remain available until September 30, 1981.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Provided, That no funds available to this agency shall be used to either reduce or plan for a reduction in full-time permanent employment of less than twelve thousand five hundred and eighty (12,580): *Provided further*, That if the Secretary determines that the orderly and efficient operation of the Department of Commerce requires that he not comply with the preceding proviso, he need not comply and shall submit to the Committees on Appropriations of the House and Senate, a report explaining his reasons for not complying.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 20 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

COASTAL ENERGY IMPACT FUND (DEFERRAL)

Of the funds appropriated under this head in Public Law 96-86, $7,000,000 are deferred for obligation until October 1, 1981.

COASTAL ZONE MANAGEMENT (TRANSFER OF FUNDS)

For an additional amount for "Coastal zone management", $33,000,000, to be derived by transfer from "Coastal energy impact fund", to remain available until expended.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 21 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

PROMOTE AND DEVELOP FISHERY PRODUCTS AND RESEARCH PERTAINING TO AMERICAN FISHERIES (DISAPPROVAL OF DEFERRAL)

The Congress disapproves $2,500,000 of the proposed deferral D 81-105, relating to Department of Commerce, National Oceanic and Atmospheric Administration, "Promote and Develop Fishery Products and Research Pertaining to American Fisheries", as set forth in the message of April 27, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act, and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 29 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

FEES AND EXPENSES OF WITNESSES (INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Fees and expenses of witnesses", $6,200,000, of which $2,931,000 is to be derived from Office of Justice Assistance, Research, and Statistics, "Law enforcement assistance".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 38 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

The amounts provided in Public Law 96-536 for the Board for International Broadcasting may be expended without regard to the limitation of $2,400,000 for the purpose of transferring RFE/RL positions to the United States.

Notwithstanding section 8(b) of the Board for International Broadcasting Act of 1973, not to exceed $1,600,000 of the amounts placed in reserve pursuant to that section, or which would be placed in reserve pursuant to that section, shall be available to the Board for carrying out that Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 41 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SALARIES AND EXPENSE (TRANSFER OF FUNDS)

For an additional amount for "Salaries and expenses", $350,000, to be derived by transfer from "Salaries and expenses (special foreign currency program)".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM) (DISAPPROVAL OF DEFERRAL)

The Congress disapproves $350,000 of the proposed deferral D 81-75 relating to the International Communication Agency, "Salaries and expenses (special foreign currency program)" as set forth in the message of February 13, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 47 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $290,089,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 49 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $140,150,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 50 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SPECIAL PAY FOR AVIATION OFFICERS

For the payment of special pay under section 301b of title 37, United States Code, $55,500,000, to be transferred to the various military personnel accounts.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 53 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $56,906,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 68 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $143,000,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 72 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "and $89,000,000 for advance procurement for reactivation of a battleship, to remain available for obligation until September 30, 1985".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 81 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "of which not to exceed $2,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. New Jersey and not to exceed $1,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. Iowa,"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 84 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

"None of the funds appropriated to the Department of Defense for fiscal year 1981 and hereafter shall be available for obligation to reimburse a contractor for the cost of commercial insurance (other than insurance normally maintained by the contractor in connection with the general conduct of his business) that would protect against costs of the contractor for correction of the contractor's own defects in materials or workmanship incident to the normal course of construction (those defects in materials or workmanship which do not constitute a fortuitous or casualty loss)."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 111 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $30,611,609 for existing units under section 8, including section 8(j), of such Act, $197,102,148 for newly constructed and substantially rehabilitated units assisted under such Act, and $5,219,104,150 of budget authority, are rescinded.

(DEFERRAL)

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $15,000,000 for modernization of existing low-income housing projects and $300,000,000 of budget authority shall be withheld from obligation until October 1, 1981.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 113 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

COMPREHENSIVE PLANNING GRANTS (RESCISSION)

Any amounts not reserved from appropriations provided under this head in the Department of Housing and Urban Development—Independent Agencies Appropriation Acts, 1981 and prior years, including any amounts becoming available from cancellation of prior year reservations, but excluding $19,000,000, are rescinded.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 118 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Of the funds appropriated under this head, $880,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1980, and $756,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, are rescinded. The reduction in each appropriation will be distributed among the States according to the allotment formula specified in section 205(c) of Public Law 92-500, as amended by Public Law 95-217. Whenever a State's share of the reduction from an appropriation, as determined by the formula, is greater than its unobligated balance for that appropriation, as determined by the Administrator of the Environmental Protection Agency upon the date of enactment of this Act, the shortfall will be distributed according to the allotment formula among all the States which still have funds remaining from that appropriation. This process of distributing the shortfall will continue until the amount of the reduction has been allocated among the States.

Of the funds appropriated under this head in the Public Works Employment Appropriation Act, 1977, $64,000,000 are rescinded.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 123 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Of the funds appropriated under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, $46,000,000 are rescinded, and of the amounts remaining for research and related activities under Public Law 96-526: (1) not more than $37,000,000 shall be available for scientific, technological, and international affairs; (2) not more than $83,000,000 shall be available for engineering; (3) not more than $18,053,000 shall be available for earthquake hazards mitigation; (4) not more than $1,240,000 shall be available for the establishment and operation of three university-based Innovation Centers; (5) not more than $2,800,000 shall be available for grants to two-year and four-year colleges for equipment and instrumentation costing $35,000 or less; (6) not more than $300,000 shall be available for small business innovation for projects to aid the handicapped; and (7) not more than $1,400,000 shall be available for special programs for women and minorities in science and technology. None of these funds shall be available for separately targeted programs for appropriate technology, science faculty improvement programs for two-year and four-year college faculty research participation, and research opportunity grants and visiting professorships for women.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 140 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: $2,745,000 shall not become available for obligation until October 1, 1981, and shall remain available for obligation until September 30, 1983, and $5,900,000 are rescinded.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 142 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: $4,776,000 including $576,000 to complete construction of the Savage River Bridge at Denali National Park and Preserve, Alaska.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 143 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $19,000,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 145 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

(RESCISSION)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514) and previous Interior Department Appropriations Acts, $90,000,000 are rescinded in the following amounts: $55,000,000 for payments to the States; $133,000 for the Bureau of Land Management; $4,918,000 for the Forest Service; $12,217,000 for the United States Fish and Wildlife Service; $14,782,000 for the National Park Service; and $2,950,000 for the Pinelands National Reserve: *Provided*, That notwithstanding the

provisions of 16 USC 4601–8, the unobligated balances of the contingency reserve and funds appropriated and apportioned for the various States and Territories upon enactment of this Act shall be reallocated among the States and Territories so that each shall receive not less than seventy-five percent of the amount each would have received under the statutory allocation of the amount appropriated for payment to the States under this head in Public Law 96–514.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 147 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $6,500,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 148 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: $12,000,000 available from the Highway Trust Fund to liquidate contract authority provided under section 105(a)(8) of Public Law 94–280 for engineering services, roadway excavation, and pilot boring for the Cumberland Gap Tunnel, as authorized by section 160 of Public Law 93–87.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 154 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *Provided,* That notwithstanding provisions of 16 USC 1704(d) and 1706 the unrescinded balance of the amount appropriated under this head in Public Law 96–514 shall be allocated as follows: $18,000,000 for the purposes of 16 USC 1704; $4,000,000 to the Secretary of the Interior; and $4,000,000 to the Secretary of Agriculture.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 155 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

RURAL WATER TREATMENT AND DISTRIBUTION SYSTEM (DEFERRAL)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96–514), $1,900,000 shall not become available for obligation until the conditions of Section 9(b) of Public Law 96–355 regarding deauthorization of the Oahe unit have been met.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 158 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *Provided further,* That $22,607,000 appropriated in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96–514), for timber management and any related activities, including roads, on the Tongass National Forest, Alaska, that are replaced by funds provided under the authority of section 705(a) of Public Law 96–487 (which fund is hereby established at not less than $25,000,000 for fiscal year 1981), are transferred to this account, to remain available until expended, to facilitate timber salvage activities in the Mount Saint Helens volcano area of the Gifford Pinchot National Forest as follows: construction of forest development roads and trails by the Forest Service $18,812,000; land line location $300,000; timber sales preparation $800,000; and road maintenance $2,695,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 161 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $53,036,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 169 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert: $400,000 shall not become available for obligation until October 1, 1981, and $10,348,000 are rescinded.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 171 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert: $67,762,000 shall not become available for obligation until October 1, 1981, and $153,180,000 are rescinded.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 173 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $17,167,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 184 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: For an additional amount for "Indian health facilities", $2,500,000, to remain available until expended, for site reviews, water investigations, and preliminary engineering and design of sanitation facilities for 2840 Indian housing units.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 185 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $3,916,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 189 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

EMPLOYMENT AND TRAINING ASSISTANCE (RESCISSION)

Of the funds provided for "Employment and training assistance" for fiscal year 1981 in Public Law 96–536, as amended, $82,500,000 are rescinded: *Provided,* That notwithstanding any other provision of law, $696,000,000 shall be available for the Youth Employment and Training Program authorized under title IV, part A, subpart 3, of the Comprehensive Employment and Training Act: *Provided further,* That notwithstanding any other provision of law, $70,136,000 shall be available for title II, part A, section 202(e), of the Comprehensive Employment and Training Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 197 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: : *Provided,* That not more than $128,399,000 shall be available under this head for operation of Public Health Service hospitals and clinics.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 202 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $9,950,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 204 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $2,113,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 205 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $997,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 206 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment insert: $1,571,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 207 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $2,694,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 208 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $2,137,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 210 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $377,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 225 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $10,000,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 240 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $2,000,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 241 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $250,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 260 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $80

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 267 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $3,000,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 268 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: , $6,020,000 of the amount provided for section 420 and

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 269 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said

amendment, insert: , and $2,150,000 of the amount provided for title IX, part B of the Higher Education Act are rescinded

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 272 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: : *Provided,* That the funds appropriated in Public Law 96–536, as amended, for title IX, part B are available notwithstanding the provisions of section 922 (b)(2) of the Higher Education Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 275 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

COLLEGE HOUSING LOANS (RESCISSION)

Of the funds appropriated for participation sales insufficiencies for fiscal year 1981 in Public Law 96–536, as amended, $14,271,000 are rescinded. Payments of insufficiencies in fiscal year 1981 as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717) shall be made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749) using loan repayments and other income available during fiscal year 1981.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 284 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $500,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 285 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $5,187,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 293 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Of the total amounts appropriated for the Department of Health and Human Services for fiscal year 1981, $13,500,000 are hereby rescinded from funds available for travel, consultants, consultant services, training, and furniture and equipment purchases.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 325 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: $12,000,000, and, in addition, not to exceed $2,000,000 shall be derived by transfer from the unobligated balance in the appropriation "Acquisition, construction, and improvements."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 331 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

GRANTS-IN-AID FOR AIRPORT PLANNING AND DEVELOPMENT (LIMITATION ON OBLIGATIONS)

The limitation in section 302 of the Department of Transportation and Related Agencies Appropriation Act, 1981 (Public Law 96–400), is amended by deleting "$700,000,000" and inserting in lieu thereof "$450,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 337 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

After reserving funds for the grant agreements executed prior to March 10, 1981, for the remainder of fiscal year 1981, the Secretary shall obligate available funds up to the extent of the entitlements which existed immediately prior to March 10, 1981, or on the basis of the rail transportation needs to be addressed by the project to be funded.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 342 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Grants to the National Railroad Passenger Corporation", for operating losses incurred by the Corporation, $15,300,000 to be derived by transfer from the unobligated balances under the appropriations "Department of the Treasury, Office of the Secretary, Investment in Fund Anticipation Notes" and "Federal Railroad Administration, Railroad Rehabilitation and Improvement Financing Funds". Not to exceed $24,900,000 of amounts previously appropriated for capital improvements may be used for operating expenses incurred by the Corporation.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 351 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

INTERSTATE COMMERCE COMMITTEE

Payments for directed rail service

(Transfer of Funds)

For necessary expenses for "Payments for directed rail service", $2,500,000, to be derived by transfer from Interstate Commerce Commission, "Salaries and expenses", to remain available until expended.

National Clean-Up and Flag-Up America's Highways Week

The week of June 28 through July 4, 1981, is designated as "National Clean-Up and Flag-Up America's Highways Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 356 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

UNITED STATES CUSTOMS SERVICE

Salaries and expenses

For an additional amount for "Salaries and expenses", $10,000,000, to be used for the implementation of the Air Module Concept; including acquisition (purchase of four), operation and maintenance of aircraft: *Provided,* That none of the funds made available by this Act shall be available for administrative expenses in connection with effecting the reduction of employment in the U.S. Customs Service below the level on April 30, 1981.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 365 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

DISTRICT OF COLUMBIA FUNDS

Governmental direction and support

(Rescission)

Of the funds appropriated for "Governmental direction and support" for fiscal year 1981 in Public Law 96–530, $3,665,500 are rescinded: *Provided,* That outstanding settlements of claims and suits not to exceed $200,000 in total shall be paid in the same manner as judgments rendered against the District of Columbia government.

Economic development and regulation

(Rescission)

Of the funds appropriated for "Economic development and regulation" for fiscal year 1981 in Public Law 96–530, $40,500 are rescinded.

Public safety and justice

For an additional amount for "Public safety and justice", $3,394,000.

Public education system

(Including Rescissions)

For an additional amount for "Public education system", $2,970,000, to be allocated as follows: $1,100,000 for the District of Columbia Public Schools, and $1,870,000 for the School Transit Subsidy: *Provided,* That of the funds appropriated under this heading for the Public Library for fiscal year 1981 in Public Law 96–530, $298,800 are rescinded: *Provided further,* That of the funds appropriated under this heading for the Commission on the Arts and Humanities for fiscal year 1981 in Public Law 96–530, $5,000 are rescinded: *Provided further,* That of the funds appropriated under this heading for the Educational Institution Licensure Commission for fiscal year 1981 in Public Law 96–530, $3,500 are rescinded.

Human support services

For an additional amount for "Human support services", $20,754,100: *Provided,* That $3,500,000 of this appropriation, to remain available until expended, shall be available solely for District of Columbia employees' disability compensation.

Transportation services and assistance

(Rescission)

Of the funds appropriated for "Transportation services and assistance" for fiscal year 1981 in Public Law 96–530, $3,031,600 are rescinded.

Environmental services and supply

(Rescission)

Of the funds appropriated for "Environmental services and supply" for fiscal year 1981 in Public Law 96–530, $121,600 are rescinded.

Water and Sewer Enterprise Fund

For an additional amount for "Water and Sewer Enterprise Fund", $3,017,800.

Washington Convention Center Enterprise Fund

For establishment of the Washington Convention Center Enterprise Fund, $382,600.

Capital outlay

For an additional amount for "Capital outlay", $696,000.

Resolved That the House recede from its disagreement to the amendment of the Senate numbered 428 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: 304

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 429 to the aforesaid bill, and

concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 305. None of the funds in the Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in World trade at competitive prices as authorized by law.

Mr. HATFIELD. Mr. President, I move that the Senate concur en bloc in the amendments of the House of Representatives.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon.

The motion was agreed to.

Mr. HATFIELD. Mr. President. I move to reconsider the vote by which the conference report was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MCCLURE. Mr. President, on page 94 of the report of the House of Representatives on the supplemental and rescission bill just passed, there appears language with respect to an amendment dealing with salaries and expenses under the U.S. Customs Service. The amendment was offered by the Senator from Arizona (Mr. DECONCINI). Senator ABDNOR, the chairman of the subcommittee, in accepting it very clearly stated that it dealt with the Customs Service salaries and expenses.

When the report was written, it included not only the support personnel for Customs Service, but it also said, "and in the Bureau of Alcohol, Tobacco, and Firearms."

I think the RECORD should correctly reflect the intention of the conferees and the language of the bill that it dealt with salaries and expenses for the Customs Service.

Mr. HATFIELD. Mr. President, I would affirm the Senator's observation. The statement of the managers goes beyond the language of the bill, and it is the bill that becomes law.

The PRESIDING OFFICER. The record will show the observation of the conferees as to the true intent of the conferees.

Mr. HATFIELD. And I assume, Mr. President, that the final record will include this colloquy on the floor as legislative history.

The PRESIDING OFFICER. The CONGRESSIONAL RECORD will include that as legislative history made during debate on the bill.

Mr. HATFIELD. I thank the Chair.

Mr. MCCLURE. Mr. President, I would like to ask the Senator from Arizona if it is not true that his amendment deals only with the U.S. Customs Service and does not in any way restrict the administration's ability to enact reforms in the Bureau of Alcohol, Tobacco, and Firearms.

Mr. DECONCINI. I am very glad that this issue has been raised. I would like to help clarify the confusion which has arisen regarding amendment No. 356 in the conference report which Senator CHILES and I originally sponsored in the Senate. The original version of this amendment simply added $10 million offset by other reductions to strengthen the Customs Service drug air interdiction capability and did not seek to prohibit employment force reductions in any Federal agency. A proviso prohibiting a reduction in employment levels of the U.S. Customs Service was attached at the insistence of the House managers.

Language was added to the joint explanation of our amended amendment which in no respect represented the intent or purpose of that amendment. The joint explanation seeks to include the BATF in the prohibition against U.S. Customs Service employment reductions. As my distinguished colleagues and coconferees have already stated, this language in no way reflects the intent or purpose of the Senate conferees in interpreting this amendment.

As my distinguished friend and colleague from Idaho knows, during the past 2 years I chaired oversight hearings on the BATF's regulatory and enforcement activities with respect to firearms. Those hearings brought to light serious evidence of widespread abuses in interpreting and enforcing the law. I believe the record of those hearings supports the need to reduce BATF resources in a number of areas and is consistent with the administration's plan for cutting BATF in strengths. I intend to work closely with the administration and my colleagues to see that these goals are met.

In conclusion, I am very glad that this clarification has been made.

Mr. MCCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COHEN). Without objection, it is so ordered.

TRIBUTE TO MARILYN COURTOT, THE NEW ASSISTANT SECRETARY OF THE SENATE

Mr. PRYOR. Mr. President, I want to take this opportunity to commend Bill Hildenbrand, the Secretary of the Senate, on his excellent choice of Marilyn Courtot as the new Assistant Secretary of the Senate.

This appointment, which is effective June 6, recognizes the achievements of a highly competent administrator whose Senate career has been dedicated to modernizing and making more professional the many activities of the Office of the Secretary. In her 7 years as Administrative Director she has served three Secretaries, during whose tenures have come major changes in the operations of the Senate.

I believe the saying is true that a successful person is one who goes ahead and does the thing the rest of us never quite get around to. To convey some notion of the extent of Marilyn Courtot's success I would like to mention some of the things she has done: her role for instance in the development of automated systems for tracking legislation, nominations, and executive communications; and her work with others to find ways of automating the demanding printing needs of the Senate. She has also analyzed the operations of many of the Secretary's support units, resulting in expanded and more efficient services offered by the Senate Library and the Office of Public Records, among others.

Marilyn Courtot has rendered invaluable assistance to the Secretary in his appearances before the Appropriations and Rules Committees, especially in the areas of budget preparation and long-range planning; she developed and implemented the first personnel policy in the history of the Secretary's office. She also has played a pivotal role in creating the orientation program held for new Senators and their key aides at the beginning of each Congress and the series of informative staff seminars sponsored jointly with the Office of the Sergeant at Arms.

That the Office of the Secretary operates as professionally and effectively as it does is due in no small measure to the efforts of this dedicated staff member.

I would like to at this time, Mr. President, offer my hearty congratulations to Marilyn Courtot on her challenging new assignment, and I am sure I am expressing the sentiment of all Members of the Senate in saying that we look forward to working with her in the future.

MESSAGE FROM THE HOUSE

At 1:16 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3512) making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 13, 25, 33, 37, 40, 100, 101, 103, 115, 131, 157, 159, 164, 190, 191, 192, 193, 194, 195, 198, 222, 223, 226, 228, 237, 245, 246, 253, 255, 259, 261, 262, 264, 266, 273, 277, 278, 280, 282, 290, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 311, 312, 313, 314, 339, 343, 357, 361, 366, 367, 368, 369, 370, 371, 372, and 374 and has agreed thereto; it recedes from its disagreement to the amendments of the Senate numbered 15, 17, 20, 21, 29, 38, 41, 42, 47, 49, 50, 53, 68, 72, 81, 84, 111, 113, 118, 123, 140, 142, 143, 145, 147, 148, 154, 155, 158, 161, 169, 171, 173, 184, 185, 189, 197, 202, 204, 205, 206, 207, 208, 210, 225, 240, 241, 260, 267, 268, 269, 272, 275, 284, 285, 293, 325, 331, 337, 342, 351, 356, 365,

428, and 429, and has agreed thereto, each with an amendment, in which it requests the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 1070. An act to extend the authorization for youth employment and demonstration programs, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Frederick Morris Bush, of Texas, to be Assistant Secretary of Commerce for Tourism.

(The above nomination reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, June 4, 1981, he had presented to the President of the United States the following enrolled bill:

S. 1070. An act to extend the authorization for youth employment and demonstration programs, and for other purposes.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-152. A resolution adopted by the Legislature of Guam; to the Committee on Armed Services:

"RESOLUTION

"Whereas, U.S. Public Law 96-600 authorized the formation of a National Guard Unit on Guam; and

"Whereas, the President of the United States is vested with the power to appoint the Adjutant General of the National Guard Unit on Guam pursuant to 32 U.S.C. 314 (b); and

"Whereas, Congressman Antonio B. Won Pat and Governor Paul M. Calvo have nominated Brigadier General Robert H. Neitz to be appointed as the Adjutant General of the National Guard Unit on Guam; and

"Whereas, Brigadier General Robert H. Neitz is eminently qualified to serve as the Guam unit's first Adjutant General having previously served as:

"Special Assistant to Chief, National Guard Bureau

"Executive, National Guard Bureau

"Advisor to Commander, Air University

"Faculty, Air War College

"Student, Air War College

"Assistant Director of Operations, Hqs, PA ANG

"Deputy Commander, Operations, 11th Military Airlift Group, PA ANG

"Operations Staff Officer, 11th Air Transportation Group, PA ANG

"Pilot, Transportation, 103rd Air Transportation Squadron, PA ANG.

"Pilot, Fighter Interceptor, 103rd Fighter Interceptor Squadron, PA ANG.

"Personnel Officer, 3501st USAF Recruiting Group, New York, NY.

"Student, Oklahoma State University.

"Base Information Officer, 3575th Pilot Training Wing, Vance AFB, OK.

"Academic Instructor, 3575th Pilot Training Wing, Vance AFB, OK.

"Pilot, Instructor, 3575th Pilot Training Squadron, Vance AFB, OK.

"Defense Training Officer, 483rd TCW (Japan).

"Pilot, Troop Carrier, 37th TRPCARRON (Japan).

"Pilot, Light Bomber, 90th Bomb Squadron (Korea).

"B-26 Combat Crew Training, Langley AFB, VA.

"B-26 Transition Training, Perrin AFB, TX.

"Primary, Basic Pilot Training; and

"Whereas, in 1970, General Neitz attended the resident course of the Air War College and was the first guardsman or reservist to win the coveted National Geographic Society Award for excellence in politico-military writing; and

"Whereas, he was invited to remain on the faculty and to serve as Air National Guard Advisor to the Commander, Air University, and Commandant, Air War College. This was the first such position at a senior service school for any reserve component; and

"Whereas, after more than four years on the Air War College faculty, during which he was an adjunct professor of political science at Troy State University, General Neitz was selected to be the Executive, National Guard Bureau and commenced a four year tour in January 1976; and

"Whereas, in this position, he was responsible for the overall administration of the National Guard Bureau, a headquarters of approximately 700 military and civilian personnel, and for programs to improve its facilities, organization, procedures, and management; and

"Whereas, he became the Special Assistant to the Chief, National Guard Bureau on 1 March 1980, and was federally recognized as a Brigadier General on 29 May 1980; and

"Whereas, the appointment of a person with Brigadier General Robert H. Neitz's education and experience will assure the expedited establishment of the National Guard Unit on Guam; now, therefore, be it

"*Resolved*, That the Sixteenth Guam Legislature respectfully recommends and requests that the President of the United States appoint Brigadier General Robert H. Neitz to serve as the Adjutant General of the National Guard Unit on Guam, pursuant to the authority granted by 32 U.S.C. 314(b); and be it further

"*Resolved*, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the Chief of the National Guard Bureau; to the President Pro Temp of the United States Senate; to the Speaker of the House of Representatives, U.S. Congress; to Brigadier General Robert H. Neitz; to Congressman Antonio B. Won Pat; and to the Governor of Guam."

POM-153. A resolution adopted by the Regional Transportation Council of Texas commenting on existing and proposed regulations issued by the United States Department of Transportation; to the Committee on Banking, Housing, and Urban Affairs.

POM-154. A resolution adopted by the City Council of Vallejo, California, urging enactment of legislation to repeal Section 301 of the Power Plant and Industrial Fuel Use Act of 1978; to the Committee on Energy and Natural Resources.

POM-155. A resolution adopted by the City Council of Point Arena, California, urging the repeal of Section 301 of the Powerplant and Industrial Fuel Use Act; to the Committee on Energy and Natural Resources.

POM-156. A resolution adopted by the City Council of Ukiah, California, urging the repeal of section 301 of the Powerplant and Industrial Fuel Use Act; to the Committee on Energy and Natural Resources.

POM-157. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

"JOINT RESOLUTION

"Whereas, California is a major energy producer with current oil production of over one million barrels per day and a projected production of over one and a half million barrels per day by 1985; and

"Whereas, California's utilities and government are taking steps to reduce by over 50 percent the burning of oil for electrical power generation by 1990, and California's citizens have reduced transportational fuel use by over 10 percent since 1979; and

"Whereas, California has taken steps to encourage energy conservation and the use of alternative energy sources, including solar, geothermal, wind, and biomass; and

"Whereas, The United States Congress in adopting the Outer Continental Shelf Lands Act Amendments of 1978 directed the Department of the Interior to 'manage the Outer Continental Shelf in a manner which considers economic, social, and environmental values of the renewable and nonrenewable resources contained in the Outer Continental Shelf, and the potential impact of oil and gas exploration on other resource values of the Outer Continental Shelf and the marine, coastal, and human environments"; and

"Whereas, California's citizens and local governments have repeatedly stated that proposed Outer Continental Shelf Sale 53 presents unacceptable risks to economic, social, human, and natural environments far in excess of the value of projected oil resources in the Santa Cruz, Bodega, Pt. Arena, and Eel River Basins; and

"Whereas, The Department of the Interior has recognized the validity of California's position and deleted these four basins from future lease sales; and

"Whereas, The State of California has further recommended that specific tracts within the Santa Maria Basin also be deleted to avoid unacceptable risks to the threatened sea otter and other valuable coastal resources; and

"Whereas, California's state and local governments support Outer Continental Shelf leasing and development in the many areas where large quantities of oil and gas are likely to be found; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly*, That the Legislature of the State of California hereby memorializes the President of the United States and the Secretary of the Interior to fulfill the existing commitments of the Department of the Interior to delete from further consideration for Outer Continental Shelf leasing the Santa Cruz, Bodega, Pt. Arena, and Eel River Basins; and be it further

"*Resolved*, That the Legislature hereby memorializes the President of the United States and the Secretary of the Interior to accept and expedite Outer Continental Shelf leasing in areas with large oil and gas reserves and to delete the northern portion of the Santa

Maria Basin to avoid excessive risk to threatened species, fisheries, marine mammals, sea birds, recreation, marine navigation, air quality, and other important values and uses of coastal waters; and be it further

"*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of the Interior, and to each Senator and Representative from California in the Congress of the United States."

POM–158. A resolution adopted by the Utah Guides and Outfitters, relative to ownership, access, and use of various public lands; to the Committee on Energy and Natural Resources.

POM–159. A concurrent resolution adopted by the Legislature of the State of New Hampshire; to the Committee on Environment and Public Works:

"RESOLUTION

"Whereas, the Nuclear Regulatory Commission of the United States is responsible for the licensing and inspection of nuclear power plants; and

"Whereas, the Report of the President's Commission on the Accident at Three Mile Island (Kemeny Commission Report) and A Report to the Commissioners and to the Public (Rogovin Report) made public serious deficiencies in the Nuclear Regulatory Commission, including managerial problems, inadequacies in the licensing and inspection processes, and insufficient communication among its major offices; and

"Whereas, these problems have interfered with the ability of the Nuclear Regulatory Commission to perform its duties effectively and to provide an acceptable level of safety for nuclear power plants; and

"Whereas, the safety of nuclear power plants is of paramount concern to the citizens of New Hampshire because of the potential serious consequences of even minor accidents at such plants; and

"Whereas, the Kemeny Commission Report and Rogovin Report are based on a thorough investigation of the Nuclear Regulatory Commission and the safety issues raised by the March 28, 1979, accident at Three Mile Island; now, therefore, be it

"Resolved by the House of Representatives, the Senate Concurring:

"That the Congress of the United States is hereby urged to pass an act to restructure the Nuclear Regulatory Commission so that the Commission can effectively pursue what should be its primary goal, the assurance of safety in the generation of nuclear power; and

"That the restructuring should be based on the recommendations of the Kemeny Commission Report and the Rogovin Report; and

"That an oversight committee on nuclear reactor safety be established to examine the performance of the Nuclear Regulatory Commission; and

"That copies of this resolution be forwarded to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives and the Administrator of General Services of the United States."

POM–160. A resolution adopted by the Legislature of Guam; to the Committee on Finance:

"RESOLUTION

"Whereas, in 1978, the Internal Revenue Code was amended to provide a credit against the income tax for the employment of certain new employees; and

"Whereas, the credit is based on the amount of unemployment insurance wages paid by the taxpayer; and

"Whereas, the unemployment insurance provisions of the Internal Revenue Code are not applicable to the territory of Guam; and

"Whereas, many employers who would otherwise qualify for the credit in the territory of Guam cannot do so because of the definition of unemployment insurance wages; and

"Whereas, the 'mirror image' of the Internal Revenue Code was designed to provide equitable treatment for taxpayers in the territories and the mainland; and

"Whereas, with respect to the credit for employment of certain new employees such equitable treatment has been denied residents of the territory of Guam; now, therefore, be it

"*Resolved*, That the Sixteenth Guam Legislature requests the United States Congress to amend Section 26, United States Code, 51(f), to provide a definition for wages applicable to the territory; and be it further

"*Resolved*, That the Sixteenth Guam Legislature requests such action to be taken as expeditiously as possible; and be it further

"*Resolved*, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the Senate; to the Speaker of the House of Representatives; to the Chairperson of the Senate Finance Committee; to the Chairperson of the House Ways and Means Committee; to the United States Secretary of the Treasury; to the United States Secretary of the Interior; to the Director of the Office of Territorial Affairs; to Congressman Antonio B. Won Pat; and to the Governor of Guam."

POM–161. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

RESOLUTION

"Whereas, Unavoidable byproducts of hazardous substances; and

"Whereas, Pollution control and toxic and hazardous substance management facilities are necessary to the health and general welfare of the residents of the State of California and to fulfill the mandates of various state and federal laws designed to protect the environment; and

"Whereas, It is essential to ensure that expenditures for pollution abatement and toxic and hazardous substance management facilities do not jeopardize the ability of American industry to make the productive capital investments necessary to maintain and enhance the nation's economic strength; and

"Whereas, Congress has already provided in Section 103(b)(4) of the Internal Revenue Code of 1954, as amended, that interest earnings on bonds issued by state and local governments to assist private industry with the costs of the installation of pollution control and solid waste disposal facilities are excludable from the gross income of the holders of such bonds; and

"Whereas, The Legislature has already declared that it is necessary and essential that the state, in cooperation with the federal government, use all practical means and measures to control and eliminate pollution hazards in the environment; and

"Whereas, In furtherance of this goal the Legislature created the California Pollution Control Financing Authority which, among other things, may issue revenue bonds to provide financing for projects which reduce, abate, or control pollution resulting from the disposal of solid or liquid waste including, without limitation, the management of toxic and hazardous substances; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly*, That the Legislature of the State of California respectfully memorializes the President and the Congress to enact legislation amending the Internal Revenue Code of 1954 to include interest earnings on bonds issued for toxic and hazardous substance management facilities within Section 103(b)(4) of the code; and be it further

"*Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–162. A resolution adopted by the City Council of Ukiah, California, expressing its support of efforts by the Administration to return powers to local entities; to the Committee on Governmental Affairs.

POM–163. A resolution adopted by the City Council of Antioch, California, expressing its support of efforts by the Federal Administration to return powers to local entities; to the Committee on Governmental Affairs.

POM–164. A resolution adopted by the City Council of Lakeport, California, expressing its support of efforts by the Federal Administration to return powers to local entities; to the Committee on Governmental Affairs.

POM–165. A joint resolution adopted by the Legislature of the State of Alaska; to the Committee on Veterans' Affairs:

"RESOLUTION

"Whereas veterans of the Vietnam war served our country with honor and distinction in the face of extraordinary circumstances including a lack of popular support from the United States civilian population; and

"Whereas the United States government has not provided benefits, allowances, and remuneration commensurate with those provided veterans of other conflicts to veterans of the Vietnam war;

"*Be it resolved* That the Alaska State Legislature urges the United States government to reinstate all benefits and allowances in force during the Vietnam war for all Vietnam war veterans regardless of time elapsed since separation from active duty; and be it

"*Further resolved* That the United States government is urged to reactivate discharge review boards and publicize their existence, and make all efforts to provide case by case corrective measures for other than honorably discharged Vietnam veterans; and be it

"*Further resolved* That the United States government is urged to establish a Vietnam war veterans' bonus program awarding those veterans a one-time cash bonus; and be it

"*Further resolved* That the legislature deplores and decries the most recent actions of the federal administration to cut or eliminate major programs that provide services to the Vietnam veteran, and urges immediate action to rescind those cuts; and be it

"*Further resolved* That the legislature endorses state participation in programs which will emphasize or supplement federal assistance programs for Vietnam war veterans."

POM–166. A petition from a citizen of Youngstown, Ohio, favoring the repeal of PSRO; ordered to lie on the table.

POM–167. A petition from a citizen of Youngstown, Ohio, urging the deregulation of health care programs by the President and the Congress; to the Committee on Finance.

POM–168. A resolution adopted by the House of Representatives of the State of Louisiana; ordered to lie on the table:

"RESOLUTION

"Whereas, the citizens of the United States and of the great state of Louisiana have witnessed the growth in federal government spending rise from a rate of sixteen percent annually and have felt an alarmingly high federal government presence in the economy, and

"Whereas, the citizens of the United States and of the great state of Louisiana have anguished under the excessive burden of oppressive tax and regulatory policies which

have gradually squeezed productive incentives from the economy, and

"Whereas, the citizens of the United States and of the great state of Louisiana have helplessly watched as the American productivity growth rate has fallen to less than one percent per year and has dwindled severely in relation to other industrialized nations, and

"Whereas, the citizens of the United States and of the great state of Louisiana have seen the United States savings rate, upon which the availability of investment capital so gravely depends, fall from its historic level of six to eight percent to a current rate of only four and four-tenths percent, and

"Whereas, the citizens of the United States and of the great state of Louisiana who are poor, who are elderly, or who live on fixed incomes have increasingly suffered from the ravages of inflation running at an annual rate of fourteen percent or higher and the unemployment rate reaching almost eight percent of the American work force.

"*Therefore, be it resolved by* the House of Representatives of the Legislature of Louisiana that the Louisiana House of Representatives does hereby express its support of the President's Program for Economic Recovery.

Be it further resolved by the House of Representatives of the Legislature of Louisiana that the Louisiana House of Representatives does hereby memorialize Congress to swiftly support the economic policies of the President's Program for Economic Recovery.

"*Be it further resolved* that a copy of this Resolution be sent to the President of the United States, to the Speaker of the House of Representatives of the United States Congress and to the President of the Senate of the United States Congress.

"*Be it further resolved* that a copy of the vote on the question of the adoption of this Resolution shall be attached to each copy of this Resolution transmitted as provided herein."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. ROBERT C. BYRD:

S. 1324. A bill to amend section 1751 of title 18, United States Code, to provide a mandatory life sentence for attempted assassination of the President; to the Committee on the Judiciary.

By Mr. CHILES (for himself, Mr. PRYOR, Mr. COHEN, Mr. BURDICK, Mr. GOLDWATER, Mr. DECONCINI, Mr. HOLLINGS, Mr. HUDDLESTON, Mrs. KASSEBAUM, Mr. LUGAR, Mr. METZENBAUM, Mr. PROXMIRE, Mr. SASSER, and Mr. STAFFORD):

S. 1325. A bill to reform the laws relating to former Presidents; to the Committee on Governmental Affairs.

By Mr. SASSER:

S. 1326. A bill to amend Title 38, United States Code, to authorize a service pension of up to $150 per month for veterans of World War I and for certain surviving spouses and dependent children of such veterans; to the Committee on Veterans Affairs.

By Mr. CHILES:

S. 1327. A bill to amend the Inspector General Act of 1978; to the Committee on Governmental Affairs.

By Mr. MOYNIHAN (for himself, Mr. D'AMATO, and Mr. WILLIAMS):

S. 1328. A bill to amend the Federal Water Pollution Control Act to delete the limitation on the use of public treatment works grants for treating, storing, or conveying the flow of industrial users into treatment works; to the Committee on Environment and Public Works.

By Mr. HAYAKAWA:

S. 1329. A bill for the relief of Samuel Joseph Edgar; to the Committee on the Judiciary.

S. 1330. A bill for the relief of Jose Garcia-Nunez and Maura Garcia-Nunez, his wife; to the Committee on the Judiciary.

S. 1331. A bill for the relief of Florence Louis Barry; to the Committee on the Judiciary.

By Mr. DIXON (for himself and Mr. PERCY):

S. 1332. A bill to amend the Internal Revenue Code of 1954 to make certain changes with respect to estate and gift taxes; to the Committee on Finance.

By Mr. BAUCUS (for himself and Mr. BRADLEY):

S. 1333. A bill to amend the Internal Revenue Code of 1954 to provide a capital cost recovery method which combines the investment credit with the depreciation deduction in a first-year allowance; to the Committee on Finance.

By Mr. BAUCUS:

S. 1334. A bill to amend the Internal Revenue Code of 1954 to allow expensing of $25,000 of depreciable assets, to eliminate the corporate tax on the first $100,000 of income paid as dividends by small business corporations, to allow an ordinary loss on certain preferred stock issued by small business corporations, to provide capital gains treatment for certain small business stock options, to make certain changes in the estate tax special use valuation rules, and for other purposes; to the Committee on Finance.

By Mr. SASSER:

S. 1335. A bill to designate certain lands in the Great Smoky Mountains National Park as wilderness; to the Committee on Energy and Natural Resources.

By Mr. QUAYLE:

S. 1336. A bill to provide for a series of regional presidential primary elections; to the Committee on Rules and Administration.

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 1337. A bill to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska; ordered held at the desk until the close of business Tuesday, June 9, 1981.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ROBERT C. BYRD:

S. 1324. A bill to amend section 1751 of title 18, United States Code, to provide a mandatory life sentence for attempted assassination of the President; to the Committee on the Judiciary.

(The remarks of Mr. ROBERT C. BYRD, when he introduced this legislation, appear earlier in today's RECORD.)

By Mr. CHILES (for himself, Mr. PRYOR, Mr. COHEN, Mr. BURDICK, Mr. GOLDWATER, Mr. DECONCINI, Mr. HOLLINGS, Mr. HUDDLESTON, Mrs. KASSEBAUM, Mr. LUGAR, Mr. METZENBAUM, Mr. PROXMIRE, Mr. SASSER, and Mr. STAFFORD):

S. 1325. A bill to reform the laws relating to former Presidents; to the Committee on Governmental Affairs.

FORMER PRESIDENTS FACILITIES AND SERVICES REFORM ACT OF 1981

● Mr. CHILES. Mr. President, today along with Senator PRYOR and other Senators, I am introducing the Former Presidents Facilities and Services Reform Act of 1981. The purpose of this bill is to place limits and restrictions on the services and allowances currently provided to former Presidents so that we can bring what has become a runaway area of Federal spending under control.

Last Congress, as chairman of the Appropriations Subcommittee which has jurisdiction over the support programs for former Presidents, I became alarmed by the proliferation of benefits and the continuing growth in the amount of taxpayer dollars spent to maintain our former Presidents. Together with Senator PRYOR, I chaired 3 days of oversight hearings on the problem, and heard testimony from the executive branch, the General Accounting Office, and experts in the private sector.

After the hearings, and after consulting with the administration, we, and 13 of our colleagues, introduced S. 2408 in the last Congress. After introduction, we were able to further refine and improve S. 2408 as a result of comments received and consultations with our former Presidents.

Congress adjourned last year before S. 2408 became law, but the need for bringing the costs of our former Presidents program under control remains as critical now as it was then. Last year marked the first time that the American taxpayer spent more money to support our former Presidents than we spent on the White House operation itself. And it is important to remember that former Presidents have no official duties or responsibilities.

Since 1955, the cost of former presidents to the taxpayer has grown from $65,000 a year to a projected sum of nearly $22 million this year. Had the price of gasoline gone up at the same rate, we would now be paying about $100 for a gallon of gas. A look through the record of hearings Senator PRYOR and I held will turn up examples of excesses in the program too numerous to detail here. An overview of the situation shows three major areas of growth: First, in the money spent to operate Presidential libraries; second, in office and staff allowances; and third, in the cost to provide Secret Service protection to former Presidents, their spouses or widows, and their minor children.

The bill we are introducing today will bring the growth and proliferation of costs in each of these areas under control and thereby reduce the burden the taxpayer must shoulder.

It keeps the current decentralized system of Presidential libraries in place, but it places a limit on the extent of the Government's obligation to maintain the libraries.

Currently, Presidential libraries are built with private funds but maintained and operated with public money.

In practice, the Government has no control over the size of the building it will be asked to maintain and operate forever. This bill sets a limit on the size of any Presidential library which is to be maintained with the taxpayer's dollars. The limit was set with a view toward allowing enough space for archival records and a modest museum, but not for an extravagent mausoleum.

The bill also sets a ceiling, which will

be reduced over time, on staff allowances for former Presidents. The use of office funds for partisan political activities, or for income generating activities, would be prohibited. A former President would be allowed to use Government funds to prepare his memoirs only if he were to agree to have the memoirs published by the Government Printing Office. The proceeds would be paid into the U.S. Treasury.

Finally, the bill modifies the current provisions of law dealing with Secret Service protection for former Presidents, their spouses and their families. It provides automatic Secret Service protection to each former President for the first 8 years he is out of office. After that time, however, protection would be limited to periods of actual threat. Protection for spouses and minor children would be allowed, but only to the extent that it is incidental to protection of former Presidents. It gives widows of former Presidents Secret Service protection, but only for the 6-month period after a former President has passed away.

Mr. President, the provisions of this bill, taken together, will insure that each former President is able to lead a dignified retired life; will be secure from threats of physical harm; and will have the assistance to respond to the many requests and inquiries received directly as a result of his tenure as President. The bill also insures, however, that the taxpayers' interests are served by placing controls on this area of Government spending.

Mr. President, I ask unanimous consent that the text of this bill, along with related information about the bill and the former Presidents program, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1325

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Former Presidents Facilities and Services Reform Act of 1981".

DEFINITIONS

SEC. 2. For purposes of this Act, the term "former President" means an individual—

(1) who has held the office of President of the United States of America;

(2) whose service in such office has terminated other than by removal pursuant to section 4 of article II of the Constitution of the United States of America; and

(3) who does not currently hold such office.

TITLE I—PRESIDENTIAL LIBRARIES

PRESIDENTIAL ARCHIVAL DEPOSITORIES

SEC. 101. (a) The first paragraph of section 2101 of title 44, United States Code, is amended by inserting before the semicolon a comma and "and may include research facilities and museum facilities in accordance with this chapter".

(b) Section 2108(a) of such title is amended to read as follows:

"(a)(1) When the Administrator of General Services considers it to be in the public interest he may, in accordance with the provisions of this subsection, accept for and in the name of the United States, land, buildings, and equipment offered as a gift to the United States for the purpose of creating a Presidential archival depository, take title to the land, buildings, and equipment on behalf of the United States, and maintain, operate, and protect them as a Presidential archival depository and as a part of the national archives system.

"(2) The Administrator, in consultation with the Archivist of the United States and Commissioner of the Public Buildings Service, shall promulgate achitectural and design standards applicable to Presidential archival depositories in order to ensure that such depositories (A) preserve Presidential records subject to chapter 22 of this title and papers and other historical materials accepted for deposit under section 2107 of this title and (B) contain adequate research facilities.

"(3) The Administrator shall accept and take title to only such land, buildings, and equipment under paragraph (1) as are necessary to establish, for each President or former President, a single Presidential archival depository in one building not in excess of 40,000 square feet in one geographic location, including museum space.

"(4) The Administrator may make agreements, in accordance with the provisions of this paragraph and paragraph (5) and upon such other terms and conditions he considers proper, with a State, political subdivision, university, institution of higher learning, institute, or foundation to use as a Presidential archival depository land, buildings, and equipment of the State, subdivision, university, or other organization, to be made available by it without transfer of title to the United States. Any such agreement shall provide that any such Presidential archival depository shall, for each President or former President, be one building not in excess of 40,000 square feet in one geographic location, including museum space.

"(5)(A) Prior to accepting and taking title of any land, buildings, and equipment under paragraph (1), and prior to entering into any agreement under paragraph (4) or any other agreement to accept or establish a Presidential archival depository, the Administrator shall submit a prospectus for the proposed Presidential archival depository to the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House of Representatives. The prospectus shall include—

"(i) a description of the land, buildings, and equipment offered as a gift or to be made available without transfer of title;

"(ii) a statement of the terms of the proposed agreement, if any;

"(iii) a general description of the types of records, papers, documents, or other historical materials proposed to be deposited in the Presidential archival depository so to be created, and of the terms of the proposed deposit;

"(iv) a statement of the additional improvements and equipment, if any, necessary to the satisfactory operation of the depository, together with an estimate of the cost; and

"(v) an estimate of the annual cost to the United States of maintaining, operating, and protecting the depository.

"(B) Except as provided in subparagraph (C), the Administrator may take title to land, buildings, and equipment under paragraph (1) or enter into an agreement under paragraph (4) or any other agreement to accept or establish a Presidential archival depository unless, within 60 days of continuous session of Congress after the date on which a prospectus is submitted under subparagraph (A), both committees referred to in such subparagraph adopt a resolution stating that the committee disapproves the prospectus submitted under such subparagraph for the Presidential archival depository to be established with such land, buildings, and equipment or pursuant to such agreement.

"(C) If a Presidential archival depository to be accepted or established with land, buildings, and equipment under paragraph (1) or pursuant to an agreement under paragraph (4) or any other agreement to accept or establish a Presidential archival depository has not been disapproved under subparagraph (B) and does not comply with the architectural and design standards promulgated pursuant to paragraph (2), the Administrator may not accept or take title to such land, buildings, and equipment and may not enter into any such agreement unless a concurrent resolution of the Congress is adopted which approves the acceptance or establishment of such depository.

"(6) No physical or material changes in or additions to a Presidential archival depository may be made unless—

"(A) the Presidential archival depository, after any such change or addition, complies with the architectural and design standards established pursuant to paragraph (2), except that any change or addition which will cause a Presidential archival depository not to comply with such standards may be made if—

"(i) such change or addition has not been disapproved under subparagraph (C); and

"(ii) a concurrent resolution of the Congress approving such change or addition is adopted;

"(B) the Presidential archival depository, after any such change or addition, is one building not in excess of 40,000 square feet in one geographic location, including museum space; and

"(C) the Administrator submits a prospectus for any such change or addition and, within sixty days of continuous session of Congress after the date on which the prospectus is submitted, both committees of Congress referred to in subparagraph (A) of paragraph (5) have not adopted resolutions disapproving such change or addition.

"(7) For the purpose of this subsection—

"(A) continuity of session is broken only by an adjournment of Congress sine die; and

"(B) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of any period of time in which Congress is in continuous session.

"(8)(A) The Administrator may provide technical assistance to any private organization or institution establishing a museum or memorial for a President or former President and may provide such institution with microfilm copies of historically significant Presidential and personal records contained in a Presidential archival depository.

"(B) For purposes of this paragraph—

"(i) the term 'Presidential records' has the same meaning as in section 2201(2) of this title; and

"(ii) the term 'personal records' has the same meaning as in section 2201(3) of this title.".

DISPOSAL OF PRESIDENTIAL RECORDS

SEC. 102. Section 2203(c) of title 44, United States Code, is amended to read as follows:

"(c) During his term of office, the President shall substantially complete the disposal of his Presidential records which no longer have administrative, historical, informational or evidentiary value. Prior to disposing of any such records, the President shall obtain the written views of the Archivist concerning the proposed disposal of such Presidential records and may not dispose of any records with respect to which the Archivist notifies the President that he intends to take action under subsection (e).".

EFFECTIVE DATE

SEC. 103. The amendments made by this title shall take effect on January 20, 1983.

TITLE II—FORMER PRESIDENTS

SPOUSAL PENSIONS

SEC. 201. Subsection (e) of the first section of the Act entitled "An Act to provide

retirement, clerical assistants, and free mailing privileges to former Presidents of the United States, and for other purposes", approved August 25, 1958 (72 Stat. 838; 3 U.S.C. 102 note) is amended to read as follows:

"(e) The spouse of a deceased former President shall be entitled to receive from the United States a monetary allowance at a rate per annum, payable monthly by the Secretary of the Treasury, which is equal to two-thirds of the rate which is payable under subsection (a) to a former President. The monetary allowance of such spouse—

"(1) commences on the day after the former President dies;

"(2) terminates on the last day of the month before such spouse—

"(A) dies; or

"(B) remarries before becoming sixty years of age; and

"(3) is not payable for any period during which such spouse holds an appointive or elective office or position in or under the Federal Government or the government of the District of Columbia to which is attached a rate of pay other than a nominal rate.".

OFFICE AND STAFF FOR FORMER PRESIDENTS

SEC. 202. (a) Subsections (b) and (c) of the first section of the Act entitled "An Act to provide retirement, clerical assistants, and free mailing privileges to former Presidents of the United States, and for other purposes", approved August 25, 1958 (72 Stat. 838; 3 U.S.C. 102 note) are amended to read as follows:

"(b)(1) The Administrator of General Services (hereinafter referred to as the 'Administrator') is authorized to provide to each former President, upon request, necessary services and facilities, including—

"(A) one suitable office, not to exceed four thousand square feet in area, appropriately equipped with furniture, furnishings, office machines and equipment, and office supplies, as determined by the Administrator, after consultation with the former President or his designee provided for in subsection (c), at such place within the United States as the former President shall designate;

"(B) payment of the compensation of members of an office staff designated by the former President at rates determined by the former President which are not in excess of the rate provided for level II of the Executive Schedule under section 5313 of title 5, United States Code, except that notwithstanding any other provision of law, persons receiving compensation as members of an office staff of a former President under this subsection shall not be considered to be employees of the Federal Government except for purposes of chapters 81, 83, 87, and 89 of title 5, United States Code;

"(C) payment of travel expenses and subsistence allowances, including rental of Government or hired motor vehicles, found necessary by the former President, as authorized for persons employed intermittently or for persons serving without compensation under section 5703 of such title;

"(D) communications services found necessary by the former President; and

"(E) except as provided in subsection (f) and notwithstanding the provisions of section 501 of title 44, United States Code, payment of expenses for necessary printing and binding.

"(2) Any Federal employee may be detailed to the office staff of a former President on a reimbursable basis with the consent of the head of the agency involved. An employee detailed to the office of a former President shall be responsible only to the former President for the performance of his duties during the period of such detail. An employee detailed under this subsection is deemed, for the purpose of preserving his allowances, privileges, rights, seniority, and other benefits, an employee of the agency from which detailed, and he is entitled to pay, allowances, and benefits from funds available to that agency. The authorization and payment of such allowances and other benefits from appropriations available therefor is deemed to comply with section 5536 of title 5, United States Code.

"(c) Each former President may designate to the Administrator an assistant authorized to make on his behalf such designations or findings of necessity as may be required in connection with the services and facilities to be provided under subsection (b).".

(b)(1) Subsection (f) of such section is redesignated as subsection (k).

(2) Such section is amended by inserting immediately before subsection (k) the following new subsections:

"(f) Funds provided for necessary services and facilities for a former President under this Act shall be used for activities which are the direct result of such former President having held the office of President. Such funds may not be used for partisan political activities or income generating activities, except that a former President may use such funds for the preparation of his memoirs if the former President signs an agreement with the Administrator of General Services which provides that such memoirs will only be printed and distributed by the Public Printer in accordance with section 1345 of title 44, United States Code.

"(g)(1) The Administrator is authorized to provide necessary services and facilities to a former Vice President for use in connection with winding up the affairs of his office. Such services and facilities shall be of the same general character as the services and facilities provided to a former President under subsection (b). Each former Vice President shall be entitled to conveyance within the United States and its territories and possessions of all mail matter, including airmail, sent by him under his written autograph signature in connection with his prepartions for winding up of his official duties as Vice President.

"(2) No funds for necessary services and facilities provided to a former Vice President under this Act shall be used for partisan political activities or income generating activities.

"(h) The Administrator shall expend no funds for the provision of services and facilities under this Act with respect to a former President at any time beyond ninety days after the date on which such former President dies.

"(i) By March 1 of each year, each former President shall prepare and transmit to the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives, and the Committees on Appropriations of the Senate and the House of Representatives a report concerning activities carried out with the assistance of the funds for necessary services and facilities provided under this Act.

"(j)(1) To carry out the provisions of subsections (b) and (g), there are authorized to be appropriated with respect to a former President and former Vice President a total of $750,000 for the fiscal year in which the term of a former President expires, except that no funds appropriated pursuant to this clause shall be available for expenditure until the day on which such term expires.

"(2) Except as provided in paragraphs (3) and (4), to carry out the provisions of subsection (b) (except the provisions of paragraph (1)(A) of such subsection) with respect to each former President, there are authorized to be appropriated to the Administrator of General Services—

"(A) $300,000 for each of the first four fiscal years beginning after the fiscal year in which the term of a former President expired;

"(B) $250,000 for the fifth and each of the three succeeding fiscal years beginning after the fiscal year in which the term of a former President expired; and

"(C) $200,000 for the ninth and each of the succeeding fiscal years beginning after the fiscal year in which the term of a former President expired.

"(3) Except as provided in paragraph (4), to carry out the provisions of subsection (b) (except the provisions of paragraph (1)(A) of such subsection) with respect to any individual who is a former President on the date of enactment of this subsection, there are authorized to be appropriated to the Administrator of General Services—

"(A) $300,000 for each of the four fiscal years beginning after the fiscal year in which this subsection is enacted;

"(B) $250,000 for the fifth and each of the three succeeding fiscal years beginning after the fiscal year in which this subsection is enacted; and

"(C) $200,000 for the ninth and each succeeding fiscal year beginning after the fiscal year in which this subsection is enacted.

"(4) To carry out the provisions of subsection (b)(1)(A) for each former President with respect to the payment of charges for furnished services, space, quarters, maintenance, repairs, or other facilities made by the Administrator of General Services in accordance with section 210(j) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(j)), there are authorized to be appropriated to the Administrator of General Services such sums as may be necessary for fiscal year 1982 and each succeeding fiscal year.

"(5) The provisions of paragraphs (2) and (3) shall lapse ten years after the date of enactment of this paragraph.".

(c) Section 4 of the Presidential Transition Act of 1963 (3 U.S.C. 102 note) is repealed.

(d) Section 5 of such Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 5. There are hereby authorized to be appropriated to the Administrator such funds as may be necessary for carrying out the purposes of this Act, except that with respect to any one Presidential transition not more than $2,000,000 may be appropriated for the purposes of providing services and facilities to the President-elect and Vice President-elect under section 3. The President shall include in the budget transmitted to Congress, for each fiscal year in which his regular term of office will expire, a proposed appropriation for carrying out the purposes of this Act.".

PUBLICATION OF PRESIDENTIAL MEMOIRS

SEC. 203. (a) Chapter 13 of title 44, United States Code, is amended by adding at the end thereof the following new section:

"§ 1345. Presidential memoirs

"The Public Printer shall cause to be printed as many copies of the memoirs of a former President who has entered into an agreement with the Administrator of General Services under subsection (f) of the first section of the Act of August 25, 1958 (72 Stat. 838) as may be necessary for the distribution and sale of such memoirs. Such memoirs shall be distributed and sold by the Superintendent of Documents in accordance with chapter 17 of this title.".

(b) The table of sections for such chapter is amended by adding at the end thereof the following:

"1345. Presidential memoirs.".

TITLE III—PROTECTION OF FORMER PRESIDENTS, FORMER VICE PRESIDENTS, AND THEIR FAMILIES

SECRET SERVICE PROTECTION AUTHORIZED

SEC. 301. Section 3056 of title 18, United States Code, is amended by striking out beginning with "protect the person of a former President" through "declined" and inserting in lieu thereof "Protect the person of a former President and the person of the spouse,

widow, widower, or minor children of a former President in accordance with sections 302 and 303 of the Former Presidents Facilities and Services Reform Act of 1980; protect the person of a former Vice President in accordance with section 304 of such Act;".

PROTECTION PERIOD

SEC. 302. (a) On or after the effective date of this title, no Secret Service protection shall be provided to a former President or to the spouse, widow, widower, or minor child of any such former President, unless such protection is authorized by subsection (b) or is extended or reinstated by the Secretary of the Treasury in accordance with section 303.

(b) The Secret Service is authorized to protect the person of a former President after the effective date of this title for a period of eight years beginning on the effective date of this title or the date on which such individual becomes a former President, whichever is later, and for such additional periods as the Treasury may authorize under section 303. The Secret Service is authorized to protect the person of the spouse or minor child of any former President after the effective date of this title to the extent that such protection is incidental to the protection of such former President or if such protection is authorized by the Secretary of the Treasury under section 303. The Secret Service is authorized to protect the person of any individual who becomes a widow or widower of a former President after the effective date of this title for a period of six months after the date on which such former President dies and for such additional periods as the Secretary of the Treasury may authorize under section 303.

AUTHORIZATION OF ADDITIONAL PROTECTION

SEC. 303. (a)(1) After the expiration or termination of Secret Service protection to a former President or the spouse or minor child of a former President, and after a period of time has passed since the expiration or termination of such protection, the Secretary of the Treasury may authorize the reinstatement of such protection—

(A) in the case of a former President, for one one-year period; and

(B) in the case of the spouse or minor child of a former President, for one six-month period,

upon a finding that a serious threat warranting such protection exists to the individual.

(2) The Secretary may extend Secret Service protection reinstated under paragraph (1) or provided under section 3056 of title 18, United States Code, prior to the effective date of this title or under section 302 after the effective date of this title—

(A) in the case of a former President, for additional consecutive one-year periods; and

(B) in the case of a spouse or minor child of a former President, for additional consecutive six-month periods,

upon the written request of the individual desiring such protection and upon the approval of the advisory committee established by the first section of the joint resolution entitled "A joint resolution to authorize the United States Secret Service to furnish protection to major Presidential or Vice Presidential candidates" approved June 6, 1968 (82 Stat. 170; 18 U.S.C. 3056 note).

(b) The Secretary of the Treasury shall submit any request for the extension of Secret Service protection under subsection (a)(2) to the advisory committee referred to in such subsection. The advisory committee shall review all such requests with the assistance of the Advisory Panel on Secret Service Protection established under subsection (c) and shall transmit to the Secretary of the Treasury its decisions regarding the extension of Secret Service protection.

(c)(1) There is established the Advisory Panel on Secret Service Protection, which shall consist of nine members, appointed by the Comptroller General of the United States. The Comptroller General shall appoint to the Advisory Panel—

(A) three officers or employees of the Federal Government having expertise in law enforcement activities, except officers or employees of the United States Secret Service;

(B) three individuals who are prominent leaders in State and local law enforcement; and

(C) three prominent citizens.

(2) Each member of the Advisory Panel shall serve for a six-year term, except that the terms of the members first appointed shall expire, as determined by the Comptroller General at the time of appointment, three at the end of one year, three at the end of two years, and three at the end of three years.

(3) Five members of the Advisory Panel shall constitute a quorum. A vacancy in the Advisory Panel shall not affect its authority.

(4) The Advisory Panel shall review requests for Secret Service protection received under this section and shall make recommendations to the advisory committee referred to in subsection (a) as to whether such requests should be granted.

(5) Each member of the Advisory Panel who is not otherwise employed by the United States Government shall receive compensation at a rate equal to the daily rate prescribed for GS-18 under the General Schedule under section 5332 of title 5, United States Code, for each day, including traveltime, such member is engaged in the actual performance of duties as a member of the Advisory Panel. A member of the Advisory Panel who is an officer or employee of the United States Government shall serve without additional compensation. All members of the Advisory Panel shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

PROTECTION FOR FORMER VICE PRESIDENTS

SEC. 304. (a) The Secret Service is authorized to protect the person of a former Vice President if such protection is authorized by the Secretary of the Treasury in accordance with subsection (b).

(b) The Secretary of the Treasury may authorize the provision of Secret Service protection to a former Vice President upon the written request of such former Vice President and upon a finding that a serious threat warranting such protection exists to such former Vice President. The Secretary of the Treasury may authorize the provision of such protection for a period beginning on the date on which the Vice Presidential term of such former Vice President expired and ending on the last day of the fiscal year in which such term expired.

EFFECTIVE DATE

SEC. 305. This title shall take effect on October 1, 1982, except that after the date of enactment the Comptroller General of the United States may appoint the Advisory Panel on Secret Service Protection established under section 303(c).●

SECTION-BY-SECTION ANALYSIS—FORMER PRESIDENT'S FACILITIES AND SERVICES REFORM ACT OF 1981

DEFINITIONS

Section 2 defines "Former President" and adopts the definitions of "Presidential records" and "personal records" found in the Presidential Records Act of 1978 (44 U.S.C. 2201).

TITLE I—PRESIDENTIAL LIBRARIES

PRESIDENTIAL ARCHIVAL DEPOSITORIES

Section 101. This section authorizes the Administration of GSA to accept responsibility for the maintenance of a Presidential archival depository (library) by taking title to the land and the building. The library must be a single building, and its size may not exceed 40,000 square feet, including museum space. Otherwise, the Administrator is prohibited from taking title. Before accepting title, an Administrator of GSA must also submit to the relevant Congressional committees a prospectus which includes, among other things, an estimate of the annual cost to the government to maintain the library. A library whose prospectus does not conform to the space or location limitations, or to the other building standards for Presidential libraries, may not be accepted by the Administration unless Congress approves a concurrent resolution allowing him to do so. This section also provides that any material additions or modifications to an already established Presidential library be subject to the same approval procedures.

DISPOSAL OF PRESIDENTIAL RECORDS

Section 102. Section 102 requires each President during his time of office to substantially complete the disposal of his Presidential records which no longer have administrative, historical, informational, or evidentiary value. The disposal of these materials shall be made under the same safeguards that currently exist in the Presidential Records Act of 1978.

COVERAGE

Section 103. Title I of the bill shall take effect on January 21, 1985, but shall cover Presidential records for which the Federal Government has title.

TITLE II—FORMER PRESIDENTS

SPOUSAL PENSIONS

Section 201. Section 201 establishes the pension of a widow of a former President at a rate which is equal to two-thirds of the rate which a former President would receive. This section effectively increases the widows' pension from the current amount of $20,000 to approximately $46,000.

OFFICE AND STAFF FOR FORMER PRESIDENTS

Section 202. A staff allowance of $300,000 a year is provided, to be reduced over time to a ceiling of $200,000. The Section provides that each former President would be entitled to one office, not to exceed 4,000 square feet in size, with space charges and pensions excluded from the ceiling.

The use of funds for partisan political activities and for income-generating activities is prohibited. The funds could be used for the preparation of memoirs provided that the receipts from the sale of such memoirs are paid into the Treasury.

The Section also requires each former President to submit a report each year by March 1, on his activities in the preceding year and authorizes $750,000 for transition expenses of a former President and former Vice President.

Finally, this section contains a "sunset" provision which automatically terminates the authorization for staff allowances for former Presidents. It would enable Congress, after ten years, to redetermine what the proper authorization levels should be.

PUBLICATION OF PRESIDENTIAL MEMOIRS

Section 203. In those cases when a former President chooses to use his office allowance for the preparation of memoirs, they will be printed by the Government Printing Office and distributed and sold by the Superintendent of Documents.

TITLE III—PROTECTION OF FORMER PRESIDENTS, FORMER VICE PRESIDENTS, AND THEIR FAMILIES

SECRET SERVICE PROTECTION AUTHORIZED

Section 301. Section 301 amends Title 18 U.S.C. 3056 to make the protection provisions conform with this legislation.

PROTECTION

Section 302. The Secret Service will be authorized to protect a former President for

8 years and protect the spouse of a former President for the same period of time to the extent the protection of the spouse is incidental to the protection of such former President.

The Secret Service is also authorized to protect the spouse of a former President who has died after leaving office, but only for the six months following the former President's death.

AUTHORIZATION OF ADDITIONAL PROTECTION

Section 303. After the expiration or termination of Secret Service protection for a former President, such protection may be reinstated for a single one year period upon a determination that a serious threat to the former President exists. Additional extensions of Secret Service protection may be authorized, but only for 6 month periods, and only upon the recommendation of a special Advisory Committee. The Advisory Committee consists of public and private sector representatives, including federal officials with law enforcement experience.

PROTECTION FOR A FORMER VICE PRESIDENT

Section 304. Secret Service will be authorized to protect a former Vice President only during the transition period if and only if the former Vice President makes a written request for such protection and the Secretary of the Treasury makes a finding that a serious threat exists that would warrant such protection.

EFFECTIVE DATE

Section 305. Section 305 establishes an effective date of October 1, 1982, for Title III.

PRESIDENTS EMERITUS

(By John Whiteclay Chambers II)

What should be done with ex-Presidents? William Howard Taft once remarked that perhaps the best way to handle a former President was to chloroform and ceremonially cremate him when he left office, in order to "fix his place in history and enable the public to pass on to new men and new measures." Taft did not insist on this ritual for himself, however, accepting instead a professorship at the Yale Law School when he finished his presidential term, and later serving as Chief Justice of the U.S. Supreme Court. These occupations were dignified and moderately remunerative. Taft thus chose a course of ex-presidential behavior midway between that of Jefferson, for example, who retired to his plantation and died heavily in debt, and Richard Nixon and Gerald Ford, both of whom hired theatrical agents, signed a number of exclusive contracts, and began earning millions of dollars for television and publishing commitments.

The evolution of the ex-Presidency has been, until recently, rather haphazard. For most of its history the nation has left the former Presidents to fend for themselves and to work out their own post-Executive careers. But in the last thirty years, the quasi-public "Office of the Ex-President" has emerged with quite well-defined perquisites, and some of the trappings of power.

Yet despite the growth of the office and of the sums of public funds spent on his maintenance, a former Chief Executive is under virtually no obligation to do, or not to do, anything at all. Until the last few years—since the ex-Presidency of Richard Nixon—no federal rules or guidelines existed to direct or restrict him.

As in almost everything else, George Washington set precedents as the first presidential retiree. Perhaps the most important decision ever made concerning an ex-President was Washington's decision to become one. Conceivably, he might have stayed in office until he died, establishing a far different tradition than the voluntary relinquishing of power.

Returning to his plantation, Washington tried not to interfere unduly with his successor, John Adams. The old hero retained enormous popularity, however, and when the nation faced the possibility of war with France in 1798, Adams found himself forced into appointing Washington as Commander-in-Chief of the Armies, a title constitutionally reserved for the President. Adams' successor, Jefferson, did not have to confront such a powerful figure. Washington died in 1799, and the unpopular Adams became the first ex-presidential "exile," banished into political inactivity.

Although a number of former Chief Executives in the ensuing century and a half remained important figures in their parties, not many achieved new elective office. Only Cleveland proved able to recapture the Presidency after a hiatus, a testimony to his ability to unite the Democratic party. The others who tried—Van Buren, Fillmore, and Theodore Roosevelt—failed at the head of so-called third parties. Three former Presidents won re-election to lesser offices—John Quincy Adams to the House of Representatives, John Tyler to the Confederate Congress, and the impeached Andrew Johnson to the U.S. Senate. They showed that a President who lost his national majority could sometimes retain a power base in his home constituency.

More common, especially in the twentieth century, has been the use of former Chief Executives in nonpartisan public service. Cleveland accepted an offer from Theodore Roosevelt to head a study commission during the coal strike of 1902. Taft co-chaired the War Labor Board in 1918 and later, as noted, became Chief Justice of the Supreme Court of the United States. Hoover headed a committee on relief of famine in Europe after World War II, and in 1947 was appointed by Truman to lead a commission to study the executive branch of the government.

Ex-Presidents also had to maintain themselves and their families economically, and until 1958 there was no government pension for them. They pursued a variety of post-White House careers, but a consensus soon developed that these should be consistent with maintaining the dignity of the Presidency. Neither the public nor most ex-Presidents have wanted to see former heads of state become hucksters or financial speculators, and genteel poverty plagued many former Chief Executives. Except for Washington, who was a good businessman, most of the Presidents of the Virginia dynasty who retired to their plantations soon discovered they were deeply in debt. Madison and Monroe, like their friend Jefferson, died virtually penniless.

To help avoid this specter, Congress doubled the President's salary in 1873 to $50,000. At the same time, legislators recognized the old tension between dignity and earning potential, for they justified the increase so that "the President could save enough money to retire [after leaving office] from all active or at least from all money-making pursuits."

The incumbent, Ulysses S. Grant, paid little heed to this, however, and the disaster that befell him probably reinforced the belief that ex-Presidents should avoid direct involvement in the commercial marketplace. Grant and his son joined a Wall Street investment banking house with an unscrupulous speculator who swindled the gullible hero out of his money and his reputation. When Grant & Ward went bankrupt in 1884, the savings of thousands of people were destroyed. Nevertheless, the penniless old soldier went on to become the first ex-President to make money out of his memoirs, which he finished only three days before he died of cancer. They earned his family nearly $450,000.

The ex-Presidents who followed Grant saved money from their salary, which was raised to $75,000 in 1909, and while avoiding positions in business, they did supplement their incomes through the practice of law. Benjamin Harrison argued cases before a Supreme Court partially filled with his own appointees. Cleveland declined to appear in court, but wrote briefs and served as a court-appointed arbiter. Accepting a law professorship at Yale, Taft described it as "a dignified retirement . . . and one which would approve itself to the general propriety of the country."

In 1912 steel magnate Andrew Carnegie, a man who dabbled in both politics and pension programs, tried to provide pensions for ex-Presidents. To embarrass Congress into giving a regular allowance to future ex-Presidents and their widows, Carnegie offered them pensions of $25,000 a year until the government provided for them. The public, however, seemed to disapprove of a millionaire paying former heads of state, and Taft rejected the offer.

Perhaps the principle of avoiding exploitation of the private earning ability of ex-Presidents was most pithily stated by the taciturn New Englander, Calvin Coolidge. Turning down several lucrative business offers, he asserted that "these people are trying to hire not Calvin Coolidge, but a former president of the United States. I cannot do anything that might take away from the presidency any of its dignity, or any of the faith the people have in it." Later, Truman and Eisenhower quoted Coolidge's remarks as a guideline for ex-Presidents. Meanwhile, Hoover had no difficulty in maintaining dignity, which was natural to him, or a high income, which came from an engineering and mining fortune he had established before entering public service.

Harry Truman, on the other hand, was never really a wealthy man. Since he rejected half a dozen corporate offers when he left office in 1953, his income stemmed primarily from the sale of his father's farm, the publication of his memoirs, and his appearance in 1958 on Edward R. Murrow's "See It Now" program. This was the first television portrait of a former President speaking informally and at length before a vast audience, and Truman received a substantial fee, although this was not publicized at the time.

When the Democrats returned to power in the 1960's, they honored Truman as an elder statesman. Kennedy held a White House dinner for him; Johnson sent him to Greece to represent the United States at the funeral of King Paul. When Truman died in 1972, his peppery forthrightness was being hailed in a reaction against presidential manipulation and deceit.

Eisenhower, too, fared well as an ex-President. The income from the sale of his wartime and presidential recollections and the subtantial fees for his television memoirs in 1961 and 1964 enabled him to live comfortably on his Gettysburg farm. Despite the turmoil at the end of his term, Eisenhower remained extremely popular. He cultivated the image of a kindly grandfather dispensing advice to his posterity. Congressional committees solicited his testimony, and Democratic Presidents sought his support for their foreign policy.

But despite Ike's paternal image, many noticed an anomaly. The man who had seemed almost apolitical in the White House appeared a vigorous partisan in retirement. Within four months after leaving Washington, he opened an attack upon the Democrats' domestic policies which he maintained until he died in 1969.

With Hoover, Truman, and Eisenhower, the shared prestige of living ex-Presidents may have reached a kind of zenith. The three sat bare-headed together at Kennedy's funeral, a powerful image of solidarity and continuity at a time when the nation felt the need for reassurance. But public support for ex-Presidents sank to the nadir in the early 1970's. Both Lyndon Johnson and Rich-

ard Nixon were forced into political retirement and seclusion.

Deeply embittered by what he considered a misunderstanding of his policies, Johnson returned to Texas and immersed himself in ensuring his memorials. All bore his brand: the LBJ Ranch, the Johnson Birthplace and Homestead; the Johnson School of Public Affairs, and the Johnson Presidential Library at the University of Texas. Money posed no problem for the richest ex-President in American history. With ranches, banks, radio and television stations, and a sizable trust fund, he and his wife controlled a fortune estimated at between $15,000,000 and $20,000,000. Furthermore, Johnson received around $1,000,000 for his memoirs and $300,000 for exclusive contractual rights to television interviews. Even though he turned the proceeds over to the Johnson Library and School of Public Affairs, his television deal raised public questions, for the first time, about the propriety of an ex-President granting such a media monopoly.

In August, 1974, Richard Nixon fled the White House under threat of impeachment. Sick, depressed, and near financial ruin, he later recalled that his life then became nearly a "life without purpose," an "almost unbearable" existence. Gradually, however, he began to recover physically, emotionally, and financially. In a surprise visit to Communist China, he was feted as a visiting dignitary. In 1978 he went to England and France and was treated with some respect. Nevertheless, although he wished to remain active within the GOP, Republican leaders believed that his actions and the controversial pardon by President Ford had hurt the party. Nixon's search for a useful purpose thus proved unavailing, but he did find economic security. During the first three years of his retirement, he augmented nearly $800,000 in federal funds with more than $1,000,000 from exclusive television interviews with David Frost.

As an ex-President, Gerald Ford has maintained an active life of speech making and politicking, remaining one of the major spokesmen of the Republican party. He is also on his way to becoming a multimillionaire. In addition to the hundreds of thousands of dollars in federal funds he and his staff receive, Ford personally will earn nearly $500,000 a year during the first five years of his ex-Presidency from lucrative part-time commitments, and from fulfillment of his network contract for television appearances, including commentary on current events. Ford's rapid rise to affluence as an ex-President has led to significant questioning of what one journalist called the "huckstering and hustling and merchandising of the presidency." "I have to earn a living," Ford explained in a TV interview.

The most significant development in the last three decades, however, has not been the activities of the former Presidents, but rather the rapid emergence of the ex-Presidency as a form of public office. This has not been a result of any coherent, deliberate policy; developments have often been fortuitously related to other events. Nevertheless, more codification has occurred in the last 30 years than in the first 150 years of the Republic.

One of the most important aspects of the office concerned the extension of the doctrine of executive privilege to ex-Presidents. In 1953 Harry Truman, even though at that time a private citizen, successfully resisted a subpoena from the House Un-American Activities Committee, which wanted him to provide information about the promotion of an alleged Communist in government. Truman claimed he could not be forced to testify about his actions in an office which had been protected by executive privilege and separation of powers. Although constitutional authorities differed, public sympathy for Truman's claim of Republican harassment led the committee to drop the matter.

Citing this precedent nearly twenty-five years later in 1977, Richard Nixon refused to testify before a House subcommittee investigating earlier negotiations with North Vietnam. When Nixon eventually agreed to talk informally on the phone with a few selected committee members, a confrontation was avoided. However, the two cases suggest *de facto* recognition that ex-Presidents continue to maintain some aspects of the executive power.

The first federal appropriations regarding the ex-Presidency came in 1955 with the congressional decision to maintain presidential libraries and museums. Franklin D. Roosevelt had begun the practice of deeding his presidential papers to the public and placing them in a special depository, but he did not live to see the Roosevelt Library open at Hyde Park, New York, in 1948. Encouraged by those planning the Truman and Eisenhower libraries, Congress recognized the new practice. In the Presidential Libraries Act of 1955 it authorized federal funds for staffing and maintaining these institutions, which were built with privately raised contributions, and which, incidentally, each included a replica of the Oval Office where a former Chief Executive could spend his last working years, like a living Cheops in his pyramid.

Still, there was no presidential pension. One was enacted as part of the congressional pension program in 1942, but the whole program was quickly repealed in the wake of a vehement public outcry against congressional avarice during a period of wartime sacrifice. After the war, Congress enacted its own pension program, but the presidential pension was not adopted for another dozen years. Instead the legislature increased the presidential salary to $100,000 in 1949. Recently it has been increased to $250,000.

In considering the proposal for a stipend for ex-Presidents in 1957, Congress addressed the old dilemna between earning potential and the need to maintain decorum. As a Senate committee asserted in recommending federal funding. "We expect a former President to engage in no business or occupation which would demean the office he has held or capitalize upon it in any improper way. There are many ways in which a former President can earn a large income, but ought not to."

With the Former Presidents Act of 1958, Congress essentially established an office of the ex-President. It declared that each former Chief Executive was entitled to receive "a monetary allowance" of $25,000 a year. (Since this represented a kind of salary rather than a contributory pension, the Internal Revenue Service later determined that it was taxable, like the President's salary.)

Congress also authorized a staff to assist the ex-President. The former Chief Executive could select, without regard to the Civil Service and classification laws, assistants and secretaries who would then become federal employees. They would be responsible solely to him in the performance of their duties. The staff allowance paid by the government was not to exceed that of the senator from the least populous state, which in 1958 meant $50,000 a year. The ex-President also received office space, furnishings, and equipment at a place in the United States determined by him. He was also given free mailing privileges. Like the comparable allowances for a President in office, these allowances for the ex-President were considered by Internal Revenue to be tax free.

Finally, Congress provided a pension of $10,000 a year for presidential widows. Previously they had been given federal assistance only upon petition, and then by special acts of Congress.

The Former Presidents Act stemmed most immediately from the plight of Harry Truman. He found his resources drained by the $30,000 he said it cost him each year just to answer his mail and fulfill requests for speeches and public appearances. He had to have federal assistance, he told House Speaker Sam Rayburn, in order "to keep ahead of the hounds."

Seeking passage of the bill, congressional leaders emphasized that a Chief Executive remained an important public figure for the rest of his life. "The American people," declared Senate Majority Leader Lyndon Johnson, "still look to an ex-President for advice, for counsel, and for inspiration in their moments of trial."

Nevertheless, dissatisfied Republicans in the House delayed action for two years. Publicly they warned that the bill gave ex-Presidents official standing and that in the future they might use the governmental services to mount a campaign for public office at the taxpayers' expense. Privately they complained that they were being asked to subsidize Truman's attacks upon their party. Overwhelming support for the bill, however, came from the mass media and from the public, and it became law in 1958.

Since then the ex-presidential allowances have been increased to counter the erosion of inflation. In 1970 Congress adopted an escalator clause, making the stipend for former Presidents equal to the annual salary of Cabinet officers, an amount that rose from $60,000 in 1970 to $66,000 in 1976.

Former Presidents also have obtained the prerogative of addressing the U.S. Senate, a modification of the proposal championed by Harry Truman to make them lifetime, nonvoting members of the Upper Chamber. This was not a new idea. President Hayes had rejected it, declaring that representation in the Senate was already inequitable. President Taft said there was already too much discussion in the Senate. Hoping to encourage Franklin D. Roosevelt not to run for re-election, Thomas E. Dewey revived the idea during World War II, but had no luck.

In the postwar era, Congress considered several such bills, but failed to adopt any. Yet, in deference to Truman's wishes, the Senate modified its rules in 1963 to give former Chief Executives the right to use it as a forum whenever they wished. The following year, on his eightieth birthday, Truman became the first ex-President to address the Senate in formal session.

Several other measures in the 1960's added to the perquisites and privileges of the ex-Presidency. The Presidential Transition Act of 1963 substituted federal for private funds to cover the cost of changing administrations. Although the incoming President received the bulk of the money, the outgoing Executive was allotted $300,000 during the six months after he left the Presidency. In 1976 this was raised to $1,000,000.

With the expansion of security measures after President Kennedy's assassination, Congress provided Secret Service agents to protect former Presidents and their families.

President Johnson's own flamboyant style led him to put Air Force jets and helicopters, complete with crews and stewards, at the disposal of Hoover, Truman, and Eisenhower, and this privilege has been continued.

In 1969 a Victorian townhouse across from the White House was designated the official Former Presidents' Residence to accommodate the former heads of state whenever they visited the nation's capital. Eight years later Gerald Ford became the first to use it.

Watergate and the resignation of President Nixon in 1974 led to questioning of some of the privileges and prerogatives and, for the first time, to restrictions on the ex-Presidency. When it was disclosed that nearly $10,000,000 had been spent by the government to make the estates of President Nixon at Key Biscayne and San Clemente more secure and comfortable for him and his staff, some challenged such expenditures on property that would remain private after he became an ex-President.

Extending the doctrine of accountability, a federal court ruled in 1976 that an ex-President would be accountable for personal misconduct while President. The judge held former President Nixon personally liable for damages because he had initiated and overseen a wiretap program without setting specific limits on it. (While asserting the moral principle, in a suit initiated by former National Security Staff member Morton Halperin, the judge reduced its effectiveness by assessing only a token fine of one dollar.)

In the Presidential Recordings and Materials Preservation Act of 1974, Congress deprived Nixon of control over his papers and tapes because of the Watergate investigation. Four years later, the lawmakers passed the Presidential Records Act of 1978, which made an outgoing President's papers public property. However, it permitted a former President to restrict access to some of his public materials for up to twelve years.

Finally, an important shaping force in the evolution of the ex-Presidency has been the growth of the Presidency itself, for the ex-Presidency is always a shadow of the larger institution. The increased power and codification of the Presidency in the postwar era encouraged similar developments in the ex-Presidency. Conversely, the ex-Presidency may be facing greater responsibility and accountability as the Imperial Presidency is dismantled. Limitation of ownership and control over White House materials may be only the first step. Congress may one day establish governmental restrictions upon the sources and amount of outside income, or reconsider the definition of eligibility. Under the Former Presidents Act, for instance, anyone who has held the office of the President—and has not been removed by impeachment and conviction—qualifies; a person who was President for even a day might qualify for lifetime allowances. Whatever future regulations may be imposed on the office of the ex-Presidency, however, one thing seems certain. It will remain a position of security, privilege, and even power that would have astonished at least the first twenty-four of the twenty-nine men who outlived their own Presidencies.

● Mr. PRYOR. Mr. President, I am pleased to join in the introduction of the Former Presidents Facilities and Services Reform Act of 1981.

This legislation is designed to control the $22 million projected cost in fiscal 1981 for Presidential pensions, office staff allowances, Presidential libraries, and Secret Service protection for former Presidents and their families.

The services and activities provided currently to our former Presidents are very expensive and the cost is growing at an alarming rate. In fiscal year 1980, these statutory programs are estimated to have cost $18.3 million—an amount which exceeded the appropriation for the entire White House operation. The libraries cost over $9 million in fiscal 1980 and the protection required $8 million. A little over a decade ago, in fiscal 1970, the library costs were less than $2 million and protection costs were about $730,000. Action to control these costs is very much needed.

It has become apparent over recent months and years that the American taxpayers want to see all Federal expenditures reviewed and where appropriate, reduced. They believe, as I do, that these programs must not be an exception to this rule.

The legislation being offered today will do a great deal to introduce controls in this area. It will provide guidelines that will apply to Presidential libraries and reduce those costs. It will also place ceilings on the funds authorized for the staffs and office expenditures of former Presidents. It will limit the duration of protection for former Presidents and their families.

Finally the legislation will resolve inconsistencies between the Former Presidents Act and the Transition Act by removing former Presidents from coverage of the Transition Act and assure that Federal funds may not be used for partisan political or income generating activities.

This legislation was developed as a result of hearings in the 96th Congress held jointly by the Governmental Affairs Subcommittee on Civil Service and General Services and the Appropriations Subcommittee on Treasury, Postal Service and General Government. The hearings served to call attention to ambiguities and deficiencies present in the current statutes. These weaknesses have been noted in reports of the General Accounting Office and I believe that everyone concerned with these statutes, including former Presidents and their families, will welcome further clarification of the provisions.

The review of these statutes has been aimed at developing good public policy. It has been our intention to enhance rather than diminish the Nation's respect and affection for its Presidents and their families.

This legislation should provide for better oversight and control over the rapid growth of Federal expenditures. It maintains and improves the programs while also responding to the interest of the taxpayers.

Congressman ANDY JACOBS has introduced a bill in the House of Representatives entitled "The Former Presidential Enough is Enough and Taxpayers Relief Act of 1981" (H.R. 878). The bill proposed today has different provisions from the House but it shares a common theme. Enough is enough. Taxpayers need relief. Spending must be brought under control.

I urge my colleagues to give this legislation favorable consideration.●

● Mrs. KASSEBAUM. Mr. President, there can be little question that Government spending has made a major contribution to the economic problems we are facing today. In recognition of this, most Americans have supported a broad-based program to reduce the growth of the Federal budget. While many laudable Federal programs may be affected by these budget cuts, it has been heartening to note that American citizens are willing to bear their share of the burden now in anticipation of a future recovery.

It is clear that Members of Congress and the executive branch should not expect the rest of the country to cut back when they exempt themselves from sacrifice. As a demonstration of this belief, the Senate has supported the President's decision to recommend no pay raise for senior Government officials and Members of Congress. Numerous other spending areas will require examination, and chief among them is the cost to the Government of providing for former Presidents. For the first time in history, we are spending more for the support of former Presidents than for the White House itself. With a projected cost of $22 million for this fiscal year, there is now widespread taxpayer sentiment that expenditures for maintaining ex-Presidents are out of control.

I am pleased to join as a cosponsor of the Former Presidents Facilities and Services Reform Act of 1981. This carefully written legislation limits the services and allowances provided for former Presidents and their wives, children, staff, or survivors, and insures that Federal funds are not used for personal political or income-generating activities. It provides Secret Service protection for the former President for 8 years only, unless the determination is made that a serious need exists. Finally, the bill places particular emphasis on controlling the enormous expense of the presidential library system without jeopardizing the system's important place in our Nation's heritage.

Americans realize that Presidents continue in public life long after leaving office. Because of the demands that continue to be present, they indeed do require adequate security and assistance in filling requests connected with their role as former Chief Executives. Because of their years of service to this country, their well-deserved right to an appropriate pension is unquestioned. I am convinced that this legislation balances our responsibilities, both to former Presidents who have served us and to frustrated taxpayers who continue to pay the bills.●

● Mr. METZENBAUM. Mr. President, I am pleased to join Senators CHILES and PRYOR in introducing the Former Presidents Facilities and Services Reform Act of 1981. This legislation is designed to curb the skyrocketing costs associated with the services the Federal Government provides to our Nation's former Presidents. Over the past 25 years, the cost to the taxpayer of pensions, office staff allowances, libraries, and Secret Service protection provided to former Presidents and their families has increased dramatically—from $65,000 in 1955 to a projected cost of $22 million in this fiscal year.

Mr. President, our Nation's former Presidents do have special needs and they are entitled to certain services upon retirement from this Nation's highest office. But, as several days of congressional hearings last year clearly demonstrated, many of the costs are excessive, unjustified and very wasteful.

The legislation that we are introducing today will help eliminate these unnecessary expenditures and will bring future costs under control. Among other things, this bill will place a cap—to be lowered over time—on the office allowances provided to former Presidents. It will prohibit the use of Federal funds for income generating activities. Furthermore, the bill will limit Secret Service protection to periods of actual threat and will control the rapidly rising costs of the current Presidential library system by placing a cap on the Govern-

ment's obligation to maintain these libraries.

The Former Presidents Facilities and Services Reform Act is sound legislation. It was developed with the participation of the executive branch, the General Accounting Office, and after consulations with our former Presidents.

The bill will not jeopardize the means by which our former Presidents can lead a dignified retired life. Under this bill, the legitimate needs of Presidents and their families will continue to be met. But wasteful Federal spending will be curtailed.

Mr. President, I believe that this legislation is fair to our former Presidents and fair to the Nation's taxpayers. I hope that we can move expeditiously to enact it into law.●

● Mr. SASSER. Mr. President, these are times of fiscal austerity. As a member of the Senate Budget Committee, I can attest that the U.S. Senate is serious about cutting Federal spending. By our actions in passing the 1981 reconciliation bill and the first concurrent budget resolution, we reduce Federal spending by more than $200 billion between 1981 and 1984.

These budget cuts will be spread throughout virtually every part of the budget. School lunch and related child nutrition programs may be cut by some $1.5 billion. Education programs may be reduced by some $1.4 billion, waste water treatment programs by over $3 billion and so on. As a result, Federal aid to State and local governments may drop by some $15 billion, and many State and local governments may have to raise sales and property taxes if they wish to provide services previously funded by the Federal Government.

All of these budget cuts are predicated on the fact that we all must make sacrifices for the common good. Indeed, if that were not the case, there is little likelihood that these spending cuts would have much popular support.

Consequently, I think that it is only appropriate that the U.S. Senate give serious and immediate consideration to S. 1325, The Former Presidents' Facilities and Services Reform Act of 1981. For, if we cannot ask the former leaders of our country to make sacrifices in this budgetary battle, how can we expect the ordinary citizen to do so.

S. 1325 provides for reasonable expenses for former Presidents. It provides for adequate Secret Service protection for former Presidents and their spouses, makes adequate allowances for staff for former Presidents, and places sensible limits on the amount of public funding for the libraries of our former Presidents.

This year we will be spending $24 million for expenses of former Presidents, $3 million more than for administration of the White House. The costs of former Presidents rose from $65,745 in 1955 to $18,250,869 in 1980. If the Federal budget as a whole had increased at the same rate, it would have totaled some $19.5 trillion in 1980.

Clearly, we need some sensible fiscal restraint in supporting former Presidents.

Our democracy is strengthened by Presidential leadership, and I hope that all our former Presidents and the Reagan administration will give this legislation the full support that it deserves. And I commend my distinguished colleague, Senator CHILES, for introducing this measure today.●

By Mr. SASSER:

S. 1326. A bill to amend title 38, United States Code, to authorize a service pension of up to $150 per month for veterans of World War I and for certain surviving spouses and dependent children of such veterans; to the Committee on Veterans' Affairs.

WORLD WAR I VETERANS' SERVICE PENSION ACT OF 1981

● Mr. SASSER. Mr. President, today it is my pleasure to introduce the World War I Veterans' Service Pension Act of 1981. It is identical to legislation introduced by my colleague Congressman GLENN ANDERSON, H.R. 1918, which currently has 109 cosponsors. H.R. 1918, I am pleased to report, will be the subject of hearings before the House Pension Subcommittee this coming July 21. I would hope that the Senate might see similar hearings in the near future as well.

Mr. President, the Veterans' Administration now estimates that there are now 482,000 living veterans of World War I. Less than a half-million veterans who, because of their service during a time of transition in veterans programs and benefits, receive virtually nothing in recognition for their service to the country.

I recognize that the Veterans' Administration currently operates a pension program for which some World War I veterans are eligible. The fact is, the VA pension program is really a poverty program, based on need. Veterans and widows who are poor enough collect less than $100 a month. More than 60 percent of these veterans collect nothing at all.

Let me quote from a letter I received from a World War I veterans:

I went into the Army December 13, 1915. Served in Mexico, 1916, and went to France 1917. Served 18 months, 14 days overseas. Returned to U.S.A. in March, 1919. Discharged August 1920. I am 85 years old. I now draw $9.35—nine dollars and 35 cents—monthly pension.

Nine dollars and thirty-five cents a month, Mr. President, to a man who served his country for almost 5 years. This is a disgrace.

From the Revoluntionary War through the Spanish-American War, our Government had a history of providing a pension to veterans in recognition of their service. After World War II, however, veterans benefits began to change, and focused on the need to compensate veterans for their service by establishing home and farm loans, job opportunities, educational benefits, and disability compensation. World War I veterans were, unfortunately, lost in the transition.

The average World War I veteran is now over 85 years of age. Two hundred of them die every day. And the dwindling number of World War I veterans continue to be forgotten by the Nation which owes its very existence to our veterans.

My bill, Mr. President, would authorize payment of $150 per month service pension in addition to any other veterans benefits, including the current VA pension or disability payment. No limit would be placed on outside income, and beyond the veteran or widow, only actually dependent orphaned children would be eligible. Based on a Census Bureau survey, my bill would be estimated to cost $1.2 billion for fiscal year 1982. Because the pension would go only to a limited and admittedly elderly group, the cost would be reduced each subsequent year. Because the bill is an authorization, not an entitlement, the above estimate would only hold true if full appropriation were realized.

To quote Congressman ANDERSON: "$150 a month is hardly a generous sum." But may I remind my colleagues that it will make a very substantial improvement in lives of these aged veterans. And it will serve a clear message to millions of American veterans that we are grateful for their service and sacrifice to the Nation.

In conclusion, I welcome the cosponsorship of my Senate colleagues on the World War I Veterans Service Pension Act of 1981. I further urge the Senate Veterans' Affairs Committee, under the able leadership of my friend from Wyoming, Mr. SIMPSON, to hold early hearings on the bill. Time is running out for the veterans of World War I; let us not shorten their remaining days by neglecting this most basic gesture of thanks.

I ask unanimous consent that the text of the World War I Veterans Service Pension Act of 1981 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1326

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "World War I Veterans' Service Pension Act of 1981."

SEC. 2. (a) Subchapter II of chapter 15, title 38, United States Code, is amended by inserting after section 512 the following new section:

"§ 513. Veterans of World War I

"(a) Subject to the availability of appropriations, the Administrator may pass to any veteran of World War I who meets the service requirements of this section a pension at a monthly rate not to exceed $150.

"(b)(1) A veteran meets the service requirements of this section if the veteran served in the active military, naval, or air service—

"(A) for ninety days or more during World War I;

"(B) during World War I and was discharged or released from such service for a service-connected disability; or

"(C) for a period of ninety consecutive days or more which began or ended during World War I.

"(2) For the purposes of this section, the term 'World War I' means the period beginning April 5, 1917, and ending on July 2, 1921.

"(c) Any payment to a veteran under this section is in addition to any payment to which the veteran is entitled under section 521 of this title or section 306 of the Vet-

erans' and Survivors Pension Improvement Act of 1978.".

(b) the Table of Sections at the beginning of such chapter is amended by inserting after the item relating to section 512 the following new item:

"513. Veterans of World War I.".

SEC. 3. (a) Subchapter II of chapter 15, title 38, United States Code, is amended by inserting after section 541 the following new section:

"§ 541a. Certain surviving spouses of World War I veterans

"(a) Subject to the availability of appropriations, the Administrator may pay to the surviving spouse of any deceased World War I veteran who met the service requirements of section 513(b) of this title a pension at a monthly rate not to exceed $150.

"(b) No pension shall be paid to the surviving spouse of a veteran under this section unless such surviving spouse was married to the veteran—

"(1) before December 14, 1944;

"(2) for one year or more; or

"(3) for any period of time, if a child was born of the marriage or was born to them before marriage.

"(c) Any payment to a surviving spouse under this section is in addition to any payment to which the surviving spouse is entitled under section 541 of this title or under section 306 of the Veterans' and Survivors' Pension Improvement Act of 1978.".

(b) The Table of Sections at the beginning of such chapter is amended by inserting after the item relating to section 541 the following new item:

"541a. Certain surviving spouses of World War I veterans.".

SEC. 4. (a) Subchapter II of chapter 15, title 38, United States Code, is amended by inserting after section 542 the following new section:

"§ 542a. Certain children of World War I veterans

"(a) Subject to the availability of appropriations and whenever there is no surviving spouse entitled to a pension under section 541a of this title, the Administrator may pay to the child or children of any deceased World War I veteran who met the service requirements of section 513(b) of this title a pension at a monthly rate not to exceed $150.

"(b) In the case of eligible children of a veteran, the pension provided for by subsection (a) of this section shall be equally divided among the children.

"(c) For the purposes of this section, the term 'child' means an unmarried person—

"(1) who is under eighteen years of age;

"(2) who, before attaining the age of eighteen years became permanently incapable of self-support; or

"(3) who, after attaining the age of eighteen years and until completion of education or training (but not after attaining the age of 23 years), is pursuing a course of instruction at an approved educational institution,

and who meets the other criteria of section 101(4) of this title.".

(b) the Table of Sections at the beginning of such chapter is amended by inserting after the item relating to section 542 the following new item:

"542a. Certain children of World War I veterans.".

SEC. 5. The amendments made by this Act shall apply to payments under chapter 15, title 38, United States Code, and shall take effect January 1, 1982.●

By Mr. CHILES:

S. 1327. A bill to amend the Inspector General Act of 1978; to the Committee on Governmental Affairs.

INSPECTOR GENERAL AMENDMENTS OF 1981

● Mr. CHILES. Mr. President, the legislation I am introducing today is in response to a general accounting report which detail the savings to American taxpayer than can be derived by resolving the outstanding audits that presently exist and by allowing each Inspector General to institute civil action to recover Federal funds where the Justice Department has declined to take action. This legislation would amend Public Law 95–452.

During the last session of Congress, I held hearings with each Inspector General nominee. Each of them expressed a deep desire to do something about the number of unresolved audits that existed in their respective agency. However when you view the problem collectively, as the GAO did, the results are even more astounding.

According to the GAO, Federal agencies referred close to 13,000 fraud cases to the Department of Justice for prosecution. However, only 40 percent of these were actually prosecuted. Thus, less than 10 percent of the over 77,000 cases identified by agencies were actually prosecuted. However, we found that agencies did not always take available administrative actions against those committing fraud. In fact, 22 percent of the cases, no administrative or legal action of any kind was taken. For example, agencies quit doing business with contractors or grantees in only 13 percent of the cases involving these types of organizations. In 22 percent of the cases involving contractors or grantees the administrative action was sending them a warning letter.

Mr. President, I recognize that the Department of Justice cannot prosecute every case referred along these lines. I believe that civil fine authority could be a useful enforcement in those cases where Justice does not take some type of legal action.

I am sure that it is clear to the Members of this body that something has to be done in order to restore public confidence in the ability of the Government to successfully combat fraud, waste, and abuse in Federal programs. Federal enforcement officials have told us over and over that every time they looked for fraud and waste and abuse, they found it. Everytime they looked for program mismanagement and systemic failures they found it.

Since I have been in the Senate I have had the opportunity to examine at some length, various Government programs. Like other Senators I then issued committee reports asking the executive branch to make the necessary changes in order to get the fraud out and the intent back into the programs. Likewise, the General Accounting Office has issued numerous reports recommending changes. Many of the suggestions and recommendations are largely ignored and "business-as-usual" remain the order of the day.

The only persons who have not been marching to the orders have been the Inspectors General. These amendments to the Inspector General Act will make these fraud fighters even more effective. I think it is important that the Congress support the Inspector General with the strongest legislation possible.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1327

Be it enacted by the Senate and House of Representative of the United States of America in Congress assembled. That this Act may be cited as the "Inspector General Amendments of 1981".

DUTIES AND RESPONSIBILITIES

SEC. 2. (a) Section 4(a)(1) of the Inspector General Act of 1978 is amended—

(1) by inserting "(A)" after "(1)";

(2) by inserting "and" after the semicolon; and

(3) by adding at the end thereof the following:

"(B) to establish schedules and deadlines for the disposition and final resolution of all audits conducted by such establishment;".

(b) Section 4 of such Act is amended by adding at the end thereof the following new subsection:

"(e) Each Inspector General is authorized, where appropriate, to commence a civil action to recover Federal funds in any case in which the Inspector General or the respective federal agency, reported a violation of law to the Attorney General and the Attorney General declined to take action on such report. In carrying out such action, the Inspector General may request legal assistance and support from the Attorney General and from the General Counsel of the establishment.".

SEMIANNUAL REPORTS

SEC. 3. Section 5 of the Inspector General Act of 1978 is amended—

(1) by striking out "and" after the semicolon in paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following new paragraphs:

"(7) a description of each audit conducted by the establishment which has not been completed by the deadline established for such audit under section 4(a)(1)(B) or, in the case of an audit for which no deadline has been established, within six months after the date on which the audit was commenced, and an explanation of the reasons why such audit was not completed by such deadline or within such specified time; and

"(8) an identification of any savings from the budget of the establishment made by the establishment due to the activities of the Office during the reporting period, and an estimate of any such savings that may be realized by the establishment during the six-month period in which the report is made.".●

By Mr. DIXON (for himself and Mr. PERCY):

S. 1332. A bill to amend the Internal Revenue of 1954 to make certain changes with respect to estate and gift taxes; to the Committee on Finance.

TRANSFER TAX REFORM ACT OF 1981

Mr. DIXON. Mr. President, I am today introducing, along with my distinguished senior colleague from Illinois, Senator PERCY, the Transfer Tax Reform Act of 1981. Identical legislation is being introduced today in the House of Representatives by a distinguished Member of the Illinois Congressional Delegation, Congressman MADIGAN. The legislation is de-

signed to bring our badly antiquated estate and gift tax laws up to date. Due to inflation and other factors the estate tax has become an unbearable burden for many, particularly for American farmers and small businessmen. The law needs to be reformed.

The estate laws no longer just prevent the excessive accumulation of wealth. They now act to make it virtually impossible to preserve family farms and family-operated small businesses. Present estate law, by excessively taxing the transfer of an estate from one generation to the next, acts to force the sale of small farms and businesses to larger farms or corporations.

American agricultural policy has long had as its basic tenet the support and maintenance of the family farm, but our estate taxes actually operate to subvert this objective. The increasingly heavy estate tax burden forces sales that turn farmland into shopping centers or into large corporate farms. American agriculture and the American public are the losers.

The legislation we are introducing today is similar in many respects to S. 395, The Family Enterprise and Gift Tax Equity Act introduced by Senator WALLOP. I am pleased to be a cosponsor of that bill.

However, there are some differences between this bill and S. 395. I am introducing it in order to give the Senate some additional options to consider as it works to make needed changes in the estate and gift tax areas.

This bill is the result of extensive research and work by the Illinois Bar Association. It reflects the quality and intelligence of the members of the Illinois Bar that worked on it. I think that the Bar Association's efforts will be of great help to the Senate. I believe any legislation that the Senate finally passes in this area will reflect the bar's efforts, and will be better because of them.

Mr. President, the bill makes a number of changes in estate and gift tax law.

First, the unified credit against Federal estate and gift tax is substantially increased. The unified credit equivalent amount is increased from the present level of $175,000 as follows:

[In thousands of dollars]

1982	250
1983	300
1984	400
1985 and thereafter	500

The unified credit is not indexed for inflation after 1985.

Second, the Federal gift tax annual exclusion is increased from the present level of $3,000 to $10,000. This increase does not fully offset the inflation that has occurred since the $3,000 level was enacted—to do so would require a $15,000 exclusion—but it does represent a reasonable effort to restore the exclusion to a practical level.

Third, the requirement that gifts included in the gross estate because they are made within 3 years of death be revalued as of the date of death is eliminated. Also, certain technical problems relating to split gifts made within 3 years of death are corrected.

Fourth, the use of the unified credit against gift tax is made elective rather than mandatory. The bill provides that by electing to pay gift tax the taxpayer can obtain a binding determination of the value of the gift for all transfer tax purposes after the 3-year statute of limitations on the gift tax return has expired.

Fifth, the special use valuation rules applicable to farms and certain closely held business real estate are comprehensively revised to make their utilization much more equitable and also simpler for both the Government and the taxpayer. This provision is of particular importance to Illinois because Illinois and Iowa have made almost one-half of the special use valuation elections in the entire Nation since 1976.

Sixth, the installment payment of estate tax rules are simplified and coordinated with the redemption provisions of the Internal Revenue Code. The discrimination against sole proprietorships in the utilization of these rules is substantially eliminated and the percentage requirements for eligibility are reduced. The acceleration of payment provisions are also made somewhat less harsh.

Finally, the Federal disclaimer statute is completely revised to permit disclaimers in more situations than the interpretation of the present law currently being made by the Treasury Department permits.

Mr. President, I believe that it is imperative to make the needed reforms in the estate and gift tax law without delay. I believe that this bill can make a substantial contribution in helping to achieve that objective. I urge the Senate to act, and act quickly, to address the issues raised by this bill and by the legislation I cosponsored with Senator WALLOP.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1332

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Transfer Tax Reform Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. INCREASE IN UNIFIED CREDIT AGAINST ESTATE TAX.

(a) CREDIT AGAINST ESTATE TAX.

(1) IN GENERAL.—Subsections (a) and (b) of section 2010 (relating to unified credit against estate tax) are amended to read as follows:

"(a) GENERAL RULE.—The unified credit amount shall be allowed as a credit to the estate of every decedent against the tax imposed by section 2001.

"(b) UNIFIED CREDIT AMOUNT.—

"In the case of decedents dying in:	The unified credit amount is:
1982	$70, 800
1983	87, 800
1984	121, 800
1985 and thereafter	155, 800"

(2) Technical and Conforming Amendments.—Subsection (a) of section 6018 (relating to estate tax returns by executors) is amended—

(A) by striking out "$175,000" in paragraph (I) and inserting in lieu thereof "$500,000", and

(B) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) Phase-in of filing requirement amount.—

"In the case of decedents dying in:	"Paragraph (1) shall be applied by substituting for $500,000 the following amount:
1982	$250, 000
1983	300, 000
1984	400, 000"

(b) CREDIT AGAINST GIFT TAX.—

(I) IN GENERAL.—Paragraph (1) of section 2505(a) (relating to unified credit against gift tax) is amended by striking out "$47,000" and inserting in lieu thereof "the unified credit amount".

(2) UNIFIED CREDIT AMOUNT.—Subsection (b) of section 2505 is amended to read as follows:

"(b) UNIFIED CREDIT AMOUNT.—

"In the case of gifts made in:	The unified credit amount is:
1982	$70, 800
1983	87, 800
1984	121, 800
1985 and thereafter	155, 800"

(c) EFFECTIVE DATES.—The amendments made—

(1) by subsection (a) shall apply to the estates of decedents dying after December 31, 1981, and

(2) by subsection (b) shall apply to gifts made after such date.

SEC. 3. INCREASE IN ANNUAL GIFT TAX EXCLUSION.

(a) IN GENERAL.—Subsection (b) of section 2503 (relating to exclusions from gifts) is amended by striking out "$3,000" and inserting in lieu thereof "$10,000".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to gifts made after December 31, 1981.

SEC. 4. ESTATE TAX TREATMENT OF TRANSFERS MADE WITHIN 3 YEARS OF DECEDENT'S DEATH.

(a) IN GENERAL.—Section 2035 (relating to adjustments for gifts made within 3 years of decedent's death) is amended by adding at the end thereof the following new subsection:

"(d) VALUATION OF GIFTS.—For purposes of subsection (a), the value of property included in the gross estate by reason of subsection (a) shall be the value of such property at the time of its transfer. The preceding sentence shall not apply to a transfer of an interest in property which is included in the value of the gross estate under section 2036, 2037, 2038, 2041, or 2042 or would have been included under any of such sections if such interest had been retained by the decedent."

(b) NO ADJUSTMENT FOR CERTAIN SPLIT GIFTS.—Subsection (b) of section 2035 is amended—

(1) by striking out "and" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2), and inserting in lieu thereof paragraph (2), and inserting in lieu thereof ", and",

(3) by adding after paragraph (2) the following new paragraph:

"(3) to any gift to a donee made during a calendar year by a decedent and the decedent's spouse pursuant to section 2513 if the total value of the gift and other gifts made by such decedent and the decedent's spouse in such year to the same donee did not exceed the combined exclusions of the decedent and the decedent's spouse under section 2503(b) for the calendar year.", and

(4) by striking out "Paragraph (2)" in paragraph (2) and inserting in lieu thereof "Paragraphs (2) and (3)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to estates of decedents dying after December 31, 1981.

SEC. 5. ELECTION TO PAY GIFT TAX.

(a) IN GENERAL.—Section 2505 (relating to unified credit against gift tax) is amended by adding at the end thereof the following new subsection:

"(e) ELECTION TO PAY GIFT TAX.—

"(1) IN GENERAL.—An individual may elect with respect to any calendar quarter the amount, if any, of the credit allowed by subsection (a) to be applied with respect to gifts made during such quarter.

"(2) ELECTION.—An election under paragraph (1) shall be made at the same time as the return required to be filed for such quarter under section 6019 is filed and shall be in such form and manner as the Secretary may by regulations prescribe.

"(3) EFFECT OF ELECTION.—For purposes of subsection (a)(2), the amount of any credit which does not apply by reason of an election under paragraph (1) shall not be treated as an amount allowable as a credit under this section."

(b) COMPUTATION OF ESTATE TAX.—Subsection (b) of section 2001 (relating to computation of estate tax) is amended to read as follows:

"(b) COMPUTATION OF TAX.—The tax imposed by this section shall be the amount equal to the excess (if any) of—

"(1) a tentative tax computed in accordance with the rate schedule set forth in subsection (c) on the sum of—

"(A) the amount of the taxable estate, and

"(B) the amount of the adjusted taxable gifts, over

"(2) the aggregate amount of tax assessed or paid under chapter 12 with respect to gifts made by the decedent after December 31, 1976.

For purposes of paragraph (1)(B), the term 'adjusted taxable gifts' means the total amount of the taxable gifts (within the meaning of section 2503 and as determined under section 2504(c)) made by the decedent after December 31, 1976, other than gifts which are includible in the gross estate of the decedent."

(c) VALUATION OF CERTAIN GIFTS FOR PRECEDING CALENDAR YEARS.—Subsection (c) of section 2504 (relating to determination of value of prior gifts on which gift tax has been paid) is amended to read as follows:

"(c) VALUATION OF CERTAIN GIFTS FOR PRECEDING CALENDAR YEARS AND QUARTERS.—If the time has expired within which a tax may be assessed under this chapter or under corresponding provisions of prior laws on the transfer of property by gift made during a preceding calendar year or calendar quarter, as defined in section 2502(c), and if a tax under this chapter or under corresponding provisions of prior laws has been assessed or paid for such preceding calendar year or calendar quarter, the value of such gift made in such preceding calendar year or calendar quarter shall, for purposes of computing the tax under this chapter for any calendar quarter and for purposes of computing the estate tax under chapter 11 and the generation-skipping transfer tax under chapter 13, be the value of such gift which was used in computing the tax for the last preceding calendar year or calendar quarter for which a tax under this chapter or under corresponding provisions of prior laws was assessed or paid."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to gifts made after December 31, 1981.

SEC. 6. VALUATION OF CERTAIN FARM, ETC., REAL PROPERTY.

(a) DEFINITION OF QUALIFIED REAL PROPERTY.—

(1) IN GENERAL.—Paragraph (1) of section 2032A(b) (defining qualified real property) is amended to read as follows:

"(1) IN GENERAL.—For purpose of this section, the term "qualified real property" means real property located in the United States which was acquired from or passed from the decedent to a qualified heir of the decedent but only if—

"(A) 50 percent or more of the adjusted value of the gross estate consists of the adjusted value of real or personal property which was acquired from or passed from the decedent to a qualified heir of the decedent,

"(B) 25 percent or more of the adjusted value of the gross estate consists of the adjusted value of real property which meets the requirements of subparagraphs (A) and (C),

"(C) during the 8-year period ending on the date of the decedent's death there have been periods aggregating 5 years or more during which—

"(i) such real property was owned by the decedent or a member of the decedent's family and used for a qualified use by the decedent or a member of the decedent's family, and

"(ii) there was material participation by the decedent or a member of the decedent's family in the operation of the farm or other business, and

"(D) such real property is designated in the agreement referred to in subsection (d)(2)."

(2) SPECIAL RULES.—Subsection (b) of section 2032A (defining qualified real property) is amended by adding at the end thereof the following new paragraphs:

"(4) RETIRED AND DISABLED DECEDENTS.—

"(A) IN GENERAL.—If, on the date of death of the decedent, the decedent did not otherwise meet the requirements of paragraph (1)(C) with respect to any property, and the decedent—

"(i) was eligible to receive old-age benefits under title II of the Social Security Act, or

"(ii) was disabled for a continuous period ending on such date,

then paragraph (1)(C) shall be applied by substituting 'the date on which the decedent became eligible to receive old-age benefits under title II of the Social Security Act or became disabled' for 'the date of the decedent's death'.

"(B) DISABLED DEFINED.—For purposes of subparagraph (A), an individual shall be disabled if such individual has a mental or physical impairment which renders him unable to materially participate in the operation of the farm or other business.

"(5) SPECIAL RULE FOR SPOUSES WHO ARE QUALIFIED HEIRS.—In the case of any qualified real property which was acquired by a qualified heir who is the spouse of the decedent and which does not otherwise meet the requirements of paragraph (1)(C) upon the death of such spouse, such real property shall be treated as meeting the requirements of paragraph (1)(C) if such spouse was engaged in the active management of the operation of the business at all times during—

"(A) the 10-year period ending on the date of death of the spouse, or

"(B) the period beginning on the date of death of the decedent and ending on the date of death of the spouse.

"(6) SPECIAL RULE FOR CERTAIN WOODLANDS.—In the case of real property used for a farming purpose described in subparagraph (C) of subsection (e)(5) which does not otherwise meet the requirements of paragraph (1)(C), such real property shall be treated as meeting the requirements of paragraph (1)(C) if, at all times during the 10-year period ending on the date of the decedent's death—

"(A) such real property was owned by the decedent or a member of the decedent's family and used for such farming purpose, and

"(B) the decedent or a member of the decedent's family was engaged in the active management of the operation of the business.

"(7) FUTURE AND PARTIAL INTERESTS.—An interest in qualified real property which is considered to have been acquired from or to have passed from the decedent for purposes of this section, whether such interest is held directly in real property or indirectly through a partnership, corporation or trust, shall not fail to qualify for valuation under this section solely for the reason that the interest in such property is a 'future interest' for purposes of section 2503(b). Property held in trust shall be considered to have been acquired from or passed from the decedent to a qualified heir if distributions from the trust may be made only to qualified heirs or at the direction of a qualified heir and the property would have been considered to have been acquired from or passed from the decedent to a qualified heir if owned directly and not in trust. For the purpose of determining whether trust distributions may be made only to qualified heirs, any remainder interests of beneficiaries who are not qualified heirs shall be disregarded if the aggregate value of such remainder interests does not exceed 5 percent of the value of the trust on the date of the decedent's death."

(b) DISPOSITIONS AND FAILURES TO USE FOR QUALIFIED USE.—

(1) 10-YEAR HOLDING PERIOD.—

(A) IN GENERAL.—Subsection (c) of section 2032A (relating to tax treatment of dispositions and failures to use for qualified use) is amended—

(i) by striking out "15 years" in paragraph (1) and inserting in lieu thereof "10 years", and

(ii) by striking out paragraph (3) and redesignating paragraphs (4) through (7) as paragraphs (3) through (6), respectively.

(B) TECHNICAL AND CONFORMING AMENDMENTS.—Paragraph (2) of section amend- (relating to treatment of replaced property) is amended—

(i) by striking out in subparagraph (A) all that follows "involuntarily converted," and inserting in lieu thereof the following: "except that with respect to such qualified replacement property the 10-year period under subsection (c)(1) shall be extended by any period, beyond the 2-year period referred to in section 1033(a)(2)(B)(i), during which the qualified heir was allowed to replace the qualified real property,", and

(ii) by striking out "(7)" in subparagraph (C) and inserting in lieu thereof "(6)".

(2) CESSATION OF QUALIFIED USE.—

(A) IN GENERAL.—Paragraph (6) of section 2032A(c) (defining cessation of qualified use), as redesignated by paragraph (1), is amended to read as follows:

"(6) CESSATION OF QUALIFIED USE.—For purposes of paragraph (1)(B)—

"(A) IN GENERAL.—Real property shall cease to be used for the qualified use if, except as provided in subparagraph (B), during any period of 8 years ending after the date of the decedent's death and before the date of the death of the qualified heir, there had been periods aggregating 3 years or more during which such property was not used by the decedent, qualified heir, or family member for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the property qualified and—

"(i) in the case of periods during which the property was held by the decedent (other than periods during which the decedent was an individual described in subsection (b)(4)(A) (i) or (ii), there was no material participation by the decedent or any member of the decedent's family in the operation of the farm or other business, and

"(ii) in the case of periods during which the property was held by any qualified heir, their was no material participation by such qualified heir or any member of his family in the operation of the farm or other business.

"(B) 10-YEAR ACTIVE MANAGEMENT.—If an eligible qualified heir or a family member or fiduciary of an eligible qualified heir elects, at such time and in such manner as the Secretary may prescribe, to have the provisions of this subparagraph apply to any real property—

"(i) the material participation requirements of subparagraph (A) shall not apply to such property, and

"(ii) such property shall cease to be used for the qualified use if the fiduciary or the eligible qualified heir or any member of his family did not take part in the active management of the farm or other business at all times during the period beginning on the date of death of the decedent and ending on the earlier of—

"(I) the date of death of the qualified heir, or

"(II) the date which is 10 years from the date of death of the decedent.

"(C) SPECIAL RULE FOR WOODLANDS.—The material participation requirement of subparagraph (A) shall not apply in the case of real property with respect to which the qualified use under which the property qualified under subsection (b) was used for a farming purpose described in subsection (e)(5)(C).

"(D) ELIGIBLE QUALIFIED HEIR.—For purposes of this paragraph, the term 'eligible qualified heir' means a qualified heir who on the date of death of the decedent—

"(i) is the spouse of the decedent,

"(ii) has not attained the age of 21,

"(iii) is a student described in subparagraph (A) or (B) of section 151(e)(4), or

"(iv) was disabled (within the meaning of subsection (b)(4)(B)) for a continuous period ending on such date."

(B) TECHNICAL AND CONTINUING AMENDMENT.—Subsection (e) of section 2032A (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(12) ACTIVE MANAGEMENT.—The term 'active management' means the making of the management decisions of a business (other than the daily operating decisions)."

(3) PROPORTIONAL RECAPTURE ON PARTIAL DISPOSITIONS.—Subparagraph (D) of section 2032A(c)(2) is amended to read as follows:

"(D) PARTIAL DISPOSITIONS.—For purposes of this paragraph, where the qualified heir disposes of a portion of the interest acquired by (or passing to) such heir (or a predecessor qualified heir) or there is a cessation of use of such a portion—

"(i) the term 'such interest' in subsection (c)(2)(A)(i) means the portion of the interest disposed of or to which there is a cessation of use,

"(ii) the value determined under subsection (a) taken into account under subparagraph (A)(ii) with respect to such portion shall be its pro rata share of such value of such interest, and

"(iii) the adjusted tax difference attributable to the interest taken into account with respect to the transaction involving the second or any succeeding portion shall be reduced by the amount of the tax imposed by this subsection with respect to all prior transactions involving portions of such interest."

(c) INCREASE OF $500,000 LIMITATION.—Paragraph (2) of section 2032A(a) (relating to value based on use under which property qualifies) is amended to read as follows:

"(2) LIMITATION.—

"(A) IN GENERAL.—The aggregate decrease in the value of qualified real property taken into account for purposes of this chapter which results from the application of paragraph (1) with respect to any decedent shall not exceed the applicable amount determined under subparagraph (B).

"(B) APPLICABLE AMOUNT.—For purposes of subparagraph (A), in the case of decedents dying in any calendar year after 1981, the applicable amount for such calendar year is—

"In the case of decedents dying in:	The applicable base amount is:
1982	$600, 000
1983	700, 000
1984	800, 000
1985	900, 000
1986 and thereafter	1, 000, 000"

(d) EXCHANGE OF QUALIFIED REAL PROPERTY.—

(1) IN GENERAL.—Section 2032A (relating to valuation of certain farm, etc., real property) is amended by adding at the end thereof the following new subsection:

"(i) EXCHANGES OF QUALIFIED REAL PROPERTY.—

"(1) TREATMENT OF PROPERTY EXCHANGED.—

"(A) IN GENERAL.—If an interest in qualified real property is exchanged—

"(i) no tax shall be imposed by subsection (c) on such exchange if the interest in qualified real property is exchanged solely for an interest in qualified exchange property in a transaction which qualifies under section 1031(a), or

"(ii) if clause (i) does not apply, the amount of the tax imposed by subsection (c) on such exchange shall be the amount determined under subparagraph (B).

"(B) AMOUNT OF TAX WHERE PROPERTY RECEIVED IS NOT SOLELY AN INTEREST IN QUALIFIED EXCHANGE PROPERTY.—The amount determined under this subparagraph with respect to any exchange is the amount of tax which (but for this subsection) would have been imposed on such exchange reduced by an amount equal to that portion of such tax which is attributable to the amount of the interest in qualified exchange property received by the taxpayer.

"(2) TREATMENT OF QUALIFIED EXCHANGE PROPERTY.—For purposes of subsection (c)—

"(A) any interest in qualified exchange property shall be treated in the same manner as if it were a portion of the interest in qualified real property which was exchanged, and

"(B) any tax imposed by subsection (c) on the exchange shall be treated as a tax imposed on a partial disposition.

"(3) QUALIFIED EXCHANGE PROPERTY.—For purposes of this subsection, the term 'qualified exchange property' means real property which is to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the real property exchanged therefor originally qualified under subsection (a)."

(2) EXCHANGES OF PROPERTY PRIOR TO DECENDENT'S DEATH.—Subsection (b) of section 2032A is amended by adding at the end thereof the following new paragraph:

"(8) QUALIFIED EXCHANGE PROPERTY.—

"(A) IN GENERAL.—For purposes of paragraph (1)(C) of this subsection, periods with respect to qualified exchange property during the 8 years preceding the decedent's death may be aggregated with periods with respect to the real property included in the decedent's gross estate.

"(B) QUALIFIED EXCHANGE PROPERTY.—For purposes of this paragraph, the term 'qualified exchange property' means real property—

"(i) which was used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the real property exchanged therefor qualifies under subsection (a), and

"(ii) which was exchanged for an interest in real property included in the gross estate of the decedent in a transaction which qualifies under section 1031.

"(C) WHERE PROPERTY RECEIVED IS NOT SOLELY QUALIFIED REAL PROPERTY.—Where the property received in a transaction which qualifies under section 1031 is not solely qualified real property (after the application of subparagraph (A) of this paragraph), then subparagraph (A) of this paragraph shall apply only to the qualified real property received in such transaction.

"(D) WHERE REAL PROPERTY IS RECEIVED NOT SOLELY IN EXCHANGE FOR QUALIFIED EXCHANGE PROPERTY.—Where property other than qualified exchange property is exchanged for qualified real property (after the application of subparagraph (A) of this paragraph) in a transaction which qualifies under section 1031, subparagraph (A) of this paragraph shall apply only to an undivided fraction of the real property received in such transaction. The numerator of the fraction shall be equal to the value of the qualified exchange property on the date of such transaction. The denominator of the fraction shall be equal to the value on the date of such transaction of the real property received in the transaction."

(3) TECHNICAL AND CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 2032A(f) (relating to statute of limitations) is amended—

(i) by inserting "or exchange" after "conversion",

(ii) by inserting "or (1)" after "(h)", and

(iii) by inserting "or of the exchange of property" after "replace".

(B) Paragraph (2) of section 6324B(c) (relating to special liens) is amended by inserting "and qualified exchange property (within the meaning of section 2032A(i)(3))" before the period at the end thereof.

(e) ELECTION REQUIREMENT OF SPECIAL RULES FOR INVOLUNTARY CONVERSIONS REPEALED.—Section 2032A(h) (relating to special rules for involuntary conversions of qualified real property) is amended—

(1) by striking out "and the qualified heir makes an election under this subsection" in paragraph (1)(A), and

(2) by striking out paragraph (5).

(f) METHOD OF VALUING FARMS.—Paragraphs (7) and (8) of section 2032A(e) are amended to read as follows:

"(7) METHOD OF VALUING FARMS.—

"(A) IN GENERAL.—Unless the executor elects to have the value of the farm for farming purposes determined under paragraph (8), the value of a farm for farming purposes shall be determined by dividing—

"(i) the excess of the amount of the average annual rental value of the qualified real property for farming purposes over the amount of the average annual State and local real estate taxes for such qualified real property, by

"(ii) the average annual effective interest rate for all new Federal land bank loans.

For purposes of the preceding sentence, each average annual computation shall be made on the basis of the 5 most recent calendar years ending before the date of the decedent's death. An executor may elect to have the value of a farm for farming purposes determined under this subparagraph regardless of whether the qualified real property or any portion thereof has in fact been rented or whether such qualified real property has been rented on a cash, crop shares, or other basis.

"(B) VALUATION OF WOODLANDS.—Unless the executor elects to have the value of woodlands determined under paragraph (8), the value of woodlands for purposes of this section shall be determined by dividing—

"(i) the excess of the average annual income which the property can be expected to yield in its current use over the amount of the average annual State and local real estate taxes for such qualified real property, by

"(ii) the average annual effective interest rate for all new Federal land bank loans. The computations made under the preceding sentence shall be made by determining the expected yield over a reasonable period of time under prudent management, taking into account current stocking, soil capacity, terrain configuration, and similar factors.

"(8) DISCOUNT METHOD OF VALUATION.—In any case to which paragraph (7) does not apply, the value of any qualified real property shall be 50 percent of the value of such property for purposes of this chapter, determined without regard to this section. An executor who initially elects to have the value of a farm for farming purposes determined under paragraph (7)(A) or the value of woodlands determined under paragraph (7)(B) shall be entitled to make a subsequent election to have the value of such farm determined under this paragraph provided such subsequent election is made within the period of time for assessment of tax under section 6501."

(g) ELECTION TO INCREASE BASIS UPON RECAPTURE.—

(1) ELECTION BY QUALIFIED HEIR.—Subsection (c) of section 2032A is amended by adding at the end thereof the following new paragraph:

"(7) ELECTION TO INCREASE BASIS.—If a qualified heir who is personally liable for the additional tax imposed by this subsection files an election in accordance with regulations prescribed by the Secretary, the basis of the qualified heir's interest in the qualified real property subject to such additional tax shall be adjusted in the manner provided in paragraph (3) of section 1014(a)."

(2) ELECTIVE BASIS UPON RECAPTURE.—Paragraph (3) of section 1014(a) (relating to basis of property acquired from a decedent) is amended to read as follows:

"(3) in the case of an election under section 2032A, its value determined under such section, increased by the value of any interest in such property (determined for purposes of this chapter without regard to this section) with respect to which an additional estate tax is imposed under section 2032A(c)(1) and the qualified heir has filed an election under section 2032A(c)(7)."

(3) INTEREST ON RECAPTURE TAX.—Paragraph (5) of section 2032A(c) is amended to read as follows:

"(5) DUE DATE.—The additional tax imposed by this subsection shall become due and payable on the day which is 6 months after the date of the disposition or cessation referred to in paragraph (1), but, if the election under paragraph (7) of this subsection is filed by the qualified heir, then for purposes of section 6601, interest on such additional tax shall be paid from the time prescribed in chapter 62 for payment of the tax imposed by section 2001 on the decedent's estate to the date such additional tax is paid."

(h) INCLUSION OF MEMBERS OF SPOUSE'S FAMILY.—Paragraph (2) of section 2032A(e) is amended to read as follows:

"(2) MEMBER OF FAMILY.—

"(A) IN GENERAL.—The term 'member of the family' means, with respect to any individual, only such individual's ancestors or lineal descendants, a lineal descendant of a parent of such individual, the spouse of such individual, the individual's spouse's ancestors or lineal descendants, a lineal descendant of a parent of such individual's spouse, or the spouse of any such descendant. For purposes of the preceding sentence, a legally adopted child of an individual shall be treated as a child of such individual by blood. The term 'member of the family' with respect to any qualified heir of a decedent includes all members of the family with respect to the decedent as determined under the preceding sentences of this paragraph. The term 'spouse' as used in this paragraph includes widows or widowers, whether or not they are remarried, and also includes former spouses who have been divorced from the decedent, qualified heir, or member of the family to whom such spouse was formerly married.

"(B) SPECIAL RULE.—For estate of decedents dying before January 1, 1982, the term 'member of the family' as used in subsection (c) means, with respect to any individual, in addition to the persons described in subparagraph (A), a lineal descendant of a grandparent of such individual and the spouse of any such descendant."

(i) SIGNING AGREEMENT ON BEHALF OF DISABLED PERSON.—Paragraph (2) of section 2032A(d) (relating to the agreement consenting to recapture provisions) is hereby amended by adding the following new sentence at the end therof:

"The agreement referred to in this paragraph may be signed on behalf of any person under legal disability by such person's parent, legal representative, or attorney in fact."

(j) PARTNERSHIPS, CORPORATIONS AND TRUSTS.—Subsection (g) of section 2032A (relating to interests in partnerships, corporations and trusts) is amended to read as follows:

"(g) APPLICATION OF THIS SECTION AND SECTION 6324B TO INTERESTS IN PARTNERSHIPS, CORPORATIONS AND TRUSTS.—

"(1) PARTNERSHIPS AND CORPORATIONS.—The Secretary shall prescribe regulations setting forth the application of this section and section 6324B in the case of an interest in a partnership or corporation which, with respect to the decedent, is an interest in a closely held business (within the meaning of paragraph (1) of section 6166(b)).

"(2) TRUSTS.—This section shall apply to qualified real property held in a trust in which the decedent or a qualified heir has a beneficial interest in the same manner as if the decedent or qualified heir had a direct interest in the qualified real property. For purposes of this paragraph it does not matter whether the beneficial interest in the trust is treated as real or personal property under applicable State law."

(k) CERTAIN PURCHASES BY QUALIFIED HEIRS.—Paragraph (9) of section 2032A(e) (relating to property acquired from decedent) is amended—

(1) by striking "or" at the end of subparagraph (B),

(2) by striking out the period at the end of subparagraph (C) and inserting a comma in lieu thereof, and

(3) by adding after subparagraph (C) the following new subparagraphs:

"(D) such property is acquired by any person from the estate or from a trust by exercise of an option to purchase granted to the person by the decedent or the trustee,

"(E) such property is acquired by any person from the estate or from a trust by making payments to other persons required by the terms of the will or trust as a condition for receiving the property, or

"(F) such property is purchased by any person from the estate or from a trust."

(l) DEDUCTIONS FOR INDEBTEDNESS NOT REDUCED.—Subsection (a) of section 2053 (relating to estate tax deduction for indebtedness is amended by adding at the end thereof the following new sentence:

"The deductions allowed by reason of paragraph (3) for claims against the estate and paragraph (4) for unpaid mortgages on, or any indebtedness in respect of, property shall not be reduced if the value of such property is determined pursuant to section 2032A."

(m) EFFECTIVE DATES.—The amendments made by subsections (a)(2), (c), (d)(2), (f), and (h) of this section shall apply to the estates of decedents dying after December 31, 1981. The amendments made by subsections (a)(1), (b), (d)(1), (d)(3), (e), (g), (i), (j), (k) and (l) of this section shall apply to the estates of decedents dying after December 31, 1976.

SEC. 7. COORDINATION OF EXTENSIONS OF TIME FOR PAYMENT OF ESTATE TAX WHERE ESTATE CONSISTS LARGELY OF INTEREST IN CLOSELY HELD BUSINESS.

(a) ELIGIBILITY REQUIREMENTS.—

(1) PERCENTAGE TESTS.—Paragraph (1) of section 6166(a) (relating to alternate extension of time for payment of estate tax where estate consists largely of interest in closely held business) is amended to read as follows:

"(1) IN GENERAL.—If the value of an interest in a closely held business which is included in determining the gross estate of a decedent who was on the date of his death a citizen or resident of the United States exceeds—

"(A) 35 percent of the value of the gross estate, or

"(B) 50 percent of the taxable estate of such decedent,

the executor may elect to pay part or all of the tax imposed by section 2001 in 2 or more (but not exceeding 10) equal installments."

(2) PROPERTY QUALIFYING AS AN INTEREST IN A CLOSELY HELD BUSINESS.—Paragraph (2) of section 6166(b) (relating to rules for applying definition of 'interest in a closely held business') is amended—

(A) by adding ", except that determinations with respect to an interest in property transferred by the decedent prior to death which is included in the decedent's gross estate shall be made as of the time immediately before such transfer" after "death" in subparagraph (A); and

(B) by adding at the end thereof the following new subparagraph:

"(E) ASSETS USED IN FAMILY-OWNED BUSINESSES.—

"(i) IN GENERAL.—For purposes of paragraph (1), a decedent's direct or indirect ownership in an asset or assets which are leased to or used by a family-owned business shall be deemed to be an interest in a closely held business.

"(ii) INDIRECT OWNERSHIP.—A decedent's indirect ownership shall qualify under clause (i) only if such interest results from—

"(I) an interest as a partner in a partnership which meets the requirements of paragraph (1)(B) other than the requirement that the partnership carry on a trade or business, or

"(II) stock in a corporation which meets the requirements of paragraph (1)(C) other than the requirement that the corporation carry on a trade or business.

"(iii) FAMILY-OWNED BUSINESS.—A business shall be treated as a family-owned business under this paragraph if—

"(I) it is a proprietorship, partnership, or corporation described in subparagraph (A), (B), or (C) of paragraph (1), and

"(II) a member of the decedent's family (as defined in section 2032A(e)(2)) is involved in the active management (as defined in section 2032A(e)(12)) of a trade or business conducted by such proprietorship, partnership, or corporation."

(b) COORDINATION WITH SECTION 303.—

(1) IN GENERAL.—Subparagraph (A) of section 303(b)(2) (relating to relationship of stock to decedent's estate) is amended by striking out all that follows "gross estate" the first place it appears and inserting in lieu thereof "exceeds—

"(i) 35 percent of the value of the gross estate of the decedent, or

"(ii) 50 percent of the value of the taxable estate of the decedent."

(2) TECHNICAL AND CONFORMING AMENDMENT.—Subparagraph (B) of section 303(b)(2) is amended to read as follows:

"(B) SPECIAL RULE FOR STOCK OF 2 OR MORE CORPORATIONS.—For purposes of subparagraph (A), stock of 2 or more corporations, with respect to each of which there is included in determining the value of the decedent's gross estate more than 20 percent in value of the outstanding stock, shall be treated as the stock of a single corporation. For purposes of the 20-percent requirement of the preceding sentence, stock which, on the date of the decedent's death, represents the surviving spouse's interest in property held by the decedent and the surviving spouse as community property or as joint tenants, tenants by the entirety, or tenants in common, shall be treated as having been included in determining the value of the decedent's gross estate.".

(c) ACCELERATION OF PAYMENT.—

(1) AMOUNT OF DISPOSITION.—Subparagraph (A) of section 6166(g)(1) (relating to acceleration of payment in the case of disposition of interest or withdrawal of funds from a business) is amended by striking out "one-third" each place it appears and inserting in lieu thereof "50 percent".

(2) FAILURE TO PAY INSTALLMENT.—Paragraph (3) of section 6166(g) (relating to failure to pay installments) is amended to read as follows:

"(3) FAILURE TO PAY INSTALLMENT.—

"(A) IN GENERAL.—If any installment under this section is not paid on or before the date fixed for its payment by this section (including any extension of time for the payment of such installment), the unpaid portion of the tax payable in installments shall be paid upon notice and demand from the Secretary.

"(B) PAYMENT WITHIN 6 MONTHS.—If any installment under this section is not paid on or before the date determined under subparagraph (A) but is paid within 6 months of such date—

"(i) the provisions of subparagraph (A) shall not apply with respect to such payment,

"(ii) the provisions of section 6601(j) shall not apply with respect to the determination of interest on such payment, and

"(iii) there is imposed a penalty in an amount equal to the product of—

"(I) 5 percent of the principal amount of such payment, multiplied by

"(II) the number of months (or fractions thereof) after such date and before payment is made.

The penalty imposed under clause (iii) shall be treated in the same manner as a penalty imposed under subchapter B of chapter 68."

(d) REPEAL OF SECTION 6166A.—Section 6166A (relating to extension of time for payment of estate tax where estate consists largely of interest in a closely held business) is hereby repealed.

(e) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Sections 303(b)(1)(C), 2204(c), and 6161(a)(2) are each amended by striking out "or 6166A" each place it appears.

(2) Paragraph (2) of section 2011(c) is amended by striking out "6161, 6166 or 6166A" and inserting in lieu thereof "6161 or 6166".

(3) Subsections (a) and (b) of section 2204 are each amended by striking out "6166 or 6166A" and inserting in lieu thereof "or 6166".

(4) Subsection (b) of section 2621 is amended—

(A) by striking out "sections 6166 and 6166A (relating to extensions" and inserting in lieu thereof "section 6166 (relating to extension", and

(B) by striking out "Sections 6166 and 6166A" in the heading thereof and inserting in lieu thereof "Section 6166".

(5)(A) Subsection (a) of section 6166 is amended by striking out paragraph (4).

(B) The section heading of section 6166 is amended by striking out "ALTERNATE".

(C) The table of sections for subchapter B of chapter 62 is amended by striking out the items relating to sections 6166 and 6166A and inserting in lieu thereof the following:

"Sec. 6166. Extension of time for payment of estate tax where estate consists largely of interest in closely held business."

(6)(A) Subsections (a), (c)(2), and (e) of section 6324A are each amended by striking out "or 6166A" each place it appears.

(B) Paragraphs (3) and (5) of section 6324A(d) are each amended by striking out "or 6166A(h)".

(C) The section heading for section 6324A is amended by striking out "or 6166A".

(D) The table of sections for subchapter C of chapter 64 is amended by striking out "or 6166A" in the item relating to section 6324A.

(7) Subsection (d) of section 6503 is amended by striking out "6163, 6166, or 6166A" and inserting in lieu thereof "6163 or 6166."

(8) Subsection (a) of section 7403 is amended by striking out "or 6166A(h)".

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to the estates of decedents dying after December 31, 1981.

SEC. 8. DISCLAIMERS.

(a) IN GENERAL.—Subsections (b) and (c) of section 2518 (relating to disclaimers with respect to interest in property) are amended to read as follows:

"(b) QUALIFIED DISCLAIMER DEFINED.—For purposes of subsection (a), the term "qualified disclaimer" means an irrevocable and unqualified refusal by a person (or his legal representative) to accept an interest in property but only if—

"(1) such refusal is in writing,

"(2) such writing is received by the transferor of the interest, his legal representative, or the holder of the legal title to the property to which the interest relates not later than the date which is 9 months after the later of—

"(A) the date on which such person first knows that the interest has become indefeasibly vested in him under applicable State property law, or

"(B) the day on which such person attains age 21,

"(3) such person has not accepted the interest or any of its benefits after attaining age 21 or, prior to the expiration of the 9-month period, has restored all benefits received, and

"(4) such writing does not direct or attempt to direct the disposition of the disclaimed interest.

"(c) OTHER RULES.—For purposes of subsection (a)—

"(1) PARTIAL DISCLAIMER.—A disclaimer which meets the requirements of the preceding sentence with respect to any part or interest less than the whole in any property, benefit, estate, interest, right (including without limitation) the accretive portion of jointly owned property acquired by right of survivorship), power of appointment or other power shall be treated as a qualified disclaimer.

"(2) POWERS OF APPOINTMENT.—A power with respect to property shall be treated as an interest in such property. The holder of a power of appointment may disclaim the right to appoint to any or all of the permissible appointees and the right to appoint any part or all of the property subject to the power.

"(3) DISCLAIMERS INEFFECTIVE UNDER STATE LAW.—A disclaimer ineffective under State law shall nevertheless be treated as a qualified disclaimer for purposes of subsection (a) if—

"(A) the disclaimer meets the requirements of subsection (b), and

"(B) on or before the last day on which the disclaimer must be received under subsection (b)(2), the disclaimant transfers the interest to the person to whom the interest would have passed had the disclaimant died immediately prior to the event as a result of which the interest became indefeasibly vested in him."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to interests which become indefeasibly vested in the disclaimant after December 31, 1981.

● Mr. PERCY. Mr. President, I am pleased to join today with my good colleague from Illinois, Senator DIXON, to introduce the Transfer Tax Reform Act of 1981. Representative EDWARD MADIGAN is introducing the same bill in the House.

We are introducing this bill at the request of the Illinois State Bar Association. The association has spent many months drafting this legislation to reform the estate and gift tax laws. It is important that it be considered by the Congress as it evaluates our present estate and gift tax laws and proposes changes.

In recent days, discussion of estate and gift tax reform has taken on new life. The President and the Republican and Democratic leaders of the Senate Finance Committee and House Ways and Means Committee have been discussing possible compromise tax bills. Figuring prominently in each of the publicly discussed proposals are changes in the estate and gift taxes.

I am encouraged by these developments and commend to my colleagues this proposal that we are sponsoring today.

There is, of course, good reason why attention has come to be focused on estate and gift taxation. Although Congress updated these so-called transfer taxes in 1976, inflation has had a corrosive effect on them. The estate and gift tax system is now woefully behind the times and is in need of immediate attention.

Mr. President, a day does not go by that my office does not receive a written plea from a hard-pressed farmer or small business to update our estate and gift taxes. Most of these letters come into my office as hand-written notes on plain paper, asking that they be allowed to keep a small family farm or business that might otherwise have to be sold just to pay estate taxes. We are all aware of this problem that should be addressed as soon as possible. The Illinois State Bar Association proposal is one way to move us in this direction.

The major features of this legislation are provisions that would:

First, increase the unified credit from the present $175,000 to $500,000 by 1985;

Second, increase the annual gift tax exclusion from the present $3,000 to $10,000. This part of the tax has not been updated since 1943 and should have been addressed in the last reform, 1976. Just 1 year's tuition at many colleges is now over $5,000. Unless this part of the Tax Code is updated, it is conceivable that IRS could tax the estates of parents who had sent their children to college.

Third, amend the definition of "qualified real property" to allow farms rented

to family members to qualify for estate tax provisions. Under the present law, when an elderly farmer stops farming and has his son or nephew farm the land for him, he can be disqualified for estate and gift tax rates. This bill remedies this inequity;

Fourth, add three rules to determine whether "material participation" exists to allow a property to be specially valued. These new rules would apply to disabled farmers or businessmen, surviving spouses and certain woodland owners;

Fifth, increase the value reduction limitation to $1 million by 1986. Present law states that special valuation cannot reduce estate taxes by more than $500,000. This provision would update the 1976 law, assuming an optimistic inflation rate of 10 percent between 1976 and 1986; and

Sixth, amend the present valuation methods to specify that rental value can be used in the special-use valuation formula without specific reference to other comparable farms leased on a similar basis. This provision also modifies another, little-used method of valuation, replacing it with a 50-percent discount from fair market value for qualifying farms and businesses in cases where real estate does not qualify for the rental formula method.

Mr. President, this bill does not pretend to be a comprehensive reform of the estate and gift tax laws. Rather, it makes a number of new proposals for ways to update the present, inadequate law. It should be considered by Congress along with other proposals now pending. The Illinois State Bar Association, whose members are close to the agricultural economy in Illinois, have worked hard and long in drawing up this proposal. I commend it to my colleagues.●

By Mr. BAUCUS (for himself and Mr. BRADLEY):

S. 1333. A bill to amend the Internal Revenue Code of 1954 to provide a capital cost recovery method which combines the investment credit with the depreciation deduction in a first-year allowance; to the Committee on Finance.

FIRST-YEAR CAPITAL COST RECOVERY ACT

● Mr. BAUCUS. Mr. President, for the last several weeks, the Finance Committee has been holding hearings on the administration's tax package. A great deal of attention has been focused on the 30-percent reduction in personal income taxes; somewhat less attention has been paid, at least by the media, to the proposals to reduce the tax burden of business, the so-called capital cost recovery plan, or 10–5–3. Yet I believe the latter is the more complex and the program which is more important in terms of improving our productivity.

In my view, 10–5–3, if not currently seriously faulted, has the potential for becoming so. For that reason, I am presenting with Senator BRADLEY an alternative proposal; it is an exciting new concept which has been too little discussed and as a result has not been given the attention it deserves. It is the first-year capital cost recovery system. Congressman SHANNON has presented a similar measure in the House of Representatives.

When this proposal has been brought up, it has been dismissed too rapidly because of misconceptions: It is viewed as potentially too complicated, as not being generous enough, as not being enough of a stimulant. Let me discuss these misconceptions.

Obviously, any tax system has its complications; only a system without tax is simple. But one of the most important factors of simplicity is the ability to deal with a tax directly and only once. Immediate expensing does that and so does first-year capital cost recovery; the major difference is that the latter does discount the writeoff to assure that the tax is fair and positive.

Second, but very important, one of the most difficult aspects of depreciation is the problem of inflation. How do you factor it into any equation? With the first-year system, it is simple: Since you do all your figuring in 1 year, inflation no longer plays a role; the same as immediate expensing. In other words, inflation does not play any role because your entire tax question is resolved within the first year. I believe this is one of the most attractive aspects of this proposal since as we all know, inflation is one of the biggest problems facing a business person today. Inflation creates unpredictability since one never knows at what level it will be in the future; therefore, having an accounting system which does not have to factor in inflation is a very large advantage.

Third, the view has been expressed that this measure is complicated. It is obviously more complicated than no tax, but on the other hand, it can be made fairly simple, too. We have four categories of assets and these can be expanded or diminished depending on how complicated or simple we want to make such a proposal. I believe four is a good number and provides enough categories to cover assets and yet few enough to make the proposal a simple one. Complicated books do not have to be kept on all assets.

But there are other advantages as well. The failure to sever inflation's capricious link with investment is not the only drawback of 10–5–3, as Professor Jorgenson, one of the authors of this proposal, has stated. What will happen under 10–5–3 is that people will seek tax shelters in those categories, moving away once again from productive and economically sound investments. As Professor Jorgenson has pointed out, 10–5–3 confuses the need for improved productivity with simple capital formation. To provide tax incentives for capital formation without resultant productivity does not make sense.

Let me summarize once again the advantages that I see in having a first-year capital cost recovery system:

First, it allows businesses to depreciate assets in the same dollars they are purchased in, thereby doing away with the problem of inflation.

Second, it matches tax writeoffs with the economic cost of depreciation, thereby equalizing tax burdens among all assets.

Third, businesses are freed from the requirement of complex reporting. The first-year allowance would be the only deduction that would have to be reported.

Fourth, its goal is to increase our productivity.

Fifth, if inflation were to drop as the administration thinks will happen, 10–5–3 will be in fact a subsidy to business. There is no point in having a tax if it ends up being a subsidy. The first-year system is, therefore, a fair and equitable tax designed to increase productivity and yet provide incentives to business.

Mr. President, for all these reasons I believe it is very important that the Senate seriously consider the first year capital cost recovery program. I am pleased to be presenting this legislation with Senator BRADLEY and look forward to its consideration by the Finance Committee and the Senate as a whole. I ask unanimous consent that several documents in support of this proposal including a concise article by Professor Jorgenson and Peter Navarro published on May 5 in the New York Times, an editorial of that date, and an article from the March 9 edition of Fortune magazine, along with the text of the bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1333

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "First-Year Capital Cost Recovery Act of 1981".

(d) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. FIRST-YEAR CAPITAL COST RECOVERY METHOD.

(a) IN GENERAL.—Part VI of subchapter B of chapter 1 (relating to itemized deductions for individuals and corporations) is amended by inserting after section 167 the following new section:

"SEC. 168. FIRST-YEAR CAPITAL COST RECOVERY METHOD.

"(a) ALLOWANCE OF DEDUCTION.—There shall be allowed as a deduction an amount equal to the aggregate of the applicable percentage of the basis of each first-year recovery property placed in service by the taxpayer during the taxable year.

"(b) CLASS AND APPLICABLE PERCENTAGE.—

"(1) IN GENERAL.—All first-year recovery property—

"(A) shall be placed in 1 of the 4 classes set forth in the following table, and

"(B) shall have the applicable percentage set forth for such class in the following table:

"Class	Applicable percentage:
1	98. 5
2	97. 3
3	94. 8
4	92. 7

"(2) ASSIGNMENT TO CLASSES.—The Secretary shall prescribe a table which sets forth

the types of assets which fall into each of the 4 classes.

"(3) INITIAL ASSIGNMENT OF PROPERTY TO CLASS.—

"(A) IN GENERAL.—For purposes of this section—

"First-year recovery property with present class life (in years)	Shall be placed in class:
Less than 4	1
4 or more but less than 8.5	2
8.5 or more but less than 14.5	3
14.5 or more	4

"(B) PRESENT CLASS LIFE.—For purposes of this paragraph, the present class life of any property is the class life (if any) which would be applicable to such property as of May 1, 1981, under section 167(m) (determined without regard to any regulation, ruling, or announcement published by the Secretary after such date).

"(4) ASSIGNMENT TO DIFFERENT CLASS.—The Secretary may assign any property to a different class if the Secretary determines that as a result of such assignment the yearly declines (in constant dollars) in the value of the property will be more accurately reflected (relative to such declines for other property).

"(5) PROPERTY FOR WHICH THERE IS NO CLASS LIFE.—If a present class life cannot be determined under paragraph (3)(B) with respect to any property, the Secretary shall assign such property to a class in a manner consistent with paragraph (4).

"(c) FIRST-YEAR RECOVERY PROPERTY DEFINED.—Except as otherwise provided in this section, for purposes of this title, the term 'first-year recovery property' means tangible property—

"(1) which is of a character subject to the allowance for depreciation,

"(2) which is—

"(A) personal property, or

"(B) other property (not including a building and its structural components) but only so long as it meets the requirements of clause (i), (ii), or (iii) of section 1245(a)(3)(B), and

"(3) which is placed in service by the taxpayer after December 31, 1980.

"(d) CERTAIN PROPERTY EXCLUDED FROM DEFINITION OF FIRST-YEAR RECOVERY PROPERTY.—For purposes of this section—

"(1) PROPERTY USED PREDOMINANTLY OUTSIDE THE UNITED STATES.—The term 'first-year recovery property' does not include property which, during the taxable year, is used predominantly outside the United States (within the meaning of paragraph (2) of section 48(a)).

"(2) CERTAIN LIVESTOCK.—The term 'first-year recovery property' does not include livestock (within the meaning of section 1231(b)(3) without regard to the period for which such livestock has been held by the taxpayer) other than items of livestock which the taxpayer elects to treat as first-year recovery property.

"(3) CERTAIN METHODS OF DEPRECIATION.—The term 'first-year recovery property' does not include—

"(A) property if—

"(i) the taxpayer elects to exclude such property from the application of this section, and

"(ii) for the first taxable year for which a deduction would (but for such election) be allowable under this section with respect to such property, the property is depreciated under the unit-of-production method or any other method of depreciation not expressed in a term of years,

"(B) property which is a leasehold improvement which is depreciated or amortized over the term of the lease, or

"(C) property which is depreciated under the retirement-replacement-betterment method.

"(4) AMORTIZATION PROPERTY.—The term 'first-year recovery property' does not include property with respect to which the taxpayer—

"(A) is entitled to elect amortization (in lieu of depreciation), and

"(B) elects such amortization.

"(5) PUBLIC UTILITY.—The term 'first-year recovery property' does not include—

"(A) any public utility property with a present class life of more than 18 years, and

"(B) any public utility property with a present class life of 18 years or less unless the taxpayer uses a normalization method of accounting (within the meaning of section 167(l)(3)(G)) with respect to such property.

For purposes of the preceding sentence, the present class life of any property shall be determined under rules similar to the rules of paragraphs (3)(B), (4), and (5) of subsection (b).

"(6) OIL OR GAS FIRED BOILERS.—The term 'first-year recovery property' does not include any boiler described in section 167(p).

"(7) NONCORPORATE LESSORS.—In the case of a person other than a corporation, the term, 'first-year recovery property' includes property with respect to which such person is the lessor only if subparagraph (A) or (B) of the first sentence of section 46(e)(3) is met with respect to such property.

"(e) SPECIAL RULES FOR DISPOSITIONS OF FIRST-YEAR RECOVERY PROPERTY.—For purposes of this title (other than this section)—

"(1) ZERO BASIS.—The adjusted basis of any first-year recovery property shall be zero.

"(2) DISPOSITIONS.—In the case of any disposition of first-year recovery property—

"(A) the applicable percentage (determined under subsection (b)) of—

"(i) the amount realized, or

"(ii) in the case of a disposition other than a sale, exchange, or involuntary conversion, the fair market value of such property,

shall be treated as ordinary income and shall be recognized notwithstanding any other provision of this subtitle, and

"(B) no gain other than that treated as ordinary income under subparagraph (A) shall be recognized.

"(f) SPECIAL RULES.—

"(1) DISPOSITIONS WITHIN 1 YEAR AFTER PLACED IN SERVICE.—The term 'first-year recovery property' shall not include any property if such property is disposed of by the taxpayer before the date 1 year after the date on which such property was placed in service.

"(2) PROPERTY FOR WHICH INVESTMENT CREDIT NOT ALLOWABLE.—If a credit would not be allowable under section 38 to the taxpayer with respect to any first-year recovery property (determined without regard to sections 48(a)(11) and 48(c)(2)), the applicable percentage for such property shall be determined under the following table (in lieu of the table contained in subsection (b)(1)(B)):

"Class:	Applicable percentage:
1	91.3
2	79.5
3	73.1
4	71.0

"(3) PROPERTY WHICH CEASES TO BE FIRST-YEAR RECOVERY PROPERTY.—If any first-year recovery property for which a deduction was allowable to the taxpayer under this section ceases to be first-year recovery property with respect to the taxpayer—

"(A) the taxpayer shall be treated as having disposed of such property for an amount equal to its fair market value as of the date of such cessation, and

"(B) the basis of such property in the hands of the taxpayer after the date of such cessation shall be treated as equal to such fair market value.

"(4) PUBLIC UTILITY PROPERTY.—For purposes of this section, the term 'public utility property' has the meaning given to such term by section 167(l)(3)(A) except that, for purposes of this section, clause (iv) of such section shall be applied as if it read as follows:

"'(iv) transportation of gas, oil, or steam by pipeline,'.

"(g) PHASE-IN.—

"(1) REDUCTION OF DEDUCTION FOR PROPERTY PLACED IN SERVICE BEFORE 1990.—

"(A) IN GENERAL.—In the case of any first-year recovery property placed in service before 1990, the amount allowable as a deduction under this section shall be the phase-in percentage of the amount which, but for this paragraph, would have been so allowable with respect to such property.

"(B) PHASE-IN PERCENTAGE.—For purposes of subparagraph (A)—

"In the case of property placed in service during:	The phase-in percentage is:
1981	35
1982	50
1983	60
1984	70
1985	75
1986	80
1987	85
1988	90
1989	95

"(2) DENIED DEDUCTION PLACED IN SUSPENSE ACCOUNT.—The taxpayer shall establish a suspense account for purposes of this subsection. As of the close of each taxable year ending after December 31, 1980—

"(A) the taxpayer shall add to such suspense account the aggregate amount disallowed as a deduction by reason of paragraph (1) with respect to property placed in service during such taxable year,

"(B) the taxpayer shall add to such account an amount equal to the balance in such account (as of the first day of such taxable year), multiplied by one-half of the rate of interest in effect under section 6621 as of the middle of such taxable year, and

"(C) the taxpayer shall subtract from such account the amount by which the amount allowable as a deduction under subsection (a) for such taxable year is increased by reason of paragraph (3).

"(3) ALLOWANCE OF SUSPENDED DEDUCTIONS.—

"(A) IN GENERAL.—In the case of taxable years beginning after 1981 and before 1991, the recovery percentage of the balance in the suspense account established by the taxpayer under paragraph (2) shall be added to the amount allowable as a deduction under subsection (a) for such taxable year. Such balance shall be determined as of the close of the taxable year but before making the adjustments under subparagraphs (A) and (C) of paragraph (2) for the taxable year.

"(B) RECOVERY PERCENTAGE.—For purposes of subparagraph (A)—

"In the case of taxable years beginning in:	The recovery percentage is:
1982	25
1983	30
1984	35
1985	40
1986	45
1987	50
1988	55
1989	70
1990	100

"(h) OTHER TRANSITIONAL RULES.—

"(1) LIMIT ON USED PROPERTY.—For purposes of this section—

"(A) IN GENERAL.—In the case of property placed in service in a taxable year beginning before 1984, the term 'first-year recovery property' shall include used property only to the extent that the aggregate cost of used property placed in service during such taxable year does not exceed the limitation determined under the following table:

"In the case of a taxable year beginning in:	The limitation is:
1980 or 1981	$100,000
1982	200,000
1983	300,000

If such cost exceeds the limitation determined under the preceding table, the taxpayer shall select (at such time and in such manner as the Secretary shall by regulations prescribe) the items of used property which are to be treated as first-year recovery property, but only to the extent of an aggregate cost not in excess of such limitation. Such a selection, once made, may be changed only in the manner, and to the extent, provided by such regulations.

"(b) USED PROPERTY.—For purposes of this paragraph, the term 'used property' means any property—

"(i) the orilgnal use of which does not begin with the taxpayer, and

"(ii) which is first-year recovery property (determined without regard to this paragraph).

"(C) COORDINATION WITH LIMITATION ON USED PROPERTY FOR INVESTMENT TAX CREDIT.—The limitation of section 48(c)(2) applicable to the taxpayer for any taxable year shall be reduced by an amount equal to the cost of any used property taken into account under this section for such taxable year.

"(D) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of subparagraphs (B), (C), and (D) of paragraph (2) of section 48(c) and of paragraph (3) of section 48(c) shall apply for purposes of this paragraph.

"(2) PROPERTY CONTINUES TO BE USED BY SAME PERSON.—The term 'first-year recovery' shall not include any property acquired by the taxpayer if, after its acquisition by the taxpayer, it is used by a person who used such property before January 1, 1981 (or by a person who bears a relationship described in subparagraph (A) or (B) of section 179(c)(2) to a person who used such property before such date).

"(i) PARTNERSHIPS, SUBCHAPTER S CORPORATIONS, AND OTHER PASSTHROUGH ENTITIES.—The Secretary shall prescribe such regulations as may be necessary to ensure that the tax treatment of each partner, shareholder, or other beneficiary of a partnership, electing small business corporation, or other passthrough entity with respect to the acquisition, disposition, or distribution of (or other transaction with respect to) first-year recovery property by the entity is consistent with the treatment which would result if such beneficiary engaged in such transaction directly."

(b) FIRST-YEAR RECOVERY DEDUCTION AS TREATED AS DEPRECIATION.—Subsection (a) of section 167 (relating to depreciation) is amended by adding at the end thereof the following new sentence: "In the case of first-year recovery property (as defined in section 168(c)), the deduction allowable under section 168 shall be deemed to constitute the reasonable allowance provided by this section."

(c) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by inserting after the item relating to section 167 the following new item:

"Sec. 168. First-year capital cost recovery method."

SEC. 3. DEPRECIATION OF REAL PROPERTY.

Section 167 (relating to depreciation) is amended by redesignating subsection (s) as subsection (t) and by inserting after subsection (r) the following new subsection:

"(s) METHOD OF DEPRECIATING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of section 167(s) property (other than low-income housing), the depreciation allowance under subsection (a) shall be computed under the straight line method using a useful life of 20 years and no salvage value.

"(2) LOW-INCOME HOUSING.—In the case of low-income housing, the depreciation allowance under subsection (a) shall be computed under the straight line method using a useful life of 15 years and no salvage value.

"(3) DEFINITIONS.—For purposes of this subsection—

"(A) SECTION 167(s) PROPERTY.—Except as provided in subparagraph (B), the term 'section 167(s) property' means any property—

"(i) which is section 1250 property or an elevator or escalator which would be section 1250 property but for section 1245(a)(3)(C), and

"(ii) which is placed in service after December 31, 1980.

"(B) EXCEPTION FOR PROPERTY FOR WHICH CLASS LIFE IS PRESCRIBED UNDER SUBSECTION (m).—The term 'section 167(r) property' shall not include any property for which a class life is in effect under subsection (m) as of May 1, 1981.

"(C) LOW-INCOME HOUSING.—The term 'low-income housing' means any property described in clause (i), (ii), (iii), or (iv) of section 1250(a)(1)(B)."

SEC. 4. $25,000 OF DEPRECIABLE BUSINESS ASSETS TREATED AS EXPENSE.

(a) IN GENERAL.—Section 179 (relating to additional first-year depreciation allowance for small business) is amended to read as follows:

"SEC. 179. EXPENSE TREATMENT FOR CERTAIN DEPRECIABLE BUSINESS ASSETS.

"(a) TREATMENT OF EXPENSES.—The cost of any section 179 property shall be treated as an expense which is not chargeable to capital account. Any cost so treated shall be allowed as a deduction for the taxable year in which the section 179 property is placed in service.

"(b) DOLLAR LIMITATION.—

"(1) IN GENERAL.—The aggregate cost taken into account under subsection (a) for any taxable year shall not exceed $25,000 ($12,500 in the case of a married individual filing a separate return).

"(2) ORDER IN WHICH PROPERTY TAKEN INTO ACCOUNT.—Except as otherwise provided in regulations prescribed by the Secretary, if the aggregate cost of section 179 property placed in service by the taxpayer during the taxable year exceeds the limitation of paragraph (1), property shall be taken into account under subsection (a)—

"(A) in the order of the classes in which such property is placed under section 168(b) (beginning with the class with the lowest number), and

"(B) within any class, in the order in which the property is placed in service.

"(c) DEFINITIONS AND SPECIAL RULES.—

"(1) SECTION 179 PROPERTY.—For purposes of this section, the term 'section 179 property' means any first-year recovery property which is acquired by purchase for use in a trade or business.

"(2) PURCHASE DEFINED.—For purposes of paragraph (1), the term 'purchase' means any acquisition of property, but only if—

"(A) the property is not acquired from a person whose relationship to the person acquiring it would result in the disallowance of losses under section 267 or 707(b) (but, in applying section 267 (b) and (c) for purposes of this section, paragraph (4) of section 267(c) shall be treated as providing that the family of an individual shall include only his spouse, ancestors, and lineal descendants),

"(B) the property is not acquired by one component member of a controlled group from another component member of the same controlled group, and

"(C) the basis of the property in the hands of the person acquiring it is not determined—

"(i) in whole or in part by reference to the adjusted basis of such property in the hands of the person from whom acquired, or

"(ii) under section 1014(a) (relating to property acquired from a decedent).

"(3) SPECIAL RULE FOR SECTION 1031 OR 1033 EXCHANGES.—For purposes of this section, in the case of any property received in an exchange described in section 1031 or 1033, the cost of such property shall only include money or the fair market value of other property (within the meaning of section 1031), or the fair market value of property not similar or related in service or use (within the meaning of section 1033) received by the taxpayer.

"(4) SECTION NOT TO APPLY TO ESTATES AND TRUSTS.—This section shall not apply to estates and trusts.

"(5) DOLLAR LIMITATION OF CONTROLLED GROUP.—For purposes of subsection (b) of this section—

"(A) all component members of a controlled group shall be treated as one taxpayer, and

"(B) the Secretary shall apportion the dollar limitation contained in subsection (b) among the component members of such controlled group in such manner as he shall by regulations prescribe.

"(6) CONTROLLED GROUP DEFINED.—For purposes of paragraphs (2) and (5), the term 'controlled group' has the meaning assigned to it by section 1563(a), except that, for such purposes, the phrase 'more than 50 percent' shall be substituted for the phrase 'at least 80 percent' each place it appears in section 1563(a)(1).

"(7) DOLLAR LIMITATION IN CASE OF PARTNERSHIPS.—In the case of a partnership, the dollar limitation contained in subsection (b) shall apply with respect to the partnership and with respect to each partner.

"(8) COORDINATION WITH SECTION 168.—

"(A) WHERE ENTIRE COST DEDUCTED.—If the entire cost of any section 179 property (determined without regard to paragraph (3)) is allowed as a deduction under subsection (a), such property shall not be treated as first-year recovery property for purposes of section 168.

"(B) WHERE ONLY PART OF COST DEDUCTED.—If only a portion of the cost of any section 179 property (determined without regard to paragraph (3)) is allowed as a deduction under subsection (a)—

"(i) such property shall not be treated as first-year recovery property for purposes of section 168 to the extent of the amount allowed as a deduction under subsection (a) of this section, and

"(ii) in the case of any disposition of such property, for purposes of sections 1245 and 168(f), the taxpayer shall be treated as having disposed of 2 properties each which bears the same ratio to fair market value at the time of disposition as the amount taken into account under this section or section 168 (as the case may be) bears to the sum of such 2 amounts."

(b) TECHNICAL AMENDMENTS.—

(1) Paragraph (1) of section 263(a) (relating to capital expenditures) is amended—

(A) by striking "or" at the end of subparagraph (F);

(B) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a comma and "or", and

(C) by adding at the end thereof the following new subparagraph:

"(H) the cost of any property deductible under section 179.".

(2) Subparagraph (A) of section 1033(g)(3) (relating to condemnation of real property held for productive use in trade or business or for investment) is amended by striking out "(relating to additional fiscal-year depreciation allowances for small business)" and inserting in lieu thereof "(relating to expense treatment for certain depreciable business assets)".

(c) RECAPTURE RULE.—Subsection (a) of section 1245 (relating to gains from dispositions from certain depreciable property) is amended—

(1) by striking out "169, 184" each place

it appears in paragraph (2) and inserting in lieu thereof "169, 179, 184",

(2) by striking out "section 190" in the third sentence of paragraph (2) and inserting in lieu thereof "sections 179, 190", and

(3) by striking out "169, 185" in paragraphs (2)(D) and (3)(D) and inserting in lieu thereof "169, 179, 185".

(d) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by striking out the item relating to section 179 and inserting in lieu thereof the following:

"Sec. 179. Expense treatment for certain depreciable business assets."

SEC. 5. THIRTY PERCENT VARIANCE FROM CLASS LIFE FOR LONG-LIFE PUBLIC UTILITY PROPERTY AND CERTAIN REAL PROPERTY.

Subsection (m) of section 167 (relating to class lives) is amended by adding at the end thereof the following new paragraph:

"(4) 30 PERCENT VARIANCE FOR LONG-LIFE PUBLIC UTILITY PROPERTY AND CERTAIN REAL PROPERTY.—In the case of—

"(A) any property which is placed in service after December 31, 1980, and is described in subparagraph (A) of section 168(d)(5) (relating to long-life public utility property), and

"(B) any property placed in service after December 31, 1980, which would be section 167(s) property but for subsection (s)(3)(B),

the last sentence of paragraph (1) shall be applied by substituting '30 percent' for '20 percent'".

SEC. 6. TERMINATION OF INVESTMENT TAX CREDIT.

(a) GENERAL RULE.—Subsection (a) of section 48 (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(11) FIRST-YEAR RECOVERY PROPERTY.—The term 'section 38 property' shall not include any first-year recovery property (as defined in section 168)."

(b) CONTINUATION OF ENERGY CREDIT.—Subparagraph (B) of section 48(l)(1) (relating to energy property treated as section 38 property) is amended by striking out "paragraph (3)" and inserting in lieu thereof "paragraphs (3) and (11)".

SEC. 7. EFFECTIVE DATE.

The amendments made by this Act shall apply to taxable years ending after December 31, 1980.

[From the New York Times, May 5, 1981]

10-5-3: "DEEPLY FLAWED"

(By Dale W. Jorgenson and Peter Navarro)

CAMBRIDGE, MASS.—There is now bipartisan consensus on Capitol Hill that business needs a tax cut to stimulate capital investment in order to improve productivity and generally revitalize America. Unfortunately, that consensus is coalescing around the Reagan Administration's highly touted, but nonetheless deeply flawed, "10-5-3" tax write-off program.

Ostensibly, 10-5-3 removes the crippling "inflation penalty" that the current business tax imposes. The penalty arises because businesses must deduct depreciation expenses according to original, rather than replacement, costs. At higher inflation rates, these deductions are worth less, so inflation in effect levies an additional tax.

The 10-5-3 approach seeks to lift this penalty through a super-accelerated depreciation plan that would allow businesses to write off depreciation on structures over 10 years, equipment over 5 years, and vehicles over 3 years. To further stimulate investment, 10-5-3 would also substantially increase the investment tax credit.

It is clear, however, that 10-5-3 does not really sever the link between inflation and investment. Instead it merely tries to "outrun" inflation. However, when 10-5-3's super-depreciation interacts with the souped-up investment tax credit, the perverse result is to transform the corporate income tax into a very large corporate subsidy. For example, at today's double-digit inflation, 10-5-3 would provide businesses with an 85 cent deduction on every dollar invested in a "5-year asset" period. The souped-up investment credit would add the equivalent of another 20 cents in write-offs so that the total tax deduction would be worth $1.05, or a 5-cent subsidy! Moreover, this subsidy would rise as inflation fell. Indeed, if the Administration reached its low-inflation target, the subsidy would balloon. That in turn would mean either higher personal income taxes, or a bigger budget deficit and renewed inflation.

The failure to sever inflation's capricious link with investment is not the only drawback of 10-5-3. The proposal also significantly widens the gaps that now exist between tax burdens for different investments. These gaps arise because the current system provides better tax breaks for some assets and industries than for others. That encourages a channeling of funds toward tax shelters and away from economically sound investments. Under 10-5-3, these gaps would approximately double, resulting in an even less-productive application of investment.

It is clear then that 10-5-3 confuses the real purpose of a business tax cut, which is not capital formation per se but rather improved productivity. In doing so, it raises the prospect of large-scale, unfair, and inefficient business subsidies that would rise and fall with the inflation roller coaster.

But can a business tax be designed that neither penalizes nor subsidies business, is inflation-neutral, and encourages the best use of capital?

We think that these objectives can be obtained by using the first-year capital-recovery system.

Under this system, businesses would deduct a first-year allowance in the year that an asset is acquired. Depreciation write-offs that would normally stretch out over the entire life of an asset would be converted into a single deduction, taking into account different lives of assets and the time value of money. For example, the allowance for a computer would be 82 cents on each dollar, while the allowance on a longer-"lived" building housing that computer would be 29 cents.

The advantages of the first-year system are obvious.

First, by allowing businesses to depreciate assets in the same dollars they are purchased in, it completely eliminates the inflation penalty.

Second, by matching tax write-offs with the economic cost of depreciation, it would equalize tax burdens among all assets, allowing investors from all industries and regions to compete on equal terms. That would be fairer and enlarge the economic pie by making the most productive use of every investment dollar.

Third, the first-year system is even simpler than 10-5-3 and would provide businesses with another important kind of tax relief—namely, freedom from complex reporting requirements. Indeed, the first-year allowance would be the only deduction that a taxpayer would ever have to report.

The primary disadvantage of the first-year system is, of course, its novelty.

While 10-5-3 has been kicking around Congress for more than a year and has the Reagan Administration's endorsement, the first-year system is still a relatively new idea germinating in Congressional committees.

Despite its low profile, the system does represent a constructive alternative to the seductively simple, but ultimately error-prone, super-depreciation dance of 10-5-3.

[From the New York Times, May 5, 1981]

REAL DEPRECIATION, REAL INFLATION

Official Washington is convinced that a business tax cut is needed to spur industrial investment. But that is only half the battle. As the economists Dale Jorgenson and Peter Navarro point out on the opposite page, President Reagan is backing the flawed "10-5-3" accelerated depreciation approach over a more effective alternative. Congress can do better.

In a world of high inflation, the capital depreciation that companies are permitted to deduct from taxable income is often less than it costs to replace wornout machines and buildings. Much of what the law labels as taxable profit exists only on paper. Real profit falls, and with it, the incentive to invest.

The proposed Reagan answer is to increase the tax credit for some industrial investment, and allow businesses to depreciate all investments more rapidly. His package, labeled 10-5-3 for the depreciable life of each of three investment categories, would clearly increase investment incentives by cutting taxes on profits. But the drawbacks are equally clear.

Souped-up depreciation, coupled with the more generous tax credit, favors investment in short-lived equipment over the more durable sort. Business shrugs off the problem, concentrating on the certain benefits of fast tax write-offs rather than the subtler questions of incentives. However, at a time when corporate America is being criticized for ignoring long-term planning, such a bias seems particularly perverse.

Equally important, 10-5-3 would merely give business a headstart in the race with rising costs. It would not do what most needs to be done: sever the connection between inflation and effective tax rates. If inflation speeded up, business would lose the ground it gained. If price increases slowed, corporate tax rates would fall, perhaps even below zero!

The Jorgenson-Navarro alternative would match tax depreciation schedules as closely as possible to the actual useful lives of various types of equipment. It would also break the link between inflation and investment incentives by what Professor Jorgenson and his other Harvard colleague, Alan Auerbach, call "first year" capital recovery.

Instead of providing regular depreciation allowances whose real value is determined by future price levels, the entire tax break would come in the year of the investment. That way, high inflation wouldn't raise the tax rate on corporations. Nor would low inflation reduce it. Business could live with 10-5-3—and surely live better than with no change in the depreciation system. But that's not the real issue. Since everyone seems to agree that business taxes ought to be cut, why not make it a reform for all seasons?

[From Fortune Magazine, Mar. 9, 1981]

A TAX STRATEGY TO RENEW THE ECONOMY

(By A. F. Ehrbar)

One of the most encouraging developments in American political attitudes is the new consensus that our tax system has become a formidable barrier to economic growth and that it needs to be drastically overhauled to restore incentives to work and invest.

With Congress no longer in the redistributive frame of mind that shaped tax legislation in the late Sixties and mid-Seventies, there is a glittering opportunity to enact a reform program that will spur productivity and growth. The Reagan Administration seems clearly determined to modify the steeply progressive structure of the personal income tax. Marginal tax rates—the rates on last-dollar income that determine whether a person is willing to take on a more exacting job or invest his money at higher risk—have risen substantially as inflation has pushed wage and salary earners into higher and

higher brackets. About 20 percent of all taxpayers are now in the 30 percent bracket or higher, as against a mere 2 percent in 1965.

A cut in rates is sorely needed, but it is only the beginning. Two other reforms are essential to relieve the costly drag that the tax system imposes on the economy. One is to remove the system's bias against personal savings, and the other is to eliminate the debilitating distortions caused by taxes on business profits. Fortune has some radical proposals to accomplish these objectives.

A MINUS RETURN ON INVESTMENT

The proposition that Americans consume too much and save too little seems indisputable. With savings rates—and accordingly, the supply of capital for investment—at depressed levels, industry is adding to plant and equipment at only half the rate of the late Sixties, the amount of capital per worker has actually been shrinking, and productivity growth is at a standstill.

The way we tax investment returns has contributed to the decline in savings. At high levels of inflation, taxes on dividends and interest often exceed the real return to the investor, so that investors end up poorer than they started. When inflation is at, say, 10 percent and bonds yield 13 percent, the real return is only 3 percent. But the bondholder pays taxes on the whole 13 percent. If he is in the 30 percent bracket, his real after-tax return is minus 0.8 percent. In the top, 70 percent bracket, it is minus 5.5 percent.

The surest way to eradicate that savage bias against savings would be to eliminate all taxes on capital income. That wouldn't be as unconscionably regressive as it might seem. For one thing, the rich can already escape taxes by putting their money in tax shelters that don't do much for economic growth or in assets that don't leave a paper trail for the IRS. As economist Milton Friedman observes, "The problem isn't really a bias against savings, but a bias against productive investment. The tax system encourages the wealthy to put their savings into gold, art, and other things that provide inflation hedges and escape taxes." Low-income workers would plainly benefit if the wealthy shifted their savings from old Packards to new factories.

Congress isn't about to let the Mellons and McCormicks off the hook, of course, but it could achieve the same measure of savings stimulus in a way that should be politically attractive. This is to allow everyone to set up tax-deferred investment and savings accounts along the lines of Keogh plans and Individual Retirement Accounts. (Employees who aren't covered by company pension or profit-sharing plans are allowed to invest 15 percent of their earnings, tax-deductible, up to a $1,500 annual limit, in IRAs; the self-employed can put up to $7,500 a year in Keogh plans.) Under Fortune's proposal there would be no limit on deductible contributions, whether they were in the form of savings-account deposits or purchases of securities; but all withdrawals—including principal as well as earnings—would be subject to taxation at ordinary rates.

In its result, the tax-deferral scheme is precisely equivalent to making investment income tax-exempt. An individual who invested pretax dollars and paid taxes on total withdrawals would end up with the same amount as one who invested after-tax dollars and paid no taxes on the investment income. However, the tax-deferral method has an important equity advantage. It exempts only income from new savings, so that people without capital get the same break, relative to their incomes, as the wealthy. For instance, if all investment income were simply exempted from taxes, an individual with $50,000 of dividends on past investments and no wage or salary income would pay no taxes at all, while a person with a $50,000 salary and no income from past savings would pay the same taxes as he does now. This would obviously be unfair. But with tax-deferred accounts, both would pay identical taxes if they saved the same portion of their $50,000 incomes.

Critics of tax-deferred accounts complain that they are regressive because people with high incomes reap most of the benefits. That is quite true, but the tax system imposes such an enormous burden on the economy precisely because it has become so progressive. It's a defensible assumption that people at the low end of the income spectrum have more to gain from good jobs than they do from soaking the rich, and a tax system that encourages saving and investment is a key to creating jobs.

Universal tax deferral on investment income would take a large bite out of the tax base and require higher rates on the remaining taxable income. But Congress could make up the lost revenue by knocking off some other deductions. Prime candidates are the deductions now permitted for state and local taxes, property taxes on owner-occupied homes, and interest payments. Any tampering with these would be sure to provoke a howl of protest from middle-income homeowners. But a good case can be made that they will come out as well or better with tax-deferred savings accounts than they do now with their real-estate deductions. Those with a high propensity to save would do a lot better than the rest—but then that is the point of the whole thing.

A DEADLY DEDUCTION

In any event, the deduction on interest paid has to be repealed if large tax-deferred investment accounts are permitted. Otherwise, an individual could "game" the tax system by borrowing whatever he contributed to a tax-deferred account. By deducting his interest costs as well as his contributions, he could get a sizable break without doing any real saving. Indeed, the tax code already contains a plethora of supposed savings incentives—such as the $200-per-person exclusion of dividend and interest income that goes into effect this year—but the interest deduction defeats the purpose.

It would obviously be unfair to end interest deductions all at once. Many people have arranged their finances on the basis of the deduction and could suffer large losses. But Congress could phase it out by gradually lowering the amount of interest that can be deducted. As for those multitudes of mortgage-holding homeowners, there is a novel way to induce them to surrender their cherished interest deduction.

Various other proposals to encourage thrift have been circulating in Washington, but none seems as workable as the tax-deferred-investment approach. For instance, Representative Richard T. Schulze, a Pennsylvania Republican, is pushing a 10 percent tax credit, up to $1,000 per person, on purchases of stocks and bonds. Brokerage houses naturally love the idea, but it's an open invitation to game the system. A couple could borrow $20,000, buy $20,000 worth of bonds, use the interest income to offset their interest costs, and spend the $2,000 credit on a trip to Tahiti.

THE FALSE LOGIC OF 10–5–3

Any program of tax changes to encourage individual saving should be accompanied by revisions that will invite business to make more investments to improve productivity. One essential is to alter the way business depreciates its fixed assets, but not for the reasons usually advanced in favor of faster write-offs. The conventional argument is that depreciation based on original costs is inadequate in periods of high inflation. Since much of the write-off comes years after an asset is acquired, original costs don't reflect the full value of equipment used up in the production process. By taking inadequate depreciation, businesses overstate their profits and pay too much tax.

That is the logic behind the "10–5–3" proposal backed by all the major business lobbies. It provides that buildings would be written off over ten years, equipment over five years, and cars and light trucks over three. By some estimates, 10–5–3 would pare business taxes by more than $60 billion in 1985.

The analysis of inflation's effect on depreciation is correct, but the excessive-taxation argument ignores what happens on the liability side of the balance sheet. Companies get an untaxed gain when inflation reduces the value of their fixed debt. Viewed another way, the interest rate they pay is set high enough to compensate the lender not only for the use of his money but also for the deterioration in its value. So part of the company's interest costs really amount to repayment of principal—which would not, of course, be deductible if it were so defined. It turns out that aggregate corporate tax payments wouldn't change very much if both depreciation and interest deductions were properly adjusted for inflation; some companies would pay less, others more. (See "Unraveling the Mysteries of Corporate Profits," Fortune, August 27, 1979.)

The real trouble with the current depreciation system is that it's a mess with or without inflation. Accelerated depreciation write-offs, in use since 1954, result in different effective tax rates on investments with different lives, so that investment decisions are based on tax considerations rather than real returns. Such misallocation of capital results in less output and slower growth, even when prices are stable. Inflation merely shifts the tax preference to different assets.

The 10–5–3 plan, and variations on it, would distort investment returns in the same way as the current accelerated write-offs. Moreover, the combination of 10–5–3 and the investment credit would give rise to outright tax subsidies. It would be even more generous than simply allowing a company to deduct the whole cost of a capital investment when it is made.

A DISTORTION-FREE SYSTEM

Two Harvard economists, Dale Jorgenson and Alan Auerbach, have advanced a proposal that would do away with the concept of accelerated depreciation and match write-offs to true economic depreciation. Write-offs would be calculated so that they correspond as closely as possible with the actual deterioration of a piece of equipment. But companies would be allowed to take all depreciation write-offs in advance, when they acquired the equipment. This would eliminate the distortion caused by inflation because purchases and depreciation allowances would be in dollars with the same value.

Depreciation that will occur in the future would be discounted back to the time of purchase at a 4-percent interest rate—so that, for instance, the $1 million of depreciation that would take place in the second year would be written off immediately, but the company would take a tax deduction of only $961,538. Why 4 percent? Because Jorgenson and Auerbach believe that is the best estimate of the average real return on business equipment. That figure may be open to dispute, but it's hard to fault the basic concept.

The Jorgenson-Auerbach approach, known as "present value" depreciation, sounds complex but is really quite simple. They figure that all assets can be divided into just 12 to 14 categories, ranging from construction machinery to commercial buildings. To establish the depreciation, you would just consult a Treasury table for the category "factor," and multiply the factor by the cost.

As part of their scheme, Jorgenson and Auerbach favor dropping the investment tax credit. The credit applies only to capital equipment, not structures. There is no doubt that it has boosted spending on equipment (and the number of doctors driving Mercedes-Benzes). But a study that Auerbach and Lawrence Summers, an MIT economist, did for the National Bureau of Economic Research suggests that more than half of the added investment attributable to the credit came at the expense of other kinds of investment, namely in housing and industrial plant. To that extent, the credit crowded out other prospective investments that offered higher economic returns. As Jorgenson observes: "What we're after is productivity, not capital spending."

THE BANKERS' LOBBY

A second change in corporate taxation that would foster larger and more productive investment is to eliminate the double taxation of dividends. (The corporation pays dividends out of after-tax profits, and stockholders then pay personal income tax on the dividends.) Double taxation distorts investment by causing capital to flow to non-corporate ventures (for example, limited partnerships in shopping centers and motels). In 1978, Al Ullman, then chairman of the House Ways and Means Committee, proposed giving shareholders a tax credit for part of the taxes paid by the corporation. The flaws in Ullman's plan were, first, that it didn't go far enough; second, that the tax credit wouldn't have been available to tax-exempt investors such as pension funds; and third, that shareholders wouldn't have received a credit for foreign tax payments. Even so, the dividend credit was a beginning, and its shortcomings could have been corrected later.

Unfortunately, business—notably the big banks—helped kill the idea. One Congressman recalls, "David Rockefeller was down here lobbying door to door in the House office buildings to stop Ullman." The banks objected to the plan because their large foreign tax payments and their special legal right to deduct interest costs while investing in tax-exempt bonds leave them with extremely low U.S. tax bills. Thus they had less to gain than other corporations from a dividend tax credit, and they feared that Ullman's plan would erode some of the comparative advantage they enjoy in the competition for capital. Since then, double taxation has dropped out of sight as a reform issue.

The pursuit of special advantages has also figured in the lobbying for depreciation changes. While the Jorgenson-Auerbach present-value depreciation would foster more economic growth, it is less generous than 10–5–3 to capital-intensive industries such as autos, steel, airlines, and utilities. Their lobbies have stuck by 10–5–3.

Business's dismal record of putting its parochial interest above the general good is the darkest cloud over Washington's new approach to taxes. Congress, after all, is a reactive body that ultimately adopts the measures the electorate demands. An important prerequisite for successful reform is that business, one of the loudest and most effective lobbies, get behind changes that promote general efficiency and growth. In the long run, such reforms will redound to the greater benefit of both business and society.●

● Mr. BRADLEY. Mr. President, I am pleased to join with the distinguished Senator from Montana, Mr. BAUCUS, in cosponsoring the First Year Capital Recovery Act. This legislation provides a sorely needed alternative to the depreciation bill proposed by the administration.

The 10–5–3 is deeply flawed. Its ostensible purpose is to offset the effect of inflation on the existing depreciation allowance. While there is no doubt that high inflation rates have eroded the value of the depreciation deduction, 10–5–3 is not the answer. It fails to sever the link between inflation and investment. Instead, it merely tries to outrun inflation through a superaccelerated plan that would allow businesses to write off structures over 10 years, equipment over 5 years, and vehicles over 3 years. To further stimulate investment, 10–5–3 would also substantially increase the investment tax credit.

The net effect of all this is to transform the corporate income tax into a very large corporate subsidy.

According to Dale Jorgenson, Professor of Economics at Harvard College, 10–5–3 would provide businesses with an 85-cent deduction for every dollar invested in an asset in the 5-year category. The additional investment-tax credit would add the equivalent of another 20 cents in writeoffs, so that the total deduction would be worth $1.05, or a 5-cent subsidy. Moreover, this subsidy would rise if, as the administration predicts, the inflation rate falls.

In addition to providing this unjustifiable subsidy, 10–5–3 is inefficient and poorly targeted. It will offer huge benefits to some firms, particularly the large capital intensive ones, and very little to others. It will make investment particularly profitable where firms can borrow heavily, so that the combination of initial tax savings from rapid depreciation and the investment tax credit, high interest deductions and low equity will be a boon to tax shelter investment. It will also provide huge breaks for investments in office buildings and shopping centers. They last far longer than the 10 years in which they could be depreciated under the President's bill and they can also be sold and written off many times. But we are most in need of industrial factories full of equipment, not office buildings and shopping centers. And we need to boost innovation which, in turn, means much more investment in research and development. Yet 10–5–3 will discourage the very industries we want to promote. If 10–5–3 is adopted, the tremendous incentive it provides for speculative buildings and tax shelters may very well end up sucking investment funds out of industry. That would mean less investment in industrial facilities and R. & D. after 10–5–3 is enacted than before.

The first year capital recovery system avoids these pitfalls. Under this system businesses would deduct a first-year allowance in the year an asset is acquired. Depreciation write-offs that would normally be stretched out over the asset's entire life would be converted into a single deduction.

The advantages of this system are obvious. First, allowing businesses to depreciate assets in the same dollars they are purchased in completely eliminates the effect of inflation on capital recovery.

Second, matching tax write-offs with the economic cost of depreciation would equalize tax burdens among all assets. This would allow investors from all industries and regions to compete on equal terms, thereby insuring that each investment dollar is put to its most productive use.

Third, the first-year system is far simpler than 10–5–3. It also frees businesses from complex record keeping and reporting requirements which would be of special value for small businesses.

Mr. President, it is essential that we reform our tax system to stimulate investment and productivity and to improve the competitiveness of our industries in international markets. But in a time of belt-tightening for the poor and disadvantaged in our society, it would be unconscionable to give wasteful subsidies to our industries and businesses, especially since such subsidies would frustrate, not further, our economic goals.●

By Mr. BAUCUS:

S. 1334. A bill to amend the Internal Revenue Code of 1954 to allow expensing of $25,000 of depreciable assets, to eliminate the corporate tax on the first $100,000 of income paid as dividends by small business corporations, to allow an ordinary loss on certain preferred stock issued by small business corporations, to provide capital gains treatment for certain small business stock options, to make certain changes in the estate tax special use valuation rules, and for other purposes; to the Committee on Finance.

SMALL BUSINESS TAX ACT OF 1981

● Mr. BAUCUS. Mr. President, today I am submitting the Small Business Tax Act of 1981 for consideration by the Senate.

I have cosponsored several bills already which are designed to assist the small business community. S. 360 is an omnibus tax bill and Senator BENTSEN has also submitted a variation, which I believe the Senate should consider as well. It is my belief that the Senate should have before it a number of proposals dealing with the small business community to determine which in fact will best be helpful to increase small business productivity and reduce unnecessary burdens which limit capital formation and retention by the small business person.

The Small Business Tax Act of 1981 is not a comprehensive tax bill, but rather represents some further refinement of measures which have been presented before us. It tries to fill some of the gaps and to present some proposals which should be considered as alternatives rather than entirely new proposals.

My bill has five sections: The first substantive section is concerned with small business expensing of capital assets. This provision would allow taxpayers to make an annual election to take an immediate deduction for up to $25,000 of tangible personal property placed in service during the year rather than recovering the cost through depreciation. No investment credit would be allowed for amounts expensed in this manner.

This provision would greatly simplify cost recovery for small businesses and is similar to a measure reported out by the Finance Committee in its 1980 tax cut bill. It would apply to property placed in service in taxable years beginning after December 31, 1980.

It probably would not represent much of a financial gain for the small business person, but would greatly simplify pro-

cedures. Instead of having to keep lengthy depreciation schedules, a small businessman can take care of the whole matter in 1 year. I think this should be an attractive alternative for the small businessman without taking away his option if he prefers to keep depreciation schedules and the like. I would think that this measure would be particularly helpful to a businessman who is just starting out, and is not in a position to set up complicated bookkeeping.

The next section attempts to deal with the very important issue of double taxation. Under this provision, a small business corporation as defined by section 1244C3 of the IRC would not be taxed on the first $100,000 of its taxable income paid to shareholders as dividends for the taxable year. Taxable income in excess of the first $100,000 of dividends paid would continue to be taxed at the normal corporate rate. Such dividends received by shareholders would not be eligible for dividend exclusion.

I do not know how many small businesses in the country would avail themselves of this opportunity, nor how many small businesses would be able to work with their shareholders to implement this program. However, I do believe it is important to address the question of double taxation. It is unfair that income is taxed twice, once at the corporate level and the other at the personal level. In a small way, this measure at least ends that process for the small businessman, and might make it easier for him to retain and raise capital.

The next section deals with losses on small business corporation preferred stocks. Under present law, losses on original issue common stock in a small business corporation may be treated as an ordinary loss up to $50,000 a year or $100,000 in the case of a joint return. In order to encourage investors to invest money in new corporate businesses, this provision would extend this treatment to losses on preferred stock issued by small business corporations to individuals.

The next substantive section deals with employee stock options. This would change the rules governing employee stock options to enable smaller businesses to attract better management by encouraging the use of stock options for key employees. Under present law, an employee exercising a stock option is, in general, taxed at ordinary income tax rates on the spread between the market price of the stock and the option price. The employer is allowed a corresponding deduction.

These rules should be changed so that employees could be permitted to exercise stock options without tax consequences to either the employee or employer. The employees would be eligible for capital gains treatment when the stock is sold with the option price being the basis of the stock. The provision would be limited to options issued by small business corporations as defined by section 1244 and would apply to options granted after the date of enactment of the bill.

Finally, my bill addresses the problem of the $500,000 cap on land use valuation for estate tax purposes. There are a number of bills before the Congress which deal with the problem of estate taxes. A major problem, of course, is farm land, since the IRS has valued the land in a way that makes it difficult for farms to be kept within a family. Although there have been modifications to estate tax laws in this respect, a $500,000 cap was placed on such valuations. Inflation and rocketing real estate prices have made that cap no longer very realistic. Several of the bills before Congress remove the cap entirely. I believe that doing so will only attract land speculators and that a cap is necessary, but that it should be more responsible to the economy. Therefore, my final proposal is simply to index the cap to inflation. This way the family farm can be valued as a family farm up to a reasonable limit as determined by earlier law, but that limit will respond to inflationary pressures and will go up to maintain a realistic level.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1334

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE: AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Small Business Tax Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. ELECTION TO EXPENSE CERTAIN DEPRECIABLE BUSINESS ASSETS.

(a) IN GENERAL.—Section 179 (relating to additional first-year depreciation allowance for small business) is amended to read as follows:

"SEC. 179. ELECTION TO EXPENSE CERTAIN DEPRECIABLE BUSINESS ASSETS.

"(a) TREATMENT OF EXPENSES. A taxpayer may elect to treat the cost of any section 179 property as an expense which is not chargeable to capital account. Any cost so treated shall be allowed as a deduction for the taxable year in which the section 179 property is placed in service.

"(b) DOLLAR LIMITATION.—The aggregate cost which may be taken into account under subsection (a) for any taxable year shall not exceed $25,000 ($12,500 in the case of a married individual filing a separate return).

"(c) ELECTION.—

"(1) IN GENERAL.—An election under this section for any taxable year shall—

"(A) specify the items of section 179 property to which the election applies and the portion of the cost of each of such items which is to be taken into account under subsection (a), and

"(B) be made on the taxpayer's return of the tax imposed by this chapter for the taxable year.

Such election shall be made in such manner as the Secretary may by regulations prescribe.

"(2) ELECTION IRREVOCABLE.—Any election made under this section, and any specification contained in any such election, may not be revoked except with the consent of the Secretary.

"(d) DEFINITIONS AND SPECIAL RULES.—

"(1) SECTION 179 PROPERTY.—For purposes of this section, the term 'section 179 property' means tangible personal property—

"(A) of a character subject to the allowance for depreciation under section 167, and

"(B) acquired by purchase for use in a trade or business.

"(2) PURCHASE DEFINED.—For purposes of paragraph (1), the term 'purchase' means any acquisition of property, but only if—

"(A) the property is not acquired from a person whose relationship to the person acquiring it would result in the disallowance of losses under section 267 or 707(b) (but, in applying section 267(b) and (c) for purposes of this section, paragraph (4) of section 267 (c) shall be treated as providing that the family of an individual shall include only his spouse, ancestors, and lineal descendants),

"(B) the property is not acquired by one component member of a controlled group from another component member of the same controlled group, and

"(C) the basis of the property in the hands of the person acquiring it is not determined—

"(i) in whole or in part by reference to the adjusted basis of such property in the hands of the person from whom acquired, or

"(ii) under section 1014(a) (relating to property acquired from a decedent).

"(3) SPECIAL RULE FOR SECTION 1031 OR 1033 EXCHANGES.—For purposes of this section, in the case of any property received in an exchange described in section 1031 or 1033, the cost of such property shall only include money or the fair market value of other property (within the meaning of section 1031), or the fair market value of property not similar or related in service or use (within the meaning of section 1033), received by the taxpayer.

"(4) SECTION NOT TO APPLY TO ESTATES AND TRUSTS.—This section shall not apply to estates and trusts.

"(5) DOLLAR LIMITATION OF CONTROLLED GROUP.—For purposes of subsection (b) of this section—

"(A) all component members of a controlled group shall be treated as one taxpayer, and

"(B) the Secretary shall apportion the dollar limitation contained in subsection (b)(1) among the component members of such controlled group in such manner as the Secretary shall by regulations prescribe.

"(6) CONTROLLED GROUP DEFINED.—For purposes of paragraphs (2) and (5), the term 'controlled group' has the meaning assigned to it by section 1563(a), except that, for such purposes, the phrase 'more than 50 percent' shall be substituted for the phrase 'at least 80 percent' each place it appears in section 1563(a)(1).

"(7) DOLLAR LIMITATION IN CASE OF PARTNERSHIPS.—In the case of a partnership, the dollar limitation contained in subsection (b)(1) shall apply with respect to the partnership and with respect to each partner.

"(8) ADJUSTMENT TO BASIS; WHEN MADE.—In applying section 167(g), the adjustment under section 1016(a)(2) resulting by reason of an election made under this section with respect to any section 179 property shall be made before any other deduction allowed by section 167 is computed.".

(b) TECHNICAL AMENDMENTS.—

(1) Paragraph (1) of section 263(a) (relating to capital expenditures) is amended—

(A) by striking "or" at the end of subparagraph (F);

(B) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a semicolon and "or"; and

(C) by adding at the end thereof the following new subparagraph:

"(H) the cost of any property deductible under section 179.".

(2) Subparagraph (A) of section 1033(g)(3) (relating to condemnation of real property held for productive use in trade or business or for investment) is amended by strik-

ing out "(relating to additional first-year depreciation allowance for small business)" and inserting in lieu thereof ", (relating to election to expense certain depreciable business assets)".

(c) RECAPTURE RULE.—Subsection (a) of section 1245 (relating to gains from dispositions from certain depreciable property) is amended—

(1) by striking out "169, 184" each place it appears in paragraph (2) and inserting in lieu thereof "169, 179, 184",

(2) by striking out "section 190" in the third sentence of paragraph (2) and inserting in lieu thereof "section 179, 190", and

(3) by striking out "169, 185" in paragraphs (2)(D) and (3)(D) and inserting in lieu thereof "169, 179, 185".

(d) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by striking out the item relating to section 179 and inserting in lieu thereof the following:

"Sec. 179. Election to expense certain depreciable business assets.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to property placed in service in taxable years beginning after December 31, 1980.

SEC. 3. ZERO RATE OF TAX WHERE SMALL BUSINESS CORPORATION DISTRIBUTES DIVIDENDS.

(a) ZERO RATE OF TAX.—Part II of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to tax on corporations) is amended by redesignating section 12 as section 13 and by inserting after section 11 the following new section:

"SEC. 12. ZERO RATE OF TAX WHERE SMALL BUSINESS CORPORATION DISTRIBUTES DIVIDENDS.

"(a) IN GENERAL.—The amount of the tax imposed by section 11 for the taxable year with respect to the taxable income of a small business corporation shall be reduced by an amount equal to the amount of tax which would be imposed by section 11 if the taxable income of the corporation for the taxable year equaled its section 12 dividend amount for such year.

"(b) SECTION 12 DIVIDEND AMOUNT.—Except as otherwise provided in this section, the term 'section 12 dividend amount' means whichever of the following is the lesser:

"(1) the amount of dividends paid by the corporation during the taxable year, or

"(2) $100,000.

"(c) DIVIDENDS TAKEN INTO ACCOUNT.—

"(1) REQUIREMENTS.—A dividend shall be taken into account under this section only if—

"(A) it is paid in cash (or is a consent dividend meeting requirements similar to those of section 565),

"(B) it is pro rata, with no preference to any share of stock as compared with other shares of the same class, and with no preference to one class of stock as compared with another class except to the extent that the former is entitled (without reference to waivers of their rights by shareholders) to such preference, and

"(C) it is not in redemption or in partial or complete liquidation.

"(2) DIVIDENDS PAID AFTER CLOSE OF TAXABLE YEAR.—For purposes of this section, a dividend paid after the close of any taxable year and on or before the 15th day of the 3d month following the close of such taxable year shall, to the extent the taxpayer elects in its return for the taxable year, be considered as paid during such taxable year.

"(3) EXCEPTION FOR DIVIDENDS ON CERTAIN PREFERRED STOCK.—For purposes of this section, the term 'dividend' includes a distribution with respect to stock of a class which is not common stock only if—

"(A) the corporation first issued stock in that class after the date of the enactment of this section, and

"(B) the corporation makes an election to have stock of that class taken into account under this section.

"(d) SMALL BUSINESS CORPORATION DEFINED.—For purposes of this section—

"(1) IN GENERAL.—Except as otherwise provided in this section, the term 'small business corporation' means, with respect to any taxable year, a domestic corporation which is a small business corporation (within the meaning of section 1244(c)(3)) as of the close of such taxable year.

"(2) CERTAIN CORPORATIONS NOT ELIGIBLE.—The term 'small business corporation' shall not include any corporation which is—

"(A) an insurance company subject to tax under subchapter L,

"(B) a corporation subject to tax imposed by subchapter M (relating to regulated investment companies and real estate trusts),

"(C) a corporation to which an election under section 936 applies,

"(D) a DISC or former DISC, or

"(E) an organization to which part I of subchapter T (relating to tax treatment of cooperatives) applies.

"(3) SERVICE CORPORATIONS NOT ELIGIBLE.—The term 'small business corporation' shall not include any corporation the principal function of which is the performance of services in the field of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

"(e) SPECIAL RULES.—For purposes of this section—

"(1) COMPONENT MEMBERS OF SAME GROUP.—In the case of a controlled group of corporations (within the meaning of section 1563(a))—

"(A) all component members of the group shall be treated as one corporation,

"(B) the section 12 dividend amount shall be divided among the component members of the group in the same manner as the amounts in each taxable income bracket in the tax table contained in section 11(b) are divided among such members,

"(C) distributions from one component member of the group to another component member of the group shall not be treated as dividends, and

"(D) in applying section 1244(c)(3), subparagraph (A) of this paragraph shall apply and amounts received by one component member of the group from another member of the group shall not be taken into account.

"(2) SPECIAL RULE WHERE 20 PERCENT OR MORE OF THE DIVIDENDS IS PAID TO TAX-EXEMPTS OR ACCUMULATION TRUSTS.—A corporation shall not be treated as a small business corporation for any taxable year during which 20 percent or more of the dividends paid by the corporation are paid (directly or indirectly) to one or more of the following:

"(A) persons which are exempt from tax under section 501, or

"(B) any trust unless, under the terms of the trust, all of its income is required to be distributed currently.

"(3) TREATMENT OF DIVIDENDS.—

"(A) IN GENERAL.—The zero rated portion of any dividend paid by a small business corporation during any taxable year shall not be treated as a dividend for purposes of sections 116 and 243.

"(B) ZERO RATED PORTION.—For purposes of subparagraph (A), the zero rated portion of any dividend is an amount equal to such dividend multiplied by a fraction—

"(i) the numerator of which is the corporation's section 12 dividend amount for the taxable year for, (or, if lesser, its taxable income for the taxable year), and

"(ii) the denominator of which is the aggregate amount of the dividends paid by the corporation during the taxable year.

"(4) PASSIVE INCOME LIMITATION.—

"(A) IN GENERAL.—If the passive investment income fraction of any small business corporation for any taxable year exceeds one-fifth, such corporation's section 12 dividend amount for the taxable year shall not exceed the taxable income of the corporation for the taxable year determined by not taking into account any passive investment income and any deductions allocable to such passive investment income.

"(B) PASSIVE INVESTMENT INCOME FRACTION DEFINED.—For purposes of this subsection, the term 'passive investment income fraction' means, with respect to any taxable year, a fraction—

"(i) the numerator of which is the passive investment income for such year, and

"(ii) the denominator of which is the gross receipts for such year.

"(C) PASSIVE INCOME DEFINED.—For purposes of this subsection, the term 'passive investment income' means gross receipts derived from royalties, rents, dividends, interest, annuities, and sales or exchanges of stock or securities.

"(D) SALES OF STOCK AND SECURITIES.—For purposes of this subsection, gross receipts from the sales or exchanges of stock or securities shall be taken into account only to the extent of gains therefrom.

"(E) SPECIAL RULE FOR CERTAIN LENDING OR FINANCE COMPANIES.—For purposes of this subsection, if the small business corporation meets the requirements of section 542(c)(6) for the taxable year, the term 'passive investment income' shall not include gross receipts for the taxable year which are derived directly from the active and regular conduct of a lending or finance business (as defined in section 542(d)(1)).".

(b) CONFORMING AMENDMENTS.—

(1) Section 243 of such Code (relating to deduction for dividends received by corporations) is amended by adding at the end thereof the following new subsection:

"(e) CROSS REFERENCE.—

"For adjustment to deduction where zero rate provisions of section 12 apply, see section 12(e)(3).".

(2) Section 116 of such Code (relating to partial exclusion of dividends and interest received by individuals) is amended by adding at the end thereof the following new subsection:

"(d) CROSS REFERENCE.—

"For adjustment to exclusion where zero rate provisions of section 12 apply, see section 12(e)(3).".

(c) CLERICAL AMENDMENT.—The table of sections for part II of subchapter A of chapter 1 of such Code is amended by striking out the item relating to section 12 and inserting in lieu thereof the following:

"Sec. 12. Zero rate of tax where small business corporation distributes dividends.

"Sec. 13. Cross references relating to tax on corporations.".

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) AMENDMENTS NOT TREATED AS CHANGE IN RATE OF TAX.—The amendments made by this section shall not be treated as a change in a rate of tax for purposes of section 21 of the Internal Revenue Code of 1954.

SEC. 4. LOSSES ON PREFERRED STOCK OF SMALL BUSINESS CORPORATION.

(a) IN GENERAL.—Subsections (c)(1) and (d)(2) of section 1244 (relating to losses on small business stock) are each amended by striking out "common stock" and inserting in lieu thereof "stock".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to stock issued after the date of enactment of this Act.

SEC. 5. SMALL BUSINESS INCENTIVE STOCK OPTIONS.

(a) IN GENERAL.—Part II of subchapter D of chapter 1 (relating to certain stock options) is amended by adding after section 422 the following new section:

"SEC. 422A. SMALL BUSINESS INCENTIVE STOCK OPTIONS.

"(a) IN GENERAL.—Section 421(a) shall apply with respect to the transfer of a share of stock of a small business corporation to an individual pursuant to his exercise of an incentive stock option if—

"(1) no disposition of such share is made by him within 2 years from the date of the granting of the option nor within 1 year after the transfer of such share to him, and

"(2) at all times during the period beginning on the date of the granting of the option and ending on the day 3 months before the date of such exercise, such individual was an employee of either the corporation granting such option, a parent or subsidiary corporation of such corporation, or a corporation or a parent or subsidiary corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

"(b) INCENTIVE STOCK OPTION.—For purposes of this part, the term 'incentive stock option' means an option granted to an individual for any reason connected with his employment by a corporation, if granted by the employer corporation or its parent or subsidiary corporation, to purchase stock of any of such corporations, but only if—

"(1) the option is granted pursuant to a plan which includes the aggregate number of shares which may be issued under options and the employees (or class of employees) eligible to receive options, and which is approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted;

"(2) such option is granted within 10 years from the date such plan is adopted, or the date such plan is approved by the stockholders, whichever is earlier;

"(3) such option by its terms is not exercisable after the expiration of 10 years from the date such option is granted;

"(4) the option price is not less than the fair market value of the stock at the time such option is granted;

"(5) such option by its terms is not transferable by such individual otherwise than by will or the laws of descent and distribution, and is exercisable, during his lifetime, only by him; and

"(6) such individual, at the time the option is granted, does not own stock possessing more than 10 percent of the total combined voting power of all classes of stock of the employer corporation or of its parent or subsidiary corporation.

Paragraph (6) shall not apply if at the time such option is granted the option price is at least 110 percent of the fair market value of the stock subject to the option and such option by its terms is not exercisable after the expiration of 5 years from the date such option is granted.

"(c) SPECIAL RULES AND DEFINITIONS.—

"(1) EXERCISE OF OPTION WHEN PRICE IS LESS THAN VALUE OF STOCK.—If a share of stock is transferred pursuant to the exercise by an individual of an option which would fail to qualify as an incentive stock option under subsection (b) because there was a failure in an attempt, made in good faith, to meet the requirement of subsection (b)(4), the requirement of subsection (b)(4) shall be considered to have been met.

"(2) SMALL BUSINESS CORPORATION.—For purposes of this section, the term 'small business corporation' has the meaning set forth in paragraph (3) of section 1244(c) (relating to losses on small business stock).

"(3) CERTAIN DISQUALIFYING DISPOSITIONS WHERE AMOUNT REALIZED IS LESS THAN VALUE AT EXERCISE.—If—

"(A) an individual who has acquired a share of stock by the exercise of an incentive stock option makes a disposition of such share within the 2-year period described in subsection (a)(1), and

"(B) such disposition is a sale or exchange with respect to which a loss (if sustained) would be recognized to such individual,

then the amount which is includible in the gross income of such individual, and the amount which is deductible from the income of his employer corporation, as compensation attributable to the exercise of such option shall not exceed the excess (if any) of the amount realized on such sale or exchange over the adjusted basis of such share.

"(4) CERTAIN TRANSFERS BY INSOLVENT INDIVIDUALS.—If an insolvent individual holds a share of stock acquired pursuant to his exercise of an incentive stock option, and if such share is transferred to a trustee, receiver, or other similar fiduciary in any proceeding under title 11 or any other similar insolvency proceeding, neither such transfer, nor any other transfer of such share for the benefit of his creditors in such proceeding, shall constitute a disposition of such share for purposes of subsection (a)(1).

"(5) COORDINATION WITH SECTIONS 422 AND 424.—Sections 422 and 424 shall not apply to an incentive stock option.".

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 421 (relating to general rules in the case of stock options) is amended—

(A) by inserting "422A(a)," after "422(a)," in subsections (a), (b), and (c)(1)(A), and

(B) by inserting "422A(a)(1)," after "section 422(a)(1)," in subsection (b).

(2) Section 425(d) (relating to attribution of stock ownership) is amended by inserting "422A(b)(6)," after "422(b)(7),".

(3) Section 425(g) (relating to special rules) is amended by inserting "422A(a)(2)," after "422(a)(2),".

(4) Section 425(h)(3)(B) (relating to definition of modification) is amended by inserting "422A(b)(5)," after "422(b)(6),".

(5) Section 6039 (relating to information required in connection with certain options) is amended—

(A) by inserting ", an incentive stock option," after "qualified stock option" in subsection (a)(1),

(B) by inserting "incentive stock option," after "qualified stock option," in subsection (b)(1), and

(C) by adding at the end of subsection (c) the following new paragraph:

"(4) The term 'incentive stock option', see section 422A(b).".

(6) The table of sections for part II of subchapter D of chapter 1 is amended by inserting after the item relating to section 422 the following new item:

"Sec. 422A. Small business incentive stock options.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to options granted after the date of enactment of this Act.

SEC. 6. VALUATION OF CERTAIN FARM, ETC., REAL PROPERTY.

(a) DEFINITION OF QUALIFIED REAL PROPERTY.—Subsection (b) of section 2032A (defining qualified real property) is amended by adding at the end thereof the following new paragraphs:

"(4) RETIRED AND DISABLED DECEDENTS.—

"(A) IN GENERAL.—If, on the date of death of the decedent, the decedent did not otherwise meet the requirements of paragraph (1)(C) with respect to any property, and the decedent—

"(i) was eligible to receive old-age benefits under title II of the Social Security Act, or

"(ii) was disabled for a continuous period ending on such date,

then paragraph (1)(C) shall be applied by substituting 'the date on which the decedent became eligible to receive old-age benefits under title II of the Social Security Act or became disabled' for 'the date of the decedent's death'.

"(B) DISABLED DEFINED.—For purposes of subparagraph (A), an individual shall be disabled if such individual has a mental or physical impairment which renders him unable to materially participate in the operation of the farm or other business.

"(5) SPECIAL RULE FOR SPOUSES WHO ARE QUALIFIED HEIRS.—In the case of any qualified real property which was acquired by a qualified heir who is the spouse of the decedent and which does not otherwise meet the requirements of paragraph (1)(C)(ii) upon the death of such spouse, such real property shall be treated as meeting the requirements of paragraph (1)(C)(ii) if such spouse was engaged in the active management of the operation of the business at all times during—

"(A) the 10-year period ending on the date of death of the spouse, or

"(B) the period beginning on the date of death of the decedent and ending on the date of death of the spouse.".

(b) CESSATION OF QUALIFIED USE.—

(1) IN GENERAL.—Paragraph (7) of section 2032A(C) (defining cessation of qualified use) is amended to read as follows:

"(7) CESSATION OF QUALIFIED USE.—For purposes of paragraph (1)(B)—

"(A) IN GENERAL.—Real property shall cease to be used for the qualified use if—

"(i) such property ceases to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the property qualified under subsection (b), or

"(ii) except as provided in subparagraph (B), during any period of 8 years ending after the date of the decedent's death and before the date of the death of the qualified heir, there had been periods aggregating 3 years or more during which—

"(I) in the case of periods during which the property was held by the decedent (other than periods during which the decedent was an individual described in subsection (b)(4)(A)(i) or (ii)), there was no material participation by the decedent or any member of the family in the operation of the farm or other business, and

"(II) in the case of periods during which the property was held by any qualified heir, there was no material participation by such qualified heir or any member of his family in the operation of the farm or other business.

"(B) 10-YEAR ACTIVE MANAGEMENT.—If an eligible qualified heir elects, at such time and in such manner as the Secretary may prescribe, to have the provisions of this subparagraph apply to any real property—

"(i) the provisions of clause (ii) of subparagraph (A) shall not apply to such property, and

"(ii) such property shall cease to be used for the qualified use if the eligible qualified heir (or his guardian, if any) or any member of his family did not take part in the active management of the farm or other business at all times during the period beginning on the date of dealth of the decedent and ending on the earlier of—

"(I) the date of death of the qualified heir, or

"(II) the date which is 10 years from the date of death of the decedent.

"(C) ELIGIBLE QUALIFIED HEIR.—For purposes of this paragraph, the term 'eligible qualified heir' means qualified heir who, on the date of death of the decedent—

"(i) is the spouse of the decedent,

"(ii) has not attained the age of 21,

"(iii) is a student described in subparagraph (A) or (B) of section 151(e)(4), or

"(iv) was disabled (within the meaning of subsection (b)(4)(B)) for a continuous period ending on such date.".

(2) CONFORMING AMENDMENT.—Subsection (e) of section 2032A (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(12) ACTIVE MANAGEMENT.—The term 'active management' means the making of the management decisions of a business (other than the daily operating decisions).".

(c) EXCHANGE OF QUALIFIED REAL PROPERTY.—

(1) IN GENERAL.—Section 2032A (relating to valuation of certain farm, etc., real property) is amended by adding at the end thereof the following new subsection: "(i) Exchanges of Qualified Real Property.—

"(1) TREATMENT OF PROPERTY EXCHANGED.—

"(A) IN GENERAL.—If an interest in qualified real property is exchanged—

"(i) no tax shall be imposed by subsection (c) on such exchange if the interest in qualified real property is exchanged solely for an interest in qualified exchange property in a transaction which qualifies under section 1031(a), or

"(ii) if clause (i) does not apply, the amount of the tax imposed by subsection (c) on such exchange shall be the amount determined under subparagraph (B).

"(B) AMOUNT OF TAX WHERE PROPERTY RECEIVED IS NOT SOLELY AN INTEREST IN QUALIFIED EXCHANGE PROPERTY.—The amount determined under this subparagraph with respect to any exchange is the amount of tax which (but for this subsection) would have been imposed on such exchange reduced by an amount equal to that portion of such tax which is attributable to the amount of the interest in qualified exchange property received by the taxpayer.

"(2) TREATMENT OF QUALIFIED EXCHANGE PROPERTY.—For purposes of subsection (c)—

"(A) any interest in qualified exchange property shall be treated in the same manner as if it were a portion of the interest in qualified real property which was exchanged, and

"(B) any tax imposed by subsection (c) on the exchange shall be treated as a tax imposed on a partial disposition.

"(3) QUALIFIED EXCHANGE PROPERTY.—For purposes of this subsection, the term 'qualified exchange property' means real property which is to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the real property exchanged therefor originally qualified under subsection (a).".

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 2032A (f) (relating to statute of limitations) is amended—

(i) by inserting "or exchange" after "conversion",

(ii) by inserting "or (i)" after "(h)", and

(iii) by inserting ", or of the exchange of property" after "replace".

(B) Paragraph (2) of section 6324B (c) (relating to special liens) is amended by inserting "and qualified exchange property (within the meaning of section 2032A (i)(3))" before the period at the end thereof.

(d) ELECTION REQUIREMENT OF SPECIAL RULES FOR INVOLUNTARY CONVERSIONS REPEALED.—Section 2032A (h) (relating to special rules for involuntary conversions of qualified real property) is amended—

(1) by striking out "and the qualified heir makes an election under this subsection" in paragraph (1) (A); and

(2) by striking out paragraph (5).

(e) METHOD OF VALUING FARMS.—Paragraph (7) of section 2032A (e) of the Internal Revenue Code of 1954 is amended by deleting the word "cash" wherever it appears therein.

(f) BASIS UPON RECAPTURE.—Paragraph (3) of section 1014(a) (relating to basis of property acquired from a decedent) is amended by inserting "(increased by any additional estate tax which is imposed under section 2032A(c)(1))" after "such section".

(g) EFFECTIVE DATE.—The amendments made by this section shall apply to the estates of decedents dying after December 31, 1981.

SEC. 7. COORDINATION OF EXTENSIONS OF TIME FOR PAYMENT OF ESTATE TAX WHERE ESTATE CONSISTS LARGELY OF INTEREST IN CLOSELY HELD BUSINESS.

(a) ELIGIBILITY REQUIREMENTS.—Paragraph (1) of section 6166(a) (relating to alternate extension of time for payment of estate tax where estate consists largely of interest in closely held business) is amended to read as follows:

"(1) IN GENERAL.—If the value of an interest in a closely held business which is included in determining the gross estate of a decedent who was (at the date of his death) a citizen or resident of the United States exceeds—

"(A) 35 percent of the value of the gross estate of such decedent, or

"(B) 50 percent of the taxable estate of such decedent,

the executor may elect to pay part or all of the tax imposed by section 2001 in 2 or more (but not exceeding 10) equal installments.".

(b) COORDINATION WITH SECTION 303.—

(1) IN GENERAL.—Subparagraph (A) of section 303(b)(2) (relating to relationship of stock to decedent's estate) is amended by striking out all that follows "gross estate" the first place it appears and inserting in lieu thereof "exceeds—

"(i) 35 percent of the value of the gross estate of the decedent, or

"(ii) 50 percent of the value of the taxable estate of the decedent.".

(2) CONFORMING AMENDMENT.—Subparagraph (B) of section 303(b)(2) is amended to read as follows:

"(B) SPECIAL RULE FOR STOCK IN 2 OR MORE CORPORATIONS.—For purposes of subparagraph (A), stock of 2 or more corporations, with respect to each of which there is included in determining the value of the decedent's gross estate more than 20 percent in value of the outstanding stock, shall be treated as the stock of a single corporation. For purposes of the 20-percent requirement of the preceding sentence, stock which, at the decedent's death, represents the surviving spouse's interest in property held by the decedent and the surviving spouse as community property or as joint tenants, tenants by the entirety, or tenants in common shall be treated as having been included in determining the value of the decedent's gross estate.".

(c) ACCELERATION OF PAYMENT.—

(1) AMOUNT OF DISPOSITION.—Subparagraph (A) of section 6166(g)(1) (relating to acceleration of payment in the case of disposition of interest or withdrawal of funds from a business) is amended by striking out "one-third" each place it appears and inserting in lieu thereof "50 percent".

(2) FAILURE TO PAY INSTALLMENT.—Paragraph (3) of section 6166(g) (relating to failure to pay installments) is amended to read as follows:

"(3) FAILURE TO PAY INSTALLMENT.—

"(A) IN GENERAL.—If any installment under this section is not paid on or before the date fixed for its payment by this section (including any extension of time for the payment of such installment), the unpaid portion of the tax payable in installments shall be paid upon notice and demand from the Secretary.

"(B) PAYMENT WITHIN 6 MONTHS.—If any installment under this section is not paid on or before the date determined under subparagraph (A) but is paid within 6 months of such date—

"(i) the provisions of subparagraph (A) shall not apply with respect to such payment,

"(ii) the provisions of section 6601(j) shall not apply with respect to the determination of interest on such payment, and

"(iii) there is imposed a penalty in an amount equal to the product of—

"(I) 5 percent of the principal amount of such payment, multiplied by

"(II) the number of months (or fractions thereof) after such date and before payment is made.

The penalty imposed under clause (iii) shall be treated in the same manner as a penalty imposed under subchapter B of chapter 68.".

(d) REPEAL OF SECTION 6166A.—Section 6166A (relating to extension of time for payment of estate tax where estate consists largely of interest in a closely held business) is hereby repealed.

(e) TECHNICAL AMENDMENTS.—

(1) Sections 303(b)(1)(C), 2204(c), and 6161(a)(2) are each amended by striking out "or 6166A" each place it appears.

(2) Paragraph (2) of section 2011(c) is amended by striking out "6161, 6166 or 6166A" and inserting in lieu thereof "6161 or 6166".

(3) Subsections (a) and (b) of section 2204 are each amended by striking out "6166 or 6166A" and inserting in lieu thereof "or 6166".

(4) Subsection (b) of section 2621 is amended—

(A) by striking out "sections 6166 and 6166A (relating to extensions" and inserting in lieu thereof "section 6166 (relating to extension", and

(B) by striking out "Sections 6166 and 6166A" in the subsection heading and inserting in lieu thereof "Section 6166".

(5) (A) Subsection (a) of section 6166 is amended by striking out paragraph (4).

(B) The section heading for section 6166 is amended by striking out "alternate".

(C) The table of sections for subchapter B of chapter 62 is amended by striking out the items relating to sections 6166 and 6166A and inserting in lieu thereof the following:

"Sec. 6166. Extension of time for payment of estate tax where estate consists largely of interest in closely held business.".

(6) (A) Subsection (a), (c)(2), and (e) of section 6324A are each amended by striking out "or 6166A" each place it appears.

(B) Paragraphs (3) and (5) of section 6324A (d) are each amended by striking out "or 6166A (h)".

(C) The section heading for section 6324A is amended by striking out "or 6166A".

(D) The table of sections for subchapter C of chapter 64 is amended by striking out "or 6166A" in the item relating to section 6324A.

(7) Subsection (d) of section 6503 is amended by striking out "6163, 6166, or 6166A" and inserting in lieu thereof "6163 or 6166".

(8) Subsection (a) of section 7403 is amended by striking out "or 6166A (h).".

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to the estates of decedents dying after December 31, 1980.

SEC. 8. INDEXATION OF LIMITATION ON ALTERNATE VALUATION OF CERTAIN FARM, ETC., REAL PROPERTY.

Section 2032A(a) is amended by adding at the end thereof the following new paragraph:

"(3) ADJUSTMENT FOR EFFECTS OF INFLATION.—

"(A) IN GENERAL.—In the case of decedents dying after December 31, 1981, the $500,000 amount in paragraph (2) shall be increased to an amount equal to $500,000, multiplied by the applicable inflation ratio.

"(B) APPLICABLE INFLATION RATIO.—The applicable inflation ratio for any asset is the percentage arrived at by dividing—

"(i) the gross national product deflator for the last calendar quarter for the calendar year preceding the calendar year of the decedent's death, by

"(ii) the gross national product deflator for the calendar quarter ending December 31, 1981.

The applicable inflation ratio shall not be taken into account unless it is greater than 1. The applicable inflation ratio for any asset shall be rounded to the nearest 1/10 of 1 percent.

"(C) Gross national product deflator.—The gross national product deflator for any calendar quarter is the implicit price deflator for the gross national product for such quarter (as shown in the first revision thereof).".●

By Mr. SASSER:

S. 1335. A bill to designate certain lands in the Great Smoky Mountains National Park as wilderness; to the Committee on Energy and Natural Resources.

GREAT SMOKY MOUNTAINS WILDERNESS ACT

● Mr. SASSER. Mr. President, I take great pleasure in presenting to the Senate a bill to designate the Great Smoky Mountains National Park, which lies on the border between Tennessee and North Carolina, as wilderness.

Approximately 475,000 acres would be designated as wilderness by my bill. That is less than a half-million acres of land that, by virtue of its beauty, history and importance, deserves to be protected from the ravages of further development.

Before getting into the specifics of the Great Smoky Mountains Wilderness Act, let us consider for a moment the Wilderness Act itself. Does it, as some might have us believe, forever close land to the people? Are hunting, fishing, and other recreational activities prohibited?

These are valid questions, Mr. President, questions which deserve answers. And the answer is simply that wilderness designations do not infringe upon the right of the public to enter, camp, walk, swim, canoe, fish, and hunt (subject to State and Federal regulations as before). Although commodity exploration is not permitted, and no works of man (including power lines, dams, roads, or reservoirs) may be constructed, we must keep in mind the specific intent of the wilderness act, which is, and I quote:

To secure for the American people of present and future generations the benefits of an enduring resource and wilderness.

Wilderness is not required to be "virgin" territory, Mr. President. At one time, the Great Smoky Mountains were logged, burned, overgrazed, roaded, and home for many early east Tennesseans and North Carolinians. But the Great Smokies now have a substantial recreational, scenic, scientific, educational, and historical value. We must not let this opportunity slip from our hands.

I ask unanimous consent that a brief summary of the Wilderness Act, compiled by the Wilderness Society, be inserted in the RECORD at this point.

David Payne Hale, one of the park's most ardent supporters, said in 1966 that:

Whatever we preserve of the Great Smokies now is all that we and the multitudes which will follow us will have of them for a long time—perhaps all that we ever have for man may never permit a reversion of developed areas to wilderness. It is in our power to deliver the Great Smokies from those who seek to build their paradise on the ashes of those paradises they would destroy.

In a word, Mr. President, the Great Smoky Mountains must have nature, not man or his peculiar traces of "civilization," as its dominant character.

Let me relate to the Senate some of the unique aspects of the Great Smoky Mountains. In the park have been found insects and spiders new to science. Over 25 indigenous types of gastropods, or slugs. The unique spider of Cades Cove, found in only one other location in the entire world, mainland China. Panthers, bears, and boars—all of these, and more, live in a mountain environment that stands as "an ecological yardstick against which man's modification of his environment can be measured."

There are a number of important provisions in my bill, Mr. President. Mount Le Conte Lodge, as well as the existing trail shelters on the Appalachian Trail, will be excluded from wilderness designation. Activities now being conducted in Cades Cove, Elkmont, and on Clingman's Dome will be preserved as these areas are also excluded from wilderness.

The transmountain road and access routes to Clingman's Dome, Mount Le Conte Lodge, and Cades Cove are specifically excluded from wilderness designation, in order to permit access to the park as is currently available.

Additionally, and perhaps most importantly, the Great Smoky Mountains Wilderness Act insists on an equitable settlement of the dispute involving the Tennessee Valley Authority, the Department of the Interior, and Swain County, N.C. The rights of Swain County are fully protected by this legislation, and the wilderness area will not infringe on the negotiated settlement that I am happy to report has been reached.

Since I first introduced the Great Smoky Mountains Wilderness Act in 1977, I have been contacted by a number of groups which have indicated support for the proposal. The Department of the Interior and the National Park Service have in the past supported wilderness designation for the Great Smokies. The Great Smokies wilderness advocates, composed of the following organizations, also support the proposal: The Smoky Mountains Hiking Club, the Tennessee Citizens for Wilderness Planning, the Haywood (North Carolina) Trail Riders Association, the Carolina Mountain Club, the Tennessee Chapter of the Sierra Club, the Wilderness Society, the Conservation Council of North Carolina, and the Tennessee Trains Association, among many others. It is evident that there is widespread support for the wilderness designation in both Tennessee and North Carolina.

The Great Smoky Mountains is the most visited national park in America, Mr. President. During the fall, the transmountain road is clogged with visitors seeking to catch a glimpse of the fall foliage, seeking an opportunity to "feel," if only for a moment, the best nature has to offer mankind.

Wilderness designation for the Great Smokies will enhance and encourage such experiences. As motorized transportation will be restricted, the rich flavor of the Smokies can be appreciated. Americans will find strength in the mountains, exhilaration in the cool rain, warmth in the afternoon sun from Sheep Wallow Knob north to Davenport Gap, from Chinquapin Knob east to Mount Noble.

Efforts to preserve land by granting wilderness status have been opposed in the past, Mr. President. My bill will undoubtedly have its opponents. But I would urge those who oppose the concept of wilderness designations to ponder the words of Benton Mackaye, a former Tennessee Valley Authority staffer whose lasting contribution to these United States is the Appalachian Trail:

The old pioneer opened through a forest a path for the spread of civilization. His work was nobly done and the life of the town and city is in consequence well upon the map throughout our country. Now comes the great task of holding this life in check—for it is just as bad to have too much civilization as too little.

Additionally, consider the following quote from an editorial of Hendersonville (Tenn.) Times-News on March 25, 1979:

The idea that land should be kept forever wild presents a hard decision to those accustomed to making a living off the land, but the present is not as important as the future and that calls for resources not only to be conserved, but preserved.

Finally, I would urge all my colleagues, or their staffs now listening, to read Michael Frome's "Strangers in High Places," published by the University of Tennessee. It is without a doubt the finest single piece of literature I have ever read on the Great Smokies. I am confident that, after reading it, my friends will agree that the Great Smoky Mountains deserve the protection of wilderness status.

I urge the Senate's early approval of my bill. On this the third introduction of the Great Smoky Mountains Wilderness Act, it is fitting and proper that we act to preserve and protect this vital land for future Americans.●

By Mr. QUAYLE:

S. 1336. A bill to provide for a series of regional Presidential primary elections; to the Committee on Rules and Administration.

REGIONAL PRIMARY LEGISLATION

Mr. QUAYLE. Mr. President, a strong consensus has emerged that our Presidential nominating process is a system in dire need of constructive change. While I am personally pleased by the results of the 1980 election, I am not dissuaded from my conviction that the process can and should be improved. It seems that every 4 years, many of us, including the candidates themselves, voice concern about how we elect our President, and every 4 years we vow to do something about the system that has been variously described as a "traveling roadshow" and "institutionalized chaos."

Mr. President, today I am introducing a bill which I believe will bring both simplicity and logic to the nominating process. My bill would establish a system of four regional primaries. The first regional primary would be held on the second Tuesday of March and on the second Tuesday in each of the next 3 months.

Seventy days prior to the first scheduled primary a lottery would be conducted by the Federal Election Commis-

sion to determine which region would hold the first primary. Similar lotteries would be held 70 days before each subsequent regional primary, except the fourth and last. No State would be required to hold a primary, but any that do must schedule it on the date assigned to the region.

Mr. President, I am aware that many regional primary bills have previously been introduced in Congress. My bill would retain the advantages of previous regional primary proposals, but would also include one more significant advantage—the specified grouping of individual States.

One of the most widely-voiced complaints about the current system is the length of the prenomination campaign The marathon known as the Presidential campaign contributes significantly, I think, to voter apathy toward political participation. The public soon becomes bored with the candidates and the issues in a seemingly endless campaign. Voter turnout has consistently declined as the primary season has consistently lengthened. Regional primaries, by concentrating voter awareness in a 4-month period, can help to stimulate voter participation. My bill does not attempt to curb the early organization of a Presidential campaign, it merely seeks to limit the time during which delegate selection through primary results can take place.

Another complaint about the current system addressed by regional primaries is the inordinate influence of the early primaries. The press shows an exaggerated interest in these contests, emphasizing the horserace aspect of the campaign. In 1980 the question was not which candidate was demonstrating Presidential characteristics, but which one had momentum. Possible better alternatives dropped out for lack of money, volunteers, or the perception of being ahead in February or March. In 1980, two newspapers, the Manchester Union-Leader and the Des Moines Register, exerted undue influence over the winnowing out process. Regional primaries, while they cannot put an end to the "horserace" perception of a campaign, can reduce the disproportionate impact on the national will of States which have that impact merely by virtue of being first.

Regional primaries also offer the benefit of spacing out the contests. This would allow real campaigns and confrontations to take place. If candidates had to stay in a certain region for 30 days at a time, voters could get a clearer comparison. Under the current system, competing candidates are often not in the same State at the same time. Candidate forums therefore are difficult to organize. It is no accident that the two memorable ones in 1980 took place early on in Iowa and New Hampshire. By enabling candidates to focus their efforts in one section of the Nation at a time, the candidate fatigue that results from having to hopscotch back and forth across the Nation would be ameliorated.

Mr. President, despite these advantages, as I have noted, previous regional primary proposals have not met with much enthusiasm. One of the problems with these earlier proposals is the sectionalism inherent in their regional groupings. The traditional groupings, that is, New England, Mid-Atlantic, South, Midwest, and West, would provide sufficient uniformity and consolidation, but would also tend to produce winners with strong regional ties, who lack broad based national acceptability. My bill seeks to avoid the problem by proposing regions modeled after the "time zone" concept. The regions in the bill cut across traditional sectional lines. For example, in region I, Maine, and South Carolina would vote on the same day. In region II, Pennsylvania and Mississippi vote the same day. In region III, Michigan and Kansas share dates, as do, in region IV, Texas and Washington.

As you see from my examples, groupings would be slight modifications of strict time zone divisions. I chose to modify as I did for two reasons: First, I wanted regions that would be both heterogeneous and balanced as to population. Region I has an approximate population of 57.17 million; region II has 57.45 million; region III has 57.80 million; region IV has 57.51 million.

Second, I wished to anchor each region with at least one State with a large bloc of electoral votes. Region I would contain New York; region II Pennsylvania, region III Illinois; region IV California. A full list of the proposed regions follows:

Region I: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, New York, Rhode Island, Delaware, New Jersey, Maryland, District of Columbia, Virginia, North Carolina, South Carolina, Virgin Islands.

Region II: Pennsylvania, Ohio, West Virginia, Indiana, Kentucky, Tennessee, Alabama, Georgia, Florida.

Region III: Michigan, Wisconsin, Illinois, Minnesota, Iowa, Missouri, Arkansas, Mississippi, Louisiana, North Dakota, South Dakota, Kansas, Oklahoma, Nebraska, Puerto Rico.

Region IV: Washington, Montana, Oregon, Idaho, Wyoming, Colorado, Utah, Arizona, New Mexico, Texas, Nevada, California, Alaska, Hawaii, Guam.

Mr. President, I do not believe that any regional primary system is perfect. I do believe, however, that a time-zone style regional primary system is vastly preferable to the present process which resembles more of a maze than a system. It is our duty to bring some order and logic to the process by which we elect our presidents. The bill I offer will accomplish this, and I urge that my colleagues support this measure.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1336

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Presidential Primaries Timing Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) the proliferation of presidential primaries and the consequent lengthening of the presidential nominating process has resulted in disturbing levels of voter apathy and candidate fatigue;

(2) the disproportionate impact that a few State presidential primaries have on the nominating process impugns the integrity of that process; and

(3) the random scheduling of presidential primaries often acts to prevent voters from receiving a clear comparison among candidates.

ESTABLISHMENT OF REGIONAL PRIMARIES

SEC. 3. (a) No State shall conduct a presidential primary except in accordance with the provisions of this Act.

(b) Four regional presidential primaries shall be held during each presidential election year. The first regional primary shall be held on the second Tuesday in March, and the remaining three regional primaries shall be held on the second Tuesday of each of the three succeeding months. Seventy days prior to the date of the first regional primary, the Commission shall determine by lot the region in which that presidential primary is to be held. The Commission shall then determine by separate lot, conducted seventy days before the date of each subsequent regional primary, except the last, the region in which each subsequent regional primary is to be held.

APPOINTMENT OF CONVENTION DELEGATES

SEC. 4. Nothing in this Act shall in any way affect the right of any political party to appoint convention delegates in accordance with the procedures of such party.

DEFINITIONS

SEC. 5. For purposes of this Act, the term—

(1) "Commission" means the Federal Election Commission;

(2) "presidential primary" means an election for the expression of a preference for the nomination of individuals for election to the office of President of the United States;

(3) "region" means any of the following four regions:

(A) region 1 comprises Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, Vermont, Delaware, Maryland, the District of Columbia, Virginia, North Carolina, South Carolina, and the Virgin Islands;

(B) region 2 comprises Indiana, Ohio, Pennsylvania, West Virginia, Kentucky, Tennessee, Alabama, Georgia, and Florida;

(C) region 3 comprises Iowa, Illinois, Michigan, Minnesota, North Dakota, South Dakota, Wisconsin, Nebraska, Missouri, Arkansas, Mississippi, Louisiana, Kansas, Oklahoma, and Puerto Rico; and

(D) region 4 comprises Montana, Alaska, Arizona, California, Hawaii, Idaho, Oregon, Nevada, Utah, Washington, Wyoming, Colorado, New Mexico, Texas, and Guam; and

(4) "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, or a territory or possession of the United States.

By Mr. STEVENS (for himself and Mr. MURKOWSKI):

S. 1337. A bill to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska; ordered held at the desk until the close of business Tuesday, June 9, 1981.

TEMPORARY EXCLUSION OF FOREIGN FISHING SUPPORT VESSELS FROM THE INTERNAL WATERS OF ALASKA

Mr. STEVENS. Mr. President, I ask unanimous consent that the bill I introduce be printed and held at the desk for referral until the close of business on Tuesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill follows:

S. 1337

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROHIBITION.

During 1981, no vessel, other than a vessel of the United States, may engage in processing or fishing support activities in internal waters of the State of Alaska, unless:

(a) The Governor of Alaska determines the extent to which United States fish processors will not have adequate processing capacity or will not utilize such capacity, in specified internal waters of Alaska and determines the period of time during which United States processors lack such capacity; and

(b) The Secretary of Commerce concurs with the Governor's determination, and authorizes the transfer of fish to foreign vessels in the internal waters of the State of Alaska.

SEC. 2. DEFINITIONS.

(a) The term "internal waters" means waters landward of the baseline from which the territorial sea is measured.

(b) The term "United States fish processors" means facilities located within the United States for, and vessels of the United States used or equipped for, the processing of fish for commercial use or consumption.

(c) The term "vessel of the United States" means any vessel documented under the laws of the United States or registered under the laws of any State.

SEC. 3. PENALTIES.

Any foreign vessel, and any owner or operator of any foreign vessel, that engages in processing or fish support activities while such foreign vessel is in the internal waters of the State of Alaska, without authorization by the Secretary of Commerce pursuant to section 1, shall be subject to the following:

(a) A civil penalty, not to exceed $25,000 for each violation; and

(b) Forfeiture to the United States of any fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used, and any fish taken or retained, in connection with such violation.

The procedures, presumptions, and jurisdictions specified in sections 1858 and 1860 of title 16, United States Code, shall apply to any civil penalties assessed or forfeitures carried out under this act.

ADDITIONAL COSPONSORS

S. 344

At the request of Mr. LEVIN, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 344, a bill to increase the accountability of, policy coordination by, and management of priorities by agencies through an improved mechanism for congressional oversight of the rules of agencies.

S. 580

At the request of Mr. LEVIN, the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 580, a bill to establish program levels for the Small Business Administration pollution control bond program.

S. 777

At the request of Mr. TOWER, the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 777, a bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes.

S. 940

At the request of Mr. THURMOND, the Senator from California (Mr. CRANSTON), and the Senator from California (Mr. HAYAKAWA) were added as cosponsors of S. 940, a bill to encourage corporations to donate certain historical film to educational organizations by increasing the limit on the charitable contribution deduction of such corporations.

S. 1025

At the request of Mr. GRASSLEY, the Senator from Idaho (Mr. SYMMS), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI), the Senator from New Mexico (Mr. SCHMITT), the Senator from Oklahoma (Mr. BOREN), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 1025, a bill to provide for penalties for persons who obtain or attempt to obtain narcotics or other controlled substances from any pharmacist by terror, force, or violence, and for other purposes.

S. 1030

At the request of Mr. MCCLURE, the Senator from Florida (Mr. CHILES), the Senator from Colorado (Mr. ARMSTRONG), and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of S. 1030, a bill to protect firearms owners' constitutional rights, civil liberties and rights to privacy.

S. 1215

At the request of Mr. PROXMIRE, the Senator from Kentucky (Mr. HUDDLESTON) was added as cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1310

At the request of Mr. BOSCHWITZ, the Senator from New York (Mr. D'AMATO) was added as a cosponsor of S. 1310, a bill to amend the Internal Revenue Code of 1954 to provide certain community development, employment, and tax incentives for individuals and businesses in depressed areas.

AMENDMENTS SUBMITTED FOR PRINTING

CLEAN WATER ACT AMENDMENTS OF 1981

AMENDMENT NO. 60

(Ordered to be printed and referred to the Committee on Environment and Public Works.)

Mr. MOYNIHAN (for himself, Mr. D'AMATO, and Mr. WILLIAMS) submitted an amendment intended to be proposed by them to the bill (S. 1274) to amend title II of the Clean Water Act and for other purposes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public, that the Subcommittee on Energy Conservation and Supply has scheduled hearings on S. 506 to reinstate and validate U.S. oil and gas leases numbered OCS–P–0218 and OCS–P–0226.

The hearings will be held on Wednesday, July 22 at 10 a.m. in room 110 of the Dirksen Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate today to hold hearings on the nomination of Ernest Lefever to be Assistant Secretary of State for Human Rights and Humanitarian Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, June 4, to mark up budget reconciliation matters within the purview of the Agriculture Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, June 4, to hold hearings on trade organization policy.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

FACE THE HOUSING CRISIS HEAD ON

● Mr. SASSER. Mr. President, the American housing industry faces a severe economic crisis.

We are building only about 1.3 million housing units a year when we need well over 2 million units a year to house a growing population. And I have seen more estimates that as much as a third of the American builders have left the homebuilding industry as a result of the housing depression that we are currently experiencing. Thus, the housing deficit is one that may continue well into the future if we do not take immediate steps to help hold down the cost of American housing.

Not only are we in a housing shortage but also the price of housing, driven ever upward by rising interest rates, has made homeownership a fading dream for most young Americans. The average cost today of a new house is now $84,000 and new home sales declined by 13½ percent nationwide.

Interest rates, ever since the announce- of the Federal Reserve Board policy on October 9, 1979, have risen to astronomical levels. According to Department of Commerce reports, the average mortgage rate on a new house as of Feb-

ruary 1981 was 13.02 percent; in October 1979, the mortgage rate was 10.91 percent.

And the most disturbing thing about these rising interest rates is their effect on the cost of housing and their impact on first-time homebuyers.

Consider if you will the interest rate cost differential and its impact on housing. A $60,000 mortgage at 10 percent costs $527 per month. With the interest rate raised to 15 percent—which is not uncommon in many areas in my own State of Tennessee—this monthly payment rises to $759 per month. In essence that increased interest rate raises the cost of this house by nearly $85,000 over the life of the 30-year mortgage.

And not only are interest rates making housing expensive, but they are proving to be a major discouragement to the first-time homebuyer.

The percentage of first-time buyers—those young families who help keep the system moving by coming in at the bottom—had declined 50 percent from 1977 to 1979; we are now at a point where less than 10 percent of these first-time buyers can afford homes. Indeed, that number is still declining: An average-priced home today—and that average price has hit $84,000—at 15 percent, interest is affordable for only 5 percent of the population. The national average rate is higher than that, Mr. President, and by the time it hits 18 percent, fully 97 percent of the American homebuying public will be unable to afford an average-priced home. That is $1,150 per month in principal, interest, insurance, taxes, and utilities. Over $1,000 per month for an average-priced home.

With interest rates at current levels—making monthly mortgage payments out of reach for all but a handful of buyers and forcing the exodus of capital into higher-yield instruments—how can homebuyers be brought back into the marketplace and how can capital be brought back into savings to expand the mortgage pool? Both questions have the same answer: tax-exempt savings for residential mortgages. It is simple, cost-effective, commonsense.

Mr. President, S. 701, introduced by my colleague, Senator BENTSEN, provides this critically needed response. It provides for the exclusion from taxation of interest earned on deposits which are used for residential mortgage lending purposes. What better way to reduce taxes, stimulate savings and investment, and spur production and sales? If we do not take steps now, we will preside over the dissolution of yet more thousands of commercial and financial enterprises and the creation of a pent-up demand that will inflate the cost of housing in the future beyond anything we have witnessed thus far.

Just bringing annual starts back up to where they were 3 years ago, to about 2 million, would generate 860,000 man-hours of work. We have cut back every last program designed to help the unemployed on the presumption that they would become employed somehow. This is one way to do it. It is also the best way to keep entrepreneurs who are carrying inventory at these phenomenal interest rates from becoming unemployed. Inventory is moving at a rate of 2.5 million annually; it was at 3.9 million in 1978.

I am a cosponsor of S. 701 and for the reasons I have stated above I want to urge speedy and favorable consideration of this approach. S. 701 is not some complex regulatory scheme. It is not out of line with any of our current priorities, notably cutting taxes and stimulating production through the private sector. It is a very necessary piece of legislation, and I commend it to my colleagues.●

HOUSING AND COMMUNITY DEVELOPMENT AMENDMENTS OF 1981, S. 1197

● Mr. LEVIN. Mr. President, I voted against S. 1197, the Housing and Community Development Amendments of 1981 last night with some reluctance. I find much to support in the bill's approach. For example, I agree with the committee's judgment that there is too much redtape and too much Federal intrusion in the CDBG program as it is currently constituted. Their proposal to shift Federal involvement to performance review rather than application evaluation is a concept which I am inclined to support in this area just as I have supported increased emphasis on performance standards in other regulatory activities.

But, Mr. President, there were still too many questions in my mind about the specific elements of the committee approach to allow me to support the bill it placed before us.

I am greatly concerned about the change in title I of the bill which shifts responsibility for small city CDBG programs to the State as opposed to the Federal Government. Rather than reducing redtape, this approach seems certain to substitute one bureaucracy for another. This view is shared by those communities most directly affected. For example, the U.S. Conference of Mayors said that:

> We oppose entirely the provisions of state control of the CDBG program in nonentitlement jurisdictions. We remain convinced that direct Federal-City relationship should be preserved . . . Certainly there is no evidence that turning the administration of the program over to the states would improve it in any way.

The National Association of Smaller Communities also objected to this provision of the bill. They concluded that:

> Greater involvement of states in the program and the performance by many states . . . reveals for the most part a very marginal ability when compared with the assistance available from representatives of the HUD area offices.

I also find the bill strikingly inconsistent in its approach to the problems involved in Federal-city relationships. At the same time that the bill seeks to give the community greater flexibility in some areas, it also directly intrudes on local decisionmaking in other areas. The punishments this bill authorizes the Federal Government to impose on communities which have rent control programs, for example, contrasts sharply with the freedom it gives communities in other areas which also involve the direct expenditure of Federal funds.

Beyond these specific concerns, Mr. President, I am also disturbed by the speed with which we were forced to consider very major changes in the nature and philosophy of these programs. As the National League of Cities suggested, the Congress and the country would have been better served had the committee deferred action on title I until the affected parties had a great opportunity to consult and develop their positions. I share the conclusion of my colleagues on the committee who voted against the bill, in part because the legislation "was presented to the committee so late and acted on so hastily that interested witnesses had no chance to offer their comments on the sweeping changes proposed."

There are, then, Mr. President, some interesting and potentially valuable approaches contained in this legislation. I find much in it that I admire. But given the particular substantive and process issues I have discussed, I reluctantly concluded that I could not support the bill.●

S. 1310—URBAN JOBS AND ENTERPRISE ZONE ACT OF 1981

● Mr. BOSCHWITZ. Mr. President, yesterday I introduced S. 1310, the Urban Jobs and Enterprise Zone Act of 1981, on behalf of myself and Mr. CHAFEE, Mr. BURDICK, Mr. GORTON, Mr. HATCH, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. JEPSEN, Mr. PERCY, Mr. TOWER, Mr. QUAYLE, Mr. ARMSTRONG, Mr. KASTEN, and Mr. D'AMATO. I ask that the bill be printed in the RECORD.

The text of the bill is as follows:

S. 1310

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Urban Jobs and Enterprise Zone Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—DESIGNATION OF ENTERPRISE ZONES

SEC. 101. DESIGNATION OF ZONES.

(a) GENERAL RULE.—Chapter 80 (relating to general rules) is amended by adding at the end thereof the following new subchapter:

"Subchapter C—Designation of Enterprise Zones

"Sec. 7871. Designation.

"(a) DESIGNATION OF ZONES.—

"(1) ENTERPRISE ZONES DEFINED.—For purposes of this title, the term 'enterprise zone' means any area in the United States or its possessions which is designated by one or more local governments for purposes of this section if—

"(A) the Secretary, after consultation with the Secretaries of Commerce, Labor, and Treasury, and the Administrator of the Small

Business Administration, approves such designation, and

"(B) the government making such designation has authority to make the local commitments under subsection (d) and provides assurances satisfactory to the Secretary that such commitments will be made in such area.

"(2) LIMITATIONS ON DESIGNATIONS.—The Secretary may not approve any designation under paragraph (1)—

"(A) unless an application therefor is submitted in such manner and in such form, and contains such information, as the Secretary shall by regulations prescribe,

"(B) if any portion of the area to be designated is already included in an area designated and approved as an enterprise zone, or

"(C) if the chief executive officer of the State or possession in which the area to be designated is located files an objection with the Secretary within 21 days of the filing of the application.

"(3) DESIGNATION BY STATES.—A designation under this subsection may be made by a State government on behalf of a local government with the consent of such local government.

"(b) PERIOD FOR WHICH DESIGNATION IS IN EFFECT.—

"(1) IN GENERAL.—Any designation of an area as an enterprise zone shall remain in effect during the period beginning on the date of the designation and ending on December 31, 2001, unless the Secretary revokes such designation under paragraph (2).

"(2) REVOCATION OF DESIGNATION.—The Secretary, after consultation with the officials described in subsection (a)(1)(A), may revoke any designation of an area only if the Secretary determines that the government which designated such area is not substantially complying with the local commitments described in subsection (d). Any such revocation shall take effect under rules similar to the rules of subsection (a).

"(c) AREA REQUIREMENTS.—

"(1) IN GENERAL.—The Secretary may approve the designation of any area under subsection (a) only if—

"(A) the area is within the jurisdiction of the government designating such area,

"(B) the boundary of the area is continuous and includes, if feasible, proximately located vacant or underutilized lands or buildings which are conveniently accessible to residents of the area,

"(C) the area—

"(i) has a population which, as determined under the most recent census, is at least—

"(I) 4,000 if any portion of such area is located within a standard metropolitan statistical area (within the meaning of section 103A(1)(4)(B)) with a population of 50,000 or greater, or

"(II) 2,500 in any other case, or

"(ii) is an Indian reservation (as determined by the Secretary of the Interior), and

"(D) the area meets the requirements of paragraphs (2) and (3).

"(2) ELIGIBILITY REQUIREMENTS.—For purposes of paragraph (1), an area meets the requirements of this paragraph if the Secretary determines that—

"(A) the area is one of pervasive poverty, unemployment, and general distress, and

"(B) the area is located wholly within an area which meets the requirements for Federal assistance under section 119 of the Housing and Community Development Act of 1974.

"(3) UNEMPLOYMENT, POVERTY, ETC. REQUIREMENTS.—An area meets the requirements of this paragraph if—

"(A) the average rate of unemployment in such area for the most recent 18-month period for which data are available was at least 1½ times the average national rate of unemployment for such 18-month period;

"(B) such area was a low-income poverty area (as determined by the Bureau of the Census during its most recent census);

"(C) at least 70 percent of the residents living in the area have incomes below 80 percent of the median income of the residents of the government designating such area (determined in the same manner as under section 119(b) of the Housing and Community Development Act of 1974); or

"(D) WITH RESPECT TO SUCH AREA—

"(i) the population of all census tracts in the area decreased by 10 percent or more between 1970 and 1980, and

"(ii) the government seeking designation of the area establishes to the satisfaction of the Secretary that—

"(I) chronic abandonment or demolition of commercial or residential structures exists in the area, or

"(II) substantial tax arrearages of commercial or residential structures exist in the area.

"(4) DETERMINATION MADE BY SECRETARY.—Determinations under this subsection shall be made by the Secretary on the basis of data submitted by or on behalf of the government designating the area (or persons designated by the government) if the Secretary determines that such data is reasonably accurate.

"(d) REQUIRED LOCAL COMMITMENT.—

"(1) IN GENERAL.—No area shall be designated as an enterprise zone unless the government seeking such designation agrees in writing that during any period during which the area is an enterprise zone such government will follow a course of action designed to reduce the various burdens borne by employers or employees in such area.

"(2) COURSE OF ACTION.—A course of action under paragraph (1) may be implemented by the government, private entities, or both, may be funded from the proceeds of any Federal program, and may include, but is not limited to—

"(A) a reduction of tax rates or fees,

"(B) an increase in the level or efficiency of local services,

"(C) a simplification or streamlining of governmental requirements on employers or employees, or

"(D) a commitment from private entities in the area to provide jobs and job training for, and technical, financial, or other assistance to, employees and residents of the area.

"(e) LIMITATIONS ON DESIGNATIONS.—

"(1) IN GENERAL.—The Secretary may only designate areas as enterprise zones during the period beginning on the date of the enactment of this subchapter and ending on December 31, 1996.

"(2) MINIMUM NUMBER OF DESIGNATIONS.—During each of the 3 calendar years following the calendar year in which the date of the enactment of this subchapter occurs, the Secretary of Housing and Urban Development shall designate at least 13 but not more than 25 areas as enterprise zones.

"(f) PRIORITY OF DESIGNATION.—In deciding which areas should be designated as enterprise zones, the Secretary shall give preference to—

"(1) areas with the highest levels of poverty, unemployment, and general distress,

"(2) areas with respect to which the government seeking or approving the designation has made (or will make) the greatest effort to examine and remove impediments to job creation, taking into account the resources available to such government to make such efforts,

"(3) areas which have the widest support from the government seeking designation, the community, residents, local businesses and private organizations, especially in meeting the local commitment described in subsection (d), and

"(4) areas with respect to which the government of the State or possession in which the area is located has made commitments similar to the local commitments described in subsection (d).

"(g) DEFINITIONS AND SPECIAL RULE.—For purposes of this section—

"(1) SECRETARY.—The term 'Secretary' means the Secretary of Housing and Urban Development or his delegate.

"(2) GOVERNMENTS.—If more than one government seeks the designation of an area as an enterprise zone, any reference to, or requirement of, this section shall apply to all such governments.".

(b) CONFORMING AMENDMENT.—The table of subchapters for chapter 80 is amended by adding at the end thereof the following new item:

"Subchapter C. Designation of enterprise zones.".

SEC. 102. COORDINATION WITH OTHER FEDERAL PROGRAMS.

(a) IN GENERAL.—The Secretary of Housing and Urban Development shall—

(1) promote the coordination of all Federal housing, community and economic development, banking, financial assistance, and employment training programs which are carried on within an enterprise zone (within the meaning of subchapter C of chapter 80 of the Internal Revenue Code of 1954),

(2) expedite, to the greatest extent possible, the consideration of applications for programs described in paragraph (1) thorugh the consolidation of forms or otherwise, and

(3) provide, whenever possible, for the consolidation of periodic reports required under programs described in paragraph (1) into one summary report submitted at such intervals as may be designated by the Secretary.

(b) PROPERTY TAX REDUCTIONS.—Any reduction of taxes under any required program of local commitment under section 7871(d) of the Internal Revenue Code of 1954 shall be disregarded in determining the eligibility of a State or local government for, or the amount or extent of, any assistance or benefits under any law of the United States.

SEC. 103. SENSE OF CONGRESS WITH RESPECT TO DESIGNATIONS OF FOREIGN TRADE ZONES.

It is the sense of the Congress that—

(1) whenever possible foreign trade zones shall be established within enterprise zones (within the meaning of subchapter C of chapter 80 of the Internal Revenue Code of 1954), and

(2) in the case of any application for designation of an area in an enterprise zone as a foreign-trade zone—

(A) the Foreign-Trade Zone Board should expedite the application process as much as possible;

(B) in evaluating such application, the Board should take into account not only current economic development within the enterprise zone but also future development to be expected from the incentives offered by this Act; and

(C) the Board should provide technical assistance to the applicants.

TITLE II—TAXATION

Subtitle A—Refundable Credits for Employers and Employees

SEC. 201. REFUNDABLE EMPLOYERS' CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44F. EMPLOYMENT OF CERTAIN EMPLOYEES IN ENTERPRISE ZONES.

"(a) IN GENERAL.—At the election of the taxpayer, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 5 percent of the qualified wages of the taxpayer for the taxable year.

"(b) QUALIFIED WAGES DEFINED.—For purposes of this section, the term 'qualified wages' means the wages paid or incurred by

the employer during the taxable year to qualified employees.

"(c) WAGES DEFINED.—For purposes of this section—

"(1) IN GENERAL.—Except as otherwise provided in this subsection, the term 'wages' has the meaning given to such term by subsection (b) of section 3306 (determined without regard to any dollar limitation contained in such section).

"(2) EXCLUSION OF CERTAIN AMOUNTS FOR EMPLOYERS RECEIVING ON-THE-JOB TRAINING PAYMENTS.—The term 'wages' shall not include that portion of any amount paid or incurred by an employer for any period to any individual which is equal to the amount of any federally funded payments the employer receives for on-the-job training of such individual for such period.

"(3) INDIVIDUALS FOR WHOM WIN OR EMPLOYMENT CREDIT CLAIMED.—The term 'wages' does not include any amount paid or incurred by the employer to an individual with respect to whom the employer claims credit under section 40 or 44B.

"(4) TERMINATION.—The term 'wages' shall not include any amount paid or incurred after December 31, 2001.

"(d) QUALIFIED EMPLOYEE.—For purposes of this section, the term 'qualified employee' means an individual—

"(1) who is certified by the designated local agency as having been (during the preemployment period) an eligible applicant or otherwise eligible—

"(A) under part B or part D of title II of the Comprehensive Employment and Training Act, or

"(B) under part A or part B of title IV of such Act, and

"(2) who performs at least 50 percent of his services during any period for which any computation is being made under this section within an enterprise zone.

For purposes of paragraph (1), the terms 'designated local agency' and 'preemployment period' have the same meanings given such terms by paragraphs (10) and (12) of section 51(d).

"(e) OTHER DEFINITIONS AND SPECIAL RULES.—

"(1) CONTROLLED GROUPS, ETC.—Under regulations prescribed by the Secretary, rules similar to the rules of section 52 and of subsections (f), (g), and (h) of section 51 shall apply to the credit allowable by this section, except that subsection (h) of section 51 shall be applied without regard to any dollar limitation.

"(2) ENTERPRISE ZONE.—The term 'enterprise zone' means an area for which designation as an enterprise zone is in effect under section 7871.".

(b) CREDIT TO BE REFUNDABLE.—

(1) Subsection (b) of section 6401 (relating to amounts treated as overpayments) is amended—

(A) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44F (relating to employment of certain employees in enterprise zones)", and

(B) by striking out "and 43" and inserting in lieu thereof ", 43, and 44F".

(2) Sections 44C(b)(5), 44D(b)(5), 44E(e)(1), 55(b)(2), 55(b)(4), and 56(c) are each amended by striking out "and 43" and inserting in lieu thereof "43, and 44F".

(3) Paragraph (4) of section 6201(a) (relating to assessment authority) is amended—

(A) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof "section 43 (relating to earned income), or section 44F (relating to employment of certain employees in enterprise zones),", and

(B) by striking out "under section 39 or 43" in the heading thereof.

(c) NO DEDUCTION ALLOWED.—

(1) IN GENERAL.—Section 280C (relating to disallowance of deductions for portion of wages for which credit is claimed under section 40 or 44B) is amended—

(A) by adding at the end thereof the following new subsection:

"(c) RULE FOR SECTION 44F CREDIT.—No deduction shall be allowed for that portion of the wages or salaries paid or incurred for the taxable year which is equal to the amount of the credit allowable under section 44F (relating to credit for employment of certain employees in enterprise zones). This subsection shall be applied under a rule similar to the rule under the last sentence of subsection (b).";

and

(B) by striking out "or 44B" in the heading and inserting in lieu thereof ", 44B, or 44F".

(2) CONFORMING AMENDMENT.—The table of sections for part IX of subchapter B of chapter 1 is amended by striking out "or 44B" in the item relating to section 280C and inserting in lieu thereof ", 44B, or 44F".

(d) CONFORMING AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting before the item relating to section 45 the following new item:

"Sec. 44F. Employment of certain employees in enterprise zones.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to wages paid after the date of the enactment of this Act in taxable years ending after such date.

SEC. 202. REFUNDABLE EMPLOYEES' CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable), as amended by section 201, is amended by inserting immediately before section 45 the following new section.

"SEC. 44G. EARNED INCOME OF EMPLOYEES IN ENTERPRISE ZONES.

"(a) IN GENERAL.—In the case of a qualified employee, there is allowed as a credit against the tax imposed by this subtitle for the taxable year an amount equal to 5 percent of the qualified earned income for the taxable year.

"(b) LIMITATION.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed $1,500.

"(c) "DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED EMPLOYEE.—The term 'qaulified employee' means an individual—

"(A) who is employed by a qualified business during the taxable year, and

"(B) with respect to whom at least 50 percent of the services performed by the individual for the qualified business during the taxable year are services performed in an enterprise zone.

"(2) QUALIFIED EARNED INCOME.—

"(A) IN GENERAL.—The term 'qualified earned income' means earned income attributable to services which were performed—

"(i) for a qualified business,

"(ii) in an enterprise zone, and

"(iii) during the 36-month period beginning on the date the qualified employee first performed services for any qualified business in any enterprise zone.

"(B) EARNED INCOME.—The term 'earned income' has the meaning given such term by section 43(c)(2).

"(3) ENTERPRISE ZONE.—The term 'enterprise zone' means any area with respect to which a designation as an enterprise zone is in effect under section 7871.

"(4) QUALIFIED BUSINESS.—The term 'qualified business' has the meaning given such term by section 1201(b)(2).

"(d) CREDIT TO BE REFUNDABLE; ADVANCE PAYMENTS.—For purposes of this title (other than this section, this subpart and chapter 63), any credit allowable under this section shall be treated as if it were allowed by section 43 and not by this section.

"(e) TERMINATION.—This section shall not apply to qualified earned income attributable to services performed after December 31, 2001.".

(b) CONFORMING AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately before the item relating to section 45 the following new item:

"SEC. 44G. EARNED INCOME OF EMPLOYEES IN ENTERPRISE ZONE.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after the date of the enactment of this Act.

Subtitle B—Reduction in Capital Gain Tax Rates

SEC. 211. CORPORATIONS.

(a) GENERAL RULE.—Subsection (a) of section 1201 (relating to alternative tax for corporations) is amended by striking out paragraphs (1) and (2) and inserting in lieu thereof the following:

"(1) a tax computed on the taxable income reduced by the amount of the net capital gain, at the rates and in the manner as if this subsection had not been enacted, plus

"(2) a tax of 28 percent of the excess (if any) of—

"(A) the net capital gain for the taxable year, over

"(B) the net capital gain determined only by taking into account sales or exchanges of qualified property.".

(b) DEFINITION OF QUALIFIED PROPERTY.—Section 1201 is amended by redesignating subsections (b) and (c) as subsections (c) and (d) and by inserting after subsection (a) the following new subsection:

"(b) DEFINITION OF QUALIFIED PROPERTY.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified property' means—

"(A) any tangible personal property which was acquired by the taxpayer after the designation of an area as an enterprise zone and which was used predominantly by the taxpayer in such enterprise zone in the active conduct of a trade or business,

"(B) any real property located in an enterprise zone which was acquired by the taxpayer after the designation of an area as an enterprise zone and which was used predominantly by the taxpayer in the active conduct of a trade or business, and

"(C) any interest in a corporation, partnership, or other entity if, for the most recent taxable year of such entity ending before the date of acquisition of such interest, such entity was a qualified business.

"(2) QUALIFIED BUSINESS.—

"(A) IN GENERAL.—The term 'qualified business' means any person—

"(i) which is actively engaged in the conduct of a trade or business during such taxable year,

"(ii) with respect to which at least 50 percent of such person's gross receipts for the taxable year are attributable to the active conduct of a trade or business within an enterprise zone, and

"(iii) with respect to which at least 40 percent of any employees hired by such person after the later of the date on which—

"(I) such person begins the active conduct of a trade or business within an enterprise zone, or

"(II) any area in which such person is actively engaged in the conduct of a trade or business is designated as an enterprise zone, are qualified employees.

"(B) EXISTING BUSINESS.—Any person which—

"(i) was actively engaged in the conduct of a trade or business in an area immediately before such area is designated as an enterprise zone, and

"(ii) otherwise meets the requirements of this paragraph,

shall not be treated as a qualified business unless the average number of employees (determined on a full-time basis) during the taxable year is at least 10 percent greater than the average number of such employees during the taxable year preceding the designation of such area as an enterprise zone.

"(3) QUALIFIED EMPLOYEES.—The term 'qualified employee' has the same meaning given such term by section 44F(d).

"(4) SPECIAL RULES FOR LOW INCOME RENTAL PROPERTY.—

"(A) IN GENERAL.—In the case of property described in subparagraph (B)—

"(i) such property shall, for purposes of section 1201(a)(2)(B), be treated as qualified property, and

"(ii) ownership of such property shall, for purposes of section 128, be treated as the active conduct of a trade or business within an enterprise zone.

"(B) PROPERTY TO WHICH PARAGRAPH APPLIES.—Property is described in this subparagraph if such property—

"(i) is section 1250 property described in clauses (i)–(iv) of section 1250(a)(1)(B), or similar property designated by the Secretary of Housing and Urban Development,

"(ii) is located in an enterprise zone, and

"(iii) was—

"(I) constructed after the area's designation as an enterprise zone, or

"(II) rehabilitated after such designation and the cost of such rehabilitation was at least $10,000 per unit with respect to each project (or $3,000 per unit if such project was financed from a State or local agency and such agency certifies that no person is in default with respect to such financing at the time of the rehabilitation).

"(5) PROPERTY REMAINS QUALIFIED AFTER ZONE DESIGNATION CEASES TO APPLY.—

"(A) IN GENERAL.—The treatment of property as qualified property under paragraph (1) shall not terminate when the designation of the enterprise zone in which the property is located or used ceases to apply.

"(B) EXCEPTIONS.—Subparagraph (A) shall not apply after the first sale or exchange of property occurring after the designation ceases to apply to the zone.

"(6) ENTERPRISE ZONE.—The term 'enterprise zone' means an area with respect to which a designation as an enterprise zone is in effect under section 7871.".

SEC. 212. TAXPAYERS OTHER THAN CORPORATIONS.

Subsection (a) of section 1202 (relating to deduction for capital gains) is amended to read as follows:

"(a) DEDUCTION ALLOWED.—

"(1) IN GENERAL.—If for any taxable year a taxpayer other than a corporation has a net capital gain, there shall be allowed as a deduction from gross income an amount equal to the sum of—

"(A) 100 percent of the lesser of—

"(i) the net capital gain, or

"(ii) the net capital gain determined by only taking into account sales or exchanges of qualified property (as defined in section 1201(b)), plus

"(B) 60 percent of the excess (if any) of—

"(i) the net capital gain, over

"(ii) the amount of the net capital gain taken into account under subparagraph (A).

"(2) PROPERTY REMAINS QUALIFIED AFTER ZONE DESIGNATION CEASES TO APPLY.—

"(A) IN GENERAL.—The treatment of property as qualified property under paragraph (1) shall not terminate when the designation of the enterprise zone in which the property is located or used ceases to apply.

"(B) EXCEPTIONS.—Subparagraph (A) shall not apply after the first sale or exchange of property occurring after the designation ceases to apply to the zone.".

SEC. 213. MINIMUM TAX.

(a) CAPITAL GAINS.—Paragraph (9) of section 57(a) (relating to tax preference for capital gains) is amended by adding at the end thereof the following new subparagraph:

"(E) SALES OF CERTAIN PROPERTY NOT TAKEN INTO ACCOUNT.—For purposes of this paragraph, sales or exchanges of qualified property (as defined in section 1201(b)) shall not be taken into account.".

(b) ACCELERATED DEPRECIATION.—Paragraph (2) of section 57(a) (relating to accelerated depreciation on real property) is amended by adding at the end thereof the following: "The preceding sentence shall not apply to any section 1250 property which is qualified property (within the meaning of section 1201(b)).".

SEC. 214. EFFECTIVE DATE.

The amendments made by this subtitle shall apply to sales or exchanges after December 31, 1981, in taxable years ending after such date.

Subtitle C—Reduction in Gross Income of Trades or Businesses Operating in Zone

SEC. 221. EXCLUSION FROM GROSS INCOME.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 128 as section 129 and by inserting after section 127 the following new section:

"SEC. 128. CERTAIN INCOME ATTRIBUTABLE TO ENTERPRISE ZONES.

"(a) GENERAL RULE.— There shall be excluded from the taxable income of a taxpayer (whether or not incorporated) for the taxable year an amount equal to the applicable percentage of the sum of—

"(1) any amount received by a qualified business from the active conduct of a trade or business within an enterprise zone, or

"(2) any amount received as interest on any mortgage, loan, or other financing (other than refinancing) provided by the taxpayer to any qualified business in connection with the conduct of a trade or business within an enterprise zone.

"(b) APPLICABLE PERCENTAGE.—For purposes of subsection (a), the applicable percentage shall be determined in accordance with the following table:

"If the taxable year begins in:	The applicable percentage is:
1981–1997	50
1998	40
1999	30
2000	20
2001	10

"(c) DEFINITIONS.—For purposes of this section—

"(1) ENTERPRISE ZONE.—The term 'enterprise zone' means an area with respect to which a designation as an enterprise zone is in effect under section 7871.

"(2) QUALIFIED BUSINESS.—The term 'qualified business' has the same meaning given such term by section 1201(b)(2).

"(3) TAXABLE INCOME.—The term 'taxable income' means the excess of the income received from the active conduct of a trade or business within an enterprise zone, less the deductions allowable under this chapter which are allocable to such income.

"(d) APPLICATION OF SECTION.—The provisions of this section shall apply to—

"(1) amounts described in subsection (a) which are received after the date of the enactment of this section and before January 1, 2002, and

"(2) amounts described in subsection (a)(2) which are received during the period described in paragraph (1) and which are attributable to financing provided during such period.".

(b) CONFORMING AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 128 and inserting in lieu thereof the following new items:

"Sec. 128. Certain income atttributable to enterprise zones.

"Sec. 129. Cross references to other Acts.".

Subtitle D—Other Incentives

SEC. 231. OPTIONAL CASH METHOD OF ACCOUNTING FOR CERTAIN SMALL BUSINESSES.

Section 446 (relating to general rule for methods of accounting) is amended by adding at the end thereof the following new subsection:

"(f) OPTIONAL CASH METHOD.—

"(1) IN GENERAL.—Any taxpayer which is a qualified business (as defined in section 1201(b)(2)) for any taxable year may elect to compute taxable income—

"(A) under the cash receipts and disbursemen's method of accoun ng, and

"(B) without any requirement to use inventories under section 471.

"(2) GROSS RECEIPTS LIMITATION.—Paragraph (1) shall not apply for any taxable year with respect to any taxpayer if for any prior taxable year the gross receipts of such taxpayer exceeded $2,000,000.

"(3) ELECTION.—An election under paragraph (1) may be made by any taxpayer without the consent of the Secretary for the taxpayer's first taxable year for which the taxpayer is a qualified business.".

SEC. 232. EXTENSION OF NET OPERATING LOSS CARRYOVERS.

(a) GENERAL RULE.—Paragraph (1) of section 172(b) (relating to net operating loss carrybacks and carryovers) is amended by adding at the end thereof the following new subparagraph:

"(J) In the case of any taxpayer which is a qualified business (as defined in section 1201(b)(2)) for any taxable year, any net operating loss for such taxable year shall be a net operating loss carryover to each of the 20 taxable years following the taxable year of such loss.".

(b) TECHNICAL AMENDMENT.—Subparagraph (B) of section 172(b)(1) is amended by striking out "and (B)" and inserting in lieu thereof "(F), and (J)".

SEC. 233. INVESTMENT CREDIT FOR CERTAIN LOW INCOME RENTAL HOUSING.

(a) DEFINITION OF SECTION 38 PROPERTY.—Paragraph (1) of section 48(a) (defining section 38 property) is amended by striking out the period at the end of subparagraph (B) and inserting in lieu thereof ", or" and by adding immediately after subparagraph (F) the following new subparagraph:

"(G) property described in section 1201(b)(4)(B).".

(b) LODGING EXCEPTION.—Paragraph (3) of section 48(o) (relating to property used for lodging) is amended—

(1) by striking out "and" at the end of subparagraph (B),

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof ", and", and

(3) by adding at the end thereof the following new subparagraph:

"(D) property described in section 1201(b)(4)(B).".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to periods beginning after the date of the enactment of this Act under rules similar to the rules contained in section 48(m) of the Internal Revenue Code of 1954.

Subtitle E—Sense of the Congress With Respect to Tax Simplification

SEC. 241. TAX SIMPLIFICATION.

It is the sense of the Congress that the Internal Revenue Service should in every way possible simplify the administration and enforcement of any provision of the Internal Revenue Code of 1954 added to, or amended by, this title.

TITLE III—REGULATORY FLEXIBILITY

SEC. 301. DEFINITION OF SMALL ENTITY FOR PURPOSES OF ANALYSIS OF REGULATORY FUNCTIONS.

Paragraph (6) of section 601 of title 5, United States Code, defining small entity, is amended to read as follows:

"(6) the term 'small entity' means—

"(A) a small business, small organization or small governmental jurisdiction (within the meaning of paragraphs (3), (4), and (5), respectively), and

"(B) any qualified business (within the meaning of section 1201(b)(2) of the Internal Revenue Code of 1954), any government designating an area as an enterprise zone (within the meaning of section 7871 of such Code) to the extent any rule will affect such zone, and any not-for-profit enterprise operating within such zone.".

THE ATLANTA MURDERS

● Mr. CHILES. Mr. President, I want to bring to the attention of my colleagues and to the American people the empathy shown by Floridians of all races and creeds for the people of Atlanta. Their grief is something that is shared by honest and sincere persons throughout this Nation.

On April 28, 1981, the city council of the city of North Miami Beach passed a resolution supporting the city of Atlanta in this time of crisis. Since that time even more children have been killed by a person or persons unknown. Many other Florida cities have also passed resolutions of support as the crisis has deepened. Because resolution No. R81–49 is typical of the concern shown by many citizens of Florida, I ask that the resolution R81–49 by the city council of the city of North Miami Beach be printed in the RECORD immediately after my remarks. May I also note, Mr. President, the diligence of the Alpha Kappa Alpha Sorority, Inc., in my State whose chapters constantly remind us of the sorrow and suffering of the citizens of Atlanta.

I join my colleagues and fellow Americans who pray for an end to the senseless violence being perpetrated against the young people in Atlanta. I know and have confidence that local public officials as well as the Federal authorities are doing all they can to apprehend those persons responsible.

Finally, Mr. President, I commend the city council of North Miami Beach and other organizations who have taken similar action on this issue.

The resolution follows:

RESOLUTION No. R81–49

Whereas, the City of Atlanta, Georgia, is presently suffering from an ongoing seige of terror as a result of the mass murder of at least 23 children by unknown persons during the last 20 months; and

Whereas, there are some 18,862 municipalities in the United States and 393 municipalities in the State of Florida including the City of North Miami Beach, all of which are concerned with the critical problem faced by the City of Atlanta and the affected parents and children of that community who are suffering from the horrendous and continuing threat to the lives of the children of that City; and

Whereas, the Mayor and City Council of the City of North Miami Beach support the people of the City of Atlanta during this time of crisis and urge the Federal government to make an all out effort to solve this problem without delay.

Now, therefore, be it resolved by the city council of the City of North Miami Beach, Florida:

Section 1. That the Mayor and City Council of the City of North Miami Beach urge the Federal government to act swiftly to prevent the further killing of innocent children by utilizing every means available to solve these vicious crimes.

Section 2. That the City Clerk of the City of North Miami Beach is directed to transmit copies of this Resolution to the Dade County League of Cities, Florida League of Cities, National League of Cities, Members of the Dade County Legislative Delegation, Senators Lawton Chiles and Paula Hawkins, Congressmen Bill Lehman, Dante Fascell, and Claude Pepper, and President Ronald Reagan.●

COMMENCEMENT ADDRESS

● Mr. QUAYLE. Mr. President, on May 17, 1981, President Ronald Reagan traveled to South Bend, Ind. to address the commencement ceremonies at the University of Notre Dame.

The President was greeted with one of the warmest welcomes he has had since assuming office. His speech was on inspiration to all who were fortunate enough to be in attendance.

I ask that the speech of President Ronald Raegan to the 1981 graduating class of Notre Dame University be printed in the RECORD.

The address follows:

ADDRESS OF THE PRESIDENT AT THE COMMENCEMENT CEREMONY AT THE UNIVERSITY OF NOTRE DAME

The PRESIDENT. Father Hesburgh, I thank you very much and for so many things. The distinguished honor that you've conferred upon me here today, I must say, however, compounds a sense of guilt that I have nursed for almost 50 years. I thought the first degree I was given was honorary. But it's wonderful to be here today, Governor Orr, Governor Bowen, Senators Lugar and Quayle and Representative Hiler. These distinguished honorees, the trustees, administration, faculty, students, and friends of Notre Dame and most important, the graduating class of 1981.

Nancy and I are greatly honored to share this day with you and our pleasure has been more than doubled because I am also sharing the platform with a long-time and very dear friend, Pat O'Brien.

Pat and I haven't been able to see much of each other lately so I haven't had a chance to tell him that there is now another tie that binds us together. Until a few weeks ago I knew very little about my father's ancestry. He had been orphaned at age six. But now I've learned that his grandfather, my great grandfather, left Ireland to come to America, leaving his home in Ballyporeen, a village in County Tipperary in Ireland, and I have learned that Ballyporeen is the ancestral home of the O'Briens.

If I don't watch out, this may turn out to be less of a commencement than a warm bath in nostalgic memories. Growing up in Illinois I was influenced by a sports legend so national in scope and so almost mystical it is difficult to explain to anyone who didn't live in those times. The legend was based on a combination of three elements; a game, football; a university, Notre Dame; and a man, Knute Rockne. There has been nothing like it before or since.

My first time to ever see Notre Dame was to come here as a sports announcer two years out of college to broadcast a football game. You won or I wouldn't have mentioned it.

A number of years later I returned here in the company of Pat O'Brien and a galaxy of Hollywood stars for the world premiere of "Knute Rockne—All American" in which I was privilege to play George Gipp. I've always suspected that there might have been many actors in Hollywood who could have played the part better. But no one could have wanted to play it more than I did. And I was given the part largely because the star of that picture, Pat O'Brien, kindly and generously held out a helping hand to a beginning young actor.

Having come from the world of sports, I'd been trying to write a story about Knute Rockne. I must confess that I had someone in mind to play the Gipper. On one of my sports broadcasts before going to Hollywood, I had told the story of his career and tragic death. I didn't have very many words on paper when I learned that the studio that employed me was already preparing a story treatment for that film. And that brings me to the theme of my remarks.

I'm the fifth President of the United States to address a Notre Dame commencement. The temptation is great to use this forum as an address on a great international or national issue that has nothing to do with this occasion. Indeed, this is somewhat traditional. So, I wasn't surprised when I read in several reputable journals that I was going to deliver an address on foreign policy or on the economy. I'm not going to talk about either.

But by the same token, I'll try not to belabor you with some of the standard rhetoric that is beloved of graduation speakers. For example, I'm not going to tell you that "You know more today than you've ever known before or that you'll ever know again." And the other standby is "When I was 14, I didn't think my father knew anything. By the time I was 21, I was amazed at how much the old gentleman had learned in seven years." And then, of course, the traditional and the standby is that "A university like this is a storehouse of knowledge because the freshmen bring so much in and the seniors take so little away."

You members of the graduating class of 1981 are what behaviorists call achievers. And while you will look back with warm pleasure on your memories of these years that brought you here to where you are today, you are also, I know, looking at the future that seems uncertain to most of you but which, let me assure you, offers great expectations.

Take pride in this day. Thank your parents as one on your behalf has already done here. Thank those who've been of help to you over the last four years. And do a little celebrating. You're entitled. This is your day and whatever I say should take cognizance of that fact. It is a milestone in life and it marks a time of change.

Winston Churchill during the darkest period of the Battle of Britain in World War II said: "When great causes are on the move in the world . . . we learn we are spirits, not animals, and that something is going on in space and time, and beyond space and time, which, whether we like it or not, spells duty."

Now, I'm going to mention again that movie that Pat and I and Notre Dame were in, for it says something about America. First Knute Rockne as a boy came to America with his parents from Norway. And in the few years it took him to grow up to college age, he became so American, that here at Notre Dame, he became an All American in a game that is still to this day uniquely American.

As a coach he did more than teach young men how to play a game. He believed truly that the noblest work of man was building the character of man. And maybe that's why he was a living legend. No man connected with football has ever achieved the stature or occupied the singular niche in the Nation that he carved out for himself, not just in sport, but in our entire social structure.

Now, today I hear very often, "Win one for the Gipper," spoken in a humorous vein. Lately I've been hearing it by Congressmen who are supportive of the program that I've introduced. But let's look at the significance of that story. Rockne could have used Gipp's dying words to win a game any time. But eight years went by following the death of George Gipp before Rock revealed those dying words, his deathbed wish.

And then he told the story at halftime to a team that was losing. And one of the only teams he had ever coached that was torn by dissention and jealousy and factionalism. The seniors on that team were about to close out their football careers without learning or experiencing any of the real values that a game has to impart. None of them had known George Gipp. They were children when he played for Notre Dame. It was to this team that Rockne told the story and so inspired them that they rose above their personal animosities. For someone they had never known, they joined together in a common cause and attained the unattainable.

We were told when we were making the picture of one line that was spoken by a player during the game. We were actually afraid to put it in the picture. The man who carried the ball over for the winning touchdown was injured on the play. We were told that as he was lifted on the stretcher and carried off the field he was heard to say: "That's the last one I can get for you Gipper."

Now, it's only a game. And maybe to hear it now afterward—and this is what we feared it might sound maudlin and not the way it was intended, but is there anything wrong with young people having an experience, feeling something so deeply, thinking of someone else to the point that they can give so completely of themselves? There will come times in the lives of all of us when we'll be faced with causes bigger than ourselves and they won't be on a playing field.

This nation was born when a band of men, the founding fathers, a group so unique we've never seen their like since, rose to such selfless heights. Lawyers, tradesmen, merchants, farmers, 56 men, achieved security and standing in life but valued freedom more. They pledged their lives, their fortunes, and their sacred honor. Sixteen of them gave their lives. Most gave their fortunes. All preserved their sacred honor.

They gave us more than a nation. They brought to all mankind for the first time the concept that man was born free, that each of us has inalienable rights, ours by the grace of God, and that government was created by us for our convenience, having only the powers that we choose to give it.

This is the heritage that you're about to claim as you come out to join the society made up of those who have preceded you by a few years or some of us by a great many.

This experiment in man's relation to man is a few years into its third century. Saying that may make it sound quite old. But let's look at it from another viewpoint or perspective. A few years ago someone figured out that if you could condense the entire history of life on earth into a motion picture that would run for 24 hours a day, 365 days—maybe on leap years we could have an intermission—this idea that is the United States wouldn't appear on the screen until 3½ seconds before midnight on December 31st. And in those 3½ seconds not only would a new concept of society come into being, a golden hope for all mankind, but more than half the activity, economic activity in world history, would take place on this continent. Free to express their genius, individual Americans, men and women, in 3½ seconds, would perform such miracles of invention, construction and production as the world had never seen.

As you join us out there beyond the campus, you know there are great unsolved problems. Federalism, with its built-in checks and balances, has been distorted. Central government has usurped powers that properly belong to local and state governments. And in so doing, in many ways that central government has begun to fail to do the things that are truly the responsibility of a central government.

All of this has led to the misuse of power and preemption of the prerogatives of people and their social institutions. You are graduating from a great private or, if you will, independent, university. Not too many years ago such schools were relatively free from government interference. In recent years government has spawned regulations covering virtually every facet of our lives. The independent and church-supported colleges and universities have found themselves enmeshed in that network of regulations and the costly blizzard of paperwork that government is demanding. Today 34 congressional committees and almost 80 subcommittees have jurisdiction over 439 separate laws affecting education at the college level alone. Almost every aspect of campus life is now regulated—hiring, firing, promotions, physical plant, construction, record keeping, fundraising and to some extent curriculum and educational programs.

I hope when you leave this campus that you will do so with a feeling of obligation to your alma mater. She will need your help and support in the years to come. If ever the great independent colleges and universities like Notre Dame give way to and are replaced by tax-supported institutions, the struggle to preserve academic freedom will have been lost.

And we're troubled today by economic stagnation, brought on by inflated currency and prohibitive taxes, and burdensome regulations. The cost of stagnation in human terms, mostly among those least equipped to survive it, is cruel and inhuman.

Now, after those remarks, don't decide that you'd better turn your diploma back in so that you can stay another year on the campus. I've just given you the bad news. The good news is that something is being done about all this. Because the people of America have said, "Enough already." We who had preceded you had just gotten so busy that we let things get out of hand. We forgot that we were the keepers of the power, forgot to challenge the notion that the state is the principal vehicle of social change, forgot that millions of social interactions among free individuals and institutions can do more to foster economic and social progress than all the careful schemes of government planners.

Well, at last we are remembering: remembering that government has certain legitimate functions which it can perform very well; that it can be responsive to the people; that it can be humane and compassionate; but that when it undertakes tasks that are not its proper province, it can be none of them as well or as economically as the private sector.

For too long, government has been fixing things that aren't broken and inventing miracle cures for unknown diseases.

We need you. We need your youth. We need your strength. We need your idealism to help us make right that which is wrong. Now, I know that this period of your life, you have been and are critically looking at the mores and customs of the past and questioning their value. Every generation does that. May I suggest don't discard the time-tested values upon which civilization was built simply because they are old.

More important don't let today's doom criers and cynics persuade you that the best is past—that from here on it's all downhill. Each generation sees farther than the generation that preceded it because it stands on the shoulders of that generation. You're going to have opportunities beyond anything that we've ever known.

The people have made it plain already that they want an end to excessive government intervention in their lives and in the economy—an end to the burdensome and unnecessary regulations and a punitive tax policy that does take "from the mouth of labor the bread it has earned."

They want a government that can not only continue to send men across the vast reaches of space and bring them safely home, but that can guarantee that you and I can walk in the park of our neighborhood after dark and get safely home.

And finally, they want to know that this Nation has the ability to defend itself against those who would seek to pull it down.

And all of this, we the people can do. Indeed a start has already been made. There's a task force under the leadership of Vice President George Bush that is to look at those regulations I've spoken of. They have already identified hundreds of them that can be wiped out with no harm to the quality of life and the cancellation of just those regulations will leave billions and billions of dollars in the hands of the people for productive enterprise and research and development and the creation of jobs.

The years ahead are great ones for this country, for the cause of freedom and the spread of civilization. The West won't contain communism, it will transcend communism. It won't bother to dismiss or denounce it, it will dismiss it as some bizarre chapter in human history whose last pages are even now being written.

William Faulkner at a Nobel Prize ceremony some time back said man "would not only endure: he will prevail" against the modern world because he will return to "the old verities and truths of the heart." And then Faulkner said of man, "He is immortal, because he alone among creatures has a soul, a spirit capable of compassion and sacrifice and endurance."

One can't say those words "compassion, sacrifice and endurance" without thinking of the irony that one who so exemplified them—Pope John Paul II, a man of peace and goodness—an inspiration to the world—would be struck by a bullet from a man towards whom he could only feel compassion and love.

It was Pope John Paul II who warned last year, in his encyclical on mercy and justice, against certain economic theories that use the rhetoric of class struggle to justify injustice. He said, "In the name of an alleged justice the neighbor is sometimes destroyed, killed, or deprived of liberty or stripped of fundamental human rights."

For the West, for America, the time has come to dare to show to the world that our civilized ideas, our traditions, our values, are not—like the ideology and war machine of totalitarian societies—just a facade of strength. It is time for the world to know our intellectual and spiritual values are rooted in the source of all strength, a belief in a Supreme Being, and a law higher than our own.

When it is written, the history of our time won't dwell long on the hardships of the recent past. But history will ask and our answer determine the fate of freedom for a thousand years—did a nation born of hope lose hope? Did a people forged by courage find courage wanting? Did a generation steeled by a hard war and a harsh peace forsake honor at the moment of great climactic struggle for the human spirit?

If history asks such questions, it also answers them. And the answers are to be found in the heritage left by generations of Americans before us. They stand in silent witness to what the world would soon know and history someday record, that in the third century the American nation came of age, affirmed its leadership of free men and women, serving selflessly a vision of man with God,

government for people, and humanity at peace.

A few years ago an Australian Prime Minister, John Gordon, said, "I wonder if anybody ever thought what the situation for the comparatively small nations in the world would be if there were not in existence the United States, if there were not this giant country prepared to make so many sacrifices." This is the noble and rich heritage rooted in great civil ideas of the West—and it is yours.

My hope today is that in the years to come—and come it shall—when it's your time to explain to another generation the meaning of the past and thereby hold out to them their promise of the future, that you'll recall the truths and traditions of which we've spoken. It is these truths and traditions that define our civilization and make up our national heritage. And now they're yours to protect and pass on.

I have one more hope for you: When you do speak to the next generation about these things that you will always be able to speak of an America that is strong and free, to find in your hearts an unbounded pride in this much-loved country, this once and future land, this bright and hopeful Nation whose generous spirit and great ideals the world still honors.

Congratulations and God bless you.●

PHARMACY CRIME

● Mr. SASSER. Mr. President, earlier this year, I introduced S. 20 which would make the robbery of controlled substances from a pharmacy a Federal crime.

All of us are disturbed by the fact that violent crime has risen by 59 percent since 1970 and robberies in general have risen 33 percent since 1970.

At the same time, Mr. President, between 1976 and 1979, a 3-year period, pharmacy robberies have risen more than 100 percent. In a 6-year period between 1973 and 1979, pharmacy robberies rose 150 percent.

These statistics alone are alarming enough. But the real issue here is that the Federal Government does not have enough enforcement power to control the theft of drugs from pharmacies. When drug stores are robbed the criminal is not looking for cash. He is looking for drugs. Drugs that are controlled by Federal law. Drugs that will be sold on our streets and compound an already serious national drug problem.

Mr. President, it seems a bit absurd that the Federal Government may investigate and prosecute the trafficking of drugs on the sidewalk outside of a drug store but it cannot investigate and prosecute the theft of the same drugs from inside the pharmacy.

It is my hope that Congress will correct this situation during the 97th Congress. For the benefit of my colleagues, I ask that a statement by Mr. John Rector of the National Association of Retail Druggists be printed in the RECORD. Mr. Rector's statement was given before the Attorney General's task force on violent crime on April 16, 1981. His comments fully outline the problem that I address in S. 20. In addition I also request the printing in the RECORD of an article from the National Association of Retail Druggists Journal entitled the "Pharmacy Crime Clock," which describes in tragic detail dozens of pharmacy crimes throughout the United States.

The material follows:

THE PHARMACY CRIME CLOCK

The pharmacy crime clock ticked ominously and relentlessly in January. No matter what part of the country you reside in, chances are your local or regional newspaper carried an article that month about the grim siege being waged on the nation's pharmacies—the battlegrounds for gun-wielding thugs in search of controlled substances.

Make no mistake about it, fellow pharmacists. There is a war going on out there. And if you haven't yet become a combatant, the odds on your seeing front-line duty are growing greater by the day.

The NARD Journal has kept constant tabs on this despicable situation, receiving daily reports from local media across the country. January 1981 wasn't a special month in this arena of pharmacy crime. It was like every month in 1980, and previous years since Congress enacted the Controlled Substances Act of 1970. The resultant rise in drug abuse and street traffic in illicit drugs has been amply reflected in the "easy pickin's" the nation's Pharmacies represent to the average armed robber bent on supporting a drug habit.

Take a moment to scan the litany below. The listing is a partial representation of reports about crimes in pharmacy in the month of January alone. The language is straight from those newspaper accounts—no embellishment on our part. The articles speak for themselves.

In January as in many other months the typical armed robbery of a pharmacy contains these ingredients:

A weapon of choice—.38 caliber revolver or sawed-off shotgun.

Drugs of choice—A shopping list for Schedule II drugs (the hard stuff). The typical robber is a sophisticated shopper, who often is not interested in a cash take.

Physical abuse—More often than not, pharmacists, clerks, and customers alike are terrorized or physically abused during the course of a robbery. In some instances, compliance with robber demands still leads to assault or threats of murder.

If you are angry about this intolerable situation after reading these pages, you may wish to keep them for reference and present them to your Congressman or Senator, when NARD's Pharmacy Crime Bill comes up for consideration this session. The pages serve as a grim reminder that action on this important legislation must be taken now. With your voices and support of the NARD effort for Federal involvement in this arena, perhaps the pharmacy crime clock will eventually stop ticking.

Arizona: Tucson—The Town and Country Pharmacy was robbed yesterday, but the robbers were somewhat disappointed. What they wanted had been taken in another holdup 10 days earlier. A man pulled a gun on a clerk and said: "This is a stickup. Give me all your class A drugs." The clerk told him that all those drugs had been stolen in a previous robbery and not yet replaced. The robbers then took other undetermined drugs and fled on foot.

California: Petaluma—A city councilman was robbed at gunpoint by a bandit who entered the lawmaker's pharmacy (O'Neill's Drugs) looking for drugs.

Pinole—Two middle-aged men stole more than $300 in drugs after they held up the Village Pharmacy at gunpoint and bound the owner and two other persons. One suspect held them at gunpoint while the accomplice stole the owner's wallet and a variety of drugs from shelves.

San Jose—San Jose police today were looking for two narcotics bandits who escaped with undetermined amounts of drugs in separate holdups of pharmacies.

Santa Rosa—An armed robber held up the Healdsburg Hospital Pharmacy and made off with an undetermined amount of drugs.

[illegible]—Two men robbed the Davison Pharmacy, holding a clerk at knifepoint and escaping with $170 in cash and a bag full of drugs. The owner handed over quantities of phenobarbital, reducing tablets and sleeping pills after convincing the thief that the store no longer carried the supplies of cocaine, Quaaludes, Seconal and Nembutal it once did.

Davis—Two robbers, one armed, held up the Davis Medical Center Pharmacy, taking $150 in cash and an undetermined amount of drugs. One suspect reportedly went behind a counter, pulled out a revolver and told the pharmacist: "Give me all your Dilaudid and Demerol."

Redding—A man armed with a handgun robbed Shasta General Hospital Pharmacy, escaping with about $400 worth of drugs. The same pharmacy was the target of an armed robbery last August in which drugs and cash were taken.

Vacaville—Two ski-masked gunmen burst through the front door of a West Texas Street pharmacy and escaped with stolen narcotics and more than $100 cash. One of the men, armed with a large caliber automatic pistol, took the pharmacist into a drug storage area at gunpoint and demanded narcotics. He reportedly got about 300 Seconal capsules.

Richmond—Two men armed with a pistol and sawed-off shotgun robbed the Professional Pharmacy of $586 in cash and drugs including morphine, tincture of opium and codeine.

San Rafael—A screaming man armed with a small revolver took drugs from a pharmacy in Rohnert Park. The man waved the weapon at the pharmacist and screamed: "Give me your class A drugs!"

Illinois: Chicago—A man who walked into a Bridgeport drugstore and threatened to shoot three people unless he was given Demerol or morphine was fatally shot by the store's owner. The man walked toward the owner, who took a snub-nosed .38 caliber revolver from a narcotics cabinet and fired twice, hitting the man in the chest and neck.

Louisiana: New Orleans—A man wearing a blond wig exchanged gunfire with a Metairie drugstore pharmacist during an attempted robbery. The robber fired two shots at the pharmacist and the pharmacist returned the fire, apparently wounding the man in the head.

Opelousa—Deputies arrested a man at a local drugstore as he attempted to exit the building by the rear door. He was carrying a pillow case which contained $7,500 worth of assorted drugs which have a street value of approximately $20,000.

Maryland: Elkton—A man was apprehended inside North East Pharmacy shortly before 2 a.m. He is charged with theft over $500, possession of methaqualone with intent to distribute, and possession of marijuana.

Massachusetts: Marlborough—Two men armed with a gun and club held up Bouvier's Pharmacy and forced three people into the store's bathroom at gunpoint. One gun-carrying thief walked into the store and demanded of an employee: "Where's your Class A narcotics?" The other thief than filled a shopping bag with the drugs. The thieves stole nothing else in the robbery.

Minnesota: Rochester—A flying tackle by a pharmacist ended an attempted stick-up at a Miracle Mile drug store when he pinned one of a pair of holdup men and a customer grabbed the second. One robber demanded that the pharmacist fill a sack with mor-

phine, narcotics, and emphetamines. The robber kept one hand in his pocket, "pointing like he had a gun." The suspected weapon later turned out to be a beer bottle. Authorities said both robbers may have been under the influence of drugs.

Farmington—A man was arrested during an alleged robbery. Officers confiscated three plastic bags filled with drugs and a knife.

Mississippi: Pearl—A 16-year-old juvenile was among three persons arrested by Jackson police on charges of armed robbery in connection with a series of drug store burglaries in which only drugs were taken. One robbery involved a quantity of Seconal, Quaalude, Valium, and Placidyle.

Jackson—A man was arrested for the armed robbery of the Escatawpa Pharmacy, which involved an assortment of Prescription drugs. The robber apparently ignored cash in the store. He used a small handgun in the alleged robbery.

Vicksburg.—Two females walked into the Battlefield Discount Drugs and pulled nickelplated revolvers on the occupants, who included the pharmacist and his wife, and demanded drugs. The pair left with a quantity of Dilaudid and Demerol. They later were apprehended and charged with other similar robbery attempts.

Missouri: Springfield—Pharmacist Charles F. Cantwell didn't move fast enough to suit two armed robbers and was shot in the chest with a rifle during a holdup. The gunmen had ordered the pharmacist to give them drugs, and, after he was wounded, they continued to prod him to look for more drugs. Witnesses to the shooting asked not to be identified because of recent rash of drug-related kidnappings involving pharmacy employees and family members in cities such as Kansas City.

Nebraska: Omaha—An Omaha pharmacist was shot in the hand during an armed robbery attempt. Two robbers approached a pharmacy employee with a knife, threw the employee to the floor and ordered that the cash register be opened. The wounding shot came as one of the robbers hurdled a counter toward the pharmacist.

Lincoln—Two armed men held up Nevin Drug and got away with between $200 and $400 from the cash register and some narcotics. One weapon involved included a sawed-off, double-barreled shotgun.

Nevada: Las Vegas—Two armed men robbed the Tropicana Drug Store of an undetermined amount of money and a large amount of Schedule II "hard narcotics." The two entered the store and forced the store manager and customers to lay face down while they ransacked the shop.

New Jersey: Branchburg—Three armed men entered the Branchburg Pharmacy and threatened one of the cashiers with a handgun. Police reported that the suspects then forced patrons into a closet and threatened to kill them. Employees were forced to lie on the floor. An undertermined amount of cash and pills was stolen.

Ohio: Toledo—One man was arrested on a robbery charge after he was shot in the head and struck with a hammer by employees of an East Toledo pharmacy during what police said was a holdup attempt. One of four suspects went to a door leading to the counter behind the pharmacy and attempted to force it open, shouting to an employee: "Open the door, or we're going to kill you." But the employee drew a .38 caliber handgun and fired.

Toledo—Police arrested a man, who they said entered the Pharmacy Counter and threatened employees with a handgun before fleeing with about $400.

Pepper Pike—Three men entered the Miller Drug Store and handed the pharmacist a note saying: "This is not a joke. I want all your A's. We have a gun. If you don't want anyone hurt, give us everything." The suspects fled with about 1,500 pills, a majority of which were Quaaludes.

Columbus—Three armed men held up Enstock's Pharmacy. The pharmacist said the men tied him with bandanges and put him into a back room. The robbers fled out the rear door with approximately $200 and a large quantity of prescription drugs.

Oklahoma: Kingfisher—A 17-year-old youth triggered a sensor alarm inside of The Drug Store and was arrested within 15 minutes. Three bottles of heart medicine were found in his coat pocket. The youth apparently was in the process of filling a customer sack with drugs including injectible Valium and some phenobarbitol tablets, syringes, and needles.

Oregon: Oregon City—One of four men arrested in an armed robbery of a Milwaukie hospital pharmacy has been sentenced to 15 years in prison. He was one of four who allegedly shot their way into the hospital pharmacy and stole drugs and money, using a hospital security guard as a shield.

Astoria—An armed robber who knew what he was after took an assortment of narcotics with a retail value of about $830 from Paramount Drug Co. The man entered the store, pointed a revolver at the owner, and demanded all Schedule I narcotics in the store. The robber remained close to the owner, monitoring with the gun for him to keep quiet. Taken were large quantities of Percodan, Dilaudid, Codeine Phosphate, and Nembutal. There were up to 1,200 tablets in some of the containers.

Rhode Island: Cumberland—An armed robber escaped with an undetermined quantity of drugs during a daring armed robbery at Hunter's Pharmacy. The gunman ordered the clerk to the rear of the store and demanded of a pharmacist various drugs. At one point, when the pharmacist could not immediately locate one of the drugs demanded, the gunman threatened to shoot him.

Tennessee: Knoxville—Two bandits, one armed with what appeared to be a .38 caliber revolver, robbed the Vaughn Drug Store of money and narcotics. The men made three store employees and a customer lie on the floor, then took cash and a quantity of drugs, including Quaaludes and morphine.

Memphis—A man, possibly under the influence of drugs, robbed the Berclair Drug Store. Armed with a .22 caliber pistol, he entered the store and demanded Valium tablets. The man fired several shots before fleeing, escaping with an undetermined amount of drugs.

Texas: Austin—An armed robber, described as a "novice" by the man he held up, took $60 in cash and an undetermined amount of Dilaudid, a narcotic painkiller, from Ace Drug Mart in South Austin. Three other employees and two customers watched as the pharmacist handed over the pills and cash to the man, who carried a pistol and wore a ski hat.

Beaumont—A pharmacist was robbed at gunpoint by a man who produced a short-barreled, chrome revolver and demanded that he put amphetamines into a prescription bag.

Wisconsin: Oshkosh—A man has been charged with three Winnebago County armed robberies of pharmacies. In one robbery the owner was struck with a sawed-off shotgun and received 24 stitches to close a gash in his forehead. In another robbery a masked man carrying a sawed-off shotgun gave the pharmacist a list of drugs he wanted. In a third robbery a gunman jumped over the pharmacist's counter with a sawed-off shotgun and demanded drugs. In each of the events a large number of drugs were taken.

Athens—The Athens Drug Store was robbed at gunpoint by three men. The clerk was ordered to lie on the floor, while the owner was instructed to fill a black satchel with various drugs. The thieves threatened to kill them if they disobeyed.

PHARMACY ROBBERY AND THE FEDERAL STRATEGY TO COMBAT VIOLENCE IN AMERICA

The National Association of Retail Druggists (NARD) represents owners of more than 30,000 independent retail pharmacies, where over 75,000 pharmacists dispense more than 70 percent of the nation's prescription drugs, with annual sales estimated in excess of $8 billion. Together, they serve 18 million persons daily. NARD has long been acknowledged as the sole advocate for this vital component of our free-enterprise system.

We welcome the opportunity to assist the Task Force, the Attorney General, and the Reagan Administration in the effort to assess and strengthen the Federal government's attack on violent crime.

Our President, Jesse M. Pike, Concord, North Carolina, has recently (see exhibit I) congratulated President Reagan on the selection of the new Attorney General, in part because he has expressed a special interest in the need to review the inadequacy of the current Federal effort to combat violent crime.

We share the Attorney General's concern that violent crime "constitutes an urgent, shocking national problem that raises a serious question of whether the Federal Government is doing enough to meet its responsibilities." The NARD pledges to assist the Task Force and the Department to help achieve any mutual goal designed to help combat violent crime.

We are not experts in the full range of violence that is challenging this nation. We do have special insight and expertise in some areas that are of particular and understandable concern to our members, the owners of independent retail pharmacies, and their staff and customers.

It is shocking that violent crime has increased 59 percent since 1970.

It is shocking that robbery has increased by 38 percent since 1970, with last year's cash loss to robbery, estimated by the FBI, at nearly one-quarter of one million dollars.

Our members and pharmacists generally are, also, concerned about robbery; but I should hasten to add that although the national statistics cited in FBI March 5, 1981. release are indeed shocking such rates would represent a welcome reduction in the incidence of robbery of pharmacists!

It appears that each class of robbery has a character and trend of its own. Our special concern is robbery to obtain Federally controlled drugs from a pharmacy. The announced criteria should place this type of robbery near the top of the Department of Justice's new priorities with other felonies involving narcotics, weapons or personal violence.

While robbery nationwide increased by one-third in the past decade, the robbery of pharmacists increased by one-third between 1978 and 1979. The FBI reports that between 1975 and 1979, bank robbery was up 51 percent, robbery of convenience stores was up 15 percent, street robbery was up 5 percent, and robbery of gas stations was down 17 percent. According to DEA, statistics for a period shorter than that reported by the FBI for other robbery, between 1976 and 1979, the robberies of pharmacists increased slightly more than 100 percent. In fact, during the period 1973–79, pharmacy robberies increased an estimated 150 percent.

Similarly, a review of the value of goods stolen is illustrative of our concern. The FBI has estimated the total national loss to all robbery for 1979 at $248 million. Although such amounts boggle the minds of many, our members understand such dollar impacts. Robbery in their situation is possibly unique. The robber seldom seeks the cash, but, in fact, often times requests controlled sub-

stances by name. Such substances have a marketplace value set in the streets. DEA, unfortunately, records the value of dosage units stolen from pharmacies on the basis of replacement value only. If, however, such crimes were assessed on the basis of the street value of the drugs obtained, rather than by a double standard, as is presently the case, the nature of the problem we cite becomes even more readily apparent.

If, for example, an armed assailant entered an independent retail pharmacy owned by one of our members, harassed and abused the staff and customers and left with 282 Dilaudid tablets, never to be heard of again, DEA would record the robbery, not a Federal felony, and assess its importance on the basis of replacement cost of the drug stolen at approximately $30.00. On the other hand, if the armed robber, one block away from our member's store, was confronted by a DEA agent and arrested for an illegal sale of the controlled substance, the agency would catalog such a case as, of course a Federal Felony arrest, involving a sale with a street value in excess of $11,000!

If DEA characterized such crimes on a par with its "street busts", clearly pharmacy thefts reported to DEA could have an estimated street value well over $125 million.

As efforts to curb forms of retail diversion other than robbery have experienced continued success, the number of robberies, as a portion of total pharmacy thefts, the volume of such drugs obtained by robbery and their street marketplace value have each skyrocketed.

Of course, monetary value is only one indication of the havoc experienced by those vitimized by robbery. In one out of five robberies, a pharmacist, staffer or customer is killed or violently injured by criminal assailants. Likewise, an impact is felt by the families, particularly children, who gain greater access to drugs of abuse because such drugs are made available through pharmacy robbery diversion.

Another consideration is the fear that the prospect of a robbery has on pharmacy customers who never know if or when they will be subjected to the terror and possibly the brutal tactics of such assailants.

We know that the Federal government is falling far short of what would be necessary, working in close coordination with state and local authorities, to begin to restore "domestic tranquility" in our nation's independent retail pharmacies.

Our members have a long standing relationship with the Department, but we have one major complaint. This is the opposition of DEA to legislation that would make the robbery of DEA registrant pharmacies to obtain Federally controlled drugs a felony under Federal law.

What follows is a policy statement with accompanying explanatory text unanimously adopted by The National Association of Retail Druggists at our 82nd Annual Convention in Atlanta, Georgia, October 2, 1980.

"THAT, robbery of controlled substances from pharmacies be made a Federal offense.

Since enactment of the Controlled Substances Act of 1970, NARD has pressed for legislation making robbery of drug stores for CSA drugs a Federal offense. The Drug Enforcement Administration has required that pharmacists place bars on windows, secure skylights and bar back doors, as well as installation of security systems. Because of the DEA activities and success in drying up illicit sources of drugs, pharmacists are left as sitting ducks for criminals seeking drugs."

You will note that it succinctly states our members' recommendation, and that of other pharmacists, about the robbery of pharmacies.

For more than a decade, (see exhibit II—NARD Crime Bill: 12 Years of Advocacy, NARD April Journal, p. 24+) NARD, especially through the unrelenting effort of our Executive Vice President, William E. Woods, has urged the Congress and the Department of Justice to support necessary legislation. Unfortunately, we have had more success with the Congress. Year after year, since the passage of the Controlled Substances Act of 1970, NARD has taken its case to the Congress. From the outset the Department has adamantly opposed the NARD legislation. In fact, DEA opposition to our legislation became the single most important obstacle to passage to the Pharmacy Crime Bill.

Unlike the robberies of gasoline stations or liquor stores, we are concerned about crimes where the objective is to obtain the Federally regulated substance: controlled drugs. In fact, enforcement of provisions of the 1970 Federal Act designed to reduce forms of diversion other than robbery have increased both the street value of the drugs sought and the likelihood of robbery as a more preferred method for obtaining the drugs. Yet, such crimes are not sanctioned by the Federal government.

It is a serious violation of Federal law if dangerous drugs are diverted from a pharmacy by fraud or by improper prescribing. Yet, when the same drugs are illegally obtained in daytime robberies by vicious assailants who terrorize customers, employees and our members, no Federal sanction is available.

Yet, curiously, as illustrated by the Dilaudid case just cited, if the robber attempts to, or in fact, sell(s) these drugs acquired in the robbery such conduct constitutes a Federal felony.

The statutory authority in such matters is not limited by the value of the controlled drugs involved, by whether there has been a pattern of similar conduct involved, by whether violence has accompanied the crime or by other special statutory criteria.

The reality is that pharmacists are on the front line in this effort to prevent diversion and abuse of legitimate drugs.

It has been this mutual cooperative effort which has yielded success since 1970. Pharmacists do not seek combat pay for participating in this risky joint venture, to which they are arguably entitled, as the key health providers of these highly dangerous Federally controlled substances. What we want is a comparable amount of Federal involvement in the protection of pharmacists, their families, employees and customers.

NARD's 1969 prediction that as illicit demands of drug supply were cut off retail pharmacists would become targets for an increased number of criminals seeking other sources of drugs has regrettably become a reality. Now the daytime robberies for Controlled Substances Act drugs are spreading to hospital pharmacies.

In cautioning that failure to act in 1970 would return to haunt, NARD forecasted the grim, growing epidemic of terror and violence which is engulfing our nation's retail pharmacies, their owners, staff, families, patients and customers.

This vicious terrorism of an entire class of health care professionals—retail pharmacists—continues unabated.

The 96th Congress gave us reason to be encouraged with the movement in both the House and the Senate. Now in the 97th Congress, we have more reason than ever to expect a victory.

The new year and the 97th Congress hold great promise for passage of the pharmacy crime legislation. The enthusiastic response to the new comprehensive NARD pharmacy crime bill holds great promise. Already the key aspects of NARD's Pharmacy Protection and Violent Offender Act of 1981 have been introduced. These include:

1. Mandatory minimum penalties for the robbery of pharmacies to obtain Federally controlled substances;

2. Additional mandatory penalties for repeat offenders;

3. Mandatory penalties for those who conspire to commit such robberies;

4. Denial of probation and suspended sentences to those convicted of such robberies; and

5. A requirement that the FBI include pharmacy crime, including robberies in its annual Uniform Crime Report.

An innovative aspect of the NARD has been incorporated in Senator Jepsen (R.-IA) pharmacy crime bill. It would help assure the maximum degree of cooperation with the pharmacy community necessary for successful enforcement of a new pharmacy robbery provision as well as any current or new efforts undertaken by the Department to combat pharmacy related crimes. These objectives would be accomplished through a requirement that the Department meet regularly with the Joint Commission of Pharmacy Practioners (JCPP) and that the Commission assess the total effort to curb pharmacy related crime and report its findings to the Attorney General.

The JCPP, incidentally, is a co-ordinating body designed to serve as a policy forum on matters of common interest and concern to national organizations of pharmacy practitioners. This Commission, although often differing on parochial issues, collaborates on vitally important matters such as pharmacy crime. Its members are: American College of Apothecaries (ACA), American Society of Consultant Pharmacists (ASCP), American Society of Hospital Pharmacists (ASHP), National Association of Chain Drug Stores (NACDS), and the National Association of Retail Druggists (NARD).

The JCPP which is on record in support of a Federal pharmacy robbery statute, is coincidentally also meeting in the Hyatt Regency this morning, and, although I am not specifically authorized to speak for the group, I know that they wish the Task Force well and stand ready to assist in the development of a more sensible Federal approach to pharmacy related crimes and other related matters.

We solicit your support for the NARD Pharmacy Protection and Violent Offender Act of 1981. We nominate the legislation for review by this Attorney General's Task Force on Violent Crime, and its distinguished co-chairmen, former Attorney General Griffin Bell and Illinois Governor, James Thompson. As you formulate recommendations for Phase II of the Task Force work, which as indicated "will focus on recommendations for necessary and appropriate changes in Federal laws . . . [to] fight against violent crime," we urge you to include our suggestions on pharmacy crime legislation, including incentives toward better security against robbery, such as tax credits, as a critical component of the Reagan Administration's strategy to combat violent crime.

The President recently stated in his proclamation designating the week beginning April 19, 1981 as Victims Rights Week that "Only victims truly know the trauma crime can produce. They have lived it and will not soon forget it . . . Such experiences foster disillusionment and, ultimately, the belief that our system cannot protect us. As a nation, we can ill afford this loss of faith on the part of innocent citizens who have been victimized by crimes."

It is with this perspective in mind that the Officers, Executive Committee and staff of NARD stand ready to assist the Attorney General and the Task Force on Violent Crime to begin anew to attack what Chief Justice Burger has appropriately called the "reign of terror" confronting America.●

THE CLEAR CREEK FLOOD CONTROL PROJECT

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD.)

● Mr. TOWER. Mr. President, over the

last 2 years, the residents of Friendswood, Tex., have experienced several severe floods which have destroyed millions of dollars of property in the southeast region of my State. The Clear Creek watershed today continues to be a serious flood problem as rising water damages both residential and commercial property.

The U.S. Army Corps of Engineers are nearing completion of a study that hopefully will provide some relief to this problem. Nonetheless, I join with the citizens and officials of the city of Friendswood to urge speedy relief of this problem.

Mr. President, I submit the following resolution by the Friendswood City Council for the RECORD:

CITY COUNCIL RESOLUTION No. 381

Whereas, a serious flood problem exists in the Clear Creek Watershed where existing residential and commercial areas are subject to extensive damages from rising water in the creek; and

Whereas, in the City of Friendswood in July 1979, 1600 of 3000 homes were flooded with attendant economic losses exceeding $38,000,000; and

Whereas, in the City of Friendswood in September 1979, 500 of these homes were again flooded; and

Whereas, in the City of Friendswood in January 1980, 75 of these homes were again flooded; and

Whereas, the citizens continue to suffer economic loss and mental anguish as a result of flooding; and

Whereas, the United States Congress in 1968 authorized the U.S. Army Corps of Engineers to design a flood control project which will provide a solution to flooding problems in the Clear Creek Watershed; and

Whereas, the studies are nearing completion and further delays will increase the cost of the project as well as the probability of additional flooding; and

Whereas, other cities, counties, drainage districts and the 67th Texas Legislature have endorsed the flood control project; now therefore,

Be it resolved by the City Council of the City of Friendswood, That the City join in urging Congress to take whatever means necessary to expedite the project and thereby reduce the probability of further economic loss and mental anguish due to flooding; and

That the City Secretary forward official copies of this resolution to the President of the United States, to the Speaker of the House of Representatives and President of the Senate of the United States Congress, and to all members of the Texas Delegation to the Congress, with the request that this resolution be officially entered into the Congressional Record.●

ABE STOLAR

● Mr. DIXON. Mr. President, I commend to the attention of my colleagues a resolution recently adopted by the city council of the city of Chicago. It pertains to the plight of Abe Stolar, a Chicagoan and U.S. citizen by birth, in Russia. Mr. Stolar, a refusenik, has tried for years to emigrate from the Soviet Union. As has happened to all too many Soviet Jews, his appeals have been denied.

Recently, I wrote to Abe Stolar and the Russian ambassador to the United States, Anatoly Dobrynin, to express my sincere concern for the welfare of this brave man. I intend to pursue my efforts in behalf of Mr. Stolar, with the hope that one day he will again see the land of his birth.

Mr. President, I ask that the city of Chicago's resolution be printed in the RECORD.

The resolution follows:

RESOLUTION

Whereas, Abe Stolar was born in Chicago, Illinois, in 1911, to parents who immigrated here from the Union of Soviet Socialist Republics; and

Whereas, Abe Stolar and his family returned to the Union of Soviet Socialist Republics in 1931 and have resided there since that time; and

Whereas, Abe Stolar has been an exemplary resident of the Union of Soviet Socialist Republics, serving as a soldier on the front line during World War II and as a civilian radio announcer thereafter; and

Whereas, Abe Stolar and his family wish to return to Chicago, the City of his birth; and

Whereas, Mayor Byrne and the citizens of Chicago wish to welcome home a native son; and

Whereas, Mayor Byrne and the citizens of Chicago recognize the human rights of all men and women; and

Whereas, Mayor Byrne and the citizens of Chicago hope that all nations will make every effort to promote and protect the human rights of all individuals; and

Whereas, Mayor Byrne and the citizens of Chicago hope that Abe Stolar and his family will be granted permission to return to Chicago; now, therefore,

Be it resolved, That the Mayor of the City of Chicago and Members of the City Council, in meeting assembled this 22nd Day of April, 1981, do hereby express their hope for the expeditious repatriation of Abe Stolar and his family.●

HANDGUN CONTROL

● Mr. McCLURE. Mr. President, all civilized and moral people must deplore the shocking attack on Pope John Paul II. In the reaction that followed this outrage, we have seen that once again, there are many who believe that the criminal is not the terrorist, but the tool he uses.

In a letter to the editor of the Washington Post, Mr. Ali F. Sevin has taken a more critical look at this assassination attempt, and his analysis clearly shows that we must blame the man, not the inanimate object.

I submit Mr. Sevin's letter for the RECORD.

The letter follows:

LETTER TO THE EDITOR

Pope John Paul II was apparently shot by a terrorist fugitive from Turkish justice. The avalanche of demands for stricter gun control laws is sure to follow.

Turkey has one of the toughest gun control laws anywhere. I know, I grew up in Turkey. No one except the police is allowed to own a handgun unless he or she can prove to the extremely cautious police that he or she must be licensed to own one.

Yet the accused assailant was convicted in Turkey for the handgun murder of Abdi Ipekci, a prominent columnist, and was sentenced to death. He escaped, presumably with the assistance of sympathizers of his political bent, during the dark days of terrorism in Turkey before the present regime put an end to anarchy on Sept. 12, 1980.

Where did he get the gun? How would stricter gun control in the United States stop such senseless deeds? There is a trickle of evidence that international terrorism is fostered by the Soviet Union, whether it is of the right or the left variety. Situations of turmoil, it seems, invite totalitarian takeover. If this is so, the Western democracies should focus their energies on discovering the inner workings of this network of terror.

Cosmetics of gun control may make some of us feel better, but they will not produce results.●

TERRORISM IN THE U.S.S.R. AND ARGENTINA

● Mr. LEVIN. Mr. President, contrary to what the Reagan administration would have us believe, the problem of state terrorism is not confined by any ideological boundaries. Countries as ideologically diverse as the Soviet Union and Argentina continue to illegally harass and imprison their people.

In an excellent article in the May 14 New York Times entitled, "It Tolls for Thee," Mr. Anthony Lewis describes the plight of two physicists, Vladimir Kislik of the Soviet Union and Elena Sevilla of Argentina.

Mr. Kislik, a Jew, applied for an emigrant visa to Israel in 1973. His wife and son were allowed to leave, but he was refused permission. He then lost his job, was sent to a psychiatric hospital and is now on trial on a charge of "hooliganism." He faces up to 5 years in prison.

Elena Sevilla had a baby by Caesarean section in November of 1975. She was arrested 5 days later in her hospital bed. While her child was put in the custody of her parents, she spent the next 3 years imprisoned without charge. Ignoring a decision by the Argentine courts to release her in January of 1976, the military authorities eventually allowed her to emigrate to this country where she is now studying at Cornell.

These were not the only physicists illegally imprisoned in either the Union of Soviet Socialist Republic or Argentina, Yuri Orlov, the founder of the 5-year old Moscow Helsinki Group, is now serving a 7 year sentence in a labor camp. Andrei Sakharov is now in internal exile. American physicists estimate that at least 16 of their colleagues have disappeared into the hands of the military.

The stories of Mr. Kislik and Ms. Sevilla are poignant reminders, however, that state terrorism and its threats to individual liberty are not confined to left or right wing regimes. I am deeply concerned that the Reagan administration chooses to ignore this reality by focusing world attention on human rights abuses in Communist countries to the exclusion of those in right wing, friendly regimes.

I commend to the attention of my colleagues an article which I ask to have printed in the RECORD.

The article follows:

IT TOLLS FOR THEE

(By Anthony Lewis)

BOSTON, May 13.—This is a column about two physicists, or more accurately about two human beings who happen to be physicists. They are from countries far apart in miles and in politics. They do not know each other. What they have in common, apart from their science, is their experience of that contemporary phenomenon: the terrorism of the state.

Vladimir Kislik comes from Kiev, in the Soviet Union. He is a Jew, and in 1973 he applied for an exit visa to emigrate to Israel. His wife and son were allowed to go. He was refused permission—and entered a nightmare life.

Mr. Kislik immediately lost his position at the Institute of Physics of the Ukrainian Academy of Sciences. He took menial jobs and was fired from them. He was arrested for vagrancy. Foreign scientists who visited him at home were assaulted by ruffians on the street.

Last July, during the Olympics, he was put in jail for 15 days. There he had a heart attack. He was sent to a psychiatric hospital, where he was put in a ward with dangerous psychotics. Friends got word to the outside world, and groups in France and the United States sent strong protests to Soviet authorities. Mr. Kislik was released.

Recently he was arrested again. According to reports from Kiev, he is about to go on trial on a charge of "hooliganism." That carries a sentence of up to five years in a labor camp.

Elena Sevilla is a physicist from Argentina. She had a baby by Caesarean section in November 1975. Five days later she was arrested in her hospital bed. No charge was made, then or afterward. In January 1976, an Argentine judge ordered her released. But the authorities did not let her go, instead placing her under indefinite detention without charge. Her child was given to her parents. She was put under a strict prison regimen: allowed almost nothing to read, kept in her cell 23 hours a day.

There were protests from groups abroad, just as in Mr. Kislik's case: from the American Physical Society, the National Academy of Sciences, Amnesty International. Elena Sevilla was luckier than Mr. Kislik. After three years she was released and allowed to leave the country. She is now studying at Cornell.

Of course these two are not the only scientists who have been victims of their governments. In the Soviet Union, Anatoly Shcharansky is wasting away in solitary prison confinement, reportedly near death. Yuri Orlov is serving a seven-year sentence in a labor camp. Andrei Sakharov is in internal exile.

The scientist victims in Argentina are less familiar to us, but their stories are no less chilling. Federico Eduardo Alvarez Rojas, a well-known physicist, and his wife Hilda Graciela were seized by armed men in 1976 in front of their three young children; though once reported to have been seen in a prison, they have never been officially accounted for. American physicists know of at least 16 other of their Argentine colleagues who have similarly "disappeared."

The stories of Vladimir Kislik and Elena Sevilla and the others make a simple but fundamental point: the indivisibility of concern for humanity. State brutality and terrorism are evils—absolute evils—whether practiced in one corner of the world for another, one political system or another.

John Donne made the point to us as individuals 350 years ago. The passage best remembered is: "Never send to know for whom the bell tolls; it tolls for thee." But he also put it another way: "Any man's death diminishes me, because I am involved in mankind."

In today's world the point is not just individual or spiritual but political. If we close our eyes to official brutality here or there—in the Soviet Union or Argentina, in Uganda or Cambodia—we risk our own civilization. Scientists have tended to understand that, supporting their threatened colleagues everywhere. Governments are another question.

The question is especially acute now, as the new American Administration proposes what amounts to a double standard for human rights. It would focus attention on the cruelties of Communist governments and wink at the horrors done by "friendly" right-wing regimes.

Ironically, victims of Soviet repression—at least some of the more prominent among them—do not seem to want a one-dimensional American policy. Pavel Litvinov, a dissident who got out, said when I asked him that his attention naturally centered on events in the Soviet bloc, "but I believe very strongly in the principle of human rights everywhere. I care about Argentina."

Five years ago this week some brave Soviet citizens set up a Moscow group to monitor observance of the rights supposedly gained in the Helsinki agreements. Most are now in prison or forced exile. Their spokesman in America, Ludmilla Alexeyeva, said: "The United States has achieved respectability and credibility in speaking out publicly and forcefully against human rights violations around the world. A continuation of this universal policy is essential to the human rights movement in the Soviet Union."●

SENATOR GRASSLEY'S ADDRESS AT UNIVERSITY OF NORTHERN IOWA COMMENCEMENT

● Mr. ARMSTRONG. Mr. President, my good friend and colleague from Iowa, Senator CHUCK GRASSLEY, returned recently to his alma mater, the University of Northern Iowa, to deliver an inspiring commencement address.

Senator GRASSLEY's speech was not only uplifting but also was filled with his special brand of downhome commonsense. He urged the graduates to reject the cynical, "looking out for No. 1" attitude that has frayed our social fabric, and not to look to the Government for all the answers.

The Senator appealed to the young people instead to invest in their society and in themselves, by harking back to enduring American values—the family, saving for the future, hard work, and participation in the political process.

Mr. President, Senator GRASSLEY's address is a fine commentary on our times, and I ask that it be printed in its entirety at this point in the RECORD.

The address is as follows:

UNIVERSITY OF NORTHERN IOWA
COMMENCEMENT

(By Senator CHARLES GRASSLEY)

Congratulations to you on your graduation.

Today most of you are leaving the University—passing into a phase of life sometimes referred to as the "Real World."

It's about the most challenging part of life you'll face—and you should enter it with anticipation. Hopefully, your university, my university, has distilled in you faith in yourselves, in America and in the future.

And the future looks bright for each of you today in America. I believe our nation has reached a turning point, and is on the road to greatness. As in no other time in the last 20 years, each individual here will have an opportunity to contribute to this new beginning.

Yet doesn't it seem these days that big institutions dwarf the individual, that largely irresistible forces determine our fates?

We do tend to feel that big government taxes our wealth; that big business and big labor drive up prices; that big oil causes our energy crisis; that big banks force up interest rates; and that big TV networks control what comes into our living rooms.

In the face of these impersonal forces, it seems easy—and sometimes necessary—to give up. We fall prey to what has been called the "Helplessness Syndrome"—the feeling that one person cannot counter these outside forces—that one person doesn't make much of a difference.

This sense of helplessness often gives way to cynicism. People turn inward, and talk of "Looking out for No. 1."

In this cult of "Self," moral restraints and social values break down. Working and saving for a goal give way to leisure and mindless consumption.

Instant gratification takes precedence over the long-term happiness to be found in enduring relationships. We are often tempted to solve our problems by taking the path of least resistance rather than seeking more enduring solutions.

But, you might legitimately ask, what difference does it make how you live your life? Can one person really make an impact in today's complex society?

Yes, I believe each of you can make a difference. Because from the moment you walk out of this arena and for the rest of your life, everything you do will affect someone else—for good or for bad. Except for the few people who choose to be hermits, no person leads a life unto himself.

Today—and every day—you are presented with a choice. You can pitch in, and become part of the most dynamic social structure ever devised, and work in harmony with like-minded individuals. Or, you can sit back, and let things tumble down around you.

You can contribute and reap the benefits of a team effort to improve our common lot, or you can go off on your own—thinking only of yourself—and suffer the turmoil of a socioeconomic system in ruins.

Every single choice you make will impact on our way of life.

If you choose to put self above family—then that cornerstone of our society will crumble.

If you choose to consume and consume, without producing, then today's economic house of cards will collapse, because it lacks a productive basis.

If you choose to join nearly half of the electorate in failing to vote—then our participatory democracy will wither and die.

Impersonal forces don't really determine what happens to us—rather, the opposite is true. We choose the kind of society we live in—and the kind of government we have—by the lives we lead.

Because, when you think about it, we and those around us make up those impersonal forces we complain about.

We are big government—when we demand that government solve our problems instead of solving them ourselves.

We are big business—when we put money over principle.

We are big labor—when we demand more without increasing production ourselves.

And we encourage trash on TV when we don't take control of our own TV sets.

But you can make a difference when you leave here by being different. You can do some of those things which don't make a lot of sense right now, but which help build a healthy society for all, as well as a healthy future for you.

For example, it may seem crazy to save and invest during a time of inflationary expectations—but saving and investing are the fountain from which springs our productivity, a fountain which needs to be continually replenished. And in a healthy economy, those who have saved and invested will find themselves in a solid financial position in the years to come.

America was not built by the worker who worked for today, or by the investor who invested for the short term—or, for that matter, by the politician who was more concerned about the next election than the next generation.

No—America was built by the pioneer, who was not burdened by the short-sightedness that today seems to blind us to our own best interests.

And it may seem inconvenient now, when

you are trying to get ahead, to weigh yourself down with family concerns—Mom and Dad and Brother and Sis, and perhaps your own household.

But someday, when you are at the top of the heap and look back, you will recall that your family was your greatest source of strength in troubled times.

And how better can you contribute to society than by instilling the positive attitudes you have acquired in your own children, if you choose to have them?

It may also seem like a waste of your time to get politically involved, to vote or even keep up with the news.

But if you just leave everything up to the other guy, he may be the one who is going to get involved in another Watergate or Abscam. If you don't participate as a check on the government, you will leave the government with absolute power. And as Lord Action said, absolute power corrupts absolutely.

Finally, when you enter the working world, as many of you will, you may want to have it all NOW—all the responsibility, all the money, all the trappings of success—whether you have earned it or not.

But the cliche of top executives starting in the mailroom and working their way to the top has a kernel of truth. These individuals have made it to the top by learning the business from the ground up—and producing at every level. They have earned their position by investing in themselves through their work.

And so should you invest in yourself. You are the Human Capital which, if patiently invested, will earn dividends for many years into the future.

It may seem risky to save and invest, to be burdened with family concerns, to be politically involved, to start at the bottom and work your way up. But Risk is what our society is all about. "Nothing ventured, nothing gained," is very close to the mark.

Today is truly the first day of the rest of your life. For these last four years, this university has prepared you—as it prepared me—to go out and make your own unique contribution to society.

And if there is any place—and any time—when your individual contribution will really make a difference, it is this great nation—and now. Our country is ready for greatness—and ready for your talent, your spirit, and your idealism.

If you keep your ability to yourselves, out of a sense of helplessness, a sense of cynicism, or for whatever reason, you are cheating yourself—and depriving your fellow man.

You have all heard that it is better to light one candle than to curse the darkness. How much better yet if that one candle you light—that contribution you make through your families, your churches, your work and even through politics—becomes a beacon to lead others.

As Emerson said, "What lies behind behind us and what lies before us are tiny matters, compared to what lies within us." And what lies within each of you is that ability to go out today—and make a real difference!

God bless you and good luck.●

DEATH OF BARABARA WARD

● Mr. KENNEDY. Mr. President, it is an occasion of great sadness for me to note the death on May 31 of one of the greatest thinkers and most remarkable women of our time, a friend of mine and devoted worker for all humanity—Barbara Ward.

Throughout her long and distinguished career as journalist, economist, educator, and author, Barbara Ward spoke out with uncommon eloquence and extraordinary insight for a comprehensive and compassionate plan of world development to bring new hope to the lives of all peoples, especially the poorest on this globe.

Barbara Ward recognized clearly the bonds between the developed and underdeveloped nations of the world and between economic issues and environmental issues. With brilliant intellect she succeeded in creating positive approaches to development that were as realistic as they were idealistic. And she spoke out with equal courage and insight for international security policies to diminish the use of force in settling disputes and, above all, to rid the world of the specter of nuclear war.

As a friend of Barbara Ward for many years, I knew not only of her special talents, but of her unique personal qualities. President Kennedy and President Johnson valued her counsel highly, as did Senator Robert Kennedy. Her wisdom was a continuing source of assistance and inspiration to all who knew her. Most of all, she was a warm and caring friend, and we shall miss her greatly.

As we mourn her death, we know that her works remain with us as a monument to her life and thought. Her books and lectures and broadcasts are a lasting contribution to our understanding of the complex problems of international development that challenge us today in every region of the Earth.

Mr. President, I ask that the obituaries on Barbara Ward which appeared in the Washington Post and the New York Times be inserted in the RECORD. I also ask that the editorial in the June 2 Washington Post and the article in yesterday's Washington Post by Robert S. McNamara, president of the World Bank, be printed in the RECORD.

The material follows:

[From the New York Times, June 1, 1981]

BARBARA WARD, BRITISH ECONOMIST, DIES—AN ADVISER OF STATESMEN

(By Paul Lewis)

LODSWORTH, ENGLAND.—Barbara Ward, the British economist and author, died today at her home in southern England after a long illness. She was 67 years old.

Her death was announced by the International Institute for Environment and Development, of which she was president from 1973 until last year.

Miss Ward, who was made a life peer five years ago with the title Baroness Jackson of Lodsworth, was at various times assistant editor of The Economist magazine and a governor of the British Broadcasting Corporation.

At the time of her death she was working on a book, with Erik Eckholm, the United States environmentalist, on global environment and social justice.

As a writer, a lecturer and an adviser and friend of statesmen, Barbara Ward was an eloquent evangelist for the needs of the developing countries and for the interdependence of nations. For over 30 years she preached the necessity of helping the poor and underprivileged of the world, the fundamental unity of the West and the need for accommodation with the Communist powers of the East.

Her prolific writings brought her many academic honors in the United States, her native Britain and several other countries. Not truly a scholar, she was clearly more than a journalist. She may perhaps best be described as a synthesizer and a propagandist who was not afraid to search through history and across many academic disciplines to find support for the causes she espoused.

ADOPTED HER MOTHER'S FAITH

Miss Ward, who was styled Lady Jackson in her own right and by virtue of her marriage, never sought political or administrative power, but she enjoyed considerable success at educating those who held power in the causes she believed in, and she worked closely with the United Nations throughout her life.

Barbara Mary Ward was born on May 23, 1914, in York, in northern England, the eldest daughter of a lawyer. Her early years were spent in the seaside town of Felixstowe, near Ipswich, where her family moved shortly after her birth.

Although her father, Walter Ward, is said to have shown interest in Quaker precepts, Barbara followed the example of her mother, Teresa Mary Burge, and embraced Roman Catholicism, which influenced her outlook throughout her life.

Beginning her education at the local convent, she was sent at the age of 15 to the Lycée Molière and the Sorbonne in Paris and then to Germany for further study. This early exposure to Continental Europe and the knowledge of its languages were reflected in her strong support for European unification and led to her personal friendship with Jean Monnet and other founders of the postwar European movement.

Miss Ward returned to England in 1932 to enter Somerville College at Oxford University, from which she graduated with the highest honors in phlosophy, politics, and economics in 1935. She published her first book, a study of colonial problems titled "The international Share-Out," in 1938, and the following year joined The Economist in London as an assistant editor.

A STAR OF "BRAINS TRUST"

During the war years she became foreign editor of The Economist and won a wide following through her appearances on the British Broadcasting Corporation's popular discussion program "The Brains Trust."

Publications during this period included studies of Turkey and of Italian and Soviet foreign policy. She also began what became a series of wider-ranging works that dealt with the challenges facing the industrial democracies, including the need for closer Western unity and a new relationship between the colonial powers and their developing possessions. These included "The Defense of the West," "Democracy East and West," "The West at Bay," "Policy for the West," "Britain's Interest in Atlantic Union" and "Interplay of East and West."

Such writings struck a sympathetic chord in the United States as it struggled with its new-found responsibilities as a global power and protector of the non-Communist world. They and particularly "India and the West," published in 1961, which argued that the economic development of the subcontinent was essential for the security and self-respect of the Western world, helped establish the considerable reputation she enjoyed here.

Miss Ward was a visiting scholar at Harvard from 1958 to 1968 and held the Schweitzer Chair of International Economic Development at Columbia from 1968 to 1973—an appointment criticized in the academic community by those who would have preferred to see a more original scholar in the post.

There were numerous other academic honors in the United States, and Miss Ward was a frequent and popular lecturer at institutions up and down the country. She often contributed to The New York Times Magazine.

In her native land she received many

honors also. She was a governor of the BBC as well as of the Old Vic and Sadler's Wells, a member of the governing council of the Institute of International Affairs and a Dame of the Order of the British Empire. A lifelong member of the Labor Party, she was created a life peeress in 1976 at the instigation of Sir Harold Wilson when he resigned as Prime Minister.

In 1950 Miss Ward married Sir Robert Gillman Allen Jackson, an Australian-born international civil servant and development expert who enjoyed a successful career with the United Nations. They had one son. Through her husband, she became closely acquainted with development problems in Ghana, where they lived for a while, and in Asia and other parts of Africa.

While playing a major role in the 1950's and 60's in awakening public opinion to the economic problems of the developing world and explaining why the West should consider its interests served by aiding the less fortunate, Miss Ward took her case to political leaders and used her considerable persuasiveness and charm to win their support.

REPORT ON U.N. PROGRAM

She was influential with U That when he was United Nation's Secretary General, and it was at his request that she became the anonymous author of the midterm report on the first United Nation's Development Decade.

Miss Ward, a close friend of Adlai E. Stevenson, was introduced to President John F. Kennedy and to Secretary of Defense Robert S. McNamara, with whom she retained a strong influence during his time as president of the world bank. She also got on well with President Lyndon B. Johnson, who once said her books were the only ones he ever read.

Miss Ward, who kept up with the times, was deeply concerned during the later years of her life about the growth of urban poverty in the developing regions and the conflict between economic development and protection of the environment. She played a major role in organizing United Nations-sponsored conferences on housing the world's poor and was both founder and president of the International Institute for Environment and Development. Last year, she was succeeded as the institute's president by William Clark, a former World Bank vice president, and became chairman of its council.

Not all Miss Ward's beliefs and insights accord with contemporary views, and some may seem outdated or at least put in question by recent history, for she was an inherent optimist who believed that if the political will existed modern technology could be combined with plentiful natural resources to put prosperity within reach of all countries.

On the other hand, most of the industrial world has accepted her fundamental conviction that the growing division between rich and poor presents a threat to international peace and the security of the West.

[From the Washington Post, June 2, 1981]

BARBARA WARD

For 30 years, it has scarcely been possible to discuss development anywhere in the world without bringing in Barbara Ward, who died in her native England on Sunday. Less theorist than popularizer, she had a fervent commitment, with a strong religious—Catholic—base, to the eradication of poverty and misery everywhere and to the participation of the privileged nations in that task. At the service of her calling she put her brilliance as a journalist, immense charm and a sure knowledge of the ways of politics. She became that rarity among public figures: someone with a nag's cause but without a nag's manner. This gave her access to the mighty. She was the model of the informed internationalist conscience.

During and after the war, Miss Ward was a leading figure of the Atlantic establishment. Her subsequent marriage to Sir Robert Jackson, a development expert, took her to India and Ghana, where she saw decolonization firsthand from the former colonies' end and developed a keen empathy with them. This was characteristic of Miss Ward. She was always poking into new places, investigating new people and books and ideas—even after cancer slowed her pace—and knitting her discoveries into the running pattern of her life. The process made her mind one of the central depositories of 20th century experience, and it made a personal encounter with her a sparkling, if sometimes exhausting, delight.

Her thinking was not for everybody; she had a faith in progress, in the benevolent potential of technology and social organization, in the applications of power, that was sometimes so strong and all-consuming as to seem unhistorical. Her life, however, had a passionate meaning. She could not abide injustice.

BRITAIN'S BARBARA WARD, 67, DIES; WRITER, ECONOMIST, HUMANITARIAN

(By Richard Pearson)

Barbara Ward, 67, a British journalist and economist who was one of the most eloquent voices calling for aid to the underdeveloped Third World and was an early proponent of world environmental policies, died of cancer yesterday at her home in southern England.

Miss Ward was the author of more than a dozen major works on economic development, written for the layman as well as the professional economist. She served on United Nations and Vatican commissions dealing with the sharing of world resources, and was a friend and adviser to statesmen on five continents.

Although she never held elective office, nor served in a government, she exerted profound influence on the debate surrounding the relation of rich to poor nations.

Honored for her writing, she also was an accomplished speaker, and an English radio personality. She was voted the second most popular public speaker in Great Britain in a 1944 national poll. She had written and had been foreign editor for the Economist, a highly respected British news weekly, and had lectured not only in Britain but at Harvard and Columbia universities.

Miss Ward's major works included "The International Share-Out," published in 1938, "Spaceship Earth," in 1966, and "The Widening Gap," published in 1971, and "The Home of Man," which appeared in 1976. A 1972 book she wrote with Rene Dubos, "Only One Earth," was used as the theme book for the United Nations Stockholm Conference on the Environment that same year.

Reviewing this book, one critic wrote that Miss Ward described "the dilemma of the poor nations—called to modernization and industrialization in order to raise their people from misery, yet hindered by the rich nations' traditional exercise of power and now by a new concern for pollution and ecological balance."

Another of her books, "Nationalism and Ideology," was hailed in the (London) Times Literary Supplement as a brilliant summary of man's progress from the tribe to the nation-state.

Her books and speeches to audiences brought home her hopes and her fears for the future, and a feeling that much of the future would be determined by the relationship between the rich and poor nations of the planet.

In "The Rich Nations and the Poor Nations" (of which Lyndon B. Johnson once said "I read it like I do the Bible") she wrote, "If we are to face the vast gap between the nations around the Atlantic area which have been through their modernizing revolutions and the searching nations all around the world who seek desperately to make the same transition, perhaps the first decision we have to make is to abandon the fallacy that, somewhere, somehow, everything is going to turn out all right."

In a 1964 speech in Washington she said that modern science and technology had unlocked "the gates of absolute scarcity" and made it a matter of choice whether to feed and clothe the world's poverty-stricken. "Never again can we say: 'We would have done it if we could, but the means were lacking'."

In another Washington speech that same year she asserted that the "possibility of making the desert bloom is just as stirring as going to the moon."

At the bottom of all her pleas was the theory that foreign aid, "direct transfers of wealth from rich nations to poor nations," is the solution to many world problems. She appealed to the Free World to invest money to help the underdeveloped nations "come through the sound barrier of modernization."

Among he students and admirers was President Johnson, who borrowed from Miss Ward her phrase, "the ancient enemies of mankind," as a call to use foreign aid to attack world poverty, disease, and ignorance.

Other American public figures she advised included John F. Kennedy during his presidency, World Bank President Robert S. McNamara, and Robert Kennedy, before and during his bid for the 1968 Democratic presidential nomination.

Miss Ward was appointed to the Pontifical Commission for Justice and Peace in 1967. The commision studies ways of helping poor countries. Miss Ward, a prominent Catholic lay person, recommended that the church donate some of its wealth to developing nations.

She was a past president of the International Institute for Environment and Development and was council chairman of the organization at the time of her death. She also had been a member of the Adlai Stevenson Institute of International Affairs.

Miss Ward was born in York, England. Her father was a solicitor of Quaker leanings and her mother was a devout Roman Catholic. Miss Ward was reared in her mother's faith.

At the age of 15 she went to Paris where she spent two years studying at the Lycee Moliere and the Sorbonne, then went to Germany where she attended college in Jugenheim. After spending three years at Somerville College, Oxford, she took a first in modern greats in 1935.

During the next three years she studied abroad in Europe during the summer and lectured at Cambridge University during the school year. She became a staff writer with the Economist in 1939, and served as the magazine's foreign editor from 1940 to 1950. She served on the staff of the BBC from 1943 to 1946, and on its board of governors from 1946 to 1950.

She first came to this country in 1942 and worked for the British Ministry of Information in Washington during World War II.

She was a visiting professor at Harvard University from 1958 to 1968, and was Albert Schweitzer Professor of International Economic Development at Columbia University from 1968 to 1973.

Five years ago, Miss Ward was made a life peer with the title of Baroness Jackson of Lodsworth. Last year she received Britain's Royal Society of the Arts Albert Medal, and India's Jawaharlal Nehru Memorial Award for International Understanding. She donated the money from both prizes to an Indian leper colony.

In 1950 she married Sir Robert Jackson, a United Nations official. He survives, as does a son.

[From the Washington Post, June 3, 1981]

AN ELOQUENT EVANGELIST FOR THE POOR

(By Robert S. McNamara)

With the death of Lady Jackson—Barbara Ward—the world has lost an eloquent

evangelist for the hundreds of millions of poor and underprivileged who live in the developing world.

I first met Barbara during the Kennedy administration at a Hickory Hill seminar at which she held me and my fellow Cabinet officers spellbound for hours. From then until the time she died, through the force of her moral convictions, the strength of her economic arguments and the depth of her political insights, she exerted a profound and continuing influence on my thinking.

In the mid-1960s, when there was much passionate intensity about our relations with the post-Colonial world, she was a voice of cool reason who pointed out the enormous problems of poverty that afflicted the Third World nations whether they were communist, Maoist, army-led autocracies or just struggling democracies. "There can be no stability," she used to say, "until we have begun to deal with that poverty, and it would cost us so very little of our affluence to begin the job."

What always struck me about Barbara was her ability as a presenter and expositor, both in public speeches, where she could arouse large audiences of hardened politicians, and in smaller gatherings, where she could hold one spellbound by her global vision and her personal insight.

She had lived in several countries of the Third World (for instance, Ghana and India), and this experience gave her a special knowledge of their problems. But what gave her judgments their exceptional quality was her compassion of the poor and for the powerful. She could feel pity, as most people can if they do not harden their hearts, for the poor peasant eking out a miserable existence on a handkerchief of bad soil, but she could also sympathize with those who bore the burdens of power—the unhappy African leaders trying to create a new nation and a new government with a hundred or so high school graduates, few natural resources and no traditions of independence in the modern world. It is so easy to condemn those in power for their failures; it is so much more constructive to try to help them to be more successful.

This was Barbara's special ability: she could see that the new rulers of the new states needed new ideas to bring their people forward, and she was not wedded to the conventional "modernization" programs. She was one of the first people to talk to me about the capacity of the small farmer to be far more productive if only he could be given from outside some of the knowledge and tools to get started.

She was always deeply concerned about the consequences of the population explosion, and when I consulted her in my early days at the World Bank she urged me, against a lot of contrary advice, to speak publicly about the issue. But Barbara was also a Catholic and a mother and she did not believe that a reduction in fertility rates could be achieved by propaganda and contraception alone. She believed that the will to have smaller families was a prerequisite, and that would only come with a decline in infant mortality. For this reason, she campaigned for what has come to be known as basic needs, and especially for that simplest, but most rare, gift of nature—a supply of pure, unpolluted water.

Barbara was always an evangelist, preaching the good news that the world could be made better if only men would collaborate for their mutual good—as they did so notably during the Marshall Plan era, which she regarded as the high point of post-war political wisdom. She taught millions through her broadcasts, newspaper articles, speeches and books, and, in her later years, she headed an institute that she intended to carry on her work for intelligent management of the resources of this earth.

I feel most privileged to have had the friendship of this remarkable woman, as well as her intellectual support and criticism, which I believe has been more influential on my thinking than that of any other person I have known.

NOMINATIONS ON THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I had hoped that today we would be able to complete a number of items on the Executive Calendar. We have disposed of a great number of them. It leaves three nominations in particular—Myer Rashish and Chester A. Crocker, in the Department of State, and Charles Z. Wick, in the International Communication Agency.

I have conferred with the minority leader, and I ask him, first, if he might be in a position to enter into an agreement as I have described it to him and as we have discussed it in connection with the consideration of the Wick nomination, on Monday.

Mr. ROBERT C. BYRD. Mr. President, I have explored the possibility of an agreement. I am ready to enter into an agreement as to Mr. Charles Z. Wick, and I am prepared to accede to that at this point.

I should like to ask a question of the distinguished majority leader, if I may. It involves the nomination of Chester A. Crocker, of the District of Columbia, to be an Assistant Secretary of State. His name has been on the Executive Calendar since May 4; and as I understand it, it was reported by a vote of 16 to 0 from the Foreign Relations Committee. Several Senators on my side of the aisle who are members of that committee are concerned as to why there is a continued delay in taking up the nomination in the Senate, inasmuch as it was reported from the committee a month ago.

So as I respond to the distinguished majority leader—and I am willing to enter into the agreement on Mr. Wick—I should like to inquire, respectfully, as to what the outlook is for early consideration of Mr. Crocker.

I keep hearing stories and reading stories. I believe that the minority on the committee are justified in asking questions as to whether this nomination is going to be held up or whether it will continue to be held hostage to a hold or holds on the nomination; because if that is the case, then the committee wastes its time in reporting a nomination on which there is a 16 to zero vote and on which hearings have been adequately conducted.

Mr. BAKER. I thank the minority leader. He raises a point I understand and about which he most obviously is in a position to be concerned.

The Rashish and Crocker nominations were reported on May 4; and in the course of time, objections have been raised on this side to proceeding to the consideration of those nominations.

I think I can advise the minority leader that it is time to move on those nominations, and it is my intention to move against the holds, much as I regret doing that, and to move on them soon. I have advised certain Members of that.

I have consulted with the President on that subject, and I expect that we will have some sort of action on it before long.

I still hope that negotiations which are underway even today, involving prominent members of the administration and the leadership in the Senate, may produce an agreement to dispose of those matters without great controversy.

The minority leader is correct. I have been urging him to clear the Wick nomination, and he has now agreed to do that, on the basis I am about to describe, but he certainly is entitled to ask when we are going to do the others.

My response to the question of the distinguished minority leader is "soon." I assure him that it is not going to become a permanent fixture on the Executive Calendar.

Mr. ROBERT C. BYRD. Mr. President, that is a very satisfactory response.

I know the problems the majority leader has. I realize that we do have to recognize and honor holds that are placed on nominations and on measures from time to time, some of those holds being placed on my side or the other side. However, there comes a time when I believe it is the responsibility of the leadership to move, and I recognize the necessity for that.

I thank the distinguished majority leader.

ELECTRONIC BLESSINGS

Mr. BAKER. Mr. President, I might say that one of the blessings of the electronic age is that notwithstanding there are not many Members in the Chamber at this time the little microphones we carry in our hands and on our lapels carry the proceedings of the Senate to each senatorial office.

While we were discussing this matter I was handed a note by a staff person saying that a hold on the Rashish and Crocker nominations is now released and we will be in a position to proceed with them on Monday.

I may say I wish to express my appreciation to all of those who insisted that we install these electronic devices.

I do not yet have a time agreement on Crocker and Rashish, but with this assurance I can tell the minority leader we will move on those nominations then on Monday.

Mr. ROBERT C. BYRD. I thank the majority leader.

TIME-LIMITATION AGREEMENT—WICK NOMINATION

Mr. BAKER. Mr. President, let me now propound a request on the Wick nomination and I hope before we go out we may be able to get a similar agreement on the Rashish and Crocker nominations.

By the way, may I express my appreciation to that Senator who had a very legitimate concern on this nomination and who had his hold place on this nomination for the very best of reasons. I admire his concern. I understand his concern. But I am doubly grateful to him for making it possible for me to an-

nounce today that we will proceed with those two nominations on Monday. I hope we might have the agreement we are about to describe on Wick also for Crocker and Rashish.

Mr. President, I ask unanimous consent, as in executive session, that on Monday, June 8, at no later than 12:30 p.m. the Senate go into executive session to consider the nomination of Charles Z. Wick, Meyer Rashish, and Chester A. Crocker, the nominees appearing on the Executive Calendar, and that in the case of the nomination of Charles Z. Wick, to be Director of the International Communication Agency, there be a time agreement as follows: 1 hour to be equally divided between the majority and minority leaders or their designees and that if a rollcall vote is ordered on any of the three nominations that I have just identified on Monday, June 8, that the rollcall vote on those nominations not occur until at or after 2 p.m. on Tuesday, June 9.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, I have a number of other unanimous-consent requests which I believe have been cleared on the minority side and let me proceed to put those requests now.

ORDER FOR THE RECORD TO REMAIN OPEN UNTIL 5 P.M. TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that the RECORD be open until 5 p.m. today for the introduction of bills, resolutions, and statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CERTAIN ACTION DURING THE RECESS

Mr. BAKER. Mr. President, I ask unanimous consent that during the recess of the Senate over until June 8, 1981, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred, and that the Vice President, the President pro tempore, and the acting President pro tempore be permitted to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER PERMITTING BUDGET COMMITTEE TO FILE BUDGET WAIVERS

Mr. BAKER. Mr. President, I ask unanimous consent that the Budget Committee have permission to file budget waivers until 5 p.m. on Friday, June 5.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEQUENTIAL REFERRAL—S. 266

Mr. BAKER. Mr. President, I ask unanimous consent that S. 266, the Federal Interagency Medical Resources Sharing and Coordination Act of 1981, once reported by the Committee on Governmental Affairs, thereon be sequentially referred to the Committee on Veterans' Affairs for a period not to exceed 45 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEQUENTIAL REFERRAL—S. 349

Mr. BAKER. Mr. President, I ask unanimous consent that the bill S. 349, when reported, if reported from the Committee on Veterans' Affairs, be thereafter referred sequentially to the Committee on the Judiciary for a period not to exceed 45 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business, not to extend longer than 15 minutes in which Senators may speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL MONDAY, JUNE 8, 1981

Mr. BAKER. Mr. President, in view of the fact that the Senate has concluded consideration of the supplemental appropriation conference report in surely what must be record time today and since we avoided the unpleasantness of the possibility that the Government could not operate beyond June 5, tomorrow night at midnight, had we not passed that measure, it seems that the Senate has performed extraordinarily well and there is no need now for the Senate to convene on Friday, tomorrow.

Mr. President, I ask unanimous consent that when the Senate stands in recess today it do so until the hour of 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I am advised now by the distinguished minority leader that there are four other nominations on the Executive Calendar that may be disposed of.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations appearing on page 3 of the Executive Calendar under Department of Defense and to include the four items listed under Department of Defense beginning with Tidal W. McCoy, of Virginia, and including and concluding with Harry N. Walters, of New York.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

DEPARTMENT OF DEFENSE

The legislative clerk read the nomination of Tidal W. McCoy, of Virginia, to be an Assistant Secretary of the Air Force.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Joel E. Bonner, of Virginia, to be an Assistant Secreary of the Army.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of William R. Gianelli, of California, to be an Assistant Secretary of the Army.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Harry N. Walters, of New York, to be an Assistant Secretary of the Army.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move en bloc to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL MONDAY, JUNE 8, 1981

Mr. BAKER. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 12 o'clock noon on Monday next.

There being no objection, the Senate, at 4:17 p.m., recessed until Monday, June 8, 1981, at 12 noon.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 4, 1981:

FEDERAL GRAIN INSPECTION SERVICE

Kenneth A. Gilles, of North Dakota, to be Administrator of the Federal Grain Inspection Service, vice Earl Leland Bartelt, resigned.

COMMODITY FUTURES TRADING COMMISSION

Philip F. Johnson, of Illinois, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1984, vice Gary Leonard Seevers, resigned.

Philip F. Johnson, of Illinois, to be Chairman of the Commodity Futures Trading Commission, vice James M. Stone.

FEDERAL COMMUNICATIONS COMMISSION

Mary Ann Weyforth Dawson, of the District of Columbia, to be a Member of the Federal Communications Commission for a term of 7 years from July 1, 1981, vice Robert E. Lee, resigned.

FEDERAL ENERGY REGULATORY COMMISSION

Charles M. Butler III, of Maryland, to be a Member of the Federal Energy Regulatory Commission for the remainder of the term expiring October 20, 1983, vice Charles B. Curtis, resigned.

Georgiana H. Sheldon, of Virginia, to be a Member of the Federal Energy Regulatory Commission for a term expiring October 20, 1984 (reappointment).

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

Gen. Robert E. Huyser, U.S. Air Force (age 56), for appointment to the grade of general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

Lt. Gen. Hans H. Driessnack, 064–22–2830FR, U.S. Air Force, for appointment as senior U.S. Air Force Member of the Military Staff Committee of the United Nations, under the provisions of title 10, United States Code, section 711.

Lt. Gen. Freddie L. Poston, U.S. Air Force (age 55), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

Lt. Gen. Stanley M. Umstead, Jr., U.S. Air Force (age 52), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. William James Livsey, Jr., [redacted], U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. Richard Luther West [redacted] age 56), Army of the United States (major general, U.S. Army).

The following-named officer to be assigned to a position of importance and responsibility designated by the President under the provisions of title 10, United States Code, section 3066(a) in grade as follows:

To be lieutenant general

Maj. Gen. Ernest Dishman Peixotto, [redacted] U.S. Army.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. Charles Maurice Hall [redacted] (age 56), Army of the United States (major general, U.S. Army).

IN THE NAVY

Vice Adm. William N. Small, U.S. Navy, for appointment as Vice Chief of Naval Operations pursuant to title 10, United States Code, section 5085.

Vice Admiral Small, having been designated for command and other duties determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of admiral while so serving.

Adm. Donald C. Davis, U.S. Navy, (age 60) for appointment to the grade of admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

The following-named officer, having been designated for command and other duties of great importance and responsibility in the grade of vice admiral within the contemplation of title 10, United States Code, section 5231, for appointment while so serving as follows:

To be vice admiral

Rear Adm. Robert L. Walters, U.S. Navy.

IN THE MARINE CORPS

The following-named officer under the provisions of title 10, United States Code, section 5232, to be assigned to a position of importance and responsibility designated by the President, in grade as follows:

To be lieutenant general

Maj. Gen. Harold A. Hatch [redacted], U.S. Marine Corps.

The following-named officer under the provisions of title 10, United States Code, section 5232, to be assigned to a position of importance and responsibility designated by the President, in grade as follows:

To be lieutenant general

Maj. Gen. John K. Davis [redacted], U.S. Marine Corps.

IN THE AIR FORCE

Air Force nominations beginning George W. Berger, to be major, and ending Joel I. Sherer, to be first lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 20, 1981.

IN THE NAVY

Navy nominations beginning Latimer T. Albert, to be captain, and ending Michael J. Thomas, to be lieutenant (j.g.), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 11, 1981.

Navy nominations beginning Kenneth J. Anderson, to be ensign, and ending Curtis L. Hitt, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 11, 1981.

Navy nominations beginning Reinaldo G. Alvarez, to be captain, and ending Eva G. Stapleton, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 19, 1981.

DEPARTMENT OF DEFENSE

Tidal W. McCoy, of Virginia, to be an Assistant Secretary of the Air Force, vice Joseph Charles Zengerle, III, resigned.

Joel E. Bonner, Jr., of Virginia, to be an Assistant Secretary of the Army, vice Alan J. Gibbs.

William R. Gianelli, of California, to be an Assistant Secretary of the Army, vice Michael Blumenfeld, resigned.

Harry N. Walters, of New York, to be an Assistant Secretary of the Army, vice William Eldred Peacock, resigned.

HOUSE OF REPRESENTATIVES—*Thursday, June 4, 1981*

The House met at 10 a.m.

The Reverend Paul Radke, Westwego Assembly of God Church, Westwego, La., offered the following prayer:

O Lord our Lord how great are Your provisions and Your blessings upon Your creation. We are made to rejoice with King David as he exclaimed, "Bless the Lord, O my soul and all that is within me, bless His holy name. Bless the Lord, O my soul, and forget not all His benefits. Who forgiveth all thine iniquities, who healeth all thy diseases, who redeemeth thy life from destruction, who crowneth thee with loving kindness and tender mercies."

Bless this assembly today and may You give these who carry such great responsibility divine wisdom and knowledge to carry on the business and affairs of state. For righteousness exalteth a nation, but sin is a reproach to any people.

Guide and bless those who hold the peace and destiny of our Nation in their hands. This we pray in Christ's name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 2156. An act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended.

THE REVEREND PAUL RADKE

(Mrs. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOGGS. Mr. Speaker, I would like to pay tribute to Rev. Paul Radke who offered today's opening prayer. He is pastor of the Westwego Assembly of God Church in Westwego, La., and together with his wife and five children, has been an outstanding community leader. Mrs. Radke and their daughter Kathy, a political science teacher accompany him today.

Pastor Radke attended Lamar Tech in Beaumont, Tex., near his hometown. He furthered his education at Texas and Southern Assemblies of God Bible College.

He has traveled widely and preached in 35 countries. He is truly a voice of leadership around the world. Among his close friends was the late David Ben Gurion, Prime Minister of Israel. He has pioneered and pastored several churches, and has served as minister for his congregation in Westwego since 1963. For many years and in many ways, his congregation has grown under his guidance.

Pastor Radke's personal accomplishments are matched only by his service to our community. He employs radio and television in his outreaching ministry, touching everything from rest homes for the elderly to detention homes for wayward youths, to encouraging the construction of a civic center for all of the people of Jefferson Parrish.

I extend my deepest gratitude to Pastor Radke for his immeasurable contributions to our society. I also thank him for allowing us the opportunity to join in prayer with him here today.

ROSE-COLORED SNAKE OIL

(Mrs. COLLINS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. COLLINS of Illinois. Mr. Speaker, in recent weeks, we have been bombarded with statements by the administration that its economic policies will revitalize America.

But now we have evidence the administration is hedging its bets on how successful those economic policies will be.

Thus, it is now clear that the administration has been giving the American public just so much rose-colored snake oil about how inflation and interests rates will drop if its economic package is adopted. It is beginning to doubt, along with the rest of us, its impossible dream.

The evidence is buried quietly and unobstrusively in the size of the administration's proposed cuts in social security.

Under administration economic assumptions, social security trust fund balances should decline until 1984. Then in 1985 and 1986, they should increase.

If that is the case, why the huge proposed cut in social security benefits—a cut that by the year 2055 will realize an almost 25 percent reduction in benefits paid out?

Clearly the cuts are much larger than needed to keep social security solvent if all goes well under the administration economic policies.

That leaves only two other choices to explain the massive cuts. One is that President Reagan is breaking his promise to senior citizens and cutting benefits, earned and promised, in order to balance the budget. The second is that President Reagan and his staff do not believe their economic policies will really work and are gouging social security now as a cushion against shortfalls down the road.

SHROUD THE STATUE OF LIBERTY

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, Ernest Lefever's nomination to be Assistant Secretary of State for Human Rights should be rejected by the Senate. I do not believe the President's choices should be tampered with normally, but this is an exception.

It is unclear to me why Mr. Lefever would even want the post. He is an insistent, strident critic of the previous administration's human rights policies. Not so much, mind you, of what was accomplished, as of the way it was accomplished. Yet he has no policy of his own, save some rhetoric about quiet diplomacy.

It is also unclear to me why President Reagan would want Mr. Lefever and his quiet diplomacy in the post. Certainly the foreign policy of this administration is not quiet diplomacy. It was not quite diplomacy that sent the Libyan diplomats quickly and justifiably packing. It was not quiet diplomacy that told the Soviets and the Cubans to keep their hands off Central America. Why become quiet when human rights are involved?

I may not agree with every action Secretary of State Alexander Haig takes, but the last criticism I would make of him is that he sits on his hands. In essence, what Mr. Lefever proposes to do is become Assistant Secretary of State for Human Rights in order to sit on his hands. Perhaps during a rare burst of energy he will indulge us in hand-wringing, but nothing more. I think this is the most

charitable analysis I can make of the Lefever program.

If Mr. Lefever is confirmed by the Senate, I suggest that during his watch at the human rights office we shroud the torch on the Statue of Liberty.

BIPARTISAN COMPROMISE APPROACH ON TAX REDUCTION—ECONOMIC TRIGGERS FOR FUTURE YEARS

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, many of us who support a long-term or multiyear tax reduction, and relieving the hard-pressed American taxpayers from the burdens that are imposed upon them, are also concerned about unbalanced budgets and growing deficits. People in my district and in the country know that we need a balanced budget and must reduce the amount of budget deficits. Therefore, as we approach the difficult questions of tax reductions, we also need to make certain that we do not increase the problems of inflation as a result of even greater deficits.

The budget which was adopted by Congress and submitted by President Reagan has certain specific economic assumptions in it which, if they are accurate, assure us that inflation will come down, deficits will be brought under control, and that interest rates will be reduced. It is my proposal, therefore, Mr. Speaker, that we take these Reagan-Stockman economic assumptions and write them as triggers into any outyear tax reductions to make certain that if these assumptions are met, those same assumptions which were put before us by the President himself, then the outyear tax reductions go into place. But, if not, in order to avoid inflation and high deficits and an unbalanced budget, those outyear tax reductions would be sunsetted until the economy is brought under control. To do otherwise would be irresponsible.

Therefore, Mr. Speaker, I think this is a bipartisan compromise approach: A multiyear tax reduction for 3 years with the outyears reductions being triggered on the achieving of the President's own economic assumptions.

A TRIBUTE TO COL. WILLIAM NUNN

(Mr. JOHNSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSTON. Mr. Speaker, I would like to call the attention of my colleagues to the record of one of our Nation's truly fine citizens, Col. William Nunn. Colonel Nunn is a retired officer of the U.S. Army whose outstanding record has won him commendations on 15 separate occasions. An even greater accomplishment is Colonel Nunn's most recent tenure as an instructor in U.S. Government, American history, Asian history and as head coach of both the track and soccer teams at Christchurch School in Christchurch, Va.

From 1960 until June 1981 Colonel Nunn has focused his tremendous energy and considerable talents on his students at Christchurch. With an understanding that education depends on relationships, the colonel has exhibited a rare ability to be demanding of his students, yet not defeating, and to be ambitious for what they could accomplish, leaving an indelibly positive mark on the memory of each young person he taught.

His devotion, loyalty, unfailing good humor, insistence on the best from each individual and determination to defend what is right are matched only by the respect, affection, and most sincere appreciation which is abundantly returned to him by the students, their families, and the faculty and board of Christchurch School.

COL. WILLIAM A. NUNN, SERIAL NO. 0231161

Combat Infantry Badge received in September, 1972;

Bronze Star Medal received in February, 1973 for action in 1942;

Bronze Star Medal received in March, 1973 for action in 1942;

Commendation Medal;

Certificate of Achievement upon leaving France;

Letter of Gratitude signed by President Harry S. Truman;

Certificate of Appreciation signed by Maxwell Taylor, Army Chief of Staff;

Asian-Pacific Theatre Ribbon;

Bronze Star (Battle Star);

Pearl Harbor Ribbon;

American Theatre Ribbon;

Victory Medal;

Occupation Medal of Japan;

Reserve Service Medal;

Expert Infantry Badge;

Governor of Yamagata Prefecture during occupation of Japan;

1960 to 1981, Christchurch School in Christchurch, Virginia—instructor; of United States Government, Asian History, American History;

Head Track Coach; and

Head Soccer Coach.

COMMUNICATION FROM THE DIRECTOR OF HOUSE INFORMATION SYSTEMS, COMMITTEE ON HOUSE ADMINISTRATION

The SPEAKER pro tempore (Mr. DANIELSON) laid before the House the following communication from the Director of House Information Systems, Committee on House Administration:

COMMITTEE ON HOUSE ADMINISTRATION,
HOUSE INFORMATION SYSTEMS,
Washington, D.C., May 11, 1981.

Re Federal Leasing Inc. vs. Underwriters at Lloyd's et al., C.A. No. H79-1088 (U.S. District Court for the District of Maryland).

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: This is to notify you pursuant to House Rule 50, that I have been served with the attached subpoenas for the taking of a deposition and the production of documents relating to a House Information Systems' (HIS) purchase order for computer equipment used to support the operations of the House.

The attached subpoenas were served on me in one envelope. One is addressed to me by name, while the other is addressed to "Authorized Representative." Each subpoena makes the usual demands regarding the taking of a deposition and the production of documents.

In accordance with House Rule 50, I shall consult with the Committee on House Administration to determine whether the issuance of the subpoena is a proper exercise of the court's jurisdiction, is material and relevant, and is consistent with the privileges and rights of the House, and shall notify you of the determination forthwith in writing.

Sincerely,

BOYD ALEXANDER.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report to H.R. 3512 amd amendments in disagreement thereto, and that I may include extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

CONFERENCE REPORT ON H.R. 3512, SUPPLEMENTAL APPROPRIATIONS, FISCAL YEAR 1981

Mr. WHITTEN. Mr. Speaker, pursuant to the order of the House on Tuesday, June 2, I call up the conference report on the bill, H.R. 3512, making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The Clerk will read the statement of the managers.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of Wednesday, June 3, 1981.)

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, as all of you know, I first voted for the substitute for the President's package for I learned as a youngster, do not buy a package without inspecting its content.

Since that time our Committee on Appropriations has inspected the various proposals which were directed to our committee by the President's Office of Management and Budget.

Where we felt we could cut back, we did so, but where we felt we could not, we have not done so.

Payment for social security does not come before our committee; however, we did point out in our bill that the social security system is vital to the American people and should be maintained as is.

I dare say that none of our 55-member committee is fully satisfied with every item in the bill; however, it does reflect a composite view.

While we cut the recommendation by the President for additional spending by $2.6 billion, and reduced his recommendation for rescissions of existing appropriations from a request of $15.1 to $14.3 billion, we added deferrals in the amount of $1.2 billion, which we believe can be saved.

While doing this, we provided for soil conservation, for the sale of surplus farm commodities in world trade at competitive prices, believing that the sale of our surplus food in foreign trade would not only recover a large share of our investment but would really contribute to bringing about peace.

We provided for the various food programs, of course, making them subject to such restrictions as the legislative committees might require in its authorization.

We held funds for education, including vocational education, for medicaid for the institutes of health, for hospitals and for the disabled.

We were able to retain $70 million to Appalachia, for the EDA and other programs of benefit to our own country.

I do regret that most of the savings here go to increased military spending where we already have a carryover of billions of dollars unobligated and unspent. We now have an investigation going in an effort to eliminate waste—the picture is anything but good.

We do have assurances that before these additional funds are spent, full justification by item will be required.

Mr. Speaker, as you know, this bill takes care of our needs until October 1. In the next few weeks we will have before you the various appropriation bills for 1982.

Mr. Speaker, I would like to say to my colleagues that this conference agreement is unique. It includes these principal features:

It provides $20.9 billion of the $23.5 billion of supplemental appropriations requested by the administration.

It provides for savings in the form of rescission totaling $14.3 billion compared with $15.1 billion recommended by the administration.

It extends the present continuing resolution from June 5 to September 30. Without an extension to the continuing resolution programs under four major appropriations bills—Labor-HHS-Education, Treasury-Postal Service, Legislative, and Foreign Assistance—would be without financing after midnight Friday, June 5.

This is a good conference agreement. It was developed and managed through conference by the subcommittees of the Committee on Appropriations—the people who know the programs involved and their requirements—and consolidated into a single bill for consideration by the House. It responds to the administration's request for restraint and at the same time continues to fund necessary people and physical resource programs.

I believe what the House conferees did with respect to this bill is truly remarkable. The time deadlines were severe, the changing budget numbers often confusing and the decisions very, very tough. The 13 subcommittee chairmen decided early on to work together, to agree to review the President's program fairly and equitably and where valid differences occurred, to respectfully disagree. Your Appropriations Committee has done the best job it can.

I must at this time take special note of my good friend and colleague, the gentleman from Massachusetts, and our ranking minority member, Mr. CONTE, as well as the 13 subcommittee chairmen, Messrs. BOLAND, NATCHER, SMITH, ADDABBO, LONG, YATES, ROYBAL, BEVILL, BENJAMIN, GINN, DIXON, and FAZIO, as well as their counterparts on the Republican side, Mrs. SMITH, Messrs. EDWARDS, COUGHLIN, MYERS, KEMP, GREEN, MCDADE, BURGENER, REGULA, O'BRIEN, and MILLER. Without the support, and the private time and counsel they have provided, our achievements would not have been possible. I truly appreciate their support and personal friendships. To this list I add all the members of the Committee on Appropriations and the members of the staff, headed by Keith Mainland, which I believe to be the best professionals, hard working, fast and accurate. Except for them, this Congress could not operate.

Mr. Speaker, this conference agreement tops all other conferences with the Senate in scope and complexity. We had our largest number of conferees, 50 in all. We had 432 amendments in disagreement concerning over 800 accounts spread throughout the jurisdiction of our 13 subcommittees. This year we had a very difficult time; first our committee reviewed the Carter budget recommendations, then we had the Reagan administration's budget. This bill not only includes 139 rescissions, 385 supplementals, and action on deferrals and various other proposals, but also involves a continuing resolution for four appropriation bills funding Government agencies for which the authority to operate will expire at midnight this Friday, June 5. Not only do we have to act favorably on this conference report, but the Senate also has to agree in order to send it to the President by Friday. Otherwise, under the Attorney General's opinion, the departments must be closed.

It has been my privilege for the second time in 2 years to present to this House an appropriation bill which covers all the various operations of Government. On both of these occasions when these various proposals came before the full committee, I asked each of the 13 subcommittees to review their part of the bill and manage it through committee markup, on the floor and finally through conference. This system has worked well, and I may say, is a feature we might wish to consider in the future for the regular bills. This gives us the opportunity to view all appropriations actions at a single time, make changes in priorities and stay within our totals.

BILL TOTALS

In total, the bill is $1.7 billion below the administration's request for fiscal year 1981. The bill before us today includes:

Supplemental appropriations totaling $20.9 billion. In total, the committee has approved 385 supplemental appropriations. This reflects 89 percent of the amounts requested by the administration. This restraint has allowed the committee to achieve savings of $1.7 billion below the President's request.

Rescissions of previously appropriated funds of $14.3 billion. In total the committee approved in whole or in part 105 of the 123 rescissions proposed by the administration. Furthermore, an additional 34 new rescissions

were found which combine to achieve savings equal to 94 percent of the amount proposed by the administration; 16 of the rescissions proposed by the administration were converted to deferrals totaling $545 million.

Deferrals of budget authority. The committee has sustained 60 deferrals proposed by the administration, totaling some $4.8 billion, and disapproved only 15 items totaling $367 million while simultaneously initiating 24 new deferrals not requested by the administration totaling some $1 billion in additional savings.

COMPARISON TO THE RESOLUTION

When the Congress adopted the third budget resolution for fiscal year 1981 it established binding ceilings under which all spending measures must conform. This conference agreement which we bring before you today is within those totals. It does not violate the ceilings, it is under the congressionally agreed upon budget by some $2.3 billion in budget authority and $300 million in outlays.

Mr. Speaker, I think I should for the RECORD call attention to the fact that we are operating under a rather odd situation, as we all know. The Budget Act which Congress passed, in 1974, provides for the fixing of budgetary targets at the beginning of a session, and later the rescissions or the reconciliation comes at the end of the session. At the present time the Committee on the Budget circumvented the Budget Act by waiving the intention and requirements of the Budget Act, by providing that the first budget resolution requires reconciliation at the beginning.

So we are under that resolution for the time being because of the actions of the Budget Committee which were approved by the Congress.

AGRICULTURAL WEALTH

Mr. Speaker, agriculture and the relatively few people involved, with huge investments and great risks, are the basis for our economy. It has been my primary job through the years to get money through the Congress to finance existing farm programs—money made necessary because of farm costs, which reflect increases under law for labor and industry. Today, those engaged in agriculture get far less for their labor, investment, and risk than other segments of our society. They certainly do not need increased interest rates to add to this burden. What they need is fair prices reflecting their increased costs. To me this is absolutely essential.

This conference report includes necessary language dealing with the Soil Conservation Service and the watershed and flood prevention program. I will include the text of the amendment for the RECORD at this point:

SOIL CONSERVATION SERVICE

WATERSHED AND FLOOD PREVENTION OPERATIONS

The Conferees direct that the Soil Conservation Service return immediately to the States all funds which have been withdrawn in the last 60 days for projects, where local taxes have been paid or plans for construction have been completed or bids announced. The Conferees expect to be notified that such action has been taken prior to the reporting of the Agriculture Appropriations Act for fiscal year 1982. Furthermore, the Conferees concur in the Senate report language which directs that the Office of Management and budget not act as an impediment to the timely authorization of watershed projects and to forward these projects to the Congress at the earliest possible time."

In addition the conferees agreed to language in section 305 of the bill which reaffirms the authority and responsibility for the Commodity Credit Corporation to protect the Government's investment to make food available to the people of the world and to prevent commodities from being held and counted to reduce the American farmers' production. This amendment does not remove or amend the restrictions contained in agricultural acts relating to the sale of surplus commodities, but rather only prohibits the use of funds to prevent or interfere with the normal sale of surplus agricultural commodities in world trade at competitive prices.

I will include the text of the amendment for the RECORD at this point.

SEC. 305. None of the funds in this Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in World trade at competitive prices as authorized by law.

CONGRESS—THE PEOPLE'S BRANCH

In recent weeks the press, and the television media, have had their eyes on the Presidency. However, there is another separate and independent branch—the House of Representatives and the Senate—that constitute the people's branch of the Government. It is the Congress which passes laws, provides for programs and funds for them. The President can only propose; it is Congress which disposes.

The responsibility of appropriating funds from the Treasury is a sacred one, guaranteed by the Constitution itself to be the exclusive domain of the people's branch of Government. The House of Representatives vests that power to provide funding for Federal programs in the Appropriations Committee. Unlike the authorizing committees, which think up new Federal programs and are not constrained in their efforts to recommend authorization levels for Government activities, the appropriations process is characterized by constraint. We must work with the budget proposals of the President and the constraints of the economy. Oftentimes we do not always agree with all the priorities of the President and may change them.

I am proud of the fact that the Appropriations Committee has been under the President's budget request 37 out of the past 38 years. Our committee is effective because we deal with the details of the entire Government and work through our structure of the 13 subcommittees. During the 96th Congress, your Appropriations Committee held 720 days of hearings, took testimony from 10,215 witnesses, published 225 volumes of hearings which comprised 202,767 printed pages.

We must bring inflation under control and we must reduce the interest rates that are now running between 18 and 20 percent. We must balance the budget, but it must be balanced at a high level, keeping incomes up with expenditures. To do this we must provide incentives to expand production—and the greatest incentive would be to strike down the many unnecessary regulations, which could be termed strangulations. We must stabilize the value of our currency, for we cannot pay the cheap dollar we borrowed with a hard-to-get dollar.

It is important for the Congress to stress productive spending—really, investments. Our country is big, from Maine to California, from Washington to Florida, and now from Alaska to Hawaii, each with similar yet different problems and interests with Members of Congress who reflect these different interests and feelings—435 of them. These diversities create competing needs for dollars. Often Members of Congress get letters from a few people who do not have everything they would like—and who does? What many people overlook is what they do have—more in a material way than the people of any other nation. We do have financial problems and here we must balance it off—stabilize the purchasing power of the dollar.

TWO WAYS TO SERVE

There are two ways to serve as a Representative in Congress. One is to sit back and merely record your views. While this approach may be popular with people who judge you by your vote alone, it accomplishes little in obtaining results.

The other way to serve is to do all you can to bring about what you believe in, to accomplish something. They call us Congressmen but really the name is Representative in Congress; this means that a Representative is something like a lawyer working for you. It means getting the best settlement possible. It does mean that sometimes it may be a little more, other times you are forced to accept a little less. In other words, we must act and justify our actions to both sides.

With the support of my colleagues, I hold a most enviable position in Con-

gress to be of service, that of chairman of the Appropriations Committee of the U.S. House of Representatives. As chairman of the full committee, I am an ex-officio member of each of the 13 subcommittees. With the help of my colleagues, we can see that adequate funds are provided for defense and energy, for the conservation of our water resources, highways, watershed protection and flood control. Funds for disaster relief, for the food programs, for energy research, for education, for housing, for sewer and water systems, for river and harbor development and other public works projects for forestry, for hospitals and health programs, for welfare, for medicaid and medicare are all provided to serve our people.

I have the privilege of serving on all conferences on appropriation bills, where we save billions of dollars annually, but in order to get the settlement we have to compromise—we have to "sign the papers" and defend the settlement. Other Members, without this responsibility or opportunity, can just vote "no" and build up a record, but one rather slim in accomplishments.

A RICH LAND AND PEOPLE

Mr. Speaker, it is fitting today that we consider this conference report for we have a rich land and people and a free and productive Nation. Yes, we have many problems. We have dedicated our energies to solving them. But let us not forget how far we have come, nor how much more progress we can make together.

During the Depression, which we must not let happen again, we had the Reconstruction Finance Corporation, a Government corporation which enabled companies, corporations—including hundreds of failed banks—drainage districts and other political entities to refinance their obligations. In fact, I handled the refinancing of bonds for several drainage districts. This Corporation did much to snap us out of 10 years of depression. Such an approach would be good today for it would enable us to have folks better trained in dealing with business and financial obligations, such as notes and collateral.

The greatest difference between the problems of our forefathers and those we face today is that these are our problems. Problems too often we ourselves have created must be faced squarely and overcome. The roots of many of our so-called problems are really a blessing in disguise. Each one of us is living better and longer. We are living 22 years longer than our parents did at the turn of the century. This improvement in health means we have a responsibility to care for our aged, that we must often provide services to our fellow man longer. Although our population is growing and we are living longer, we are a rich nation.

If each of you will look out the window, no matter what your age, and remember what you first saw and compare it with what you see today—roads, highways, and streets, factories, our buildings, our schools, our farms, our trees, our forests, everything you will see is so far above what you first remember and in some cases thousands of times better.

We see fertile lands that are no longer subject to erosion and which feed and clothe us so we do not have to farm for ourselves. All around us we see evidence of God's bounty and the fruits of our labors. No country has ever had it so good in a material way, and I don't want to lose it. Let us keep in mind that we do have a nation rich in real wealth—physical resources, human talent, character, and ingenuity. With the support of our people, we have restored the fertility of our land, replanted our trees, and developed our highways, factories, rivers and harbors.

Mr. Speaker, the point I am making is let us look to see where the problem really is, and let us do not overdraw on the real wealth of the country, its soil, its water, its trees, and other basic resources. That is where you are going to have trouble. One thing we in Congress have done during the past 28 years is override the President who wanted to quit helping to preserve the "temple"—the soil and the physical resources—for future generations.

I am as proud as I can be for having helped provide area coverage for rural electricity. The REA electric and telephone coverage programs have not cost us a whole lot. But we have coverage all over the country now. Our progress in rural areas to achieve better housing, hard-surfaced roads, water and sewer facilities, and rural telephones has never been surpassed.

As we intensify our fight against such problems as inflation and energy, we must be certain not to give up that which we have gained. Let us remember not only what we have achieved but how we got there.

DEFENSE SPENDING

This bill provides the first phase of increased appropriations for the Department of Defense under the President's plan. It is, in a very real sense, a down payment on the fiscal year 1982 bill.

Over the past few weeks we have heard a lot of debate on the need for increased military preparedness, for a stronger, and more flexible defense. As chairman of the Appropriations Committee I want to assure all my colleagues that your committee will review defense requirements and provide appropriations when required. The committee, however, must question the effectiveness of adding huge sums of money to any area of the budget, including defense, in a relatively short period of time without detailed justification. The committee has the responsibility to undertake to determine whether or not a dollar in value is received for a dollar expended. The committee will continue to raise valid questions of whether or not the Pentagon and the Nation's industrial capacity can effectively absorb such enormous increases.

Unfortunately many of the reductions made by this bill in domestic programs will not achieve the desired goal of reducing inflation, since this same bill includes increases in spending of over $11.6 billion for the Pentagon. This is at a time when we have unobligated balances of $142.8 billion and unexpended balances of $187.5 billion as of March 31, 1981.

During the next 2 years defense spending is scheduled to increase by $80 billion. It is my hope that the Congress will demand justification of these increases and that no funds will be drawn from the Treasury until the Appropriations Subcommittee has been satisfied that these funds will be used for the purpose intended. Any time spending is increased for any program by tens of billions of dollars in such a short period of time, the opportunity for waste and abuse exists. It is this committee's responsibility to insure that we get military strength from taxpayers' dollars.

Thank you, Mr. Speaker.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I take the well of the House to speak to my colleagues in support of the conference report on H.R. 3512, the supplemental and rescission bill for fiscal 1981.

This conference agreement is our first step into the real world of appropriations and revenue legislation where the President's program of economic recovery will succeed or fail.

Your conferees have brought you an agreement that deserves your strong support.

The conference agreement contains appropriations of $20.9 billion, and rescissions of $14.3 billion, for a net total of $6.6 billion in new budget authority.

In addition to the appropriations and rescissions, we initiated deferrals totaling $1.2 billion, and disapproved deferrals of $367 million. There were 432 Senate amendments in conference, and these amendments included over 800 individual items that were negotiated with the Senate.

We completed the formal conference in about 10 hours, which is a remarkable accomplishment, and a tribute to the leadership of my chairman, and of all the subcommittee chairmen and ranking minority members who were conferees.

The conference agreement is $1.7 billion under the President's budget estimates for new budget authority, and is $161 million under the House

bill, and $46 million under the Senate bill.

The conference agreement is also within the ceilings in the budget resolution for fiscal 1981 by $2.3 billion in budget authority, and $300 million in outlays.

And of course the conference agreement extends the continuing resolution from June 5 to September 30, continuing appropriations for four appropriation bills: foreign operations, legislative, Treasury—Postal Service, and Labor, Health, Human Services and Education.

I will review some of the more important individual items in a moment, but I want to emphasize again that this is a historic piece of legislation. It is filled with rescissions and other reductions that go far beyond recent experience, and is hopefully our first step, with the President, down the road of budget control and economic recovery.

I also call the attention of my colleagues to an administrative provision in the Interior chapter of the House bill that provided that: "None of the funds deferred under this chapter may be proposed for rescission or subsequent deferral."

The Senate struck the provision, and the conferees accepted the Senate action.

In my opinion, this provision raised serious constitutional questions. The President has wide authority under section 3 of article II of the Constitution to communicate to the Congress. That section provides that—

He shall from time to time give to the Congress Information of the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient. * * *

The Annotated Constitution of the United States comments on this clause that—

Today there is no subject on which the President may not appropriately communicate to the Congress, in as precise terms as he chooses, his conception of its duty.

While I assume that the House language was intended to prevent abuses under the Impoundment Control Act, the language was not limited to that act, and is in direct conflict with the President's Authority under the Constitution to communicate to the Congress.

With over 400 amendments, and over 800 individual items, we could not please everyone. Some will not like the defense spending, some will not like the foreign assistance, some will not like the cuts and rescissions in health and education, and of course we had our usual share of limitations on quotas, abortion, and the like.

But as a whole, and as the first major component of the President's program of economic recovery, this is an outstanding conference agreement, and deserves your support.

I will now review for the benefit of the House some of the specific recommendations of your conferees.

Total net new budget authority provided in the conference report for the Departments of Commerce, Justice, and State and for the judiciary and related agencies for program and pay items is a minus $109 million, which is $49 million over the House bill, $7 million below the Senate bill, and $69 million over budget estimates. For program items alone, the total is a minus $280 million, which is $46 million over the House bill, $3 million below the Senate bill, and $89 million over budget estimates.

For the Economic Development Administration, the conferees agreed to the list of projects included in the House report as long as those projects meet all legal requirements. Planning grants for all applicants would run only through December 31, 1981, pending further congressional action regarding the future of EDA. Regional development programs were not funded in either bill, and were not subject to conference action.

For the Small Business Administration, the conferees agreed that $8.5 million shall be used for small business development centers, and that $73 million in business loan funds shall be deferred.

The conferees also agreed to defer $7 million in coastal energy impact funds and to transfer the remaining $33 million in CEIP funds to the coastal zone management program for a 2-year phaseout of the latter program.

For other items, the conferees agreed to a rescission of $6 million for public telecommunications facilities, compared to a House rescission of $13 million and a Senate rescission of $4 million, and agreed to defer $37 million of the $92 million proposed for deferral for ship construction subsidies.

In the Defense chapter, the conference arrived at an agreement almost $1.2 billion below the Senate figure and $900 million over the House version.

Even so, the chapter is $715 million below the request.

The major change from the House is in the personnel, operations and maintenance, and shipbuilding accounts where we provided about $600 million in additional funding in anticipation of higher than projected inflation.

Other upward adjustments were made for mileage allowances, utilities costs, aviation officer bonuses, training, antitank weapons, helicopters, and truck procurement.

We took out all funds for any item associated with the MX missile system, even though a basing decision is expected next month.

Funds are in the bill to begin work on the battleship *New Jersey* although we instruct the Navy to hold to the projected cost of $329 million for this program or refrain from using the $89 million in this bill to begin the project.

The binary weapons issue was not in conference, but we have agreed to language instructing DOD to provide a full blown cost analysis of the modernization program and remarks by our allies on the entire program, as well as an overview of requirements.

We have provided funding to meet the needs of the pay raise granted last October and will address future pay raises in the fiscal year 1982 bill.

The conference agreement on the energy and water development chapter represents a compromise which I believe every Member in this Chamber can support.

This chapter provided for supplemental appropriations in the amount of $156 million, the same amount as in the House and Senate bills. There are some $253.9 million in rescissions of fiscal year 1981 funds, which is $45.8 million more than the House-passed version, and $222.3 million less than the Senate's position. The conferees compromised on a figure of $214.4 million for deferrals. This represents a figure $38.1 million below the House bill and $144.5 million above the Senate's level.

As regards renewable energy funding, the conference agreement provides for $63 million in rescissions for the solar, geothermal, and hydropower account. This compares to the Senate's position of $126 million in rescissions. In addition, there is agreed upon an amount of $59.7 million in deferrals for the programs funded under this account. The hydropower feasibility studies loan program has rescinded $14 million and a deferral of $5.9 million in its $24.7 million fiscal year 1981 funding.

In the area of synthetic fuels, a coal gasification demonstration project funded through the Tennessee Valley Authority has funds in the amount of $85.5 million rescinded and $42 million deferred until fiscal year 1982. The Senate bill had provided for a rescission of $177.5 million and a deferral of $15.8 million of the $287.6 million appropriated for this fiscal year.

Total net new budget authority provided in the conference report for foreign assistance programs and pay items is $476 million, which is $49 million below the House bill, $93 million over the Senate bill, and $78 million below budget estimates. For program items alone, the total is $465 million, which is $49 million below the House bill, $93 million over the Senate bill, and $78 million below budget estimates.

The conferees agreed to $500 million for the sixth replenishment of the International Development Association (IDA VI), compared to $535 million in the House bill and $408 in the Senate

bill. These funds will only be made available when authorized.

For the Export-Import Bank, a split was agreed upon wherein direct loans would be limited to $5,461,000,000, which is $63 million below the House bill and $63 million over the Senate bill. Both bills contained $8,059,000,000 for guaranteed loans.

For other items, the conferees agreed to provide $14 million in Egyptian pounds for the American University in Cairo, as proposed by the Senate, and $500,000 for initial U.S. participation in the African Development Foundation, as proposed by the House. Report language is included to prohibit further aid to Syria.

Mr. Speaker, I support the conference action to provide $500 million for the first U.S. contribution to IDA VI. The time has come for us to stop beating around the bush on the question of U.S. support for international assistance activities, particularly the International Development Association (IDA). For more than 20 years, I have spoken out in favor of this program—and I have heard all the arguments against our participation in IDA VI.

WHY IDA IS IMPORTANT TO OUR NATIONAL CREDIBILITY

This IDA replenishment totaling $12 billion has been carefully worked out in consultation with 33 donor nations over an 18-month period. President Reagan has given his word that the United States will support its pledge of $3.2 billion. The U.S. percentage share of IDA VI—27 percent—is the lowest of any IDA agreement in history. If we fail to appropriate our share of IDA and renege on this agreement, our credibility will be damaged and our ability to get cooperation from our allies on matters like defense spending will be seriously jeopardized. Let me tell my colleagues that the rest of the world is watching this. The President will be going to the Ottawa Summit in July and to Mexico in October to talk with the major developed and less developed nations about economic cooperation. Are we going to support the President by giving him the funding necessary to keep IDA alive or are we going to let him venture forth to these major summit meetings empty-handed and embarrassed?

IDA AND OUR FOREIGN POLICY

We cannot, in my view, have a coherent, balanced, and effective foreign policy without a foreign assistance program. And we cannot achieve all of our foreign policy objectives in the Third World on a bilateral basis alone. That is why we participate in the World Bank and its affiliates like IDA.

IDA serves important U.S. strategic and political interests. It plays an important role in stimulating market-oriented private sector growth in the LDC's. It specifically helps countries of major importance to the United States such as Egypt, Bangladesh, Pakistan, Sudan, and Kenya—countries that are either close allies or key buffers to Soviet backed expansionism.

We cannot achieve long-term political and economic stability in the developing world without these programs.

URGENCY OF APPROVING IDA

Failure to approve the U.S. contribution to IDA would mean a cutoff of $10 billion in loans to increase food production and improve health, sanitation, and education in countries at the bottom of the income ladder. The largest source of external funding for food production in Africa and South Asia would be terminated.

IDA is not welfare; it helps nations help themselves and develop Western-oriented economics. All IDA projects must meet the same strict economic and financial standards required for other World Bank lending.

At this moment, IDA funds from past replenishments are exhausted. No further commitments can be made by IDA until the United States subscribes to the replenishment.

BENEFITS FROM IDA

U.S. contributions to IDA support President Reagan's call for budget austerity. Why? Because every dollar we contribute to IDA is matched three or more times by other donors on a cost-sharing basis. Our first year contribution was reduced 50 percent from the Carter amount of $1.080 billion to $540 million, a level our allies expect us to support. The Senate's figure of $408 million would have created a serious credibility problem with our allies.

Every dollar we pay to IDA and other MDB's generates about $3 in trade for U.S. companies. For example, companies in New York received $7.8 million in procurement of goods and services through IDA financed projects last year. In my State, 15 companies got more than $100,000 in procurement from World Bank/IDA projects in 1979.

Let me conclude by saying the President supports this program. I urge my colleagues to do likewise. One final word: President Reagan has said the United States will support the existing IDA VI agreement. But he has also said that the United States will conduct a serious, thorough review of U.S. participation in the MDB's before making any future commitments. I support that review, but in the meantime, we should honor our existing commitment to this international body.

For chapter VI, Department of Housing and Urban Development and Independent Agencies, the conference agreement provides $1.8 billion in supplementals and $7.5 billion in rescissions. This is $265 million more in supplementals than was contained in the House-passed bill due mainly to an additional $250 million VA readjustment benefits supplemental that was not transmitted to the Congress until the House had already passed H.R. 3512. The conference agreement contains $34 million more in rescissions than the administration requested.

Regarding specific programs, the conference agreement provides:

For the continuation of the National Consumer Cooperative Bank but rescinds all funds for the Solar Energy and Energy Conservation Bank;

Defers $300 million in public housing modernization funds which were proposed for rescission by the administration and the Senate;

Restores $19 million for work study and areawide planning activities of the HUD "701" program;

Adopts a more equitable formula for the distribution of the $1.7 billion rescission of EPA construction grants moneys than was provided in the Senate bill;

Restores funding to the VA medical care account;

Allows NASA to reprogram $52 million into Shuttle activities and restores $8 million to NASA's research and development budget including $3 million for SEPS (solar electric propulsion system); $2 million for technology utilization and $3 million for the International Solar Polar Mission with instructions that NASA and the National Academy of Sciences are to study U.S. options with respect to ISPM and report back to the Congress by September regarding this matter; and

Restores $20 million to the National Science Foundation's research and related activities account, which is $8 million more than the House had provided, and leaves the distribution of these moneys to the discretion of the agency. The conference agreement also restores $6 million, which the House had recommended, to NSF's science education program.

For chapter VII, Interior and related agencies, the conference agreement provides program supplementals totaling $1.6 billion, pay supplementals of $147 million, rescissions of $2.2 billion, and deferrals of $361 million. The conference agreement brings the Interior chapter of this bill in nearly $1 billion below the administration estimates.

Conference agreements that may be of particular interest include:

Restoration of the $108 million proposed for rescission by the House in the payments-in-lieu-of taxes program (PILT);

Restoration of $16 million to the urban parks program;

A rescission of only $90 million in land and water conservation funds moneys compared to the $150 million rescission included in the Senate bill. Of the $90 million rescission, $55 million would be for the State share;

Restoration of $1.5 million out of the $8 million proposed for rescission by the administration and the Senate

in the historic preservation fund. This $1.5 million is to be allocated to those States which had not received their survey and planning funds;

Restoration of $12,357,000 for the Institute of Museum Services as the House had recommended;

A compromise of a $34 million rescission in the Youth Conservation Corps rather than the $30 million proposed by the House and $38 million proposed by the Senate. Of the remaining $26 million, $4 million is to be allocated to the Department of the Interior and $4 million to the Department of Agriculture with the remaining $18 million to be apportioned among the States;

With regard to the alternate fuels program and the Strategic Petroleum Reserve, the conferees agreed to rescind the $875 million remaining in the Solar and Energy Conservation Reserve rather than transferring that money to the Strategic Petroleum Reserve as part of the $1.3 billion supplemental for SPRO. The $1.3 billion supplemental for SPRO will be provided with new budget authority; however, the conference agreement does not provide the $883 million advance appropriation for SPRO which the House had recommended.

The conference agreement also rescinds the $30 million loan guarantee reserve for biomass energy projects provided by the House as well as the $23 million loan guarantee reserve for urban waste energy projects; and

Under energy conservation, the conference agreement provides for a rescission of $153 million and deferrals of $68 million. This action restores $81 million proposed for rescission by the Senate including $2 million for the urban consortium, $3 million for gas turbine engine development, $3.1 million for the Stirling engine, $68.7 million for the schools and hospitals program, and $4.6 million for biomass energy studies. This action also defers rather than rescinds as proposed by the Senate $64 million including $6.7 million for building systems, $5.15 million for residential/commercial retrofit, $2.2 million for RCS, $3.2 million for community systems, $7.6 million for technology and consumer products, $2.3 million for appliance standards, $28.4 million for industrial energy conservation, $4.4 million for gas turbine energy development, $1.7 million for Stirling engine, and $2.3 million for vehicle systems.

In the Labor, Health and Human Services and Education chapter of the bill the conferees agreed on rescissions totaling $1 billion, $856.4 million compared with President's original request for rescissions totaling nearly $2.9 billion. Comparing the conference agreement with the House and Senate positions shows that the conference total for rescissions is $283 million higher than the House and $320 million below the Senate recommended level. In total it represents 64 percent of the administration's requested rescissions.

The conferees also agreed on $547.4 million in supplemental appropriations as compared with the President's original request for $918.5 million in supplemental funds.

When we began the conference there were 126 items in disagreement just in this chapter of the bill. Without the skilled leadership of BILL NATCHER we might never have resolved all of the differences we faced—but we did and the gentleman from Kentucky should be proud of his efforts.

There were a lot of tough compromises in this bill and they were not taken lightly by the conferees. Funding for the National Institutes of Health, for instance, was carefully decided Institute by Institute for a total rescission totaling $43 million. Alcohol and drug treatment formula grants funding was split between the House and Senate positions as were other vital health programs including public health and health administration and health planning.

In education the conferees agreed on a 12-percent reduction in elementary and secondary education—restoring $520 million to the cuts proposed by the President and settling on a position between the House and Senate figures.

In libraries and learning resources there was a reduction of $12 million—or 7 percent of the fiscal 1981 appropriation.

Education for the handicapped which was funded at $1 billion, $86 million for fiscal 1981 faces a rescission of $76.8 million—or 7 percent.

Similarly, vocational education includes a rescission of 12.5 percent or $98.4 million.

Certainly one of the toughest items to resolve in this entire chapter was the supplemental request for Pell grants under student financial aid. The President had requested a supplemental of $661 million to continue funding the Pell grant program through the fiscal year with a maximum grant of $1,750 and an average grant of $1,434. The House had gone along with this supplemental, yet the Senate position had been to provide a supplemental of only $391 million while making up the difference by reducing each award by $100.

In conference we settled, after considerable debate and compromise back and forth, on a supplemental of $445 million with each award being decreased by $80.

There is an item in the education portion of this chapter, Senate amendment No. 274, concerning the higher education facilities loan and insurance fund. The Senate receded to the House on this amendment thus restoring the House language that disapproves deferral D-81-82.

The conference report includes the following statement on this item:

> The Senate recedes to the House position on deferral D-81-82. The conferees instruct the Secretary of Education to release the funds to Boston College and Georgetown University in accordance with the report language in House Report No. 97-29.

This specific language was included as a result of a statement by Secretary Bell in a letter to Chairman WHITTEN and all the conferees on H.R. 3512 which stated in part:

> However, I want to make clear that, if the House recommendation to make new loan obligations is adopted by the conferees, the conference report must specify the names of the two institutions which should receive the loans if it is the intent of Congress to fund those institutions in particular.

Thus the names of the two institutions are specifically named in the conference report as requested by the Secretary of Education. Further it should be perfectly clear from the legislative history of this matter that of the $25 million in loans, $15 million is to go to Boston College and $10 million is to go to Georgetown University.

Total net new budget authority provided in the conference report for the legislative branch for program and pay items is $34 million, which is $34 million below the House bill, $1 million over the Senate bill, and $87 million below budget estimates. For program items alone, the total is a minus $15 million, which is $48 million below the House bill, $1 million over the Senate bill, and $76 million below budget estimates.

The conferees agreed to add Senate housekeeping items, including a rescission of $46 million in unobligated Senate funds appropriated in fiscal years 1977, 1978, and 1979. The conferees also accepted a Senate amendment limiting all Senate items other than pay to 90 percent of fiscal year 1980 levels.

In the military construction chapter, we came out of conference almost as we went in. The report before you is only $5.8 million over the House version and $5 million below the Senate.

The changes to the House provide additional planning funds for rapid deployment facilities and two projects added by the Senate.

In summary, including pay raises, the conferees are recommending a Defense supplemental of $11.6 billion, about $740 million less than was requested, and a military construction supplemental of $227.3 million, about $107 million under the request.

Both chapters represent an effort to meet the needs of defense and the conference agreement does just that.

The transportation chapter represents a fair and equitable compromise on the part of both Houses of Congress. The agreement regarding the supplemental appropriations funding is in the amount of $612 million. This

figure is merely $6.9 million less than the House-passed version of the bill and $57 million more than the Senate bill. As regards rescissions, the amount agreed upon of $33.2 million is $36 million less than the House bill and $28 less than the Senate bill. Deferrals of fiscal year 1981 funding until next fiscal year are in the amount of $60 million as compared to $166.5 million in the House version and $55 million in the Senate version.

The Coast Guard, which has been hard pressed to meet the latest commitments prescribed by the Congress, is the recipient of $128.6 million in supplemental appropriations, principally for operating expenses.

The Conrail work force reduction program has a supplemental appropriation of $10 million in addition to a $5 million transfer, for a total of $15 million. This provision should offer the necessary assistance in order to reduce the costly labor force currently available to Conrail.

The quasi-governmental entity, Amtrak, has transferred to it for its use some $15.3 million. Hopefully, this additional money will assist our national passenger railroad in its attempt to become a viable means of transportation.

The urban discretionary grants program administered by the Urban Mass Transit Administration will have deferred $220 million of its $2.190 billion fiscal year 1981 funds. It has been the impression of many witnesses that these deferrals are very important to the success of the President's economic recovery program.

Mr. BOLAND. Mr. Speaker, chapter VI of the conference report on the supplemental appropriations and rescission bill deals with some very difficult issues. I am happy to report that we were able to reach an agreement with the Senate on all these issues.

The conference agreement for the HUD-Independent Agencies Subcommittee totals $2,069,081,000 in supplemental appropriations and $7,475,189,747 in rescissions.

The supplemental appropriations total $133,019,000 more than requested, $265,331,000 above the House-passed bill and $2,175,000 above the Senate-passed bill. The increase above the House passed bill largely reflects the $250,000,000 added by the Senate for Veterans' Administration readjustment benefits. That request was submitted after the House considered the bill.

The rescissions total $33,989,716 more than requested, $16,021,000 above the House-passed bill and $137,603,575 below the Senate-passed bill.

Now let me touch on the major items that we worked out in conference.

COMPREHENSIVE PLANNING GRANTS

Under the Department of Housing and Urban Development, the comprehensive planning grants program—popularly known as section 701—was a major issue before us. The administration proposed rescinding the full balance available for the program and in effect terminating it. The House supported that rescission with the exception of preserving $2,000,000 for the work study program that is targeted at helping young minority and disadvantaged planners. The Senate, however, restored the $34,975,709 proposed for rescission. We reached a compromise providing $19,000,000 and directing that HUD make available these funds for metropolitan and nonmetropolitan areawide organizations.

Within that $19,000,000, $2,000,000 continues to be reserved for the work study program.

Mr. Speaker, I took the position that if ever there was a program that could be ended at this time—this was the program. We did, however, yield to the Senate on a compromise figure. But I want to make clear, and the conference report makes clear that we will not approve any additional funding for the section 701 comprehensive planning program in 1982. The funds provided here give the areawide planning organizations an opportunity to transition to other funding sources—including, for example, funding available to localities through the community development block grant program.

HOUSING COUNSELING ASSISTANCE

Mr. Speaker, the administration also proposed rescinding $6,000,000 of the $10,000,000 appropriated in 1981 for housing counseling assistance. The conference committee split the difference in this rescission and has provided $3,000,000 or a total of $7,000,000 in 1981 for this activity. I want to make clear that it is our intention that those funds should be used for comprehensive counseling, including prepurchase and renter counseling.

EPA CONSTRUCTION GRANTS

The next big issue that faced the conferees is one that was not easy to resolve to everyone's satisfaction.

But we did the best job that we could and I believe that we have brought back a reasonable compromise for the waste water treatment construction grants program of the Environmental Protection Agency.

Let me provide you with just a little background. The administration requested a rescission of $1,700,000,000 in construction grants funds.

Both the House and the Senate versions of the bill rescinded the $1,700,000,000. The House agreed with the administration's proposal—but the Senate revised the distribution of the rescission. The principal difference in that revision is that the Senate retained the $114,351,000 of funds available from the Public Works Employment Appropriation act of 1977. These funds are popularly known as Talmadge-Nunn. The House felt strongly that of all the funds proposed for rescission—the Talmadge-Nunn funds should have been rescinded. Why? Because the purpose of the 1977 public works appropriation bill was to stimulate the economy and to provide additional jobs. But here is the shocking fact. As of December 31, 1980, the total Talmadge-Nunn obligations were $249,000,000 of the $480,000,000 made available in 1977. That represents only slightly over half of the entire appropriation—and it is clear that these funds did nothing to stimulate jobs as part of that economic package.

So it was our feeling that of the entire $1,700,000,000 proposed for rescission, the Talmadge-Nunn moneys had the weakest argument for not being rescinded.

Not unexpectedly, the Senate took exactly the opposite position. The Senate was interested in protecting those States that have large unobligated balances of Talmadge-Nunn funds. For example, West Virginia has not obligated $1 of the $34.2 million that have been made available under Talmadge-Nunn. In fact, as of last December the same was true of Louisiana, Colorado, Montana, and a number of other States which has used none or very little of their Talmadge-Nunn funds. So what the Senate did was restore the rescission of $114,351,000 for Talmadge-Nunn and take away that amount of funding—on a proportional basis—from a number of other States.

Under that arrangement the biggest loser was New York, which would have lost an additional $47,000,000 on top of the nearly $175,000,000 it was giving up under the House proposal.

Other States—particularly in the Midwest and in New England—would have lost considerable amounts of money compared to the House rescission. Massachusetts, for example, would have lost an additional $13,000,000 under the Senate proposal; New Jersey would have lost nearly $16,000,000 more.

So the problem was to try and work out some kind of compromise—and it was a very difficult issue to find any ground for compromise. But I think we were successful. What we ended up doing was agreeing to rescind $64,000,000 of the Talmadge-Nunn funds—and using those moneys to help restore some of the major cuts in the States that would have been most impacted by the Senate version of the bill.

Under the compromise, for example, New York loses $21,000,000 less than it would have under the Senate version of the bill. It is true, and I do not want to misrepresent anything here, that it does lose about $26,000,000 more than

it would under the House version. The essence of compromise is that not everyone gets what he is looking for—and that is exactly what has happened here. But we felt we had to reach some compromise and I think on the whole we have come up with something here that is as equitable as possible to all States.

At this point in the RECORD I will include a table that displays the effect of the EPA construction grants rescission based on the original House language—the Senate language and the conference language which we are asking you to approve today:

EFFECT OF EPA CONSTRUCTION GRANTS RESCISSION

	House	Senate	Conference
Total	−$1,700,000,000	−$1,700,000,000	−$1,700,000,000
Alabama	−21,486,328	−20,357,730	−21,068,948
Alaska	−12,081,644	−8,382,191	−8,649,018

NATIONAL CONSUMER COOPERATIVE BANK

Now, Mr. Speaker, I want to turn to another issue of importance that was a difficult problem for the conferees. And—again I am happy to report that we did reach an agreement. I am referring to the National Consumer Cooperative Bank. The bank was established through legislation in 1978 to provide credit and technical assistance to cooperatives. While cooperatives have a proven record of minimizing the impact of inflation and recession, consumer cooperatives and certain producer cooperatives have been denied access to credit by lending institutions.

To date the Congress has appropriated $175,000,000 for loans by the bank. The administration proposed rescinding $90,000,000 of the bank and self-help funds—thus effectively terminating the bank.

The House bill rescinded only $17,000,000 in self-help development funds while not agreeing to rescind any of the $60,000,000 proposed for rescission for the hard loan window of the bank.

The Senate bill rescinded the full $90,000,000 as requested. The conferees have agreed with the House position. This action will allow the bank to go private—in other words the bank will be able to continue on its own without additional Federal funding.

In fact, I believe that it is possible, and we hope it is possible, that administrative expenses of the bank can be met from its own funds after fiscal year 1981.

There were a number of Senators who felt strongly that all bank funds should be rescinded but the House prevailed on this position.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The National Aeronautics and Space Administration agreement concerns both a rescission and a reprograming. The conferees agreed to rescind $4,500,000 as proposed by the House instead of $37,900,000 as proposed by the Senate. The conferees also agreed that NASA could reprogram $52,000,000 of the $60,000,000 proposed to the Space Shuttle program. I should point out that the conference report, House Report No. 97-124, contains a printing error regarding the use of the remaining $8,000,000. The other $8,000,000 is to remain available as follows:

International solar polar mission	$3,000,000
Solar electric propulsion system	3,000,000
Technology utilization	2,000,000

VETERANS' ADMINISTRATION

Finally, Mr. Speaker, I want to address one other major issue that the conferees struggled with in this bill under the HUD-independent agencies chapter. That issue is the question of allocating sufficient personnel—both permanent full time and part time—to Veterans' Administration hospitals throughout the country. Section 5010(a)(4) of title 38 of the United States Code requires that the Director of the Office of Management and Budget permit the VA to employ for the appropriation accounts medical care, medical and prosthetic research and medical administration and miscellaneous operating expenses not less than the number of employees for the employment for which appropriations have been made. During the past 2 years that law has not been fully implemented by either the Carter or Reagan administrations. When it was partially implemented—and the appropriate level of full-time equivalent employees was made available to the various hospitals—too often other ceilings were imposed that limited the discretion of hospital directors to hire the people needed to get the job done.

For example, the 1981 ceiling on full-time permanent employees is so low that hospital directors are forced to limit the number of full-time permanent employees hired. This restriction does not contribute to the efficient allocation of resources. Arbitrarily requiring that other than full-time permanent employees—temporaries—be hired does not save money and does not promote good management. The decision to hire a full-time permanent of part-time or temporary employee should be made by each hospital director to fit local circumstances.

What we were aiming for in the action taken in the House version of this supplemental appropriation bill was to try and convince the Office of Management and Budget that the full-time employee equivalent (FTEE) ceiling that is set in the appropriation bill each year should be the governing control.

OMB was reluctant to do that and in some ways I can understand its reluctance. But the gentleman from Mississippi (Mr. MONTGOMERY) and I had a conversation on Tuesday with the Director of the Office of Management and Budget and he has agreed to lift the full-time permanent ceiling for the balance of 1981 and through fiscal year 1982. We feel that this approach will be very beneficial to the VA health care system.

At the same time—I want to put the Veterans' Administration and each of the hospital directors on notice that we will be monitoring how they make use of this increased flexibility, I think we can count on them—as good managers—to properly administer a single ceiling on full-time equivalent in an equitable fashion.

Mr. Speaker, the conferees reached agreement on this item. I think it is a good compromise—and I want to express my thanks to Dave Stockman for

the consideration he has shown to give this approach a chance to work.

● Mr. SMITH of Iowa. Mr. Speaker, the portion of the conference agreement on H.R. 3512, the supplemental and rescission bill for fiscal year 1981, for the Departments of Commerce, Justice, and State, the judiciary, and related agencies provides a net decrease in budget authority of −$108,877,000. This figure is comprised of $70,006,000 in program supplementals, $171,064,000 in pay supplementals, and −$350,947,000 in rescissions.

The conference agreement for these departments and agencies would provide for a net decrease in budget authority which is $68,753,000 less than the administration's request, $49,314,000 less than the House bill and $6,868,000 more than the Senate bill. The large increase over the House bill is due primarily to the fact that the conference agreement provides for a transfer of $33,000,000 from the Coastal Energy Impact Fund to the coastal zone management program instead of rescinding that amount as proposed by the House.

Mr. Speaker, the conference agreement with respect to EDA would rescind $187,850,000 of the $342,350,000 proposed for rescission. A total of $154,500,000 would remain available, of which $14,500,000 is for substate planning grants and $140,000,000 is for projects for which EDA made a moral commitment to fund. The list of these projects is printed in House Report 97-29, and under the conference agreement EDA must give first priority to the projects on that list.

I should also add, Mr. Speaker, that the conference agreement disapproves $73,400,000 of a $113,400,000 deferral, proposed for the Small Business Development Administration's business loan and investment fund. This action will provide for a business loan guarantee program of $4.5 billion, which was the level originally approved for fiscal year 1981. This action will also provide for a direct business loan program totaling $367,500,000 for fiscal year 1981 instead of $304 million as proposed by the administration.●

□ 1030

Mr. WHITTEN. Mr. Speaker, I have no further requests for time on this side.

Mr. CONTE. Mr. Speaker, I have no futher requests for time.

The SPEAKER pro tempore. All time having expired, without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13: Page 5, lines 23 and 24, strike out "may be withheld from obligation until October 1, 1981" and insert "are rescinded".

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Senate amendments in disagreement be designated by number, considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 13 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 15: Page 6, strike out lines 17 to 23, inclusive, and insert:

CHILD NUTRITION PROGRAMS

For an additional amount for "Child nutrition programs", $109,875,000.

FOOD STAMP PROGRAM

For an additional amount for the "Food stamp program", $1,742,600,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation: *Provided further*, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: *Provided further*, That of the amounts provided herein, $538,000,000 shall be withheld from obligation until the Secretary of Agriculture certifies to the Congress that the Department of Agriculture has utilized all regulatory and administrative methods available under law to curtail fraud, waste, error, and abuse in the program: *Provided further*, That the funds provided herein shall remain available until September 30, 1981.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

CHILD NUTRITION PROGRAMS

For an additional amount for "Child nutrition programs", $109,875,000: *Provided*, That this appropriation shall be available only to the extent an official supplemental request is transmitted to the Congress.

FOOD STAMP PROGRAM

For an additional amount for the "Food stamp program", $1,740,724,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation, but pending the enactment into law of such legislation, funds received from the sale of surplus agricultural commodities shall be available to the extent and in the manner provided in this paragraph: *Provided further*, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: *Provided further*, That of the amounts provided herein, $536,124,000 shall be available upon certification by the Secretary of Agriculture that the Department of Agriculture is using all regulatory and administrative methods available under law to curtail fraud, waste, error, and abuse in the program: *Provided further*, That this appropriation shall be available only to the extent an official amended supplemental request is transmitted to the Congress: *Provided further*, That the funds provided herein shall remain available until September 30, 1981.

Mr. WHITTEN (during the reading). I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that Senate amendments numbered 25, 33, 37, 40, 100, 101, 103, 115, 131, 157, 159, 164, 190, 191, 192, 193, 194, 195, 198, 222, 223, 226, 228, 237, 245, 246, 253, 255, 259, 261, 262, 264, 266, 273, 277, 278, 280, 282, 290, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 311, 312, 313, 314, 339, 343, 357, 361, 366, 367, 368, 369, 370, 371, 372, and 374, be considered as read, printed in the RECORD, and that they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk designated Senate amendments 25, 33, 37, 40, 100, 101, 103, 115, 131, 157, 159, 164, 190, 191, 192, 193, 194, 195, 198, 222, 223, 226, 228, 237, 245, 246, 253, 255, 259, 261, 262, 264, 266, 273, 277, 278, 280, 282, 290, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 311, 312, 313, 314, 339, 343, 357, 361, 366, 367, 368, 369, 370, 371, 372, and 374, as follows:

Senate amendment No. 25: Page 10, after line 7, insert:

SHIP CONSTRUCTION

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $55,000,000 of the proposed deferral D81-80 relating to the Department of Commerce, Maritime Administration, "Ship construction" as set forth in the message of March 10, 1981, which was transmitted to the Congress by the President. The disapproval shall be effective upon the enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Senate amendment No. 33: Page 12, after line 23, insert:

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves the proposed deferral D81-86 relating to the Department of Justice, Federal Prison System, "Salaries and expenses" as set forth in the message of March 10, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Senate amendment No. 37: Page 15, after line 21, insert:

BANKRUPTCY COURTS, SALARIES AND EXPENSES

(TRANSFER OF FUNDS)

For an additional amount for "Salaries and expenses", $2,000,000, to be derived by transfer from "Space and facilities".

Senate amendment No. 40: Page 17, after line 7, insert:

DEPARTMENT OF THE TREASURY

BUREAU OF GOVERNMENT FINANCIAL OPERATIONS

FISHERMEN'S PROTECTIVE FUND

For payment to the Fishermen's Protective Fund, in accordance with section 5 of the Public Law 92-569 approved October 26, 1972, $8,300,000, to remain available until expended.

Senate amendment No. 100: Page 34, after line 25, insert:

Not to exceed $2,288,000 of the unobligated balances of the Water Resources Council, as of the date of enactment of this Act, shall be reprogramed for grants to the States provided under the authority of title III of the Water Resources Planning Act (42 U.S.C. 1962 et seq.).

Senate amendment No. 101: Page 35, after line 4, insert:

CONTRIBUTION TO THE INTERNATIONAL FINANCE CORPORATION

(RESCISSION)

Of the funds made available for this account by Public Law 96-536, $33,447,900 are rescinded.

Senate amendment No. 103: Page 37, after line 4, insert: American Schools and Hospitals Abroad (Foreign Currency Program): For necessary expenses as authorized by section 612 of the Foreign Assistance Act of 1961, $14,300,000 in foreign currencies which the President determines to be excess to the normal requirements of the United States, which shall be available only for the American University in Cairo, Egypt, to remain available until expended.

Senate amendment No. 115: Page 43, line 15, after "available" insert ": *Provided*, That $501,500 of funds appropriated for Community Development Grants in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, shall be available from the Secretary's Discretionary Fund to fully fund the balance of the grant commitments made for the nine Neighborhood Self-Help Development projects approved after September 30, 1980, and before March 17, 1981".

Senate amendment No. 131: Page 50, after line 3, insert:

MEDICAL CARE

(RESCISSION)

Of the funds appropriated under this head in the Department of Housing and Urban Development-Independent Agencies Appropriations Acts, 1981 and prior years, $25,789,000 are rescinded.

Senate amendment No. 157: Page 56, line 5, after "Service" insert ": *Provided*, That section 14(i) of the National Forest Management Act of 1976 (Public Law 94-588) may be waived at the discretion of the Secretary if he determines that such action will facilitate the salvage of timber damaged by the eruption of Mount Saint Helens".

Senate amendment No. 159: Page 56, line 11, after "rescinded" insert "; and of the funds provided under this head in Public Law 96-126, $875,000,000 for the Solar and Conservation Reserve are rescinded".

Senate amendment No. 164: Page 56, line 22, after "96-514)," insert "$89,400,000 are rescinded and".

Senate amendment No. 190: Page 61, after line 2, insert:

LABOR-MANAGEMENT SERVICES ADMINISTRATION

SALARIES AND EXPENSES

(RESCISSION)

Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended, $570,000 are rescinded.

Senate amendment No. 191: Page 61, after line 3, insert:

SALARIES AND EXPENSES

(RESCISSION)

Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended, $406,000 are rescinded.

Senate amendment No. 192: Page 61, after line 7, insert:

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

(RESCISSION)

Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended $920,000 are rescinded.

Senate amendment No. 193: Page 61, after line 7, insert:

MINE SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

(RESCISSION)

Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended, $660,000 are rescinded.

Senate amendment No. 194: Page 61, after line 7, insert:

BUREAU OF LABOR STATISTICS

SALARIES AND EXPENSES

(RESCISSION)

Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended, $160,000 are rescinded.

Senate amendment No. 195: Page 61, after line 7, insert:

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

(RESCISSION)

Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended, $300,000 are rescinded.

Senate amendment No. 198: Page 61, after line 17, insert: For an additional amount for "Preventive health services", $2,000,000, to remain available until expended: *Provided*, That these funds are to be derived from unobligated balances provided under Public Law 94-266 for National influenza immunization.

Senate amendment No. 222: Page 66, after line 10, insert:

LIMITATION ON ADMINISTRATIVE EXPENSES

The amount available to process workloads not anticipated in the budget estimates and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved, is increased to $80,000,000.

Senate amendment No. 223: Page 66, after line 10, insert:

LOW INCOME ENERGY ASSISTANCE

(RESCISSION)

Of the funds provided for "Low income energy assistance" for fiscal year 1981 in Public Law 96-536, as amended, $500,000 are rescinded.

Senate amendment No. 226: Page 66, after line 15, insert:

CUBAN AND HAITIAN ENTRANTS DOMESTIC ASSISTANCE

For an additional amount for "Cuban and Haitian entrants domestic assistance", $6,000,000, to remain available until September 30, 1982, for education expenses pursuant to section 501(a) of the Refugee Education Assistance Act of 1980: *Provided*, That no funds shall be provided to any school district with fewer than 10,000 eligible students.

Senate amendment No. 228: Page 67, after line 5, insert:

DEPARTMENTAL MANAGEMENT

POLICY RESEARCH

(RESCISSION)

Of the funds provided for "Policy research" for fiscal year 1981 in Public Law 96-536, as amended, $2,500,000 are rescinded.

Senate amendment No. 237: Page 67, line 25, after "States" insert ": *Provided further*, That notwithstanding the provision of sections 404(a)(9) and 523(c), none of the funds appropriated for title IV, part C of the Elementary and Secondary Education Act may be expended for the purposes of title V, part B of such Act: *Provided further*, That any reductions required in title IV, part C and title V, part B, of the Elementary and Secondary Education Act shall be proportionate among the States".

Senate amendment No. 245: Page 69, line 16, after "rescinded" insert ": *Provided*, That notwithstanding other provisions of law, the appropriation for section 112 of the Rehabilitation Act of 1973 shall be $2,800,000".

Senate amendment No. 246: Page 69, line 16, after "rescinded" insert ": *Provided further*, That $650,000 provided under this head in Public Law 96-536, as amended, for carrying out section 130 of the Rehabilitation Act of 1973 shall be made available to the Navajo Tribal Council".

Senate amendment No. 253: Page 70, line 8, after "Act" insert ": *Provided further*, That not to exceed $7,477,000 shall be for carrying out part B, subpart 2 of the Vocational Education Act: *Provided further*, That notwithstanding the provisions of subpart 1, section 103, $2,243,100 shall be made available for the National Occupational Information Coordinating Committee".

Senate amendment No. 255: Page 70, line 8, after "Act" insert ": *Provided further*, That the $3,138,000 remaining for title VIII of the Elementary and Secondary Education Act shall be used for the purpose of carrying out sections 809, 810, and 812 of the Act".

Senate amendment No. 259: Page 70, line 20, after "expenses" insert ": *Provided further,* That with funds appropriated herein and in the 1981 Continuing Resolution, Public Law 96-536, as amended, eligibility for a Pell grant in academic year 1981-82 shall be based on a maximum grant of $1,750, notwithstanding section 411(a)(2)(A)(i)(I) of the Higher Education Act".

Senate amendment No. 261: Page 70, line 20, after "expenses" insert ": *Provided further,* That the cost of attendance used for calculating eligibility for and amount of Pell grants shall be established by the Secretary of Education".

Senate amendment No. 262: Page 70, line 20, after "expenses" insert ": *Provided further,* That notwithstanding any other provisions of law, of the sums appropriated pursuant to section 461(b)(1) of the Higher Education Act of 1965 for purposes of the fiscal year ending September 30, 1981, the Secretary shall apportion to each State an amount that bears the same ratio to the total amount of such sums as the amount received by the State under section 462(a)(1) of the Act in fiscal year 1980 bears to the sum of such amounts for all the States".

Senate amendment No. 264: Page 70, after line 23, insert:

"No amounts provided herein or under Public Law 96-86 or Public Law 96-536 shall be reserved for, or paid to, educational institutions to meet administrative expenses."

Senate amendment No. 266: Page 71, line 5, after "rescinded" insert "of the Higher Education Act are rescinded, and of the amount made available under this head in Public Law 96-536, as amended, for fiscal year 1981, $12,800,000 of the amount provided for title I, part B".

Senate amendment No. 273: Page 71, line 5, after "rescinded" insert": *Provided further,* That $2,200,000 of the amount made available in Public Law 96-536 for title I, part B of the Higher Education Act is available only for section 115(d)".

Senate amendment No. 277: Page 71, line 18, before "part B," insert "part A,".

Senate amendment No. 278: Page 71, line 19, after "Act," insert "title III, section 303(c)(2) of the Comprehensive Employment and Training Act of 1973, as amended, and ".

Senate amendment No. 280: Page 71, line 23, after "1950," insert "and section 422(a) of the General Education Provisions Act,".

Senate amendment No. 282: Page 72, after line 2, insert:

"EDUCATIONAL STATISTICS

"(RESCISSION)

"Of the funds provided in Public Law 96-536, as amended, to carry out section 406 of the General Education Provisions Act, $1,000,000 are rescinded."

Senate amendment No. 290: Page 73, after line 23, insert:

"NATIONAL LABOR RELATIONS BOARD

"SALARIES AND EXPENSES

"(RESCISSION)

"Of the funds provided for "Salaries and expenses" for fiscal year 1981 in Public Law 96-536, as amended, $1,060,000 are rescinded."

Senate Amendment No. 294: Page 75, after line 2, insert:

"SENATE"

Senate amendment No. 295: Page 75, after line 2, insert:

"(RESCISSION)

"Of the funds appropriated under the heading "SENATE" in Acts providing for the Legislative Branch for the fiscal years ending September 30, 1977, September 30, 1978, and September 30, 1979, and which (except for the provisions of this section) would remain available until expended, the remaining balances, but not less than $46,400,000, are rescinded."

Senate amendment No. 296: Page 75, after line 2, insert:

"SALARIES, OFFICERS AND EMPLOYEES

"OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

"For an additional amount for "Offices of the Secretary for the Majority and the Secretary for the Minority", $100,000."

Senate amendment No. 297: Page 75, after line 2, insert:

CONTINGENT EXPENSES OF THE SENATE

"STATIONERY (REVOLVING FUND)

"For an additional amount for 'Stationery (revolving fund)', $2,000."

Senate Amendment No. 298: Page 75, after line 2, insert:

"ADMINISTRATIVE PROVISIONS"

Senate Amendment No. 299: Page 75, after line 2, insert:

"SEC. 101. In order to provide additional capital for the revolving fund established by the last paragraph under the heading 'Contingent expenses of the Senate' appearing under the heading 'SENATE' in chapter XI of the Third Supplemental Appropriation Act, 1957 (2 U.S.C. 46a-1), the Secretary of the Senate is authorized and directed to transfer $100,000 to such revolving fund from 'miscellaneous items' in the contingent fund of the Senate."

Senate Amendment No. 300: Page 75, after line 2, insert:

"SEC. 102. Effective with respect to fiscal years beginning on or after October 1, 1980, the first sentence of section 101 of the Legislative Branch Appropriations Act, 1976 (2 U.S.C. 61a-9a), is amended by striking out '$7,500' and inserting in lieu thereof '$10,000'."

Senate Amendment No. 301: Page 75, after line 2, insert:

"SEC. 103. Section 111 of the Supplemental Appropriations and Rescission Act, 1980 (Public Law 96-304) is amended by striking out 'and to remain available through September 30, 1981' and inserting in lieu thereof 'and to remain available until December 31, 1981'."

Senate amendment No. 302: Page 75, after line 2, insert:

"SEC. 104. Section 112(a) of the Supplemental Appropriations and Rescission Act, 1980 (Public Law 96-304) is amended—

"(1) by inserting '(and the unexpended balance on any subsequent date during the fiscal year ending September 30, 1981)' immediately after 'February 28, 1981', and

"(2) by striking out 'for any fiscal year shall' and inserting in lieu thereof 'or in funds otherwise made available for the same purposes as funds so appropriated for such fiscal year shall during such fiscal year'."

Senate amendment No. 303: Page 75, after line 2, insert:

SEC. 105. The second proviso contained in the Legislative Branch Appropriation Act, 1966 (2 U.S.C. 126b), under the heading "SENATE", "SALARIES, OFFICERS AND EMPLOYEES", "OFFICE OF THE SECRETARY", is amended to read as follows: "The Secretary of the Senate is hereafter authorized to employ, by contract or otherwise, substitute reporters of debates and expert transcribers at daily rates of compensation, or temporary reporters of debates and expert transcribers at annual rates of compensation; no temporary reporters of debates or expert transcribers may be employed under authority of this provision for more than ninety days in any fiscal year; and payments made under authority of this proviso shall be made from the contingent fund of the Senate upon vouchers approved by the Secretary of the Senate."

Senate amendment No. 304: Page 75, after line 2, insert:

"SEC. 106 (a) Effective January 1, 1981, the allowance for administrative and clerical assistance of each Senator from the State of Florida is increased to that allowed Senators from States having a population of nine million but less than ten million, the population of said State having exceeded nine million inhabitants.

"(b) Effective January 1, 1981, the allowance for administrative and clerical assistance of each Senator from the State of Washington is increased to that allowed Senators from States having a population of four million but less than five million, the population of said State having exceeded four million inhabitants.

"(c) Effective January 1, 1981, the allowance for administrative and clerical assistance of each Senator from the States of Oklahoma and South Carolina is increased to that allowed Senators from States having a population of three million but less than four million, the population of said States having exceeded three million inhabitants.

Senate amendment No. 305: Page 75, after line 2, insert:

"SEC. 107. Hereafter, the Secretary of the Senate as Disbursing Officer of the Senate ia authorized to make transfers between appropriations of funds available for disbursement by him for fiscal year 1981, subject to the customary reprogramming procedures of the Committee on Appropriations of the Senate."

Senate amendment No. 306: Page 75, after line 2, insert:

"SEC. 108. Effective with the fiscal year ending September 30, 1981, section 117 of the Second Supplemental Appropriations Act, 1976 (2 U.S.C. 61f-1a), is amended by striking out '$92,000' and inserting in lieu thereof '$167,000'."

Senate amendment No. 307: Page 75, after line 2, insert:

"SEC. 109. Notwithstanding any other provision of this Act (or any provision of law enacted prior to the date of enactment of this Act), the aggregate of the funds (other than funds appropriated under title II of this Act for increased pay costs) appropriated for the fiscal year ending September 30, 1981, for projects or activities for which disbursements are made by the Secretary of the Senate, shall not exceed an amount equal to 90 per centum of the aggregate of the funds (including funds appropriated for increased pay costs) appropriated for the fiscal year ending September 30, 1980, for such projects or activities."

Senate amendment No. 308: Page 75, after line 2, insert:

"SEC. 110. (a) Effective in the case of each fiscal year (commencing with the fiscal year ending September 30, 1981) each Senator, at his election, may transfer from his Administrative, Clerical, and Legislative Assistance Allowance (hereinafter referred to as the 'clerk hire allowance') to such Senator's Official Office Expense Account any balance remaining, or any portion thereof in such clerk hire allowance as of the close of the fiscal year. Any balance so transferred to a

Senator's Official Office Expense Account shall be available only for expenses incurred during the calendar year in which occurred the close of the fiscal year. Each Senator electing to make such a transfer shall advise the Senate Disbursing Office in writing, no later than December 31, and such transfer shall be made on such date (but not earlier than the October 1 which next succeeds the close of the fiscal year with respect to which the balance occurs) as may be specified by the Senator.

"(b) Transfer of funds under subsection (a) shall be made from the appropriation 'Administrative, Clerical, and Legislative Assistance Allowance to Senators' under the heading 'Senate' and 'Salaries, officers, and employees' for transfer to the appropriation 'Miscellaneous items' for allocation to Senatorial Official Office Expense Accounts."

Senate amendment No. 311: Page 76, after line 16, insert:

CAPITOL BUILDINGS

(RESCISSION)

Of the funds appropriated under this head in H.R. 7593, and made available by Public Law 96-536, making continuing appropriations through June 5, 1981, $97,000 are rescinded.

Senate amendment No. 312: Page 76, after line 16, insert:

CAPITOL GROUNDS

(RESCISSION)

Of the funds appropriated under this head in H.R. 7593, and made available by Public Law 96-536, making continuing appropriations through June 5, 1981, $10,000 are rescinded.

Senate amendment No. 313: Page 77, after line 7, insert:

SENATE GARAGE

(RESCISSION)

Of the funds appropriated under this head in H.R. 7593, and made available by Public Law 96-536, making continuing appropriations through June 5, 1981, $102,000 are rescinded.

Senate amendment No. 314: Page 77, line 20, after "rescinded" insert ", together with $70,000 included under this head in H.R. 7593, and made available by Public Law 96-536".

Senate amendment No. 339: Page 85, after line 22, insert:

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of the Conrail Workforce Reduction Program, to remain available until expended, $15,000,000 which shall be transferred to the United States Railway Association in accordance with section 405(b)(1) of Public Law 96-448, of which $5,000,000 shall be derived by transfer from "Rail service assistance".

Senate amendment No. 343: Page 87, after line 5, insert:

PAYMENTS TO THE ALASKA RAILROAD REVOLVING FUND

For an additional amount for "Payments to the Alaska Railroad revolving fund", $2,000,000 to remain available until expended.

Senate amendment No. 357: Page 92, after line 18, insert:

INTERNAL REVENUE SERVICE

TAXPAYER SERVICE AND RETURNS PROCESSING

For an additional amount for the tax counseling for the elderly program (TCE), $500,000. This additional amount shall be used to retroactively reimburse volunteer tax counselors for personal and administrative expenses incurred during the past 1980 income tax filing season.

Senate amendment No. 361: Page 96, after line 11, insert:

INTERGOVERNMENTAL PERSONNEL ASSISTANCE

(RESCISSION)

Of the funds provided for the Intergovernmental Personnel Act Grant program for fiscal year 1981 in Public Law 96-536, $5,600,000 are rescinded: *Provided*, That no funds appropriated or made available by this or any other Act shall be available to fund the Intergovernmental Personnel Act Grant program after June 5, 1981.

Senate amendment No. 366: Page 97, after line 23, insert:

SENATE

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendments of the Senate numbered 25, 33, 37, 40, 100, 101, 103, 115, 131, 157, 159, 164, 190, 191, 192, 193, 194, 195, 198, 222, 223, 226, 228, 237, 245, 246, 253, 255, 259, 261, 262, 264, 266, 273, 277, 278, 280, 282, 290, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 311, 312, 313, 314, 339, 343, 357, 361, 366, 367, 368, 369, 370, 371, 372, and 374, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 17: Page 8, line 10, after "expended" insert: "*Provided*, That no funds available to this agency shall be used to either reduce or plan for a reduction in full-time permanent employment of less than twelve thousand five hundred and eighty (12,580)".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein.

Mr. CONTE. Mr. Speaker, I demand that the question be divided.

The SPEAKER pro tempore. The question will be divided.

Does the gentleman from Mississippi desire recognition?

Mr. WHITTEN. Not at this time.

The SPEAKER pro tempore. The question is on the motion to recede from disagreement to Senate amendment 17, offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion to recede was agreed to.

PREFERENTIAL MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. CONTE moves that the House concur in the amendment of the Senate numbered 17, with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided*, That no funds available to this agency shall be used to either reduce or plan for a reduction in full-time permanent employment of less than twelve thousand five hundred and eighty (12,580).

"[However, if the Secretary determines that the orderly and efficient operation of the Department of Commerce requires that he not comply with the preceding proviso, he need not comply and shall submit to the Committees on Appropriations of the House and Senate, a report explaining his reasons for not complying.]"

Mr. CONTE. Mr. Speaker, I very reluctantly offer this motion, because as I said earlier, I agree with the conference report. I think we have done a tremendous job. The administration, however, feels very, very strongly about this amendment. The Secretary of Commerce has met with the gentleman from Iowa (Mr. SMITH) and with the gentleman from Mississippi (Mr. WHITTEN). He came to my office and also met with Senator HATFIELD and others in the other body. He is very concerned about this amendment put in by the Senate.

In a nutshell, this mischievous Senate amendment would set a bad precedent of mandating a congressionally imposed employment floor—not a ceiling—on one of the biggest bureaucracies in town, the National Oceanic and Atmospheric Administration, or NOAA, as it is commonly known. NOAA has a current on-board strength of 12,670 full-time permanent positions, or more than 43 percent of the total employees in the Department of Commerce.

The new administration has proposed a modest reduction in NOAA positions by the end of fiscal year 1981 of 3.6 percent, or 435 slots, as part of the overall cutback in Federal employment, a cutback strongly supported by most of our constituents. The reduction for NOAA is actually less, percentagewise, than for the Department as a whole, which is slated for a 4.8-percent reduction.

Senate amendment 17 would limit reductions in NOAA to 1 percent of its personnel, or a cut of only 120 positions. This small reduction would force other agencies within the Department of Commerce to absorb an additional 333 cutbacks in employment levels allocated by the Office of Management and Budget. This would

mean that while NOAA is called on to make only a 1-percent reduction, other agencies which are important to the commerce and health of this Nation would be forced to cut back by nearly 8 percent. That is not fair; it is not good management, and it should not be allowed to happen.

If this amendment is not removed from this bill, the following actions will be taken by the Department of Commerce:

An across-the-board hiring freeze will be reinstituted.

Critical new program hires in the Patent Office will not be made, thus increasing patent and trademark processing times by 1 to 2 months.

Needed employment in the International Trade Administration will not be instituted, which would negatively impact such activities as the timely processing of export application license backlogs, control over high-technology exports, review of militarily critical technologies in the license evaluation process, and administration of trigger price mechanisms.

Effective administrative control over existing EDA projects, totaling $1.2 billion, could be lost due to conflicting employment directives contained in this bill.

And finally, nearly half of the $1 billion spent for decennial census data collection could wind up wasted due to the inability to process that data in a timely manner.

These harmful results are too high a price to pay to satisfy what is essentially a special relationship which one member of the other body feels toward NOAA, a relationship which has generated an amendment to protect this one agency out of the entire Federal bureaucracy and to give it special privilege.

I would like to make one final observation, Mr. Speaker. As the new administration and the Congress labors to create a more lean and more efficient and more effective Federal Government, we must be evenhanded in dealing with these agencies or we will never accomplish our goals, Each of us has favorite programs and agencies, many of which are being cut back in this bill. It hurts us to do it, but we do it because we are convinced such reductions, taken in total, will ultimately benefit the Nation.

If we get sidetracked every time one Member is successful in gaining special consideration for his or her favorite agency, such as this hiring floor for NOAA, we have no chance of success. We must put a stop to such attempts whenever they appear, and that is why I urge all of you to adopt this motion.

Mr. O'BRIEN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. O'BRIEN. Mr. Speaker, if I understand the gentleman correctly, the appropriation for the Commerce Department was finely tuned and all the excess eliminated. Now, if this little bit of special treatment is given to NOAA, then the Patent Office, the Census Office, and, indeed, the Agency for International Trade are going to suffer serious cutbacks that will completely degenerate their effectiveness; is that correct?

Mr. CONTE. You are protecting NOAA to the detriment of all these other agencies; the gentleman is absolutely right.

Mr. O'BRIEN. I thank the gentleman.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Speaker, let me state what is involved here. We are talking about the budget for NOAA. Under the instructions given by OMB to NOAA, they would have had a cut of 453 people, not necessarily for NOAA, but that is NOAA's part of the cut as it was distributed by Secretary Baldrige; so what is involved involves a lot of things, like the aquaculture program. It is especially important to the east coast and to the Northwest; also the fruit frost program, and with the closing down of 37 part-time weather stations. Those are all over the country.

We are involved with a number of things that we may or may not do in the 1982 budget coming up here in 2 or 3 weeks; but Secretary Baldrige wants to fire those people right now. He wants to determine it right now; so we are talking about whether or not to keep them on until October 1. Under this bill we would let him fire 120 people right now, but we would say that as to the other 333, you can surely wait until the first of October or until we have settled this matter in the 1982 budget.

□ 1045

If my colleagues vote for this amendment, they are saying right now, "Kill the aquaculture program" that people on the east coast especially are interested in, and those in the State of Washington and those in the State of Oregon are also interested. Maybe we will and maybe we will not, but we should not decide it now.

My colleagues will also be saying to these 38 Members around here, almost every one of which have been before the committee saying we should not close down these part-time weather stations, we would be saying do it now, do not wait for the 1982 budget and make the decision, fire them now, and the question will already be settled. We should not do it this way.

The argument is if we do not do this we will take some out of the Patent Office. That is only if OMB gets their way. It is also only if OMB does not shift some people to them from someplace else.

Let me explain something else we did in this bill. Under this bill that we have before us now there will be 200 more people cut in SBA than they wanted to. OMB can give them those 200 people. They have a number of ways to keep from reaching into the Patent Office or any other place.

The whole thing involved here is the Secretary of Commerce wants to make a decision now that we have not given him permission to make yet. I say my colleagues should not agree to this amendment.

Mr. CONTE. Mr. Speaker, I just want to make sure the RECORD is correct. My good friend from Iowa (Mr. SMITH) says we are going to close weather stations and fire those individuals. We have on board 5,018 weather service employees.

This reduction the Department of Commerce has proposed would cut only 69 of those 5,018. And listen to this. Of those 69, 40 are associated with nuclear testing services in Las Vegas. Maybe it is high time they came home and we saved some money. At any rate, those weather stations the gentleman from Iowa referred to are not affected by this motion. We will deal with that issue in the fiscal year 1982 bill.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. SMITH of Iowa. It still involves those 37 part-time weather stations. The Secretary has said that the cuts he proposes now are a part of the package he intends to complete in fiscal year 1982 and we would be making a decision now to close the stations when Members on both sides of the aisle do not want that decision made today.

Mr. CONTE. I maintain this action does not make that decision.

Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. Does the gentleman from Mississippi (Mr. WHITTEN) have further requests for time?

Mr. WHITTEN. I have no further requests for time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the preferential motion.

There was no objection.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken; and on a division (demanded by Mr. CONTE) there were—ayes 10, noes 15.

Mr. CONTE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the

point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present. The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 195, nays 178, not voting 58, as follows:

□ 1100

The Clerk announced the following pairs:

On this vote:

Mr. Hollenbeck for, with Mr. Mollohan against.

Mr. Young of Alaska for, with Mrs. Bouquard against.

Mr. Craig for, with Mr. Fary against.

Mr. Evans of Iowa for, with Mr. Leland against.

Mr. Philip M. Crane for, with Mr. Dellums against.

Mr. Rousselot for, with Mr. Fuqua against.

Mr. Schulze for, with Mr. Jones of North Carolina against.

Until further notice:

Mr. Price with Mr. Madigan.

Mr. Stratton with Mr. Vander Jagt.

Mr. Heftel with Mr. Walker.

Mr. Florio with Mr. Archer.

Mr. LaFalce with Mr. Gradison.

Mr. Neal with Mr. Dickinson.

Mr. Foglietta with Mr. Conable.

Mr. Flippo with Mr. Bafalis.

Mr. Stump with Mr. Badham.

Mr. White with Mr. Moore.

Mr. Roe with Mr. Weber of Minnesota.

Ms. Ferraro with Mr. Brown of Ohio.

Mr. Biaggi with Mr. Hillis.

Mr. Beilenson with Mr. Frenzel.

Mr. Dymally with Mr. Martin of North Carolina.

Mr. Brooks with Mr. Fish.

Mr. AuCoin with Mr. Carney.

Mr. Grisham with Mr. Deckard.

Mr. Hansen of Utah with Mr. Duncan.

Mr. Jeffords with Mr. Hartnett.

Mr. Washington with Mr. Goldwater.

Messrs. BREAUX, HUTTO, CHAPPELL, DYSON, IRELAND, LEVITAS, NELSON, and VOLKMER changed their votes from "yea" to "nay."

Mr. LOWERY of California and Mr. GLICKMAN changed their votes from "nay" to "yea."

So the preferential motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 20: Page 8, strike out lines 18 to 22, inclusive, and insert:

COASTAL ZONE MANAGEMENT

For an additional amount for "Coastal zone management", $40,000,000, to be derived by transfer from "Coastal energy impact fund", to remain available until expended.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 20 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

COASTAL ENERGY IMPACT FUND

(DEFERRAL)

Of the funds appropriated under this head in Public Law 95-86, $7,000,000 are deferred for obligation until October 1, 1981.

COASTAL ZONE MANAGEMENT

(TRANSFER OF FUNDS)

For an additional amount for "Coastal zone management", $33,000,000, to be derived by transfer from "Coastal energy impact fund", to remain available until expended.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 21: Page 8, after line 22, insert:

PROMOTE AND DEVELOP FISHERY PRODUCTS AND RESEARCH PERTAINING TO AMERICAN FISHERIES

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves the proposed deferral D81-105, relating to Department of Commerce, National Oceanic and Atmospheric Administration, "Promote and Develop Fishery Products and Research Pertaining to American Fisheries", as set forth in the message of April 27, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon the enactment into law of this Act.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

PROMOTE AND DEVELOP FISHERY PRODUCTS AND RESEARCH PERTAINING TO AMERICAN FISHERIES

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $2,500,000 of the proposed deferral D81-105, relating to Department of Commerce, National Oceanic and Atmospheric Administration, "Promote and Develop Fishery Products and Research Pertaining to American Fisheries", as set forth in the message of April 27, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act, and the amount of the proposed deferral disapproved herein shall be made available for obligation.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 29: Page 11, after line 13, insert:

FEES AND EXPENSES OF WITNESSES

(TRANSFER OF FUNDS)

For an additional amount for "Fees and expenses of witnesses", $6,500,000; to be derived by transfer from Antitrust Division, "Salaries and expenses", $1,569,000; United States Attorneys and Marshals, "Salaries and expenses", $2,000,000; and Office of Justice Assistance, Research, and Statistics, "Law enforcement assistance", $2,931,000.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 29 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

FEES AND EXPENSES OF WITNESSES

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Fees and expenses of witnesses", $6,200,000, of which $2,931,000 is to be derived from Office of Justice Assistance, Research, and Statistics, "Law enforcement assistance".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 38: Page 16, strike out lines 12 to 18, inclusive, and insert:

Notwithstanding section 8(b) of the Board for International Broadcasting Act of 1973, not to exceed $4,500,000 of the amounts placed in reserve pursuant to that section, or which would be placed in reserve pursuant to that section, shall be available to the Board for carrying out that Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 38 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

The amounts provided in Public Law 96-536 for the Board for International Broadcasting may be expended without regard to the limitation on $2,400,000 for the purpose of transferring RFE/RL positions to the United States.

Notwithstanding section 8(b) of the Board for International Broadcasting Act of 1973, not to exceed $1,600,000 of the amounts placed in reserve pursuant to that section, or which would be placed in reserve pursuant to that section, shall be available to the Board for carrying out that Act.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 41: Page 17, after line 14, insert:

SALARIES AND EXPENSES

(TRANSFER OF FUNDS)

For an additional amount for "Salaries and expenses", $650,000, to be derived by transfer from "Salaries and expenses (special foreign currency program)".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 41 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SALARIES AND EXPENSES

(TRANSFER OF FUNDS)

For an additional amount for "Salaries and expenses", $350,000, to be derived by transfer from "Salaries and expenses (special foreign currency program)".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 42: Page 17, after line 14, insert:

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $650,000 of the proposed deferral D81-75 relating to the International Communication Agency, "Salaries and expenses (special foreign currency program)" as set forth in the message of February 13, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 42 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves $350,000 of the proposed deferral D81-75 relating to the International Communication Agency, "Salaries and expenses (special foreign currency program)" as set forth in the message of February 13, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective upon enactment into law of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 47: Page 19, line 14, strike out "$305,329,000" and insert "$297,289,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 47 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$290,089,000".

The motion was agreed to.

Mr. ADDABBO. Mr. Speaker, I rise in support of all of the amendments to chapter III, Department of Defense. All of the reductions made will not in any way affect readiness.

Mr. Speaker, the efforts of the House conferees resulted in considerable savings for the taxpayers in the Department of Defense part of the supplemental bill. We were able to persuade the Senate managers to give up $1,167,375,000 which had been included in the Senate bill for the Department of Defense. This was done in such a way that those funds necessary for the Department of Defense at this time were provided.

The total budget estimates, including both the program supplemental and the pay raise supplemental, for that part of the Department of Defense funding included in the regular annual defense appropriation bill was $12,352,242,000. The House had passed $10,680,927,000. The Senate increased the amount both above the House and above the budget level to $12,779,438,000. The conference agreement is for $11,612,063,000. Although the conference amount is a very substantial sum, the reductions which were achieved under the Senate-passed amount for defense gave the other appropriations subcommittees some room to accommodate necessary programs in the supplemental which could not otherwise have been accommodated under the fiscal year 1981 budget ceiling.

The conference amount is as I said, $1,167,375,000 under the Senate-passed bill. It is $931,136,000 above the House-passed bill and $740,179,000 below the budget estimate.

The principal area in dispute in the conference involved amounts added to the bill by the Senate for inflation. The Senate, in its review of the Defense requests, rejected the Reagan administration's estimates of inflation since they seemed to be too low and provided $1,580,826,000 in the supplemental bill for the Department of Defense for inflation based on an estimated average inflation rate for the fiscal year of 10 percent. The House-passed bill had supported the amounts requested by the administration in this area. Testimony before the full Appropriations Committee by the Director of the Office of Management and Budget as well as testimony before the Defense Subcommittee by the Secretary of Defense stated clearly that if the administration's inflation estimates prove to be faulty, and if additional funds were required by Defense for this reason, the administration would present supplemental requests to the Congress so that defense readiness would not be adversely impacted by inflation. I for one chose to accept this position of the administration. The Senate did not and provided the additional $1.6 billion to which I made reference.

In the conference we agreed to provide a total of $514,226,000 of the inflation amount which the Senate had added to the bill. We agreed to the inflation sums for the operation and maintenance appropriations. We also agreed to the much smaller such sums requested for the military personnel and the shipbuilding appropriations. We succeeded in persuading the Senate to give up the funds appropriated in the procurement accounts, other than in shipbuilding, and in the research, development, test, and evaluation accounts. This totaled approximately $1.1 billion.

I think the agreement reached is realistic. The operation and maintenance appropriations are those which are impacted most adversely by inflation. To provide unallocated lump sums for inflation in procurement and research and development accounts this late in the fiscal year would only result in even larger unobligated and unexpended balances than we will have on hand at the end of the fiscal year already. The funds were just not required at this time and I think the conferees reached a wise and equitable agreement in this area.

I will mention here just a few of the other highlights in the conference agreement.

The conferees agreed to provide $55.5 million in a special account for special pay for aviation officers. The Navy especially has complained that it is short on aviators and that a special bonus was needed to persuade aviators already in the service to remain in the service rather than to take higher paying jobs elsewhere. The conferees provided the special fund which is to be used to transfer needed funds to the military personnel appropriations after decisions are made and requests are submitted to the House and Senate Appropriations Committees.

The funds included in the House bill for the F-18 and F-16 aircraft are included in the conference agreement; $89 million for the reactivation of the battleship *New Jersey* was included in both the House and Senate bills and was not an issue at the conference. The funds for the ground launched cruise missile which had been included by the Senate but not included by the House were agreed to at the Senate level in conference. The conference agreement includes funding for the Viper antitank missile and the Patriot antiaircraft missile system of the Army. The funds requested for the DDG-X program which had been denied by the House but included by the Senate were not agreed to in the conference.

Last year, at the initiative of the House, a developmental airfield attack system, termed the "JP-233," was terminated by action of the conferees on the appropriation bill. Rather than using the funds provided for termination as the conferees directed, the Air Force used the funds to keep the program going and requested additional funds for the program in the supplemental. The House position prevailed in the conference and the funds are again denied and the conferees direct that the program be once and for all terminated.

One of the more important items in the bill involves a general provision which had been proposed by the House which provides that funds appropriated to the Department of Defense may not be used to reimburse a contractor for the cost of commercial insurance that would protect him against his own defects in materials or workmanship. The Senate had deleted the provision but in conference we found that many of the Senate conferees concurred in the House position and the provision was perfected and included in the conference agreement.

There were programs which were agreed to in the conference that I would not personally have chosen to fund but, as all of us know, conferences are a matter of give and take and I think, on balance, in the conference on the pending supplemental bill the House conferees were very successful in supporting the House position and supporting national defense and in insisting on reductions in waste and mismanagement in the Pentagon.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 49: Page 19, line 23, strike out "$152,100,000" and insert "$142,700,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 49 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$140,150,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 50: Page 19, after line 23, insert:

MILITARY PERSONNEL; SPECIAL PAY FOR AVIATION CAREER OFFICERS EXTENDING PERIOD OF ACTIVE DUTY

For the payment of special pay under section 301b of title 37, United States Code, $55,500,000.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of

the Senate numbered 50 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert:

"SPECIAL PAY FOR AVIATION OFFICERS

"For the payment of special pay under section 301b of title 37, United States Code, $55,500,000, to be transferred to the various military personnel accounts."

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachussetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 53: Page 21, line 11, strike out "$45,060,000" and insert "$46,906,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: $56,906,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 68: Page 24, line 9, strike out "$117,100,000" and insert "$132,400,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 68 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$143,600,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 72: Page 24, line 15, strike out all after "program;" down to and including "programs" in line 23 and insert "$21,800,000 for the LSD-41 program; $89,000,000 for advance procurement for the reactivation of the battleship U.S.S. New Jersey, to remain available for obligation until September 30, 1985".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 72 and concur therein with an amendment, as follows: in lieu of the matter stricken and inserted by said amendment, insert: "and $89,000,000 for advance procurement for reactivation of a battleship, to remain available for obligation until September 30, 1985".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 81: Page 26, line 10, after "$101,664,000," insert "of which $2,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. New Jersey and $1,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. Iowa,".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 81 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert: "of which not to exceed $2,000,000 is for research and development in connection with the reactivation of the battleship U.S.S. New Jersey and not to exceed $1,000,000 is for research and development in connection with the reactiviation of the battleship U.S.S. Iowa,".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 84: Page 27, strike out lines 4 to 11, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 84 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert: "None of the funds appropriated to the Department of Defense for fiscal year 1981 and hereafter shall be available for obligation to reimburse a contractor for the cost of commercial insurance (other than insurance normally maintained by the contractor in connection with the general conduct of his business) that would protect against costs of the contractor for correction of the contractor's own defects in materials or workmanship incident to the normal course of construction (those defects in materials or workmanship which do not constitute a fortuitous or casualty loss)."

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 111: Page 39, strike out lines 11 to 19, inclusive and insert:

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $15,000,000 for modernization of existing low-income housing projects, $30,611,609 for existing units under section 8, including section 8(j), of such Act, $187,862,148 for newly constructed and substantially rehabilitated units assisted under such Act and $5,260,384,150 of budget authority, are rescinded.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 111 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $30,611,609 for existing units under section 8, including section 8(j), of such Act, $197,102,148 for newly constructed and substantially rehabilitated units assisted under such Act, and $5,219,104,150 of budget authority, are rescinded.

(DEFERRAL)

Of the amounts of additional contract authority provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, as authorized by section 5 of the United States Housing Act of 1937, $15,000,000 for modernization of existing low-income housing projects and $300,000,000 of budget authority shall be withheld from obligation until October 1, 1981.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 113: Page 42, strike out lines 2 to 9, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 113 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert:

COMPREHENSIVE PLANNING GRANTS

(RESCISSION)

Any amounts not reserved from appropriations provided under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Acts, 1981 and prior years, including any amounts becoming available from cancellation of prior year reservations, but excluding $19,000,000, are rescinded.

Mr. CONTE. (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 118: Page 45, strike out lines 6 to 25, inclusive, and insert:

Of the funds appropriated under this head, $1,700,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Acts, 1980 and 1981, are rescinded. Of the amount rescinded, and to the extent available, $1,000,000,000 should be rescinded from the Department of Housing and Urban development-Independent Agencies Appropriation Act, 1980, and $700,000,000 should be rescinded from the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981. The reduction in each appropriation will be distributed among the States according to the allotment formula specified in section 205(c) of Public Law 92-500, as amended by Public Law 95-217. Whenever a State's share of the reduction from an appropriation, as determined by the formula, is greater than its unobligated balance for that appropriation, as determined by the Administrator of the Environmental Protection Agency upon the date of enactment of this Act, the shortfall will be distributed according to the allotment formula among all the States which still have funds remaining from that appropriation. This process of distributing the shortfall will continue until the amount of the reduction has been allocated among the States.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 118 and concur therein with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

Of the funds appropriated under this head, $880,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1980, and $756,000,000 in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, are rescinded. The reduction in each appropriation will be distributed among the States according to the allotment formula specified in section 205(c) of Public Law 92-500, as amended by Public Law 95-217. Whenever a State's share of the reduction from an appropriation, as determined by the formula, is greater than its unobligated balance for that appropriation, as determined by the Administrator of the Environmental Protection Agency upon the date of enactment of this Act, the shortfall will be distributed according to the allotment formula among all the States which still have funds remaining from that appropriation. This process of distributing the shortfall will continue until the amount of the reduction has been allocated among the States.

Of the funds appropriated under this head in the Public Works Employment Appropriation Act, 1977, $64,000,000 are rescinded.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 123: Page 47, strike out all after line 18 over to and including line 14 on page 48, and insert:

Of the funds appropriated under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, $37,500,000 are rescinded, and of the amounts remaining for research and related activities under Public Law 96-526: (1) not more than $18,053,000 shall be available for earthquake hazards mitigation; (2) not more than $1,240,000 shall be available for the establishment and operation of three university-based Innovation Centers; (3) not more than $2,800,000 shall be available for grants to two-year and four-year colleges for equipment and instrumentation costing $35,000 or less; (4) not more than $300,000 shall be available for small business innovation for projects to aid the handicapped; and (5) not more than $1,400,000 shall be available for special programs for women and minorities in science and technology. None of these funds shall be available for separately targeted programs for appropriate technology, science faculty improvement programs for two-year and four-year college faculty research participation, and research opportunity grants and visiting professorships for women.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 123 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

Of the funds appropriated under this head in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1981, $46,000,000 are rescinded, and of the amounts remaining for research and related activities under Public Law 96-526: (1) not more than $37,000,000 shall be available for scientific, technological, and international affairs; (2) not more than $83,000,000 shall be available for engineering; (3) not more than $18,053,000 shall be available for earthquake hazards mitigation; (4) not more than $1,240,000 shall be available for the establishment and operation of three university-based Innovation Centers; (5) not more than $2,800,000 shall be available for grants to two-year and four-year colleges for equipment and instrumentation costing $35,000 or less; (6) not more than $300,000 shall be available for small business innovation for projects to aid the handicapped; and (7) not more than $1,400,000 shall be available for special programs for women and minorities in science and technology. None of these funds shall be available for separately targeted programs for appropriate technology, science faculty improvement programs for two-year and four-year college faculty research participation, and research opportunity grants and visiting professorships for women.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 140: Page 52, line 18, strike out all after "96-514)" down to and including "1983" in line 20 and insert "$11,800,000 are rescinded"

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 140 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$2,745,000 shall not become available for obligation until October 1, 1981, and shall remain available for obligation until September 30, 1983, and $5,900,00 are rescinded".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, I urge support of the conference report. With respect to chapter 7, we have worked out a good conference agreement. The conference report provides for supplemental budget authority of

$1,561,454,000 which is $10,517,000 below the budget estimate. It is $4,893,000 above the Senate bill and $36,852,000 below the bill that was approved by the House. In addition the bill provides for rescissions of $2,158,746,000 which is $55,441,000 more than the amount proposed by the administration. The amount rescinded is $294,458,000 less than rescinded in the Senate bill and $395,247,000 more than was approved by the House. The conference report also includes deferrals of $360,807,000.

The bill does not include any fiscal year 1982 advanced funding for the Strategic Petroleum Reserve as proposed by the House. However, there is a supplemental appropriation of $1,305,000,000 for additional oil purchases for the reserve in fiscal year 1981. The committee remains strong in its resolve to provide sufficient funds so that the Petroleum Reserve may be filled as expeditiously as possible.

The conference report eliminates some of the inequities associated with the proposed rescissions. Instead of rescinding $250,000,000 from the Land and Water Conservation Fund as proposed, the conference report rescinds $90,000,000. The $160,000,000 made available will insure that each State will now receive at least 75 percent of its original share. Because of different obligation patterns, fiscal years, and bienniums, the proposed rescission would have left some States with disproportionate shares of the available funds.

For the historic preservation fund the conference report added $1.5 million over the Senate bill in order to give each State a full share of its survey and planning grants. Under the proposed rescission, 10 States would have received a greatly reduced share. In the urban parks program the conference report rejects $16 million of the rescission so that those local jurisdictions whose projects had been announced as grant recipients, only to have the funds withdrawn, will now receive grants.

The Youth Conservation Corps program is another example of how the proposed rescission affected the various States unevenly. The conference report does rescind $34,000,000 but retains $18,000,000 so that the States can receive 30 percent of the original appropriation as required by law. In addition the Departments of Agriculture and the Interior split the balance of $8 million made available.

The conference report also makes available funds to salvage 771 million board feet of timber felled as a result of the eruption of Mount St. Helens. This action, combined with previous appropriations, will result in a net gain of $115 million for the Government.

The Senate version of the bill for the payments-in-lieu-of-taxes program is included in the conference report. This action makes $108 million available for fiscal year 1981.

In the energy conservation area the conference report makes $81,390,000 above the Senate amount available for obligations in fiscal year 1981. This includes $68,700,000 for schools and hospitals conservation grants, $3 million for gas turbine engine development and $3,100,000 for Stirling engine development, $2 million for the urban consortium and $4,590,000 for biomass energy studies. For fossil energy research and development the conference report rescinds $53,036,000 instead of the $66,850,000 proposed by the Senate. The increase in the amount made available is $1 million for the SRC-I pilot plant, $5 million for peat gasification, and $4,814,000 for a methanol from coal facility in Beaverdale, Pa. In addition, $3 million for enhanced gas recovery is not rescinded.

The conferees in agreeing to the conference report are in agreement that the $271 million made available for the alcohol fuels loan guarantee reserve is to provide for guarantees of $812 million. This is based on a 3 to 1 ratio of guarantees to appropriated reserves as stated in the House report accompanying this bill.

The committee is concerned about the trend to withhold appropriations by administrative action. In the programs under the jurisdiction of the Interior and Related Agencies Subcommittee, there are two examples. The Department of the Interior has withheld approximately $45 million of land and water conservation funds and the Indian Health Service has withheld $1,100,000 of scholarship money for Indian students in Indian health professions. Neither of these has been reported as a rescission or a deferral. Managers of these programs are referred to section 1011 of title X of the Impoundment Control Act of 1974.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, the gentleman from Michigan had a question or two.

Does the gentleman want to ask a question?

Mr. ALBOSTA. Yes; if the gentleman will yield.

I would like to get some clarification on the conference committee report.

I would like to take this opportunity to clarify one matter in House Report 97-29 that accompanies H.R. 3512, the supplemental appropriations and rescission bill for fiscal year 1981 with the distinguished chairman of the Subcommittee on Commerce, Justice, State, and the Judiciary, the gentleman from Iowa.

In the House Report 97-29, on page 41, concerning the title V regional commissions, is it not the intention of the committee to allow all of the remaining balances of these title V commissions to be used in an orderly phasedown of the activities of these commissions?

Mr. SMITH of Iowa. If there are any remaining balances at the end of fiscal year 1981 and they are needed for an orderly phaseout of the program, such balances should be available during the rest of the authorization.

Mr. ALBOSTA. I want to thank the distinguished gentleman from Iowa for this important clarification.

Mr. McDADE. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Speaker, I rise in support of H.R. 3512 making supplemental appropriations, deferring certain budget authority, and rescinding certain budget authority for fiscal year 1981 and to urge its adoption by the House. I particularly want to call the Members' attention to the recommendations set forth by your committee in the Interior and related agencies chapter of title I.

We were faced with a particularly difficult decision posed by the President's request to rescind $250 million from the land and water conservation fund programs of the National Park Service. The House denied this request entirely. The Senate agreed to rescind $150 million. In conference we were able to restore $40 million to the States' share, sufficient funds to enable each State to receive not less than 75 percent of their targeted allocation. These funds will make certain that the greatest possible equity will be shown to all 50 States. This provision was necessary because certain States obligate their funds early while others obligate late in the calendar year. At the time of our markup, there were 12 States, including my own State of Pennsylvania, that had not received or obligated their LWCF money. This was despite the fact that commitments have been made by the State to local governments for recreation projects. I am especially grateful to my chairman, the gentleman from Illinois, Mr. YATES, and to the Senator from Idaho, Senator MCCLURE, for their support of this action.

Our committee also reduced the Federal share of the land and water conservation fund by $35 million. In doing this, our report did not give specific direction to the Interior and Agriculture Departments as to which hardship acquisitions would be funded in the remainder of fiscal year 1981.

However, both agencies are not without guidance on the subject. As the result of submitted questions from both the Senate and the House Interior Appropriations Committees, the National Park Service, the Forest

Service, and the Fish and Wildlife Service have submitted for the RECORD a list of projects that represented their priority acquisitions. At this place in the RECORD, I would like to enter those lists and to advise the Interior and Agriculture Departments that it is our intention that they follow them in allocating their funding.

The information follows:

SENATE QUESTIONS

In the event that a rescission level of $55 million for the Federal side of the Land and Water Conservation Fund may be adopted by Congress in its consideration of the Supplemental Appropriations and Rescission package for fiscal year 1981, the following acquisition list represents priorities beyond those contemplated by the existing Departmental rescission proposals for fiscal year 1981. These priorities are based on hardship criteria which have been applied to the circumstances associated with each acquisition. A detailed list of hardship or emergency circumstances associated with each acquisition would be far too lengthy, but a brief explanation of the peculiarities of each acquisition has been supplied for your use.

EMERGENCY OR HARDSHIP CRITERIA

Emergency acquisition will have as their primary objective the avoidance of imminent actions resulting in irreparable harm to the land resources in question. "Irreparable harm" will include, as a minimum, adverse uses contrary to specified purposes delineated in Congressional authorizations.

Hardship cases will ordinarily dictate the use of the LWCF for land acquisition in those instances where failure to proceed with acquisition would result in the loss of a significant and unreasonable amount of financial outlay by the proposed seller, or unreasonable deprivation resulting from financial hardship associated with the seller's reasonable expectations regarding the acquisition. Hardship as defined here would be similar to notions associated with zoning statutes defining grounds for variances, and would generally mean actions that are unduly oppressive, arbitrary, or confiscatory.

Further specificity concerning hardship criteria would preempt Secretarial discretion necessary for adequate review on a case-by-case basis. The above established criteria have been applied to each of the acquisitions listed in response to Committee inquiries.

LAND AND WATER CONSERVATION FUND, SUMMARY OF PROPOSED RESCISSION—FISCAL YEAR 1981

[In thousands of dollars]

Agency	Proposed rescission $105 million	Higher priority areas not included in $50.2 million level	Areas to be included in $54.8 million level
National Park Service	$65,948	$19,502	$46,446
Forest Service	23,007	23,007	0
Fish and Wildlife Service	12,962	4,722	8,240
Bureau of Land Management	133	0	133
Pinelands NR	2,950	2,950	0
Total	105,000	50,181	54,819

NATIONAL PARK SERVICE LAND AND WATER CONSERVATION FUND, PROPOSED RESCISSION—FISCAL YEAR 1981

[In thousands of dollars]

Management unit	Proposed rescission	Remarks
Areas required for proposed rescission of $105 million (entire page):		
Appalachian Trail, Maine to Georgia.	$5,000	Acquisition to avoid disjointed trail. Initial contact made with several hundred owners.
Olympic NP, Wash	100	Hardship case identified.
Inholdings, various	1,500	Avoid potential resource damage. Acquistion 99-percent complete.
Fort Caroline N. Mem., Fla	60	Last tract in area, owner has expressed interest in selling.
St. Croix WSR, Wisconsin-Minnesota.	260	Acquisition 88-percent complete. Would consolidate Federal interests.
Virgin Islands NP, V.I	490	Hardship case identified.
Delaware Water Gap NRA, New Jersey-Pennsylvania.	600	Hardship case identified. Other owners have expressed an interest to sell.
Allegheny Portage RR NHS, Pa.	1,900	Offers to sell on hand.
New River Gorge NR, W. Va.	1,900	Funds to acquire public use areas.
Sequoia NP (Mineral King), Calif.	500	95-percent complete. Owners have expressed interest in selling.
Jean Lafitte NHP, La	1,790	Avoid potential resource threat and consolidate Federal holdings.
Obad WSR, Tenn	1,400	Appraisals on hand. Acquisition to provide for public use areas.
Monacacy NB, Md	2,502	Negotiations currently suspended. Owners have expressed willingness to sell.
Ozark NSR, Mo	150	99-percent complete. Acquisition would improve public access.
Antietam NB, Md	490	Resource threat.
C. & O. Canal NHP, Maryland-District of Columbia-West Virginia.	500	86-percent complete.
Lowell NP, Mass	360	Resource threat.
Subtotal	19,502	
Areas required for proposed rescission of $54.8 million:		
Redwood NP, Calif	21,200	Additional deposit for big 3 timber companies. Total value unknown.
John Day Fossil Beds N. Mex., Oreg.	425	Opportunity program.
Fire Island NS, N.Y	600	Needed only for zoning variances.
Indiana Dunes NL, Ind	280	Funds insufficient to permit acquisition.
Cuyahoga Valley NRA, Ohio	3,000	Current threatened tracts acquired.
Santa Monica Mtns NRS, Calif.	20,400	Only 2-percent complete.
Golden Spike NHS, Utah	200	New start.
Klondike Goldrush NHP, Alaska-Washington.	115	Opportunity program.
Georgia O'Keefe NHS, N. Mex.	36	Acquisition deferred until donation of key tract.
Kaloko Honokahau NHP, Hawaii.	150	Acquisition by exchange being pursued.
Thomas Stone NHS, Md	40	Acquistion complete.
Subtotal	46,446	
Grand total NPS	65,948	

LAND AND WATER CONSERVATION FUND, FEDERAL PORTION—FISCAL YEAR 1981 PROPOSED RESCISSION

[In thousands of dollars]

Management unit	Proposed rescission	Comments
FOREST SERVICE		
Areas required for proposed rescission of $105 million (entire page):		
Boundary waters Canoe area.	$406	Requirement of the law to acquire resorts, Pending court actions.
Appalachian Trail	930	Lands offered and under option along the trail.
Spruce Knob-Seneca Rocks NRA.	100	Development threat.
Mount Rogers NRA	450	Development threat.
Pacific Crest Trail	100	Tracts under option.
Flathead WSR	1,000	Properties under option and potential threat of development.
M. F. Salmon WSR	200	Development threat.
Inholdings	3,521	Properties under option.
Oregon Dunes NRA	1,300	Development threat.
Hells Canyon NRA	3,400	Potential resource threat.
Alpine Lakes	$11,600	Withdrawal of funds will disrupt this program. Two major land exchanges would have to be revised to eliminate cash equalization payments out of the LWCF. Outstanding offers for land purchase will have to be withdrawn and options dropped. Would also make funds available to settle suits filed by 21 parties for compensation for their properties.
Subtotal	23,007	
Areas required for rescission of $54.8 million.

LAND AND WATER CONSERVATION FUND, FEDERAL PORTION—FISCAL YEAR 1981 PROPOSED RESCISSION—Continued

[In thousands of dollars]

Management unit	Proposed rescission	Comments
FISH AND WILDLIFE SERVICE		
Areas required for proposed rescission of $105 million (entire page):		
Great Dismal Swamp	491	Optioned tract on a unit 90-percent complete.
Bogue Chitto	225	Relocation of tenants.
American Crocodile	1,731	Slippage and potential resource threat. Owners claiming hardship.
Minnesota Valley	1,634	Involved purchase comprising State highway department, Northwest Airlines, and the Service.
Mississippi Sandhill Crane	154	To acquire properties within a project that is over 90-percent complete.
Lower Suwannee	487	Hardship case and willing sellers.
Subtotal	4,722	
Areas required for rescission of $54.8 million:		
Key Deer	127	Option in hand for small acreage inholding.
Plymouth red-bellied turtle	220	Purchased and held by The Nature Conservancy and accruing interest charges.
Blunt-nosed leopard lizard	576	Slippage and optioned tract which may involve hardship claims.
Bon Secour	138	Slippage.
Moapa Dace	711	Slippage and purchase of a spring for sale on open market. Would aid species survival.
Hawaiian Waterbirds	50	Needed for long-term leases.
Rio Grande Valley	141	Needed for several small tracts within project. Willing sellers.
Dusky Seaside Sparrow	300	Emergency reprogramming request for Chassahowitzka (Crystal River Manatee).
Hawaiian Waterbirds	4,287	Offer made to purchase Kealia pond prior to February moratorium. Important for endangered waterbirds. Purchase uncertain.
Chassahowitzka	193	No willing sellers. Would involve condemnation.
Moapa Dace	59.5	Minimal impacts if funding is not available. If funds would be available, to be used for reprogrammings to acquire The Nature Conservancy holdings.
Okefenokee	10	Do.
Santa Cruz Salamander	56	Do.
Delmarva Fox Squirrel	25	Do.

LAND AND WATER CONSERVATION FUND, FEDERAL PORTION—FISCAL YEAR 1981 PROPOSED RESCISSION—Continued

[In thousands of dollars]

Management unit	Proposed rescission	Comments
BUREAU OF LAND MANAGEMENT		
Areas required for proposed rescission of $105 million or $54.8 million (entire page):		
Rogue WSR	$101	Acquisition on this project is in the final phases. Most of the remaining acquisitions will be accomplished by condemnation; declaration of takings have already been filed. These funds will be used to cover potential deficiency awards.
Upper Missouri WSR	24	These funds would be used to attempt acquisition of small scenic easements.
Rio Grande WSR	8	These were the only other funds available to meet the rescission target. Five tracts remain to be acquired in this project, but without an additional appropriation further acquisition is not possible.
Subtotal	133	
PINELANDS		
Areas required for proposed rescission of $105 million (entire page):		
Pinelands NR	2,950	The lack of funds will prevent the State of New Jersey from acquiring a 7,300 acre site in the Reserve which has been identified in their management plan as a priority State acquisition. A grant allocation for $2,950,000 has been submitted to DOI for the site.
Subtotal	2,950	
Areas required for rescission of $54.8 million.	.....	
Total, Pinelands NR	2,950	

Mr. McDADE. Mr. Speaker, I would also like to commend to you our actions with regard to the energy programs funded in this bill. When the House considered the supplemental last month, I suggested that there were certain items that I believed could be changed from rescissions to deferrals without any harm to our Nation's energy effort. I believe we have accomplished that task. I am especially grateful that the committee saw fit to continue the coal loan program in the Department of Energy. This program will assist an industry that is still having difficulty in these inflationary times securing front end capital. We have also taken certain steps in the energy conservation programs that will allow for us to make final judgments on the merits of activities in the 1982 energy appropriations.

We have accomplished these things while at the same time keeping the final conference number well below the estimates submitted by the administration. We reduced the proposed rescissions by $55.4 million. We have deferred, until 1982, another $360.8 million and reduced the supplemental budget request by another $10 million. This gives us combined reductions, rescissions and deferrals of $426.7 million.

Mr. Speaker, I would also like to comment upon the actions of the Subcommittee on Defense. Our subcommittee was presented with program supplemental requests of $7.65 billion. We finalized recommendations totaling $6.93 billion, $715 million below the budget estimates submitted to the committee.

I believe the Defense Subcommittee has taken a number of pay and personnel initiatives that will meet the manpower needs of all three services. I believe we have addressed the military's most pressing problem while at the same time responded to the taxpayers' concerns that the defense budget be given a thorough review.

I would like to express my support and interest in one specific item contained in this bill. The committee decisions included funds to go forward with the Army commitment to integrate the M-1 tank into our defenses at the earliest possible time. These funds will bring production of the M-1 to 569 tanks, some 209 more copies than would have been produced had the supplemental been denied. Upon completion, the M-1 will be the fastest, most advanced, most mobile tank ever produced. Our committee has expressed concern that the funded delivery period objectives be met by the Army and Chrysler. I trust the Army will interpret our support of this supplemental as a clear signal that we are anxious to overcome any further delays in production of the M-1.

Mr. Speaker, while it is not an issue in this conference report, the issue of DOD ammunition policy is one that concerns me greatly. I was most pleased when our chairman, the gentleman from New York (Mr. ADDABBO) stated publicly that our committee will not look favorably upon further reprogramings from our ammunition accounts. I believe this is a most wise policy that should put to rest the practice of reducing the ammunition accounts at every perceived emergency. Our ammunition accounts need strengthening and the policy of drawing them down like savings accounts should be stopped. DOD witnesses before our committee have concurred in that judgment and I hope it will become DOD's policy throughout the coming year.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 142: Page 53, line 9, strike out all after "system"," down to and including "94-565" in line 11 and insert "$800,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 142 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$4,776,000 including $576,000 to complete construction of the Savage River Bridge at Denali National Park and Preserve, Alaska".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 143: Page 53, after line 11, insert:

URBAN PARK AND RECREATION FUND

(RESCISSION)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514), and previous Interior Department Appropriations Acts, $35,000,000 are rescinded.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 143 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$19,000,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 145: Page 53, after line 14, insert:

(RESCISSION)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Acts, 1981 (Public Law 96-514), $150,000,000 are rescinded in the following amounts: $95,000,000 for payments to the States; $55,000,000 combined amounts for the Bureau of Land Management; Forest Service, the United States Fish and Wildlife Service, the National Park Service, and for Pinelands National Reserve: *Provided*, That notwithstanding the provisions of section 6 of the Land and Water Conservation Fund Act, as amended, the unobligated balance of

the contingency reserve and of funds appropriated and apportioned for the various States and unobligated upon the date of enactment of this Act shall be made available to the States in the most equitable means practicable, in the judgment of the Secretary, consistent with the general purposes of the Land and Water Conservation Fund Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 145 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"(RESCISSION)

"Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514) and previous Interior Department Appropriations Acts, $90,000,000 are rescinded in the following amounts: $55,000,000 for payments to the States; $133,000 for the Bureau of Land Management; $4,918,000 for the Forest Service; $12,217,000 for the United States Fish and Wildlife Service; $14,782,000 for the National Park Service; and $2,950,000 for the Pinelands National Reserve: *Provided*, That notwithstanding the provisions of 16 U.S.C. 4601-8, the unobligated balances of the contingency reserve and funds appropriated and apportioned for the various States and Territories upon enactment of this Act shall be reallocated among the States and Territories so that each shall receive not less than seventy-five percent of the amount each would have received under the statutory allocation of the amount appropriated for payment to the States under this head in Public Law 96-514."

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 147: Page 53, after line 17, insert:

(RESCISSION)

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514), and previous Department of the Interior Appropriations Acts, $8,000,000 are rescinded.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 147 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$6,500,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 148: Page 53, line 22, strike out "$15,500,000" and insert "$11,423,400".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 148 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$12,000,000 available from the Highway Trust Fund to liquidate contract authority provided under section 105(a)(8) of Public Law 94-280 for engineering services, roadway excavation, and pilot boring for the Cumberland Gap Tunnel, as authorized by section 160 of Public Law 93-87".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 154: Page 55, line 14 after "rescinded" insert ": *Provided further*, That of the remaining unobligated balance of the 1981 appropriation, $10,758,000 shall be available for Federal management and orderly close out of the program".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Cleark read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 154 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ⅛": *Provided*, That notwithstanding provisions of 16 U.S.C. 1704(d) and 1706 the unrescinded balance of the amount appropriated under this head in Public Law 96-514 shall be allocated as follows: $18,000,000 for the purposes of 16 U.S.C. 1704; $4,000,000 to the Secretary of the Interior; and $4,000,000 to the Secretary of Agriculture".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 155: Page 55, strike out lines 15 to 19, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 155 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

"RURAL WATER TREATMENT AND DISTRIBUTION SYSTEM

"(DEFERRAL)

"Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514), $1,900,000 shall not become available for obligation until the conditions of Section 9(b) of Public Law 96-355 regarding deauthorization of the Oahe unit have been met."

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 158: Page 56, line 5, after "Service" insert ": *Provided further*, That all funds appropriated in the Department of the Interior and Related Agencies Appropriation Act, 1981 (Public Law 96-514), for timber management and any related activities, including roads, on the Tongass National Forest, Alaska, that are replaced by funds provided under the authority of section 705(a) of the Alaska National Interest Lands Conservation Act (Public Law 96-487) shall be used to facilitate timber salvage activities in the Mount Saint Helens volcano area, including roads".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 158 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further*, That $22,607,000 appropriated in the Department of the Interior and Related Agencies Appropriations Act, 1981 (Public Law 96-514), for timber management and any related activities, including roads, on the Tongass National Forest, Alaska, that are replaced by funds provided under the authority of section 705(a) of Public Law 96-487 (which fund is hereby established at not less than $25,000,000 for fiscal year 1981), are transferred to this account, to remain available until expended, to facilitate timber salvage activities in the Mount Saint Helens

volcano area of the Gifford Pinchot National Forest as follows: construction of forest development roads and trails by the Forest Service $18,812,000; land line location $300,000; timber sales preparation $800,000; and road maintenance $2,695,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 161: Page 56, line 16, after "96-514)," insert "$66,850,000 are rescinded and".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 161 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$53,036,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 169: Page 57, lines 9, 10, and 11, strike out "$3,500,000 shall not become available for obligation until October 1, 1981" and insert "$13,248,000 are rescinded".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 169 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "$400,000 shall not become available for obligation until October 1, 1981, and $10,348,000 are rescinded".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 171: Page 57, lines 16 and 17, strike out "$230,930,000 shall not become available for obligation until October 1, 1981" and insert "$3,837,000 shall not become available for obligation until October 1, 1981, and $298,495,000 are rescinded".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 171 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment insert the following: "$67,762,000 shall not become available for obligation until October 1, 1981, and $153,180,000 are rescinded".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 173: Page 57, line 22, after "96-514)," insert "$39,167,000 are rescinded and".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 173 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$17,167,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 184: Page 59, strike out lines 20 and 21.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from it disagreement to the amendment of the Senate numbered 184 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following: "For an additional amount for "Indian health facilities", $2,500,000, to remain available until expended, for site reviews, water investigations, and preliminary engineering and design of sanitation facilities for 2,840 Indian housing units.".

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 189: Page 60, after line 18, insert:

EMPLOYMENT AND TRAINING ASSISTANCE

(RESCISSION)

Of the funds provided for "Employment and training assistance" for fiscal year 1981 in Public Law 96-536, as amended, $100,000,000 are rescinded: *Provided*, That notwithstanding any other provision of law, $696,000,000 shall be available for the Youth Employment and Training Program authorized under title IV, part A, subpart 3, of the Comprehensive Employment and Training Act: *Provided further*, That notwithstanding any other provision of law, $70,136,000 shall be available for title II, part A, section 202(e), of the Comprehensive Employment and Training Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 189 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

EMPLOYMENT AND TRAINING ASSISTANCE

(RESCISSION)

Of the funds provided for "Employment and training assistance" for fiscal year 1981 in Public Law 96-536, as amended, $82,500,000 are rescinded: *Provided*, That notwithstanding any other provision of law, $696,000,000 shall be available for the Youth Employment and Training Program authorized under title IV, part A, subpart 3, of the Comprehensive Employment and Training Act; *Provided further*, That notwithstanding any other provision of law,

$70,136,000 shall be available for title II, part A, section 202(e), of the Comprehensive Employment and Training Act.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachussets?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 197: Page 61, line 15, after "rescinded" insert ": *Provided*, That not more than $126,242,000 shall be available under this head for operation of Public Health Service hospitals and clinics".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

WASHINGTON CONVENTION CENTER ENTERPRISE FUND

For establishment of the Washington Convention Center Enterprise Fund, $382,600.

CAPITAL OUTLAY

For an additional amount for "Capital outlay", $696,000.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 428: Page 126, after line 24, insert:

SEC. 303. The Social Security system is vital to the well-being of the Nation's elderly and disabled citizens and currently provides benefits to about 35 million Americans.

The Social Security system faces serious short-term and long-term financing problems that jeopardize the payment of benefits.

It is essential that Congress act forthrightly to address the Social Security financing problem and to restore the American people's confidence in the system.

Any resolution to this problem will have come as a result of a bipartisan effort.

It is the sense of the Congress that Congress should carefully study all options in order to find the most equitable solution to insuring the fiscal integrity of the system.

That Congress shall not precipitously and unfairly reduce early retirees' benefits.

That Congress will enact reforms necessary to ensure the short-term and long-term solvency of the Social Security system but will not support reductions in benefits which exceed those necessary to achieve a financially sound system and the well being of all retired Americans.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 428 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert the following: "304".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 429: Page 126, after line 24, insert:

SEC. 304. None of the funds provided in this Act may be used to pay for employee travel involving the taking of annual leave while away from the official duty station.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 429 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 305. None of the funds in the Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in World trade at competitive prices as authorized by law.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

CONFERENCE TOTALS

Mr. WHITTEN. Mr. Speaker, under leave to revise and extend my remarks and to include other matter, I include in the RECORD at this point a table detailing the actions taken by the conference committee on the bill:

	New budget authority			
	Estimates	House	Senate	Conference
TITLE I				
CHAPTER I				
DEPARTMENT OF AGRICULTURE

Copyright Royalty Tribunal				
Salaries and expenses	22,000	14,000	14,000	14,000
Government Printing Office				
Office of Superintendent of Documents, salaries and expenses	2,562,000	1,300,000		400,000
Railroad Accounting Principles Board				
Salaries and expenses	860,000			
Total, chapter IX:				
New budget (obligational) authority	60,873,000	32,914,663	−15,679,337	−14,829,337
Appropriations	(60,873,000)	(34,176,663)	(32,978,663)	(33,378,663)
Recissions		(−1,262,000)	(−48,658,000)	(−48,208,000)
CHAPTER X				
MILITARY CONSTRUCTION				
Military construction, Army	34,400,000	28,400,000	28,400,000	28,400,000
Military construction, Navy	27,862,000	15,862,000	15,862,000	15,862,000
Military construction, Air Force	124,100,000	70,240,000	81,100,000	76,100,000
(Effect of new deferral)		(−92,000,000)	(−92,000,000)	(−92,000,000)
Military construction, Defense agencies	29,900,000	16,400,000	16,400,000	16,400,000
Military construction, Air National Guard	6,500,000	6,500,000	6,500,000	6,500,000
Total, military construction	222,762,000	137,402,000	148,262,000	143,262,000
Family housing, Defense	111,600,000	84,000,000	84,000,000	84,000,000
Total, chapter X:				
New budget (obligational) authority	334,362,000	221,402,000	232,262,000	227,262,000
(Effect of new deferral)		(−92,000,000)	(−92,000,000)	(−92,000,000)
CHAPTER XI				
DEPARTMENT OF TRANSPORTATION				
Coast Guard				
Operating expenses	95,575,000	95,575,000	95,575,000	95,575,000
Acquisition, construction, and improvements	2,000,000			
Retired pay	15,000,000	13,000,000	15,000,000	12,000,000
(By transfer)		(2,000,000)		(2,000,000)
Reserve training	1,000,000	1,000,000	1,000,000	1,000,000
Deepwater port liability fund	5,000,000	5,000,000	5,000,000	5,000,000
(Limitation on obligations)	(50,000,000)	(50,000,000)	(50,000,000)	(50,000,000)
Pollution fund	15,000,000	12,000,000	15,000,000	15,000,000
Recreational Boating Safety and Facilities: Improvement			2,000,000	
Total, Coast Guard	133,575,000	126,575,000	133,575,000	128,575,000
Federal Aviation Administration				
Facilities and equipment (effect of deferral disapproval)		(30,000,000)	(25,000,000)	(30,000,000)
Rescission			−25,000,000	
Grants-in-aid for airports (limitation on obligations)	(−250,000,000)		(−300,000,000)	(−250,000,000)
Aircraft purchase loan guarantee program: (Limitation on new loan guarantees)	(−100,000,000)	(−50,000,000)	(−100,000,000)	(−50,000,000)
Federal Highway Administration				
Highway-related safety grants (liquidation of contract authorization) (trust fund)	(12,000,000)	(12,000,000)	(12,000,000)	(12,000,000)
National Scenic and Recreational Highways (liquidation of contract authorization)	(7,000,000)	(7,000,000)	(7,000,000)	(7,000,000)
Federal-aid highways (liquidation of contract authorization) (trust fund)	(1,250,000,000)	(1,250,000,000)	(1,250,000,000)	(1,250,000,000)
Urban high density traffic program (contract authority)		33,959,000		33,959,000
Darian Gap Highway	7,500,000			
Access highways to public recreation areas on lakes			10,000,000	10,000,000
Total, Federal Highway Administration	7,500,000	33,959,000	10,000,000	43,959,000
Federal Railroad Administration				
Rail service assistance	65,000,000	60,381,000	60,381,000	60,381,000
(By transfer)	(5,000,000)			
Appropriation for debt reduction	−60,381,000	−60,381,000	−60,381,000	−60,381,000
Total, rail service assistance	4,619,000			
(Effect of deferral disapproval)		(40,000,000)	(40,000,000)	(40,000,000)
Conrail workforce reduction program		50,000,000	10,000,000	10,000,000
(By transfer)	(25,000,000)		(5,000,000)	(5,000,000)
Railroad rehabilitation and improvement funds (rescission)		−37,000,000		−1,000,000
(By transfer)	(50,000,000)		(10,000,000)	
Northeast corridor improvement program (effect of deferral disapproval)		(125,000,000)		
Grants to the National Railroad Passenger Corporation		24,900,000		
(By transfer)		(15,300,000)		(15,300,000)
Payments to the Alaska Railroad Revolving Fund	2,000,000		2,000,000	2,000,000
Settlements of railroad litigation	2,320,000,000	2,113,000,000	2,113,000,000	2,113,000,000

PROVIDING FOR THE CONSIDERATION OF H.R. 3455, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 144 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 144

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes, the first reading of the bill shall be dispensed with, and all points of order against the bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR), for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 144 is an open rule providing for the consideration of H.R. 3455, the Military Construction Authorization Act for fiscal 1982.

The rule provides for 2 hours of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services.

In order to expedite consideration of H.R. 3455, the rule provides that the bill shall be read for amendment under the 5-minute rule by titles instead of by sections. The rule also provides for one motion to recommit.

The rule further waives all points of order against the bill for failure to comply with the provisions of clause 5, rule XXI. Clause 5 of rule XXI prohibits appropriations in a legislative bill. This waiver is necessary because several sections of the bill specifically direct the use of funds from previous military construction appropriations, change the status of funds, or contain provisions which might otherwise be considered appropriations. For example, section 905 permits the use of funds appropriated for fiscal year 1981 for specified purposes, and section 904(b)(1) permits proceeds from the disposition of property to discharge certain obligations on or related to the property.

Mr. Speaker, H.R. 3455 authorizes $6.98 billion for construction activities at military facilities both in the United States and overseas. This amount is $50.35 million less than the $7.03 billion contained in the administration's amended request.

The construction proposals for the Active Forces cover approximately 773 projects at 399 major military installations within the United States and overseas. Included are 80 committee-initiated projects designed to improve workplaces, enhance housing conditions, and provide for additional quality of life facilities. The committee noted that its initiatives are consistent with its concern about the relationship between living conditions and recruitment and retention of personnel.

I am especially pleased that the committee has authorized $120.2 million for Wright-Patterson Air Force Base, including $102.3 million to add

to and alter the composite medical facility. The Medical Center at Wright-Patterson Air Force Base has been designated the Department of Defense Medical Center for region No. 6, which includes 10 States.

The Wright-Patterson Medical Center plays a key role in the Department of Defense regionalization concept of health care delivery to members of the Armed Forces and authorized beneficiaries. The Medical Center is an important element in both military and civilian medical training programs through its active affiliation with the Wright State Medical School and residency training programs in five specialties. It also represents an important community asset with the capability to respond to emergencies and natural disasters.

There have been plans to expand the Wright-Patterson Medical Center for over 4 years. I wish to commend the Armed Services Committee for the support it has provided the Medical Center for the upcoming fiscal year. It is my hope that the action taken by the committee will set in motion the realization of the impressive expansion plans for the Wright-Patterson Medical Center. Completion of this expansion will permit the Air Force Medical Center of Wright-Patterson to serve an estimated local population of 57,000 and a regional population of almost 400,000 eligible beneficiaries.

Mr. Speaker, passage of H.R. 3455 is necessary before appropriations can be provided to finance the construction activities of the military departments and defense agencies during fiscal year 1982. Therefore, I would urge my colleagues to adopt House Resolution 144 so that we may proceed to the consideration of H.R. 3455.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 144 is an open rule providing 2 hours of general debate for the consideration of the military construction authorization bill for 1982.

The rule waives all points of order that would otherwise lie against the bill for failure to comply with clause 5 of rule XXI. Clause 5 of rule XXI prohibits appropriations in a legislative bill, and the waiver provided by the Committee on Rules is necessary because at least two sections of the bill, sections 904(b)(1) and 905, do constitute appropriations.

The bill will be read for amendment under the 5-minute rule by titles instead of by sections. As the gentleman from Ohio (Mr. HALL) has described, one motion to recommit is provided for.

The Republican floor manager of H.R. 3455 will be the ranking minority member of the Subcommittee on Military Installations and Facilities, the gentleman from Virginia (Mr. TRIBLE).

Mr. Speaker, the bill made in order by this rule authorizes almost $7 billion for construction, operation, and maintenance of military facilities in the United States and abroad in 1982.

H.R. 3455 is the authorization for brick-and-mortar expenditures necessary to support deployment of new weapons systems, to continue our emphasis on European readiness, to develop staging facilities in the Mideast and southwest Asia for the Rapid Deployment Force, and to improve the quality of life for our military personnel and their families.

While it is not my purpose to discuss the provisions of the bill during debate on the rule, I do want to take a moment to mention one area of concern to the administration that was explained to us in the Committee on Rules.

This has to do with the form of congressional approval of any change President Reagan may want to make in the MX missile system recommended by the former administration.

The Committee on Armed Services is recommending, in section 305 of the bill, the use of a concurrent resolution as the vehicle for congressional approval of any decision by the President that changes current plans for the basing of the MX missile.

The Committee on Armed Services limits the obligation and expenditure of $356.5 million in funds for MX basing to the selection of a multiple protective structure basing mode: unless: First, the President determines and certifies to the Congress that an alternative basing mode is in the national interest; and second, the Congress, within a 60-day period of Presidential certification, adopts a concurrent resolution approving development of an alternative basing mode.

In the Committee on Rules we were assured by the chairman of the subcommittee that this provision is designed to give the President flexibility in selecting an alternative basing mode—a matter which is currently under review by a panel appointed by Defense Secretary Weinberger—and insures that any alternative approach must be approved by the Congress.

There was no controversy over this bill in the Committee on Rules, and we reported the rule by a voice vote.

I support the rule so that the House may proceed to consider the bill.

Mr. HALL of Ohio. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

□ 1145

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I ask for this time for the purpose of inquiring of the distinguished majority whip the program for next week.

Mr. FOLEY. Mr. Speaker, would the distinguished minority leader yield to me?

Mr. MICHEL. I will be happy to.

Mr. FOLEY. Mr. Speaker, we anticipate that there will be no further business this week. Next week, the House will meet at noon. This is District day, but there will be no bills offered.

There will be four suspensions under suspensions of the rules, as follows:

H.R. 3240, National Telecommunications and Information Administration authorization;

H.R. 3567, Export Administration authorization, fiscal years 1982 and 1983;
